| Minutes   | Paper Reference   |
|---|-------------------|
| 1 Apologies   |                   |
| Apologies were received from Mr Robin Russell.  |                   |
| 2 Declaration of interests  |                   |
| There were no declarations of interest.   |                   |
| 3 Patient Story   |                   |
| Due to the patient being readmitted to hospital they were unable to attend to provide their story at the meeting.                             |                   |
| Action: that a second patient story via DVD be held in reserve in circumstances where the planned patient story is cancelled at short notice. | DW                |
| 4 Minutes of previous meeting – 5 <sup>th</sup> November 2015   | SWBTB (11/15) 185 |
| Resolved: the minutes of the previous meeting were agreed as an accurate record of the meeting.   |                   |

#### 5 Update on actions arising from previous meetings

Mr Lewis provided an update regarding smoking cessation by saying that in the report he had set out the 5 key points that had been agreed by the Board at its previous meeting. These were that:

- 1. All sites would be smoke free from November 2018
- 2. Smoking would only be permitted from April 2016 within designated shelters
- 3. That shelter arrangements would also apply to e-cigarettes
- 4. We would continue to support NRT, MECC and introduce a paid-time pilot slot.
- 5. Fines remedy would be trialled to seek to ensure there was both stick and carrot approaches.

This would go live from April 2016 with further development work undertaken around point five. This policy wasn't unique to this Trust but our ambition to implement it and ensure that it works is.

Ms Dutton sought clarification as to whether this regime would extend more widely to litter for example and whether the costs would be fully recovered. In response Mr Lewis made clear that the objective was not about generating income. The Board had taken a clear policy line around this being about promoting health and wellbeing. In terms of learning from other Trusts that have implemented a similar approach it was important that the proposals are implemented in a managed way that issues were not simply shifted elsewhere.

Action: that the action log be updated to ensure all actions have clear deadlines against them. DW

#### 6 Questions from members of the public

Mr Samuda opened the meeting for questions from the public.

Mr Bill Hodgetts welcomed the offer Dr Stedman had made to meet with the Healthwatch representatives in a few weeks regarding the proposals around cancer services. He thanked the Board for their support over the past 12 months, with the Chairman also thanking Healthwatch for their engagement with the Board.

#### 7 Chair's opening comments

Mr Samuda took the opportunity to highlight the success of the recent CQC rating of outstanding for the Children, Young People and Families Service and that it was a privilege to hear the feedback given at the summit when the announcement was made. Effective leadership at all levels was a key theme from the feedback. Mr Samuda offered his thanks to all of those involved in the inspection process.

He went on to say that progress had been made with the TDA with the hope that the Midland Met development could be brought to financial close over the coming weeks. He also wanted to highlight the strong turnout at the recent Members Leadership Group meeting.

# 8 Chief Executive's Report SWBTB (12/15) 189 SWBTB (12/15) 189(a)

Mr Lewis drew the Board's attention to the work that was ongoing to tackle recruitment and sickness issues across the Trust. Progress had been made in 4 of the 8 groups with sickness levels now below 4%.

Performance in October had fallen short in respect of key planned care targets, a matter that

| 3  | WBTB (01/16) 204                          |
|--|---|
| needed to be back on track in December in terms of the Trust's self-imposed six week maximum wait time. Quality and Safety Plans were currently being developed and agreed and would be brought to the Board in the new year.  |   |
| In the past week Monitor had written to all NHS Chief Executives highlighting the need to address spend on agency staff. Mr Lewis highlighted that this had been a key priority for the Trust for some time with regular reporting back through to the Workforce and OD Committee and the Board.   |   |
| Bank rates do not exceed the cap but there are agency rates which will breach the cap over the coming months especially in respect of certain groups such as A&E staff, trainee doctors and some specialist nurses. The Board always puts patient safety and quality of care at the forefront of its decision making. The Trust needed to retain flexibility in its ability to fill shifts whilst still retaining a clear focus on reducing agency costs. To that end it was proposed that the Trust delegate authority to the Chief Executive to breach the hourly cap for agency staff where there was a justified reason for doing so. Any such incidents would be reported to the Quality and Safety Committee after the event. Mr Waite stated that the national announcement would not affect existing terms and conditions. |   |
| Resolved:  |   |
| <ol> <li>That the Board delegate authority to the Chief Executive to breach the hourly rate cap for agency staff when there is a justified reason for doing so.</li> <li>That the incidents of the pay cap being exceeded are reported to the Quality and Safety Committee and then to the Board.</li> <li>Trust Risk Register</li> </ol>  | SWBTB (12/15) 190<br>SWBTB (12/15) 190(a) |
| Miss Dhami introduced the Risk Register drawing the Board's particular attention to the following:   |   |
| <ul> <li>BCG shortages remain on the risk register as a national risk. Maternity services are managing the backlog of vaccinations as supplies of the vaccines become available.</li> <li>The oncology risks highlighted on the register will be addressed as part of the Cancer Services project.</li> </ul>  |   |
| <ul> <li>In terms of trauma risk the trauma operating table takes three months to build but this risk should be mitigated by February 2016. In terms of assurances in terms of the equipment replacement programme this would be presented to the Audit and Risk Committee in January 2016.</li> </ul>   |   |
| Mr Lewis raised risk 327 (reduced ability to provide an Interventional Radiology service as a result of difficulties in recruiting Interventional Radiology consultants) stating that there may be opportunities through the Black Country Alliance but that if progress had not been made by March 2016 then it may be a matter that the Board would need to return to.   |   |
| 9.1 Junior doctor (in training) Industrial Action  | SWBTB (12/15) 191<br>SWBTB (12/15) 191(a) |
| Ms Barlow introduced the item, thanking the clinicians and other support in planning for the proposed strike action. The planned action had since been postponed until January. Comprehensive contingency plans had been developed and were in place.  |   |
| The Trust had made 135 cancellations on the day of the proposed strike, many of which had been rebooked. It was stressed that 135 is a small percentage of the thousands of admissions the Trust receives every day. This decision was taken on the basis of providing patients with   |   |

certainty around their care and patient safety.

Mr Kang asked whether other Trusts had gambled on the strikes not taking place and hence did not cancel bookings. Ms Barlow responded by saying that some cancelled on the day with some other reprofiling work to a different day on the same week. One of the potential lessons is around the effective use of technology in terms of communicating with patients about their care through the use of mobile technology.

Ms Barlow also highlighted that there had been a B Braun strike, a company which provided the Trust's sterile supplies. This involved changing operating lists around but services were still maintained. Overall there was no heightened effect on A&E on the Tuesday but there was some increased activity on the Monday.

#### **10 Integrated Performance Report**

SWBTB (12/15) 192 SWBTB (12/15) 192(a)

Mr Lewis introduced the report highlighting that staffing, mortality and readmissions were all substantive items elsewhere on the Board agenda.

In terms of matters to pick out from the at a glance summary at the start of the report these included:

- There was no mixed sex accommodation breaches reported during October.
- The Trust's performance against the 4 hour ED wait target was 94.2% during October compared to 92%
- There were 9 urgent cancellations during October.

Urgent care challenge 3 would provide a focus on readmissions and access and discharge planning. Recent meeting with Social Care and CCGs had been positive with ADAPT and McCarthy ward providing some positive steps in supporting effective discharge plans. Mr Lewis stated that he was meeting with the Chief Executive of Birmingham City Council which would be a further opportunity to discuss ongoing partnership working. Mr Lewis expressed concern that intermediate care arrangements had still not been resolved with the CCG from last year and that a clear position needed to be confirmed by 19 December 2015. There remained some local issues around intermediate care with the impact of the Living wage and Sandwell Council being an outlier in terms of care workers pay.

In terms of Referral to Treatment the national contract conditions changed in October. In terms of the November figures then the total waiting lists reduced by 3% with the backlog reducing by 7%. Significant effort was going in to planned care at the moment.

There was a predicted in month failure in cancer targets for October but with this due to recover from November. There was currently work underway to formalise the appointment of a lead cancer nurse through internal appointment. Progress around cancer targets would be subject of further discussion by the Board towards the end of quarter 4.

In terms of learning disabilities progress was being made around the kite mark. There was a CCG funded post currently out to recruitment. The Board asked for a progress update against the 5 Trust commitments in terms of learning disability be presented to the January 2016 Board meeting.

Mr Lewis sought assurances as to when we would reach Trust compliance in regard to planned care. Ms Barlow responded by saying that the Trust would be compliant by January. The partial booking system went live in mid-November and was working well.

In terms of cancelled operations then these were an area of focus with cancellations the highest for over a year. Of the 9 urgent cancellations 8 were deemed avoidable and were marginally over the 24 hour period for rebooking. The Executive lead was receiving daily reports to monitor cancellations.

Work was underway to sit down with clinicians and support given to groups which have higher cancellation rates.

In response to an issue raised around the junior doctors' bank it was agreed that a paper be brought to the next meeting providing an overview of the management arrangements for junior doctors.

Mr Lewis challenged the validity of the vacancy data presented in the report. The Trust could not have 780 vacancies as stated. These 780 were vacancy positions logged on the system with many clearly not having been deleted off. The data needed to be cleansed by the end of January to prevent these figures being used as a basis for business planning and being pulled through to the annual plan assumptions for next year. Ms Barlow stressed the need for a monthly reconciliation with part of the quality assurance piece to reduce the scale of managed vacancies. Other issues highlighted were that fractured neck of femur performance had achieved 59% which was a deteriorating position and that complaints per 1,000 episodes of care had increased with the need to determine whether this was in reality more complaints or a coding issue.

#### **Actions:**

- That a paper be brought to the next meeting providing an overview of the management of doctors in training.
- That a report on the Trust commitments regarding Learning Disabilities be brought to the January meeting.
- That there is a focused discussion as part of the IPR regarding cancer targets towards the end of quarter 4.

#### **10.1 Mortality Update**

SWBTB (12/15) 193 SWBTB (12/15) 193(a)

Dr Stedman introduced the paper highlighting that there were three core indicators the Trust used in regard to mortality rates. These were the Risk Adjusted Mortality Index (RAMI), Summary Hospital-Level Mortality Index (SHMI) and Hospital Standardised Mortality Ratio (HSMR). Over the previous 12 months there had been a steady increase in HSMR and RAMI relative to peers. Some of this may be down to changes in coding practice relating to palliative care. Overall the Trust's rates have remained well within standard ratio parameters.

Mr Stedman went on to say that there were differences between the City and Sandwell sites with Sandwell having a profile of older and frailer patient demographics compared to City. He went on to stress that 80% of deaths of expected and unavoidable. Of 1,600 deaths per year a very small number of these may have been preventable in some form. Coding was also not an exact science and hence some explanations may be down to coding practice. It was agreed that mortality would be a topic for discussion at the next Board Development session.

#### **Actions:**

That mortality is added to the agenda for the next Board development session.

| 11.1 Ten out of Ten Safety Standards   | SWBTB (12/15) 194                         |
|--|---|
|  | SWBTB (12/15) 194(a)                      |
| Mr Ovington provided an overview of progress against the 10/10 safety standards which had been a focus of work for some time. Work has been ongoing to ensure consistent application of the standards across the Trust with patients being assessed against the standards within the first 24 hours of their hospital stay.  |   |
| Mr Samuda challenged where responsibility sat in terms of these standards being applied on each and every occasions and whether patients were aware of these standards and their rights to challenge if they felt they were not being met.   |   |
| Mr Ovington responded by saying that information was available at the bedside but that feedback from nurses was that patients or their relatives didn't always read the information provided. In terms of ownership then this sat with everybody within the multi-disciplinary team and needed to be implemented consistently.   |   |
| Miss Dhami said that the mock inspections had highlighted areas of good practice but that there was inconsistent application of the standards elsewhere.   |   |
| Ms Barlow stated that the focus areas were those key entry points into the Trust such as AMU's and elective in patients. The standards reflect the conversations we should naturally be having with patients during their first 24 hours of care.  |   |
| Mr Lewis challenged whether the issues were a matter of us asking people to change practice or record what they did in a different way and that some of this confusion persists in some parts of the Trust. What appears to be missing is the element of compulsion in respect of applying these standards and the need for ward leaders to apply these standards consistently for each and every  |   |
| new patient. There needed to be clear leadership at ward level around these standards.   |   |
|  | SWBTB (12/15) 195<br>SWRTR (12/15) 195(a) |
| new patient. There needed to be clear leadership at ward level around these standards.   | SWBTB (12/15) 195<br>SWBTB (12/15) 195(a) |
| new patient. There needed to be clear leadership at ward level around these standards.  11.2 Readmissions – Board Assurance Framework Update  Ms Barlow introduced the report on readmissions highlighting the improvements that had been made in this area with emergency readmission rates within 30 days of discharge having reduced from 9.1% in July to 7.7% in September. The readmissions focus week had provided an opportunity to promote awareness of the LACE tool which is a predictor tool for patients at risk of readmission. The week used a range of mechanisms including daily communications, the tracking of key performance data and multi professional learning. These activities were however   |   |
| new patient. There needed to be clear leadership at ward level around these standards.  11.2 Readmissions – Board Assurance Framework Update  Ms Barlow introduced the report on readmissions highlighting the improvements that had been made in this area with emergency readmission rates within 30 days of discharge having reduced from 9.1% in July to 7.7% in September. The readmissions focus week had provided an opportunity to promote awareness of the LACE tool which is a predictor tool for patients at risk of readmission. The week used a range of mechanisms including daily communications, the tracking of key performance data and multi professional learning. These activities were however resource intensive.  Mr Samuda challenged whether we were an outlier in comparison with others in the Black County Alliance. Ms Barlow responded by saying that as a Trust we were being proactive in terms of introducing virtual comprehensive discharge care in the community, changing patient pathways and working with partners such as Social Care and GPs. As a Trust we had made |   |

#### 12. CQC Improvement Plan Update

SWBTB (12/15) 196 SWBTB (12/15) 196(a)

Miss Dhami introduced the report stating that following on from previous discussions at the Board the report provided an update on the delivery of the CQC Improvement Plan and how the in house inspection process had been used to test progress against the plan. It was not the intention to sign off the improvement plan until the Board were satisfied that there was firm assurance across the Trust.

In terms of the in house inspections then these evidenced overwhelming feedback that patients and carers felt that the organisation was caring and that care was good or outstanding. In terms of areas for improvement then headline issues included care plans not consistently being signed off by the patient or relation or not completed fully. There remained improvements that needed to be made around some of the basics.

As a Board there was an opportunity to discuss how else it would be assured of progress across the Trust on a consistent basis. The inspections had developed a high level of enthusiasm amongst those that took part and has highlighted a lot of good practice but there remains more to do to ensure consistency across every area.

Ms Barlow reiterated the "buzz" that had been created from the process and the opportunities it provide for visibility for the leadership team. It was important for the programme to triangulate with other inspection regimes.

Mr Lewis stated that his experience in undertaking an inspection highlighted that staff knew who to escalate issues to but that in terms of responses to some questions he received slight variations in answers dependant on the person he asked. He felt that this perhaps needed to be reflected back in terms of induction processes at a team level.

Miss Dhami stated that the results of the mock inspections would be reported back to the Clinical Leadership Executive for them to consider any key issues arising from the feedback.

#### 13. Safe nurse staffing

SWBTB (12/15) 197 SWBTB (12/15) 197(a)

Mr Ovington introduced the report stating that the Trust had not made an October national submission in respect of safe nursing data. NHS England and the TDA had been made aware of the non-submission.

This was due to a lack of confidence in the data as it was presented through the system. Daily checks were occurring with a paper system in place to more accurately collate ward nursing levels. Whilst the paper system was time consuming invariably it was likely to result in less time spent than in validating the electronic records.

Mr Samuda sought clarity on whether this was simply an IT solution issue. Mr Ovington responded by saying that there were a combination of issues that led to a lack of confidence in the data. In terms of the electronic system it was over 15 years old and had not been developed in a way as to be able to pull off management reports. There were additions to the system in terms of e-rostering and bank modules but it was proposed that the paper based system would remain until any electronic solution had been thoroughly tested and was proven to work.

In terms of who undertook the manual checking then this was the responsibility of the senior ward nurse and matron. This was time and resource intensive but was the key means of ensuring the data was accurate.

SWBTB (01/16) 204 Elaine Newell presented the second part of the paper with the focus on staffing levels in midwifery. There had been a significant investment in maternity services and staffing during the last 6 years. This investment had been recognised through CQC and other review processes. There remained difficulties around recruitment and high sickness absence rates. A lot of work was going in to making the service attractive to potential new midwives. Birthrate plus is the recognised model for co-ordinating optimal staffing levels. The application of this standard was however difficult, given the challenges of recruiting staff and affordability. The report sets out the staffing levels within the Trust against this standard based on professional judgement of the senior midwifery team. There were effective and robust escalation plans in place. SWBTB (12/15) 198 14. Financial performance – PO7 October 2015 SWBTB (12/15) 198(a) Mr Waite introduced the financial report reminding the Board of the focus that had been given to the issue at the previous two Board Informal meetings. In terms of progress there had been a modest improvement in the financial position by £400, 000. This improvement whilst welcome was significantly less than what was required if the Trust was to exit the year on plan. There was a clear message being shared with the organisation that there must be a continued focus on planned care, sickness absence, pay and CIP plan delivery. In terms of achieving the £3.8 million target then this remained feasible at this point in time but there were clear risks and a significant improvement in step rate was still required. Mr Samuda challenged whether the measures that had been agreed were biting and whether there was sufficient traction in terms of improvement in run rate. Mr Lewis stated that later in the agenda there would be a discussion around the workforce plan and the fact that the Trust was not yet seeing the turnaround in the pay bill that was needed to meet our year-end target. At the January meeting the Board would need to have a frank conversation about deliverability of the current plan. He said that it was clear that the effort that had been put in to date had not shifted the needle in terms of filling vacancies, addressing sickness absence and addressing rostering issues. Mr Waite highlighted that to reach year end there needed to be an improvement equivalent to £2 million per month. Ms Dutton questioned whether there had been any changes in control mechanisms around agency staff that could have led to the still high use of agency staff. Mr Lewis stated that Mr Ovington had taken the role of personally signing off requests for agency cover which had provided some robustness to the process and that it would be worthwhile reintroducing that rigour. 15. The Contribution of Volunteers to SWBH SWBTB (12/15) 199 SWBTB (12/15) 199(a) Mr Ovington introduced the report highlighting the importance the Trust places on volunteers and the support they give. A concerted recruitment campaign had resulted in 75 people joining the Trust's volunteer service by the end of November 2015. The report prompted discussion around key milestones for 2016 including promoting the value of volunteering and the benefits of giving back to the community and the ongoing partnership between staff and volunteers in delivering against the values of the Trust. Mr Ovington highlighted that the ambition was to have a total of 460 volunteers in the Trust with support provided 7 days a week.

| 16. Annual Plan Delivery Report 2015/16 –Q2 Update  | SWBTB (12/15) 200<br>SWBTB (12/15) 200(a) |
|---|---|
| Mr Lewis introduced the report stating that the report in front of the Board presented the quarter 2 update against the 30 priority objectives. In terms of the priorities listed as red then these were clearly set out in the report. The Board should however give equal focus to the effort needed to shift the ambers to green and the impact this would have on delivering against the Trust's key objectives.  |   |
| Ms Barlow highlighted the safe discharge priority and the fact that this was a significant piece of work with capacity needed to move this on including a benchmarking piece of where we are now. She also highlighted that in terms of discharge there were a group of wards that were performing consistently well but that there was a need for a stronger grip from the 4 medical wards at Sandwell for improvements to be made.  |   |
| Mr Lewis asked that a report be brought back to the March 2016 meeting in respect of progress against priority 13-ensure that we improve the ability of patients to die in a location of their choosing, including their own home.  |   |
| Action: that priority 13 (improving the ability of patients to die in a location of their choosing) is added to the action tracker with a report back to the Board in March 2016.   |   |
| 17. Sandwell Treatment Centre   | SWBTB (12/15) 201<br>SWBTB (12/15) 201(a) |
| In preparation of the financial close of Midland Met. 5 pre financial close issues were identified for which assurance was needed. One of these was the Sandwell Treatment Centre and in particular:  |   |
| <ul> <li>Is there sufficient space available to accommodate the (clinical and non-clinical services/ departments) to be retained on or transferred to the STC?</li> <li>Is the capital investment required to develop the STC available and affordable in line with the Trusts 2016020 LTFM financial plans and programmes?</li> <li>The need for a programme which captures the individual projects to be aligned to the master programme to enable the STC to be operational by July 2019.</li> </ul> |   |
| In terms of the answer to the first question Mr Kenny stated that there was sufficient space to accommodate the services that were to be retained. In terms of funding then this was within the LTFM but is predicated on other factors falling into place.   |   |
| Miss Dhami sought clarity over the phasing of the moves and the STC becoming operational in July 2019. Mr Kenny responded by stating that access to the wards is needed first and this can't be achieved until those departments had moved to Midland Met. Mr Lewis made clear that a summer 2019 opening was significantly earlier than the original proposals which saw the Sandwell changes being completed in 2020.   |   |
| Ms Dutton sought assurances that the development would be flexible enough to manage any developments that may occur within the Black Country Alliance. Mr Kenny responded by saying that flexibility has been built into the scheme with 3 wards remaining vacant that could be used flexibly should requirements demand. Mr Gill received assurances that there would be adequate research space.  |   |
| It was confirmed that the urgent care centre would open on 15 October 2019 with the transition from A&E occurring the night before.   |   |

| In terms of the location of pathology services it was made clear that they would be located in the lower ground floor.  |   |
|---|---|
| Mr Lewis drew the link with the capital figures with £19 million being invested from 2016-19 including pathology services. This includes the Education Centre development and equipment.  |   |
| Resolved: that the Board are content with the progress that is being made on the STC to authorise progress on the wider financial close of the Midland Met project.   |   |
| 18. 100,000 Genome Project: Update  | SWBTB (12/15) 202<br>SWBTB (12/15) 202(a) |
| Dr Stedman provided a brief overview of the 100,000 Genome Project of which the Trust is a phase 1 partner in the West Midlands Centre of the project. The project was cutting edge and sees genetic medicine coming of age. The project would look to unpack the clinical meaning for a vast information base that is the genomes of 100,000 volunteers. |   |
| Mr Lewis stated that they were currently working through the detail of the contract arrangements with the Queen Elizabeth Hospital to ensure there was effective sharing of financial risk and rewards.   |   |
| Updates from Board Committees   |   |
| 19 Minutes of the Configuration Committee held on the 17 November 2015  | SWBCC (11/15) 079                         |

| Minutes  | Paper<br>Reference   |  |  |  |  |
|--|----------------------|--|--|--|--|
| 1. Apologies for absence:  |                      |  |  |  |  |
| Apologies for absence were received from Mr Mike Hoare and Mr Tony Waite   |                      |  |  |  |  |
| 2. Minutes of the previous meeting held on 30 October 2015   | SWBQS (11/15)<br>109 |  |  |  |  |
| The minutes of the meeting held on the 30 October 2015 were agreed as a true and accurate record of the meeting.   |                      |  |  |  |  |
| 3. Matters and actions arising from previous meetings  |                      |  |  |  |  |
| The action log was noted.  |                      |  |  |  |  |
| 4. Integrated Performance Report   | SWBQS (11/15)<br>110 |  |  |  |  |
| Ms Barlow introduced the Integrated Performance Report highlighting the work that had been undertaken around the kite marks. Ms Dutton welcomed the detail and openness of the report. She stressed the importance of being transparent where there were red indicators so long as clear action was highlighted as being taken to mitigate performance that was off track. |                      |  |  |  |  |
| Mr Samuda sought assurances that the culture of accurate reporting was fully embedded. Ms Barlow highlighted the recent discussions undertaken at the Board in regard to data quality  |                      |  |  |  |  |

and that whilst there was always more to do there had been quite a sea change in culture with a real focus on both data quality and timely reporting.

Mr Ovington highlighted that there had been 1 case of MRSA Bacteraemia in October. This had been the subject of a root cause analysis and the patient had not been treated with any invasive devises. Other performance issues included:

- the reported number of avoidable pressure sores was in fact 5 according to the performance indicator definition.
- 7 serious incidents had been reported in October (including fall injuries)
- Sickness absence overall remained above target but improving with 4 groups now reporting sickness absence below 4%.

Ms Dutton sought assurances around progress in terms of staff vacancies. Mr Ovington responded by saying that the figures were encouraging in terms of new starters, particularly in emergency care. Community midwife recruitment remained a risk but this was a national recruitment issue.

Ms Dutton went on to challenge progress in respect of cancer care waiting times. Ms Barlow responded by saying that the local cancer action team had been re-launched and that she was currently scoping a role for a lead nurse in this area to progress ongoing improvements. Dr Stedman went on to say that the cancer task force had been running for around 9 months and that some progress had been made but that more progress was still needed. Ms Barlow stressed the need for strengthened internal governance in this area and that there may be potential opportunities through the Black Country Alliance.

Ms Barlow stated that readmissions were at 7.7% for the month. There will be a fuller report going to the Trust Board which identified data quality issues which may account for up to 0.7% of the difference. Urgent Care Challenge 3 would provide a focus around readmissions.

Dr Stedman stated that in respect of HSMR there had been a small increase to 18 (compared to 17.4). A more detailed discussion would be prompted at the Trust Board and a review had been undertaken which flagged up some potential issues around palliative care coding.

#### **5. Safe Staffing Update**

Mr Ovington introduced the report highlighting that it would be the subject of wider debate at the Board meeting the following week. Mr Ovington informed the Board that the Trust had not made its monthly Unify submission given the concerns around data quality. A daily manual checking system had been introduced to provide assurances. The Board paper would provide more specific detail. The manual collection of data would continue until such a time as the trust was satisfied that the e-rostering system was accurate and consistent. Currently the manual data collections were providing stronger assurances than the electronic system.

Miss Dhami asked whether we were using the system to its full capacity and whether any of the other trusts in the BCA were having similar issues. Mr Ovington responded by saying that none of the other BCA trusts were using this exact same system. He went on to say that a bank module could be added but that there were still issues with it being able to pull off effective management reports.

| 6. CQC Improvement Plan Update   | SWBQS (11/15)<br>111 |
|--|----------------------|
| Miss Dhami introduced the CQC Improvement Plan update saying the in house inspections had been successful and had included positive engagement from the CCG and MLG members. The checklists were currently being analysed and good practice recognised. Whilst there was work to do to analyse all of the checklists there were issues arising around some of the basics being embedded consistently across the trust and the visibility of the Executive team. There was a clear message however that staff were seen as caring. More work was needed before the Board could satisfy itself in terms of signing off all the CQC recommendations.  |                      |
| The process had generated a real positive buzz and the inspection teams were received positively by staff. The staff that took the opportunity to be inspectors also gave positive feedback as to the benefits of being involved in the process.   |                      |
| The recent outstanding rating had been communicated to all staff. The committee wished to thank all those that were involved in the inspection. The Quality Improvement Half Days would be utilised to feed back in terms of thanking staff and on learning that had a wider application across the Trust.   |                      |
| 7. Annual Priorities and Board Assurance Framework   | SWBQS (11/15)<br>112 |
| Ms Barlow introduced the report highlighting action that was being undertaken in respect of community caseload management, national waiting times, discharge rates and respiratory medicine.   |                      |
| In terms of community caseload management progress was on track. The Single Point of Access and triage model had been reviewed with smart scheduling and 7 day services. The team were working with IT to enable systems to be linked and care to be scheduled in the community.   |                      |
| In terms of national waiting times progress was being made in reducing waiting list size and the numbers of patients waiting over 18 weeks. The waiting list time had increased over the summer but the backlog was now reducing. Significant work was going on around planned care but the risk rating would be maintained for another month. Backlog clearance was the subject of weekly monitoring.   |                      |
| In respect of discharge rates and DTOCs there is constructive dialogue with Birmingham City Council and they are engaged in the ADAPT workshop in the coming week. There is a strong focus on discharge bundles and ward leadership to deliver ongoing improvements. Urgent Care Challenge 3 would be taking place at the start of December and would have a focus on ADAPT and ward clinical leadership. Ms Dutton challenged whether more beds needed to be made available. Ms Barlow responded by saying that there was a comprehensive plan in place including providing capacity at Rowley and a joint health and social care ward at Sheldon. The conversation would need to shift to a broader care home strategy, working with the Council, to develop a 5-10 year strategy. |                      |
| In terms of respiratory medicine. A new pathway for Chronic Obstructive Pulmonary Disease would be launched in December with a focus on care at home.  |                      |
| 8. SAU move progress report  | SWBQS (11/15)<br>113 |
| Michelle Harris attended to speak to the committee about the impact of the SAU move. She   |                      |

stated that in the move there was a clear focus on improving patient flow and optimising patient stays. The new pathways provided more timely access to different services and professional support.

The 12 hour model of care had provided a clear opportunity to build positive working relations across professions, for example the ultrasound team. The team was also building a more constructive relationship with local GPs to enable the more effective signposting of patients. The SAU meetings were continuing following the transition as they were seen as an effective means of discussing patient pathways.

Ms Dutton asked about feedback from staff following the move. Ms Harris stated that staff had felt supported during the changes and had found the transition quite enjoyable. The patient centric approach, light and spacious environment and improved access to scanning facilities had all proven beneficial.

Ms Barlow stressed the importance of bringing specialties together and effective relationship building to prevent any potential friction. Clinical meetings were for example well attended and scan responses were being received within 1 hour. There had been extensive negotiations with the Ambulance Service about escalations of care and there were direct conversations taking place with GPs as they issued referrals. The team was taking a very proactive, solution focussed approach.

Ms Dutton asked whether there were any patient/ carer feedback coming through. Ms Harris stated that no negative feedback was being escalated through PALs. She said there was a strong team in place and new agile working areas provided a better environment for junior doctors.

Mr Ovington said that he had been to the unit a number of times and stated that the environment had felt positive for both patients and staff. Dr Stedman also praised the engagement with doctors and surgeons giving them assurances as to the benefits of the new environment. Ms Barlow stated that there would be a full review of the move after 6 months.

#### 9. Update on industrial action and impact on safety

Ms Barlow introduced the item stating that the first one day junior doctor strike was due on Tuesday with a further 2 days of action planned for the 15 and 16 December. Contingency plans were in place with 5 doctors in place across each A&E. Should the strike go ahead then cancellations would be made 48 hours in advance. The financial and performance impacts would be monitored and reported to the Board.

#### 10. Patient story for the Board

A 13 year old boy would be attending with his mother to present his experiences of receiving treatment at the Trust.

#### 11. Serious Incident Report

SWBQS (11/15) 114

The report was noted

## 12. Clinical audit forward plan: monitoring report

SWBQS (11/15) 115

| The report was noted   |        |
|--|--------|
| 13. Matters of topical or national media interest  | Verbal |
| Ms Dutton asked if the changes to nursing loans rather than bursaries were likely to have an impact on training and recruitment. Mr Ovington said that this brought nursing into line with other university students.  |        |
| <b>14. Meeting effectiveness:</b> The Committee agreed the effectiveness of the meeting was positive.  |        |
| 15. Matters to raise to the Board and Audit & Risk Management Committee None   | Verbal |
| 16. Any other business   | Verbal |
| Ms Dutton sought assurances around still birth rates at weekends following national media coverage of the issue. Dr Stedman gave an assurance that the labour ward was appropriately staffed 7 days a week. The figures were in part impacted by the choice of Tuesday as the index day which was the quietest day of the week. The figures were not out of kilter with other statistical comparisons. |        |
| 17. Details of the next meeting  | Verbal |
| It was agreed that the meeting scheduled for the 18 December would be cancelled.   |        |

| Minutes   | Paper Reference     |
|---|---------------------|
| 1 Apologies for absence   | Verbal              |
| There were no apologies for absence.  |                     |
| 2 Workforce Transformation 2016-2018  | SWBTWOD (12/15) 019 |
| Mr Kang opened the meeting by stating that there had been extensive discussion at Board and across the committees in respect of MMH with the Board continuing to seek assurances around the management of the Workforce Transformation project and the mitigation of risks. As a Trust we needed to assure ourselves of the ability to deliver the scale of transformation that is envisaged and satisfy ourselves that it is possible to remove £34 million in pay costs during 2016-18.   |                     |
| Mrs Goodby introduced the paper that had been circulated to the committee in advance of the meeting which set out the Workforce Transformation Programme from April 2016 – March 2018. The Long Term Financial Model (LTFM) and Long Term Workforce Model (LTWM) that underpin the MMH business case require £34 million in pay bill savings. These are broken down into circa £23 million from reductions in the number of staff and a further circa £11 million from additional payments. |                     |

In putting this transformation plan together a lot had been learnt from phases 1 and 2 of the Safe and Sound Programme. In particular it was essential to ensure genuine changes in workflow and that such changes are robustly applied. If that did not happen effectively then the removal of posts would not result in genuine transformation of productivity and ultimately ongoing enhancements in the quality of care.

Mr Kang challenged the buy in to the need for change from the bottom up as well as the top down. For this to succeed it needed everybody to fully understand what the Trust was trying to achieve and their role in supporting this to happen. He queried then the disparity between the 800 figure that emerged from the executive led work and the circa 300 posts that had been identified from the bottom up proposals and the robustness of the 646 total that was included in the papers.

Mrs Goodby gave an assurance that there had been a challenge back in terms of matching capacity and that the assumptions from both the top down and bottom up were both ambitious and realistic. A twin track approach had been taken in terms of activity with a clinical group workstream and an executive led workstream.

Ms Barlow stressed that Groups had been involved throughout the process and that there was buy in from staff. Some of the executive challenge back was in terms of encouraging people to see the art of the possible and look to innovative means of delivering high quality services. A little more stretch was possible in some areas but there was good evidence of engagement.

Mr Kang sought assurances that the transformation would be beyond staff numbers and result in real changes to clinical practice.

Mr Ovington reiterated that this wasn't about simply cutting staff to reach a short term financial goal but rather a wholesale transformation of how the Trust delivers quality care to patients. Things will be done differently with teams located in a different place and working together in a different way.

Mr Lewis returned to the report and sought explicit clarification on the 646 W.T.E. posts that had been identified. Mrs Goodby responded by saying that the 646 WTE figure and £11.7 million in additional payments had been reached following a synthesis of proposals to ensure that duplication had been removed. Mr Lewis was relaxed in terms of the discrepancies between the top down and bottom up figures, given the work that had taken place to ensure that there was no duplication, but that the committee and wider Board needed certainty that these figures were now realistic and achievable.

Mr Cook referred the committee to the scheme breakdown in respect of Emergency Care, as an example of how some of the figures had been reached. With reductions in readmittance, the closure of 4 wards, vacancy management and other initiatives it had been determined that it would be realistic to alter staffing levels by the rate indicated.

Mr Lewis wanted firm assurance around the terminology of the loss of 4 wards. He challenged whether this was in fact the case as it seemed a bigger cut than was accounted for through the Midland Met.

Ms Barlow responded by saying that by 2018 there would be 676 acute beds on par with what we had planned for. Mr Cook stated that the figure wasn't in terms of complete loss of posts as some staff would be redeployed into community settings. To clarify the point Mr Lewis stated that in practice it appeared to be closer to a 2 ward reduction than a 4

ward reduction as stated in the paper. He used an example of a member of staff in medicine who would in future be working in a community setting rather than actually losing their job.

Mrs Goodby highlighted that some people may choose to resign rather than make the transition to a community setting. Mr Lewis stated that as a Trust we would support people through the transition. The committee did however need to be clear that because of the demographic of the staff population then some staff may be at an age where they choose to leave. That would however be their choice.

Mr Kang asked whether as part of the organisational design piece it was clear who would transition over into new roles, who would leave and not be replaced and who would leave and need to be replaced?

Mrs Goodby responded by saying that work was being done to map any potential changes in skill mix needed and plan for these accordingly by training/retraining staff.

Mr Kang asked how the cash assumptions against posts had been determined and whether these were exact W.T.E. costs or averages. Mr Cook responded by saying that the calculations were based on averages relating to staff groups. Work was underway in terms of analysis of any net increases. It was important to stress that the exercise was not about creating an underpaid workforce.

Mr Lewis reaffirmed the principle that the key driver for these proposals was not about reducing or pairing back the workforce as an end in itself. The whole thrust of these changes was about developing highly skilled teams that could deliver the quality of care that the Trust was committed to delivering and aligned directly with the Trust's values. This may result in fewer senior people and less people in the middle of the organisation but the quality of care remained paramount.

Ms Barlow highlighted the length of staff reduction targets that are built into the business case with the assumption of a reduction of length of stay down to 3.17 days over 2 years due to improvements in patient pathways.

Mr Lewis moved the debate on to Medicine, Surgery and corporate functions. He asked for clarification on how many beds would be closing? Ms Barlow stated that in terms of acute beds then 144 would be lost between 2015-16 and 2019-20 in terms of headline figures (813 acute beds down to 669 acute beds) but that in terms of retained estate this would equate to 148 beds resulting in total bed capacity of 817 by 2019/ 20 compared to 897 in 2015/ 16. In terms of total theatres the reduction will be from 28 in 2015/ 16 to 24 in 2019/ 20. Mr Lewis stated that the Theatre Management Board would provide assurance that things were improving as the transition took place.

Dr Gill challenged the impact changes may have on specialist training and support using the example of anaesthetists and whether the new model would retain the capacity for effective training. An assurance was given by Ms Barlow that rotas currently were based on generalist provision and that in discussions to date professionals were not arguing a case against the proposals. Mr Lewis made clear that the Trust wouldn't lose trainees for financial reasons, that there would be non-training lists and that none of the proposals would result in a reduction in trainees.

Mr Kang returned to the risk of double counting and whether the committee could be assured that the figures had been cleansed to ensure there was no double counting in the figures presented before the committee today. He used the example of A10-Medical staff and the hypothesis that clear consultant job plan mapping could reduce the number of clinical sessions and in turn release 80 medical posts.

Mrs Goodby stated that this calculation was on the basis of a 5% productivity increase. Mr Cook went on to say that the 15 W.T.E. target stated didn't relate exclusively to consultants but did also include non-consultant medics.

Mr Lewis sought to ascertain the direct impact this and other hypotheses highlighted in the paper would have on consultants. Consultants were by no mean sacrosanct but the committee needed to be clear that the aim was not to be losing consultants through this process. He went on to seek assurances around the proposed reduction in outpatient clinics. The total number of outpatient clinics was currently 420. This was set to reduce to 370 by 2017/18 with 350 shifting into MMH in 2018/19. Fewer outpatients would result in the requirement for fewer staff.

Again the committee needed to reflect on the service from the patient experience and not simply a reduction in staff numbers. Self-service options in dermatology, the developments around treatment centres and community care were all examples where we had already been making some of these changes and reducing staff whilst continuing to improve care.

Mrs Goodby drew the committee's attention to the 7 biggest impact schemes in the paper. Mr Samuda sought assurances that the changes were in alignment with EPR. He also sought assurances that 24/7 workforce planning had been effectively integrated into these proposals.

Mr Cook responded by saying that workforce mapping for 24/7 coverage had been reflected in the proposals. The implications of EPR and for example the impact on medical records staff had also been reflected in the proposals.

Mr Kang again sought assurances around the numbers of W.T.E.s listed in the proposals and an assurance that there wasn't duplication in the figures put forward and that there was clear alignment across the transformation programmes to ensure delivery.

Mr Cook responded by stating that in pulling proposals together there was a challenge around three key themes. These were:

- Fit with Trust values do any of the opportunities/ schemes conflict with the Trust's values.
- Alignment and future state including capacity fit, including MMH assumptions; service at point of care fit and alignment to modelled productivity assumptions.
- Quality and safety implications strategic assessment of quality and safety impacts

In terms of the mobilisation stages for 2016 through to August then in January we would quickly get an assessment of schemes and identify which ones we could quickly get on with and implement. These would be schemes which would release cash quickly and align

with the Trust's values and direction of travel. The team would then move on to the longer term schemes which would take longer to implement. Whilst some of these would be longer term it was made explicit that the majority of the £34 million savings must be made in the first year and indeed some of the analysis would be around how some schemes could be accelerated. Mr Lewis made clear that the Board should be thinking in terms of phases 1 and 2. Were there to be any kind of phase 3 then this would be a very small number of residual schemes and should have almost nothing in it.

Mr Cook highlighted that individual workshops would be taking place during the week commencing the 14 December to build an understanding of the opportunities that had been identified. The week commencing the 11 January further workshops would be held to map projects against value versus deliverability and agree priorities to fast track. A workshop with executives on the 12 January would be used to work through the mapping work across schemes. By the time we reached July 2016 and staff consultations then the detail needed to be to the point where it was explicit about how it affected individuals and their jobs so that people could fully understand and appreciate what it meant for them.

Mr Cook stated that workshops would be held in February to map benefits and undertake specific work around reengineering what we do and map what new processes would look like.

Mr Kang sought assurances that the Quality and Safety Committee would have the capacity to retain oversight of these changes and the impact upon quality of services. We must have absolute assurance that it is possible to remove the headcount and costs whilst maintaining safety and the quality of services. Mr Lewis responded by saying that discussions were underway to reframe the Quality and Safety Committee forward programme away from operational detail which would free up capacity for it to undertake this work. He stated the need for explicit focus across the Board Committees to ensure effective oversight of these changes.

Ms Barlow assured the committee that Groups and Directorates were accountable for their workforce. KPIs were matched to workforce changes and would be monitored through the appropriate leadership boards.

Mr Samuda sought assurances around the processes in place for recruiting into roles for which there was a national shortage of trained staff and areas which were difficult to recruit into.

Mr Lewis responded by saying that risk groups were known and represented on the Risk Register. The Board would need to assure itself of the ongoing reduction in agency spend. We must deliver against this in quarter 4 and have clear confidence in the way forward.

Mr Kang sought assurances in terms of fall back positions if schemes did not come to fruition within timescale. Mr Cook responded by saying that Groups were working up detailed options this side of Christmas around savings. This would inform the work around strategic fit and the modelling undertaken. It was imperative that the Trust was heading into next year with confidence in the schemes that would be delierved. Priortiy schemes would need to be worked up before quarter 1 2016-17.

Dr Gill wanted assurance that any potential impact of winter pressures had been factored in. Ms Barlow stressed that in terms of the modelling work then the planned bed base

and winter preparedness had been accounted for. There wasn't the view that winter preparedness would fail to the point of affecting the plans outlined today.

Mr Cook stressed the importance of the effective capacity and capability within the organisation to drive this transformation project forward. In some areas not all the capacity may be in place. One specific area is in respect of corporate capacity to the front line in making these changes. Support would be needed for leadership teams and resilience to drive the changes forward. Staff would need the space to lead the change and implement these with pace so that the relevant savings can be made.

Mr Lewis stated that the Board would need assurance that Group Leaders would have the time between January and May to effectively plan for the changes proposed. Alongside this corporate skills would be needed to support the organisation in moving forward. He wanted to see detail of pre delivery plans for the first 23-26 weeks of 2016 and for a first cut of these to be brought to the Private Board meeting in February. There were three distinct phases of implementation: 1 April 2016, 1 October 2017 and 1 April 2017. Again it was stressed that the April 2017 phase would be small.

The Board also needed to see a first draft of a communications plan. We cannot be in a position of creating bubble of optimism. This needed to be communicated in terms of what it takes to reach top quartile performance in terms of patient care consistently across every part of the Trust and the opportunities that brings. Staff would need be engaged and brought in with focus groups from across a range of staff.

Mr Kang challenged whether there were the skilled project leads in place to drive this forward. Mr Cook responded by saying that there would be the need for an injection of additional external resource at the start of the year but that this would taper off as the phasing progressed.

Mr Samuda reiterated the need to frame the conversation around patient pathways which add value to the patient experience. Where they don't then these need to change and staffing alongside it. It is not an issue of reducing staff for short term financial purpose but rather a fundamental transformation of how we deliver care to the communities of Sandwell and West Birmingham.

Mr Lewis reiterated that 180-200 roles would be coming from corporate functions. These functions would shrink considerably in a short period which is likely to be difficult. Mrs Goodby stressed the point that this was not about a simple headcount reduction exercise but a real investment in skills in the right areas that would support the Trust and its ambitions for the future.

Mr Lewis concluded by saying that during January and February the Board would need to be persuaded of the messaging that sits alongside these changes. Overall the Board should feel more assured than was the case a month ago but that these changes remains one of the most significant current challenges.

It was agreed that:

• At the January Private Board meeting it would receive details of the

| communications plan, the means by which the programmes would be tracked to ensure successful implementation and the progress being made around the proposals affecting the corporate teams.  Further information was also sought in terms of the reconciliation of beds and clarity over the consultant and doctor posts in the proposals pulling out of consultant and doctor posts. |                 |
|---|-----------------|
| Action: That the Workforce and Organisational Development Committee inform the Board that it has received further assurances that the Trust can safely remove £34 million in pay costs during 2016-18 given the evidence presented to the committee today.  |                 |
| That ongoing assurances are provided to the January Trust Board in respect of:  |                 |
| • The Comms Plan for the changes proposed including road testing the communications messages and narrative.   | Raffaela Goodby |
| <ul> <li>An outline as to the tracking mechanisms in place to measure progress and<br/>impact of these changes; and</li> </ul>  | & Simon Cook    |
| An update on the corporate directorate workstreams.   |                 |
| That the Workforce and OD Committee and Quality and Safety Committee continue to scrutinise the implementation of these proposals to ensure the skills and capacity are in place to deliver the proposals at each key phase and that quality and safety of patient care is not compromised.   |                 |
| The next meeting is to be held on 7 December 2015 at 1530h, Nurse Training Room Trust HQ  |                 |
|   |                 |

Mr. Richard Samuda

Chairman

Mr Harjinder Kang Non-Executive Director Committee Support:

Mr. Tony Waite Director of Finance and Mr Duncan Head of Corporate

Performance Whitehouse Governance Management

Ms Rachel Barlow Chief Operating Officer

| Minutes   | Paper Reference          |
|---|--------------------------|
| 1. Apologies:   | Verbal                   |
| Apologies were received from Mr. Mike Hoare and Mr Robin Russell.   |                          |
| 2. Minutes of the previous meetings – 30 October 2015   | SWBFI (11/15) 039        |
| The minutes were agreed as a true and accurate record.  |                          |
| 2.1. Matters arising and update on actions from the previous meetings   | SWBFI (11/15) 039<br>(a) |
| Mr Waite highlighted that discussions were underway on a number of fronts with his  |                          |
| counterparts in the Black Country Alliance with feedback being positive.  |                          |
| Mr Waite had received the previous day correspondence from Lord Carter's office. This   |                          |
| information included details of the 2014-15 reference costs but there was still work to be  |                          |
| done around more effectively defining clinical efficiency and in terms of model hospital  |                          |
| costs. He went on to highlight that there were as yet no clear timelines around the next stages of the Carter review.                                   |                          |
| 3. 2015-16 Financial performance and outlook  | SWBFI (11/15) 040        |
| Mr Waite introduced the report stating the importance of exiting the financial year in recurrent balance consistent with the trust's medium term plans. |                          |
| Mr Kang queried the extent to which the Chancellor's spending review statement would  |                          |
| impact on the trust's current and future positions. In response Mr Waite stated that more   |                          |
| analysis of the Chancellor's statement was needed to determine the extent to which any  |                          |

further resource would be available to frontline services. There remained some immediate challenges including the potential for junior doctor industrial action, the investment required around 7 day working and other factors such as inflation and recruitment shortages in some skilled areas.

Ms Barlow stressed the ongoing importance of a long term focus for the trust in terms of transforming the way we deliver services across the Trust not just in response to the developments around MMH.

Mr Samuda sought assurances around the negotiations in terms of ante natal services. Mr Waite replied by saying that in terms of the SLA then positive discussions were underway and was on track to be concluded prior to Christmas which would resolve matters in respect of current year charges and bills. In terms of any future agreements then there was a clear focus on pricing, risk share and the timeliness of data submissions.

He went on to highlight new risks that had emerged following the announcement of the junior doctor and B Braun strikes. Ms Barlow stressed that comprehensive continuity plans were in place and that decisions to cancel activity would not occur until 48 hours prior to the strikes commencing. In response to a query as to the financial impact of the strikes Mr Waite stated that plans were based on the optimisation of capacity to contract. Any income loss would inevitably affect the bottom line.

In regard to appendix 7 Ms Barlow highlighted that all the expedient measures had clear executive leads, milestones and deliverables against them and were subject to regular review by the Executive Team. Mr Waite stated that in terms of objective 50-selling hardware, the gains from this were limited given the costs of disposing of the equipment safely. In terms of scheme 69 then the Estates Team were currently working through the reconciliations and the effective utilisation of vacant properties.

#### 4. 2015-21 Capital Programme

SWBFI (11/15) 041

Mr Waite introduced the capital programme paper stating that the Board had received a paper at its September meeting regarding the previous years' capital programme but that this paper provided an overview of the programme going forward. One of the approval conditions for the MMH sign off was for there to be a capital programme in place. There was a small increase in the overall scale of the programme but a significant advancement in terms of timescales. This advancement was to ensure the retained estate was fit for purpose in a way that is concurrent with the MMH development. He made reference to the programme including £19 million being set aside for the Sandwell Treatment Centre including Pathology. Mr Waite stated that the Capital Programme was ambitious but realistic. The EPR programme remained largely unchanged. Other elements such as the replacement programme for medical equipment were subject to regular review.

Mr Kang sought assurances over the measures the Trust took in terms of the disposal of surplus land and who took responsibility for site clearance. Mr Waite responded by saying that the Trust would provide vacant possession for the site with any demolition and remediation work done by the developer.

In terms of the MES Mr Waite stated that following a moderation process the Trust was now down to 2 bidders with these submissions being evaluated in the new year with recommendations being brought through to the Board. The numbers included in the LTFM were on a par with the submissions received.

| In response to a query from Mr Kang in terms of the significance of the financial programme going forward Mr Waite stated that the cash position for the Trust over the next 4 years was tight and that it was imperative that CIPs were delivered to timetable.  |        |
|---|--------|
| 5. Matters to highlight to the Board and Audit & Risk Management Committee  | Verbal |
| Mr Samuda stated the need for ongoing focus on delivering against our financial plans and the important links across this committee and the Audit and Risk Committee in ensuring effective oversight of progress.   |        |
| 6. Meeting Effectiveness Feedback   |        |
| No points were raised under this item.  |        |
| 7. Any Other Business   | Verbal |
| Mr Waite provided an update on the finance team with recruitment underway around a new team structure. Over 30 staff had received training in lean methodology. In response to a question Mr Waite stressed that staff were firmly embedded in groups to ensure effective communication and a real understanding of the issues faced. Conversations with the Black Country Alliance were ongoing in terms of more effective working together. |        |
| 8. Details of the next meeting  | Verbal |
|   |        |
| It was agreed that the 18 December meeting would be cancelled but that the teleconferences would continue during this period.   |        |

# **Public Health, Community Development & Equalities Committee**

Venue: D29 Meeting Room, City Hospital 26 November 2015: 1400h-1600h Date

Members present:

Ms R Wilkin

Mr R Samuda Chairman

Dr P Gill Non-Executive Director Mr W Zaffar Non-Executive Director

Mrs R Goodby Director of Organisation

Development

Director of

Mr C Ovington **Chief Nurse** 

Communications

In attendance:

Mrs C Rickards **Trust Convenor** 

**Committee Support:** 

Mr D Whitehouse **Head of Corporate** 

Governance

| Minutes   | Paper Reference   |
|---|-------------------|
| 1. Apologies  | Verbal            |
| Apologies for absence were received from Mr Toby Lewis  |                   |
| 2. Minutes from the meeting held on 27 August 2015  | SWBPH (11/15) 035 |
| The minutes of the meeting held on the 27 August 2015 were agreed as an accurate and correct record with the exception of the reference to BMEC under item 5 of the minutes being changed to BME.   |                   |
| 3. Matters and actions arising from previous meetings   |                   |
| The Chair asked for a review of external invitees to the committee and for invites to be sent to key meetings during the course of the year.  |                   |
| 4. Volunteers-objectives by March 2017  | SWBPH (11/15) 036 |
| Mr Ovington introduced the report stating that it set out the vision for how volunteers will continue to contribute their services and can get involved and be supported with the work of the Trust. Mr Ovington highlighted that a similar report would be going to the next meeting of the Board. |                   |
| The paper set out the intention to have over 400 volunteers across the Trust with a robust recruitment process having resulted in 75 people joining by the end of November 2015. Volunteers would have a role in welcoming people at the main entrances to the hospital sites. Volunteer support    |                   |

would be available 7 days a week. Mr Ovington said it was important to be imaginative about the utilisation of volunteers across the Trust. There was a thorough checking procedure before people became volunteers with the Trust's approach being an example of good practice.

Mr Zaffar asked about opportunities to give people experiences that would support them back into work. Mr Ovington responded by saying it was one of the founding objectives of the volunteer strategy to provide opportunities to people to develop confidence and skills that would support them back into work. The work undertaken by Edna's Army and recent gardening projects were two examples of where the work and impact of volunteers had proven successful.

Mr Gill sought assurances around volunteer safety given a recent incident with a member of staff. Mr Ovington gave assurances that volunteers were treated in exactly the same way as staff when it came to personal safety as was the case in regard to personal indemnity.

Mr Samuda highlighted the opportunities for engaging the wider community in the work of the Trust. Mrs Rickards also commented that the in house approach was working well and enabled constructive working relationships between staff and volunteers.

Action: a revised paper reflecting feedback from the committee would be presented to the next meeting of the Trust Board.

#### 5. Equality and diversity

SWBPH (11/15) 037

Mr Ovington introduced the paper highlighting that to date 3 EDS2 documents had been submitted and formally assessed by the Local Interest Group. These were the Health Visiting and Family Nurse Partnership, Childrens' Therapy Services from the Women and Child Health directorate and Interventional Radiology from Imaging. A further 21 directorates had submitted documentation with 10 of these having a full evidence base.

The Local Interest Group has 6 lay members who frequently attend and then further lay members whose attendance is more sporadic. The meetings are chaired by the Deputy Chief Nurse-Workforce, Strategy and Patient Experience.

Mr Ovington went on to introduce the Equality Report which was before the committee as a draft for comment. There was a requirement for the Equality Report to be completed and approved in January. The report was focused around the 10 equality objectives agreed by the Board. Mr Ovington requested feedback on the draft report prior to it being finalised and agreed by the Board in January.

Mr Zaffar highlighted the opportunity to celebrate the importance placed

| on equality by the Trust. As a Trust we were being considerably more ambitious than some other organisations. Mr Gill highlighted the potential for drawing links through local networks with the NHS Inclusion Board and regional links to highlight the good work and ambitions we had as a trust.  Action: that the committee to provide feedback to Mr Ovington this side  |                   |
|--|-------------------|
| of Christmas on the Equality Plan prior to the next iteration being presented to the Board.  |                   |
| 6. Raising awareness of protected characteristics  | SWBPH (11/15) 038 |
| Mrs Goodby and Ms Wilkin introduced the report highlighting the limited visibility that existed of some peer groups (e.g. BME Group, LGBT Group and Disability Group). The report highlighted the range of actions that were planned to raise awareness of protected characteristics including:  |                   |
| <ul> <li>A campaign in January 2016 following on from the recent Information Governance campaign focused on the accuracy of staff data. Diversity in campaign posters etc. would also become more prominent as well as making role models more visible.</li> <li>Work would also be undertaken to implement peer support groups. Some groups already exist but not in any particularly formal way. The intention was to meet with these groups and identify what support could be provided and to assign an Executive champion.</li> <li>Signing up to Stonewall UK, signaling the commitment of the Trust.</li> </ul> |                   |
| Mrs Rickards highlighted that some groups were successful but that others would be more cautious and would need to be engaged in a sensitive way.  |                   |
| There then followed a discussion around ageing and the ageing demographic of the workforce. Ms Wilkin highlighted the intention to hold a workshop with Age Well for staff around the implications of ageing linked to a wider awareness campaign.   |                   |
| In was resolved that:  |                   |
| <ul> <li>the January 2016 campaign is supported by the committee.</li> <li>the committee support the Trust signing up to Stonewall UK.</li> <li>a report is brought back to the February meeting highlighting progress of the campaign and updating the committee on overall progress made.</li> </ul>   |                   |
| It was agreed that part of a Board Informal session would be set aside to undertake further consideration of progress against the Trust's equality objectives.   |                   |

| 7. Public health plan update  | SWBPH (11/15)<br>039 |
|---|----------------------|
| The committee received an update on progress against the Public Health Plan 2014-17. The Board had recently agreed an approach to smoking cessation and work was ongoing in respect of food, gyms and mental wellbeing.   |                      |
| The report set out progress and risk ratings against the 13 objectives in the plan. The committee went through the objectives in turn with the following comments being made:   |                      |
| <ul> <li>Objective 2 – all pregnant women to receive carbon monoxide monitoring and as required, intensive smoking cessation support. Good progress had been made with 80.1% of identified smokers being referred but the amber red rating highlighted that there was more still to be done to support pregnant women in quitting giver the risks it poses to perinatal deaths.</li> <li>Objective 3 – all community nurses delivering audited asthma advice. Good progress was being made with lots of education in place.</li> <li>Objective 4 - Trust sites being smoke free had been the subject of discussion at the previous Board meeting.</li> <li>Objective 5-reducing alcohol related admissions had not been progressed as quickly as wished in part due to staff changes but it was now being progressed at executive level and would be the focus of a forthcoming CLE meeting.</li> <li>Objective 6 - evidence that the food we serve promotes healthy choices. A focus is being put on out of hours food provision and a further launch of the Choose Green campaign.</li> <li>Objective 8 - delivering health promotion activities including nicotine replacement therapy were in place.</li> <li>Objective 9 - being recognised as a leader in workplace mental health. Support around mental health is positive with further opportunities for psychological therapy expansion being explored.</li> <li>Objective 10-the Trust recognised as a youth employer of choice. Substantive work was being undertaken around apprenticeships</li> <li>Objective 11- Trust tackles the number one priority for the local Health and Wellbeing Board by delivering outstanding services for the homeless. Mr Samuda highlighted the importance of working with 3<sup>rd</sup> sector partners on this issue.</li> <li>Objective 12-select a new hospital partner in accordance with regeneration obligations. The trust was working with local suppliers with procurement being localised where practical to do so.</li> </ul> |                      |

meeting.

#### REPORT TO THE TRUST BOARD HELD IN PUBLIC

#### Chief Executive's Report - January 2016

December saw the organisation buffeted by more than the typical seasonal winter pressures.

- We faced the dual strike issue, which the Board discussed when we last met. In the event
  the doctors' action was deferred and is now in prospect for January 14<sup>th</sup>, while a series of
  stoppages took place at the sterile services unit in Birmingham.
- In addition we experienced a morning without water for much of the City site, after a pipe failure off site. This was compounded by the provider, Severn Trent, not activating the agreed process in relation to priority hospital re-provision. Discussions on lessons learned continue and some patients care was delayed or cancelled.
- Finally, we had a major disk failure in our CDA IT system in the run-up to Christmas. Yet again this is one of our acknowledged IT risks, which we have funded a solution to, but the problem struck before we could implement the solution. We need now to press ahead with the solution, albeit that our overall infrastructure programme is behind schedule because we have consistently had an extra ward open at Sandwell.

Board members will recognise that in October we dedicated a senior manager to our business continuity position, in recognition of issues identified in my annual statement of control for 2014-15. Matthew Dodd continues with his work to make sure that we have good local plans in place when issues do arise and can respond rapidly and consistently. Simulation exercises around major incidents will take place during 2016.

Whilst we would all of perhaps wished these instances to have not taken place, credit is due to a range of senior leaders, notably Rachel, for the manner in which each has been handled in practice.

### 1. Our patients

The Trust has managed to more than halve the number of very long wait patients (6 hours+) admitted as emergencies so far this year, compared to the prior year, and years before that. This is despite a rise in overall numbers attending all three of our Emergency Departments. This is encouraging, perhaps especially in respect of mental health liaison. However, we continue to fall short of the 95% four hour standard (missing it for 8 of 9 months), and substantial bed pressures on the Sandwell site have led to the very poor days during the last month. Both admission patterns and discharge patterns are creating issues for us on different days. As with the prior three years, delivery at Sandwell maps fairly closely to bed availability, though that is not true at City. The CQC recently reported concerns elsewhere about initial ED triage, and we are confident that we meet those standards. To succeed we know that we need to:

Reduce readmission numbers and length of stay at Sandwell & West Birmingham Hospitals
 NHS Trust

• Ensure that majors is rapidly freed of admitted patients at City, allowing senior staff to focus on intermediate patients who may or may not require admission

I will update the Board orally on discussions around future oncology provision. Recruitment continues to ensure that we can provide a stable local service during 2016-2017. We need now to make much more rapid progress with e-prescribing, consistent with our desire to have standard protocols used at the heart of our current and new service. With the switch, during 2016, to a single aseptic unit at Sandwell, it will be important to have that consistency in place. Of equal importance is work to ensure that each of our MDTs works well, with a consistent membership, and multi-professional decision making. This is, after all, the reason the current service is not meeting the standards we expect.

Encouragingly, we have returned to compliance with national cancer wait time standards, and will meet, we expect, the measures for Q3. The re-launch of our cancer action team will seek to provide a broader base of action to meet that standard across all tumour groups. It is slightly too early to conclude whether action in urology on the surgical pathway at the QE and the diagnostic pathway has yet sustainably addressed this source of high volumes of delayed cases. The patients shown on the IPR beyond 104 days have been investigated and details can be provided to Board members on request. The Performance Management Committee has requested rapid improvement on the difficulties with the cardiac Rapid Access Chest Pain clinics. It is, among other changes, vital that they operate as a pan-Trust service so that patients can be seen quickly.

Most surgical specialties are making good progress towards our six week maximum wait time for clinic. There remain some issues in orthopaedics. Medical specialties, specifically dermatology and respiratory medicine, give cause for concern about achievement by March. Discharge rates, clinic profiles, and triage delay times are all factors in not accomplishing yet the consistent Trust wide delivery we aimed for last spring. Six weeks is the right standard for us, both because it gives GP referrers and patients clarity, and because our leave booking rules mean that we can confident that such a clinic will operate. The fortnightly programme board for outpatient improvement continues to focus on delivery of this metric, which requires many of the same disciplines needed to secure improved throughput and indeed to deliver partial booking without creating backlogs of unappointed review patients.

We continue to succeed with our work on turning round good quality complaint responses more rapidly. The transformation compared to 2012, 2013, or 2014 is very significant. It is apparent from the improvement inspection work that we did that there is more to do to publicise changes arising from complaints, of which there are a number, and to ensure that staff can speak confidently about those changes. This forms part of January's team brief 'hot topics', and will be something we return to as a Board in preparing for June's annual general meeting.

### 2. Our workforce

Our absolute focus on sickness rates remains. Both the corporate reviews in December and clinical Group reviews in January will focus on long term sickness management return. The Clinical Leadership Executive workforce committee will monitor all over 28-day absences to provide assurance that individuals have a clear plan to return to work. This does not move us away from our emphasis on short term sickness, but it is evident we cannot move below 3% without addressing our

100+ employee long term absence situations. For short term sickness the Q4 emphasis is on triggers to action and ensuring local managers do operate our policy sensitively but firmly. We know that written guidance on flexible working and a single reporting line work – as we have seen improvements in Q3 in 4 of 8 groups.

It is good news that our ground-breaking work on apprenticeships has led to the Trust being a finalist in the Health Education West Midlands awards early in February. We are seeking further support from the same organisation to extend our Live-Work scheme. Within the Board's papers today is a note on the Government's drive from early 2017 to extend apprenticeships among large employers, including the NHS, and within that SWBH. As the paper outlines we will have to contribute over £1m to central coffers arising from the Chancellor's spending review. The paper sets out our journey from 100 to 200 apprentices and describes the introduction from April 2016 of an opt-out scheme, as distinct from an opt-in scheme. This makes all roles liable for apprenticeships at bands 1-4. There are some requests to exclude ward service officer roles from this system, which I would invite the Board to discuss.

Initial results have been considered from the NHS' annual staff survey. Our overall results show signs of improvement compared to 2014-15. However, our sample response rate was extremely low. This reflects the competing efforts to ensure that our monthly Your Voice e-form is completed by staff. Ruth Wilkin and Raffaela Goodby are leading work to consider how we can improve further the deployment of Your Voice across all staff groups, and, as with complaints and patient feedback, make progress with raising awareness of changes made as a result. With inevitable major workforce changes again this coming summer it is timely to try and get this feedback loop working well over the coming six months. A key theme from responses, and a key theme with getting responses, is the need to improve the visibility and approachability of the 'middle management' of the organisation. A number of groups and directorates have made strides with this in the last quarter and we need to consider through the Clinical Leadership Executive how that can be further supported.

The Board agreed at the last meeting to delegate to me the approval of breaches of the agency cap. This data is reported externally now each week, and will be summarised for the quality and safety committee. As the cap tightens in coming weeks, breach volumes are likely to increase. We will start by seeking to remove all non-framework contracts. And then aim to eliminate above cap use for non-ED functions. I cannot offer a timeframe on ED until we have completed assessment of the overall staffing position across our two sites.

Preparations for industrial action remain in place in the event that the Trust is notified of action proceeding, on January 14<sup>th</sup> or thereafter.

#### 3. Our partners

The start of December saw a successful ADAPT workshop examining how the discharge bundle of good practice we have developed within the Trust was being deployed across our own wards and with partner agencies. The Trust has significant work to do to establish as routine the assessment of discharge timelines within 48 hours of admission. Beyond that, we aim to build clear information in video format for patients and their relatives about the choices they face, as we need to commence planning that process with families much sooner in someone's time with us. The advent of our discharge focused wards may be having the unintended consequence of causing routine discharge

good practice to be delayed into later in a patients' stay. During 2016 we are looking to remove at least half a day from routine stays on our sites, and having a more consistent approach will be central to making progress on this aim.

Discussions continue with Aston University around their medical school. A draft memorandum of understanding has been circulated separately to Board members to permit final operational planning and commercial discussions to be concluded. Attached at annex C is the original agreement by the Board to this proposal, for further discussion and consideration.

#### 4. Our regulators

In February we will see a major inspection of our foundation educational provision, in addition to the routine processes of specialty visits. We remain well placed to respond to this evaluation. We are however in the process of making changes both to our educational leadership, and the facilities that we operate. These move us towards the Sandwell-hub/Midland Met spoke model which we will operate from 2018. They also reflect the intent to integrate educational provision across all disciplines, retaining distinctions between professions only where that makes sense to do so.

The 2016-17 research funding provision to the West Midlands CRN is as yet undetermined. However, we have agreed at regional level how any resource is to be allocated, and a small increase in income will come to the Trust. We can consider how that contributes to research trajectory we set in spring 2015, when we undertake a review of the 3 year delivery plan at our February meeting.

In line with the discussion at the last Trust Board, I have written to the CQC setting out our thoughts on re-inspection for acute services.

As usual I attach trackers for our quality and diversity goals, together with our annual plan work. What is evident from the first is that there is a significant body of work to be completed during Q4, ranging from policies and data cleansing, through to the commencement of interest groups. I remain to be assured that we have a clear line of sight across this work and a timetabled plan for delivery and will address that within the executive before the Board meets.

Toby Lewis, Chief Executive

December 30<sup>th</sup> 2015

Annex A – top 10 annual plan commitments : December Monitoring Report

| Ref | 2015/16 Priority  | Exec  | Ops  | Current status  | RAG | Actions in Q3 and Q4   |
|-----|---|-------|------|---|-----|--|
|     |   | Lead  | Lead | <br>High Quality Care   |     |  |
| 1   | Reducing admissions by 2%*  | RB    | NR   | As the Board's papers in December show there is an initial impact from work undertaken in late Q2 and early Q3. There is real focus on this issue across sites and teams.   |     | Continue to focus on specialty wards but also seize AMU opportunities and build on hot clinic model now running in surgery.                                |
| 3   | Achieving the gains promised within our 10/10 programme*  | CO    | DT   | There is great work being undertaken and evident enthusiasm. It has yet to translate into a 100% delivery mindset.  |     | The Board needs now to direct a set of interventions to ensure that we can demonstrate ward clinical teams embracing and using this checklist.             |
| 5   | Tackling caseload management in community teams*  | RB    | FS   | As per prior Board papers work is ongoing, but a single plan of action is not yet visible.  |     | There remains, with focus, a chance to make this a green item, but a change of pace is now needed.   |
|     |   |       |      | ible & Responsive   |     |  |
| 9   | Deliver our plans for significant improvements in our Health Visiting provision so children 0-5 years and their families receive high standards of professional support at home | RB    | EN   | There is considerable improvement in delivery in many categories, albeit we fall short of the KPI specification.  |     | Continued improvement is needed to achieve the metrics specified later in Q4.  |
| 10  | Work within our agreed capacity plan for the year ahead   | RB    | AM   | The Trust is within our capacity plan but is not delivering sufficient volume of care. Reform to remove premium rate working is strong in Surgery A and WCH, less so in medicine, imaging and especially Surgery B. |     | There is some evidence of change in bookings, but it is not yet translating into productivity indices improvement nor higher overall volumes of work done. |
| 12  | Implement our Powley  | DD/AV | Care | Closer to Home  |     | Encure that the changes  |
| 12  | Implement our Rowley<br>Regis expansion plans,<br>so that by March 2016<br>we have in place our<br>Right Care Right Here<br>model on the site*                                  | RB/AK |      | Plan supported by the Board after extensive patient and staff consultation. Due to finish in next 3 months.   |     | Ensure that the changes in care models in OPD are implemented, not merely a change in physical layout. Finalise the pharmacy option.                       |
| 4-  | Constale !  | 714   |      | Use of Resources  |     | Cantinuali   |
| 17  | Create balanced financial plans for all directorates, and   | TW    | PS   | The overall Trust plan remains deliverable, with a challenge to   |     | Continued focus on our 3 areas of emphasis: CIP delivery, agency control,  |

| Ref | 2015/16 Priority  | Exec<br>Lead | Ops<br>Lead          | Current status  | RAG | Actions in Q3 and Q4  |
|-----|---|--------------|----------------------|---|-----|---|
|     | deliver Group level<br>income & expenditure<br>on a fully year basis*   |              |                      | make it deliverable recurrently. Local team compliance is poor in most cases.               |     | and activity booking.   |
|     |   |              | 21 <sup>st</sup> Cen | tury Infrastructure   |     |   |
| 21  | Agree Electronic Patient Record Outline Business Case, and initiate the procurement process, whilst completing infrastructure investment programme* | AD           | ME                   | Infrastructure project contracts let and on site. EPR running to timetable.                 |     | Meet the timescales previously agreed and see improvement from infrastructure investment in network resilience. |
| 22  | Reach financial close on<br>the Midland Met<br>Hospital*  | AK           | DL                   | We are operating to, or slightly ahead of, timetable, and advanced works are on site.       |     | Financial close and transition phase for project into commissioning stages.                                     |
|     |   | An E         | ngaged a             | & Effective Organisation  |     |   |
| 26  | Cut sickness absence<br>below 3.5% with a focus<br>on reducing days lost to<br>short term sickness*   | RG           | LB                   | Latest data shows some encouragement month on month. Four of eight groups are now below 4%. |     | We need to conclude work on long term sickness cases, including resolving those in corporate areas.             |

| The CLE education committee is overseeing analysis of training requests and training funds vs ESR protected characteristics data.   | This will be available in draft at in time for our annual declaration. This will be compared to our overall by band staff profile.   | On track   |
| The CLE equality committee and whole Board have received initial training in the duties of the Act and in the precepts of the EDS system.   | This work will be led by Raffaela Goodby, supported by the Head of Corporate Governance.   | This <u>will</u><br>happen during<br>January   |
| We would undertake an EDS2 self-<br>assessment for any single directorate<br>in the Trust. Almost all directorates<br>have submitted to post a draft for<br>review.   | It is to be reviewed in full and final form at the next meeting of the Board's PHCD&E committee in September 2015  | On track.  |
| Collect, collate and examine protected characteristics data on our workforce and, largely, on our staff: We will  | The use of outpatient kiosks (from Q3) will be our vehicle to improving patient data. Both will be compared through our Board committee against  | The start of this was planned for Dec 15 and has   |
| undertake a one off ESR data validation.  | the demographic for SWB as per the ONS.  | been delayed.  |
| Undertaking monthly characteristics of emphasis in which we host events that raise awareness of protected characteristics (PC)  |  | There is a clear schedule for the year ahead in place.                                   |
| Add into our portfolio of leadership development activities a series of structured programmes for people with PC  | Raffaela Goodby will determine how we move ahead by October 2015 with an unambiguous programme which will certainly include a specific BME leadership offer.   | Plan developed,<br>staffside<br>consulted -<br>implementation<br>date to<br>commence Q4. |
| We proposed and agreed with staff-<br>side that Harjinder Kang, as JCNC<br>independent chair, would review<br>whether our workforce policies and<br>procedures match (if implemented)<br>our ambitions and commitments. This<br>was due to occur in Q2 but will now<br>occur in Q3. | It now needs to be progressed, to conclude by December 2015. Critically we are looking to determine not simply whether our policies avoid overt discrimination, but whether they actively take steps to promote diversity.   | Method agreed, timetabling to be shared for completion by end of February 16             |
| With partners to ensure a peer group in each protecting characteristic is active [we have BMSOG and there is an emerging LGBT group]  | This will require some further discussions across the leadership, to prioritise how we create interest groups with integrity. We will work with TU colleagues and others to think through how this is best developed in time for the PHCD&E committee in September.    | Consulted with staffside colleagues & programme confirmed at PHCD&E committee (Nov).     |
| Work with senior leaders with protected characteristics for them to provide visible support within the organisation to others   | We will start by producing a pictoral representation, and data graph, of who our leaders are. We will also use the next stage of the leadership development programme to explore how issues of diversity can become a more explicit part of our leadership programmes. | Plan developed, implementation date to commence Q4.                                      |

#### Annex C

#### Excerpt from April 2014 Board approval note to the medical school dean for AMS:

We discussed the proposal that you put to us at our Board meeting on April 3rd. We are able to endorse the proposal in principle and look forward to working with you and your colleagues in coming months to confirm the arrangements. As we do it will important to ensure that:

- 1. The proposals do not detract or distract from our existing and valued relationship with the University of Birmingham. We see no reason that they should. I have written to Professor Adam to advise him of our support for your plans.
- 2. That the articles of association for the new venture should enshrine some clear agreements, and clear governance for change to those agreements, in respect of the social purpose of the venture and the partners that shall be primarily involved.
- 3. That we confirm in coming weeks that we have in place the partnership sufficient to meet the Keele curriculum, and that we can foreseeably accommodate 500 undergraduate students across the partnership.
- 4. That we reach agreement on the commercial elements of the venture. Our Board are supporting a contractual involvement, under which we would remunerate (with an expectation of a small surplus) above the costs incurred in providing this service to you.
- 5. That we actively explore a wider, complimentary partnership with Aston that might include but not be limited academic appointments between our two institutions.

|                               | TRUST BOARD                               |
|-------------------------------|---|
| DOCUMENT TITLE:               | Trust Risk Register                       |
| SPONSOR (EXECUTIVE DIRECTOR): | Kam Dhami, Director of Governance         |
| AUTHOR:                       | Mariola Smallman, Head of Risk Management |
| DATE OF MEETING:              | 7 January 2016                            |

### **EXECUTIVE SUMMARY:**

The Trust Risk Register compromises high (red) risks that have been through the validation processes at directorate / group and Executive Committee levels.

The Trust Risk Register was last reported to the Board at its December meeting and Executive Director updates are highlighted where these were provided for the meeting. There are three additional risks submitted for the Board to review and decide whether to include them on the Trust Risk Register.

#### **REPORT RECOMMENDATION:**

Accept

- RECEIVE monthly updates on progress with treatment plans from risk owners for risks on the Trust Risk Register
- **REVIEW and DECIDE** whether to include the three additional risks on the Trust Risk Register.

Approve the recommendation

**Discuss** 

### **ACTION REQUIRED** (Indicate with 'x' the purpose that applies):

The receiving body is asked to receive, consider and:

#### Comments:

# ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:

Aligned to BAF, quality and safety agenda and requirement for risk register process as part of external accreditation programmes.

### **PREVIOUS CONSIDERATION:**

Clinical Leadership Executive December 2015

# Sandwell and West Birmingham Hospitals

**Trust Risk Register** 

#### Report to the Trust Board on 7 January 2016

#### 1. EXECUTIVE SUMMARY

1.1 This report includes the Trust Risk Register and an update on the implementation of the electronic risk system.

#### 2. TRUST RISK REGISTER (TRR)

- 2.1 Clinical Group and Corporate Directorate risks were reviewed at Risk Management and Clinical Leadership Committees. There are three additional risks highlighted for escalation to The Board:
  - As a result of planned care activity being significantly below plan there is a risk that SLA income will under recover and compromise the delivery of key financial targets. This may harm the trust's reputation and compromise future investment plans. (Risk number 84)
  - As a result of significant on-going reliance on premium rate temporary staffing there is a risk that pay costs will exceed budget and compromise the delivery of key financial targets. This may harm the trust's reputation and compromise future investment plans. (Risk number 86)
  - As a result of the scale & pace of CIP development and delivery being behind plan there is a
    risk that costs will exceed budget and compromise the delivery of key financial targets. This
    may harm the Trust's reputation and compromise future investment plans. (Risk number
    164)
- 2.2 The risk related to lack of assurance of standard process and data quality approach to 18 weeks has been updated based on the findings of a review of the breaches. (**Risk number 214**)
- 2.3 If discussions with BCA about the Interventional Radiology service have not reached a conclusion by the end of March the mitigation plan will be revisited. (Risk number 327)
- 2.4 Actions to recall approximately 1400 babies affected by the national BCG shortage are progressing; as at December approximately 40% of recalls were completed. (**Risk number 332**)
- 2.5 The oncology risk related to differential and extended chemotherapy wait times between sites has been updated following successful recruitment and audit findings which provide assurances that wait times have significantly improved; 9 days on each site. Monthly monitoring of performance will continue to check that staff recruitment maintains sustainable change. (Risk number 538)
- 2.6 The Informatics risk related to the Trust's integration engine has been updated to reflect progress made with business continuity measures, successful transfer of Rhapsody V2 onto a virtual server and transition from V2 to v5 is also underway. (Risk number 755)

- 2.7 The trauma risk is anticipated to be mitigated January / February as a new trauma operating table is on order. (**Risk number 770**)
- 2.8 The risk related to no longer being able to offer Rfa or USGF has been updated to reflect progress with replacement of the Sonosite machine, which is on order for delivery by the end of January. (Risk number 775)
- 2.9 As a reminder, the options available for handling risks are:

| Terminate | Cease doing the activity likely to generate the risk   |
|-----------|--|
| Treat     | Reduce the probability or severity of the risk by putting appropriate controls in place          |
| Tolerate  | Accept the risk or tolerate the residual risk once treatments have been applied                  |
| Transfer  | Redefine the responsibility for managing the risk e.g. by contracting out a particular activity. |

#### 3. ELECTRONIC RISK SYSTEM

- 3.1 Implementation of the electronic risk system is ongoing. All risk registers provided by clinical groups and corporate directorates have been imported onto the system and implementation is well underway. It is anticipated that all directorates will fully transfer management of their risk registers onto the electronic system during quarter 4 so that the electronic system is in use Trust wide by quarter 1, 2016-17.
- 3.2 Risk register reports at various levels, including the Trust Risk Register, are available for all staff to access on the Connect Intranet System.

### 4. **RECOMMENDATION(S)**

- 4.1 The Board is recommended to:
  - RECEIVE monthly updates from Executive Directors for high (red) risks on the Trust Risk Register.
  - REVIEW and DECIDE whether to include the three additional risks on the Trust Risk Register.

Kam Dhami, Director of Governance

7 January 2015

30/12/2015

Risks that feature on the Trust Risk Register (TRR) have been escalated and reviewed by management teams through to Clinical Leadership Executive Committee and Trust Board. Trust Board takes the decision whether risks feature on the TRR including approval of requests for risks to be removed from the TRR for them to managed at the relevant Clinical Group / Corporate Directorate.

## Sandwell and West Birmingham Hospitals WHS

NHS Trust

### TRUST BOARD

| DOCUMENT TITLE:               | Line management of doctors            |
|-------------------------------|---------------------------------------|
| SPONSOR (EXECUTIVE DIRECTOR): | Rachel Barlow Chief Operating Officer |
| AUTHOR:                       | Rachel Barlow Chief Operating Officer |
| DATE OF MEETING:              | 7 <sup>TH</sup> January 2016          |

### **EXECUTIVE SUMMARY:**

The attached paper confirmed the line management of doctors in the organisation covering:

- Line management clinical leaders
- Junior doctors

It also clarifies the role of the medical staffing department as a specialist and advisory service.

In order to fully embed a standardised approach to line management and rota management across the Directorates, there are some clarification and practicalities of work to be completed over the next 2 months. These include:

- Standardisation of job descriptions
- Assurance from Clinical Groups on administration for managing rotas and sickness absence and a clear reporting structure for junior doctors
- Consideration should be given to how job plans can be tracked and managed in a standardised way across the Trust. This may require investment.

### **REPORT RECOMMENDATION:**

The Trust Board are asked to discuss and note the line management of doctors in the organisation.

The Chief Operating Officer, will work with the Clinical Group Directors to oversee the delivery of this work in Quarter4.

### **ACTION REQUIRED** (Indicate with 'x' the purpose that applies):

### ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:

Managing resources effectively

### PREVIOUS CONSIDERATION:,

CLE

#### **Line Management of Doctors**

#### 1 EXECUTIVE SUMMARY

This document sets out the line management arrangements of doctors in the following areas:

- Line management clinical leaders
- Junior doctors

#### 2 LINE MANAGEMENT OF CLINCIAL LEADERS

The reporting lines and line management structure is as follows:

- Group Directors are managerially accountable to the Chief Operating Officer; professionally they are accountable to the executive level professional lead eg medical director, nursing director.
- Clinical Directors are managerially accountable to the Group Directors of Operations and professional accountability to the Group Directors.
- Speciality leads report to the Clinical Directors and are an advisory role to the directorate leadership.

Line managers typically undertake a range of responsibilities:

- Appraisal and objective setting.
- Team and individual development.
- Management of performance (conduct, capability, productivity, punctuality).
- Sickness absence management and recording.
- Management of work patterns and rotas.
- Oversee/authorise payments and employee expenses

It would be expected both the line manager and professional reporting lead are involved in appraisal and individual development.

### 3 JUNIOR DOCTORS AND ROTA MANAGEMENT

Both line management and rota management are the responsibilities of Clinical Groups. There is some variation in approach and practice, with efforts being made over the coming 2 months to standardise all aspects of line management of doctors.

Line management of junior doctors should be by clinical supervisors. Each Directorate should have a clear reporting structure with a named consultant to each junior doctor to avoid ambiguity. This should be reflected on ESR which currently shows inconsistency of line management. Issues that need escalation regarding a junior doctor's welfare or performance should be between the clinical supervisor and clinical director.

Each Clinical Group and Directorate must have robust, self-contained rota management and administration arrangements in place for their medical staff rotas.

The coordination and responsibility for robust rotas and OOH cover, rests with the consultant and speciality rota lead. The administration of this should be supported by the general management within the Directorate.

Any foreseen gaps in cover should be escalated to the Group Director of Operations and onto the Chief Operating officer if unresolved.

There should be accurate recording of sickness and return to work interviews for all medical staff in line with Trust policy. It is felt that this is currently under reported.

### 4 SHOP FLOOR WORKING

There is a separate job planning policy to support the job planning process. There is no standardised mechanism for the tracking of job plans and worked PAs. There are local processes in place in some Groups, but tracking is variable and there are examples of unintentional under delivery of job plans in year, which have been recovered. The Trust should look to establish a mechanism to track delivery against contracted job plans.

The day to day direction of junior doctors should be through the appropriate senior shift leaders and coordinating clinician. For example:

- On the wards should be to the ward manager and middle grade.
- In ED it will be the senior doctor in charge working in partnership with the nurse coordinator.

### 5 CONCLUSION AND RECOMMENDATIONS

In order to fully embed a standardised approach to line management and rota management across the Directorates, there are some clarification and practicalities of work to be completed over the next 2 months.

- Job descriptions should be standardised and re-circulated aligning with above arrangements.
- The Clinical Groups are asked to provide assurance of Directorate and Group level administration for managing rotas and sickness absence and a clear reporting structure for junior doctors.
- Some practicalities logistics need to be standardised to improve access and reports of information at staff level to line management.
- Consideration should be given to how job plans can be tracked and managed in a standardised way across the Trust. This may require investment.

The Chief Operating Officer, will work with the Clinical Group Directors to oversee the delivery of this work in Quarter 4.

- November performance has 47 exceptions (red rated) indicators.
- Relevant recovery plans are overseen through the executive Performance Management Committee.

#### Key:

Grey column shows a reported indicator, for which there is currently not a target or it is used for driving a graphical illustration.

#### 2) New Indicators

- The IPR remains under regular review and revised / new indicators have been added.
- This month's IPR includes % in-month sickness rates.
- Readmissions now feeds down to group level to allow specific actions

#### 3) Data Quality Kitemarks

- All IPR Kitemarks have been updated in the November IPR version and reflect the Executive sign off position (middle segment);
- The project assessed all indicators published in the IPR for data quality robustness across the 'kitemark' segment framework. This included 'bottom up' involvement from operational leads to Executive leads.
- The assessments have resulted in a number of actions (to address residual red segments) and the plan for which will be tracked as for audit recommendations.

#### At Glance - November 2015

|  | F   | d Clarice - November 201  | 19   |   |  |  |  |  |  |
|--|---|---|--|---|--|--|--|--|--|
| Infection Control  | Harm Free Care  | Obstetrics  | Mortality & Readmissions   | Stroke Care & Cardiology  |  |  |  |  |  |
| There was 1 C. Diff case reported during the month of November. The number of cases year to date is at 17 against a target of 20.  | Overall Harm Free Care as assessed through the NHS Safety Thermometer indicates a level of Harm Free Care of 94.1% for November beneath the 95.0% operational threshold. This modest under-performance is stubborn month on month.  | The overall Caesarean Section rate for November is 24.9% (vs. 25% target), 25.4% (25.0%) on a cumulative year to date basis. Elective and Non-Elective rates cumulatively are 8.8% and 16.6%  | The Trust overall RAMI for most recent 12-mth cumulative period is 91 (latest available data is as at August). The RAMI for weekday and weekend each at 78 and within statistical confidence limits.   | Stroke data for November indicates 95.2% of patients spending >90% of their time on a stroke ward being compliant with the 90% operational threshold (year to date delivery at 91.9%).  |  |  |  |  |  |
| No. of MOCA Partners in the second of No.  | There were 72 falls reported in November (51 Acute; 21 Community) with 3 falls resulting in serious injury (2 in Medicine and 1 in Surgery A). 3 cases of serious injury from falls in month (14 year to date).   | respectively.   | SHMI measure which includes deaths 30-days after hospital discharge is at 99 for the month of July (latest available data).  | November admittance to an acute stroke unit within 4 hours remains relatively stable at 80.0% (falling short on 90% local target, but compliant with 80% national target). Year to date delivery at 81.1%. The trust is looking to still improve on this level of performance.  |  |  |  |  |  |
| No cases of MRSA Bacteraemia were reported in November. 2 cases reported year to date versus a target of zero.   | There were 6 cases of avoidable, hospital acquired pressure sores reported in November (3 cases in Medicine, 1 case in Surgery A, and 2 in Community). All 6 cases were grade 2 ulcers.   | Adjusted perinatal mortality rate (per 1000 births) for November is 6.48; 6/8 months this year delivering within target of 8.0 or less.   | Consistent with previous months.  Deaths in Low Risk Diagnosis Groups (RAMI) - month of August is at 44 [vs. 102 equivalent month last year]. This indicator measures in-month expected versus actual deaths so  | Pts receiving CT Scan within 1 hour of presentation 65.2% in month [73.9% YTD] being compliant with 50% standard. Pts receiving CT Scan within 24 hrs of presentation has failed to deliver to the 100% target in the month, delivery at 97.8%.   |  |  |  |  |  |
| MRSA Screening - Elective patients meeting target overall and in all groups except Medicine; Non-elective patients meet full screening compliance  | There were 6 serious incidents reported in November (incl 3 from falls injury).   | Early Booking Assessment (<12 + 6 weeks) - SWBH Specific definition target of 90% has consistently not been met; November delivery 78.9%;   | subject to larger month on month variations.   | The November percentage of patients receiving thrombolysis within 60 minutes of<br>admission was at 100% (target of 85%) - a significant achievement which is now<br>consistently delivering for the last 4 months.   |  |  |  |  |  |
| across all groups.   | There was one medication error causing serious harm in November in medicine.  | performance is consistently delivering to nationally specified targets.   | Crude in-month mortality rates remain similar to previous periods and tracks against established averages.  During the latest available month, of September, the mortality review  | For November the Primary Angioplasty Door to balloon time (<90 minutes) and Call to balloon time (<150 minutes) was at 100% (80% targets); both indicators delivering   |  |  |  |  |  |
|  | Venous Thromboembolism (VTE) Assessments in November are at 94.7% (target of 95%). The CCG has requested an exception report as 3/5 latest months have shown under-performance.   | Trust based registrations convert to lower deliveries at the Trust, as other centres pick up the births element.  | rate is at 86% for the Trust against the internally set target of 90%.   | year to date and have improved significantly month on month.  |  |  |  |  |  |
| The incidence of MSSA Bacteraemia (expressed per 100,000 bed days) for the month of November is 5.6 versus the target of 9.42; year to date 3.1  | There were 6 Open CAS Alerts reported at the end of November, of which none were overdue at the end of the reporting period.  | Breastfeeding initiation is at 74.22% on a cumulative basis, below the target of 77% in the last quarter.   | Readmissions (in-hospital) reported at 8.0% for November in-month [8.3% rolling 12 mths].  For COC diagnostic group reporting 8.6% rolling 12 months (vs. peer 6.0%).  Expected to improve over time due to October focus week which need to feed through. | RACP performance for November at 71.3% (significant worsening from 97% previous month); 4/5 latest months failed staandard; impacting therefore the year to date performance which is now at 93.5% (target of 98%).  The service is now looking at improvements across the full pathway, in particular, the GP referral process.  |  |  |  |  |  |
| Cancer Care  | Patient Experience - MSA & Complaints   | Patient Experience - Cancelled Operations   | Emergency Care   | Referral To Treatment   |  |  |  |  |  |
| As projected the Trust failed the 62-day urgent GP referral to treatment target during October, with overall performance of 80.6% (vs. 85% target).  | There were no mixed sex accommodation breaches reported during the month of November.   | The number of elective operations cancelled at the last minute improved to 0.8% in November (vs. 1.0% previous month) & meeting the 0.8% target. However, this delivery is not consistent against all specialities and some continue to fail. | The Trust's performance against the 4-hour ED wait target of 94.14% during the month of November. Performance for the second Quarter was 94.57% (vs. Q1 92.99%). December A&E performance (as at 28 <sup>th</sup> Decl is at 91.28% hence                  | RTT incomplete pathway for November was at 92.27% meeting the 92% target. This is the only pathway now monitored nationally. The forecast is that incomplete RTT will be met over the next 3 months.  Admitted and non-admitted RTT pathways continue to be monitored & both under-   |  |  |  |  |  |
| 62 day cancer targets not met for Gynae, Upper GI, Lower GI & Urology  |   | No breaches of 28 days guarantee in November.   | unlikely to meet the monthly or quarter 3 target.  | achieved in November as per projections.  |  |  |  |  |  |
| cancer sites.  Gynae is an exceptional result this month and Urology a deterioration on previous improvement.  | FFT is meeting the target in respect of inpatient score, however low response<br>rate. Failing the A&E score for November. Lower than targeted response<br>rates continue in inpatients and A&E.<br>Outpatient FFT is reported for the first time & at 87% which is below the target  | 57 of all cancelled patients experienced multiple cancellations in November being consistent with previous months.  | WMAS fineable 30 - 60 minutes delayed handovers at 67 in November a significant decrease to last month.  | At the end of November 4 patients were waiting more than 52 weeks for commencement of treatment; of these 2 are on the incomplete pathway.  |  |  |  |  |  |
| The projection is that all targets will deliver in November through to Feb (latest forecast).  | score of 95%.   |   | Over 60 minutes delayed handovers reported at 3 cases.   |   |  |  |  |  |  |
| In October, 13 patients were waiting over 62 days and 8 patients were waiting more than 104 days. There is now a national focus on this cohort of patients (104 days waiters) and the trust will be required to submit detailed patient level information for this indicator.                  | The number of complaints received for the month is at 104 (avg for this year is 96), with 3 formal complaints. All have been acknowledged within target timeframes.  The level of responses exceeding agreed dates is at its lowest rate this year (at 4.1% in November).  The oldest complaint on the system is 47 days old. | The number of sitrep cancellations decreased from 42 last month to 33 in November.  There were no urgent cancellations reported in the month of November which is a significant improvement to previous months.                               | Fractured Neck of Femur performance in November was at 91% following increased sessions. In November therefore, both, internal (24hrs) and national standards (36hrs) have been met for this cohort of patients.   | 20 Treatment Functions failed the respective RTT pathway performance thresholds for the month. Mainly in Medicine and Surgery A.  'Completed Pathway – Admitted - 5 Treatment Functions are under-performing  'Completed Pathway – Non Admitted - 9 Treatment Functions are under-performing  'Incomplete Pathway - 6 Treatment Functions are under-performing  |  |  |  |  |  |
| Other aggregate level targets were met in October (2WW and 31day).   | The Learning Disability indicator is red. The service is on an action plan to   | Theatre utilisation is below the target of 85% at a Trust average of 73.0% as at November.  | Patient out of hours bed moves are showing a reducing trend, but need to follow CQUIN principles which is being actioned and will inform this indicator going forward.   | Diagnostic waits (November) beyond 6 weeks were 0.16%, remaining well beneath   |  |  |  |  |  |
| The longest waiting patient is at 165 days in medicine.  | ensure compliance is as per latest guidance, and this is being progressed.  | Review of completeness being undertaken having regard to new Cardiology system (Labyrinth).   | DTOCs are at 2.0% in the month of November (vs. 1.9% previous month), below the target of 3.5%.  | bilagnostic waits (november) beyond 6 weeks were 0.16%, remaining well beneate the operational threshold of 1.00%.  |  |  |  |  |  |
| Data Completeness  | Staff   | CQUIN   | Ext Assessment Frameworks & Data Quality   | Summary Scorecard - November (Month)  |  |  |  |  |  |
| The Healthcare and Social Care Information Centre (HSCIC) assess the percentage of Trust submitted records for A&E, Inpatients and Outpatients to the Secondary Uses Service (SUS) for completeness of valid entries in mandatory fields. AE, OP and Community parameters remain above target, | PDR overall compliance as at the end of November is at 86.67%. The Medical Appraisal / Revalidation rate as at August is 87.5% measuring only validated appraisals, not appraisals 'carried out'.  Both indicators are below targets of 95%.  |   | The TDA Observation & Escalation assessment of the trust remains   | Section   Rand   Amber   Green   Amber   Green   Rand   Rand |  |  |  |  |  |
| but IP data with valid entries has fallen just below the required threshold in previous months, recovering in November.  | Mandatory Training at the end of November is at 87.2% overall against target of 95%. Health & Safety mandatory training at 97.57%   |   | at 'level 3 - Intervention'.   | Obstetrics  |  |  |  |  |  |

The Trust's internal assessment of the completion of valid NHS Number Field within inpatient data sets is below the 99.0% operational threshold, with actual performance (completeness) during November reported as 97.4%. Outpatient, Community and A&E data sets continue to exceed their respective thresholds. Coding for Ethnicity has improved in November to 90.2% (89.82%LM) versus a target of 90%.

Open Referrals as at November are at are at 222,729 (214,841 LM). This reflects another monthly increase of c8,000 referrals. The trust is following up previous reviews earlier this year, and again assessing the process and policy in respect of this indicator which aims to maintain appropriate levels of open referrals. This is currently under-view due to complete by Jan2016.

In-month sickness rate is at 5.1% - highest monthly rate since June 2015. 12-month rolling period sickness absence at 5.0%. Return to Work interview rate following Sickness Absence is at 65.2% for the

The Trust annualised turnover rate is at 13.6% as at November.

the trust transitions between two systems.

month of November.

Qualified nurse vacancies as at October reported as 267wte (vs. 279wte

Nurse Bank & Agency utilisation continues to be high; a high proportion of the filled shifts has been via Bank nurses.

The absolute number of bank shifts worked in month is subject to validation as

The trust has submitted Q2 returns to CCG and SCG commissioners.

Feedback has been received from both confirming 100% paymer however some schemes are subject to validation and audit. November reviews with the CQUIN leads are scheduled to address some of the issues that have arisen since Q2. Significant, on-going focus is required for several schemes to ensure this is delivers for Q3 (at the end of December).

Data Quality (DQ) - the Performance Committee has agreed to revisit all IPR indicators in respect of DQ. DQ kitemark assessments have been progressing as part of an ongoing improvement cycle. The initiative is reaching its completion at the end of December 2015 when all data reported in the IPR will have a completed / assessed kitemark (or with clear actions in place). This will include the middle of the kitemark sign off reflecting Executive Judgement. This version of the IPR already includes the updated Kitemarks for many indicators, some are still subject to a final sign off and will be

completed at the end of the month.

The Trust is contracted to deliver a total of 20 CQUIN schemes during 2015 / 2016. 7 schemes are nationally mandated, a further 5 have been agreed locally, 5 identified by the West Midlands Specialised Commissioners and 3 by Public Health. The collective **financial value** of the schemes is **c.£8.8m**.

Maternity and Health Visiting Services - Integrated working

The CCG and SCG have signed off the Q2 position and agreed to fully fund the schemes up to that stage. The Trust is reporting on Q3 performance at the end of January.

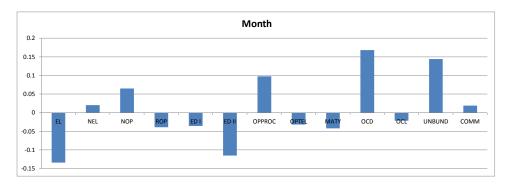

A number of manual interventions has been necessary to secure scheme delivery, as systems were either not in place or failing appropriate configuration. This relates mainly to AKI, Sepsis A and Dementia 'inform' element.

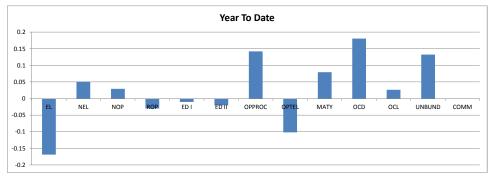

- There is a high risk that Sepsis A will fail this quarters' targets although processes have been put in place to manually satisfy the audit requirements. For clarity, The trust is delivering the appropriate clinical care, it is the audit that is not fully in place as Patient First fails to deliver on this development. Alf continuous to rely on manual audits, but the system development is expected in Jaruary, this scheme is of a lesser risk of failure for Q3. - Dementia 'inform' element relies on patient letters being sent to GPs where patients has a certain level of score. There is a heavy focus on extracting this manually and sending out, but it is expected to deliver.

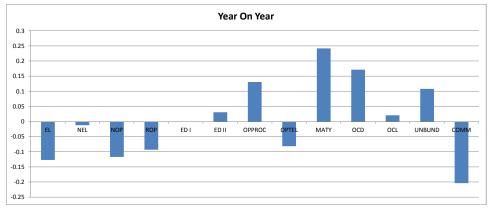

Other schemes rated amber are subject to a fuller review at the end of the quarter and are expected to deliver.

### **Activity Summary**

#### Data up to Novmber 2015 (M08)

Activity - Variance expressed as a percentage between actual activity and planned (contracted) activity is reflected for the month and year to date in the graphs opposite. Additionally, there is a year on year comparison of current year with previous year for the corresponding period of time.

Adverse variances to plan in elective and outpatient care are being addressed through the demand and capacity work being led by the Chief Operating Officer. The plan focusses on maintaining underlying contract plan levels of activity during Q3 and Q4 through daily reporting of booked admitted and non-admitted activity and management challenge of differences from target.

There has been some movement in point of delivery activity since plans were set with plans set as daycase procedures but now recorded in the outpatient setting. Outpatient procedures continue to perform well in month 8 however daycases have dipped slightly following improved performance in October, and elective procedures continue to show significant adverse variance.

Emergency admissions continue to over perform year-to-date, however there was an under-performance in month 8, and our emergency departments continue to underperform – particularly at the City site.

Maternity performance against plan is not showing the same level of over performance we saw in October, however actual activity levels remain at the average level seen so far this year.

#### **EXECUTIVE SUMMARY:**

SWBH CEO attended the 'people's parliament' in June 2014 and committed to a range of actions to improve the experience of patient's with Learning Disabilities in our organisation. Enclosed is a progress report to date which includes progress on actions arising from the Confidential Enquiry into Premature Deaths of Patients with LD 2013. This will support data quality assurance kitemark assessment.

### Confidential Enquiry into Premature Deaths of Patients With Learning Disabilities 2013 and Commitments to People's Parliament 2014

**Progress Report December 2015** 

#### 1.0 Organisational Strategy

- Confidential Inquiry into the Premature Deaths of People with Learning Disabilities (DOH 2013) Appendix One- DOH response includes 18 recommendations including:
  - 1. identification of people with LD
  - 2. audit of reasonable adjustment
  - 3. consideration of multi-morbidity
  - 4. named health care co-ordinator for people with multiple or complex needs (2 or more LT conditions)
  - 5. patient held records
  - 6. equal access to investigations and treatments
  - 7. appropriate referral to specialist LD services

#### **Local Drivers**

- Peoples Parliament- Commitment to improve services (cross reference recommendations from CIPOLD 1,5,8)
- Changing our Lives (COL) local action plan to improve services for patients with LD in SWBH
- Patient stories -carer/user feedback on criteria to improve patient experience /safety
- Clinical incidents and complaints feedback regarding staff knowledge base, information etc.
- Self -assessment against six criteria for meeting needs of people with LD based on recommendations in Healthcare for All (2008)

#### **Background**

Over 800 patients were admitted to SWBH in 14/15 potentially requiring access to nurses with expert knowledge and skills to support their journey and improve experience and outcomes. Traditionally the LD services at SWBH have been provided using two different models for Sandwell and Birmingham patients. In Sandwell a LD Lead Nurse (LDLN) is hosted by the Adult Safeguarding Team and generally available on site five days per week. The post was co-created between the two organisations (BCPNHST) to meet the needs of both. In City there is case specific support via the single access phone number to Health Care Facilitator team. The service is no longer based in the hospital and therefore inter team working to promote proactive work is difficult (information leaflets, training, audit etc.).

A second LDLN has been funded to provide cover for Birmingham residents and interviews are taking place 13<sup>th</sup> January 2016. This will allow promotion of standardised, evidence based practice under the guidance of the Adult Safeguarding Team and Deputy Chief Nurse.

#### 2.0 Communication Strategy

- On recruitment of the second LDLN a re-launch of service provision via Heartbeat, staff communications, ward /department visits, roadshows is planned
- The LD intranet page will be up-dated to ensure access to Easy Read information and key contacts, national and local documents, care plans etc.
- External communication to ensure local Health Care Facilitator teams and GPs are aware of the new service to ensure provision of integrated care.

 Ensure LDLN are involved in locality CIPOLD meetings and form links with 3<sup>rd</sup> sector partners such as Changing our Lives

#### 3.0 Patient Safety

Patients with LD are flagged on EBMS and the LDLN receives an automated notification which enables her to search patient systems for more information, advise and support are provided to the patient/carer and staff to help undertake an individual patient assessment and develop personalised care plans.

<u>Action 1:</u> committed to ensuring we identify and flag patients with LD when they are in hospital

<u>Action</u> 2:Commitment to ensuring reasonable adjustments are put in place for individuals in hospital and to work with others to find ways for this to be audited and how the Quality of Health Principles could be part of this process.

Action 3: Commitment to increase awareness and competency of staff working Positively with people with LD and using reasonable adjustment

<u>Action 4:</u> Commitment to explore options for putting in patient held records developed in conjunction with service users

Action 5: commitment to increase the numbers of people with LD employed by SWBH by focusing on young people in transition:

#### 4.0 Patient Experience

Patient Satisfaction Surveys make provision for LD /MH and sensory loss to be identified hence enable the organisation to determine the number of respondents with a LD who have responded as a proportion of the whole and key themes for action.

#### **5.0Clinical Effectiveness**

#### **Areas of Good Practice:**

- Introduction of notifications, flagging
- Introduction of use of hospital passport
- Close liaison between hospital and community teams

#### 6.0Next steps

- Recruitment of second LDLN
- Standardise policies across site
- Develop Workforce Development Plan and range of training methods
- Analyse results in patients satisfaction surveys to determine themes
- Ensure activity and outcome data recorded, collated and reviewed to allow appropriate local and corporate action planning
- Communications plan

#### 7.0 Recommendations

Accept the report.

Executive Lead: Colin Ovington, Chief Nurse

#### 8.0Appendices:

Combined CIPOLD 2013 and People's Parliament 2014 Action Plan

#### SANDWELL AND WEST BIRMINGHAM HOSPITALS NHS TRUST

| Ref | Standard  | Current    | Explanation of Compliance  | Action up-date/Next Steps  | Lead | Time-         |
|-----|---|------------|--|--|------|---------------|
|     |   | Compliance |  |  |      | frame         |
| 1   | CIPOLD 1 We need to know if people have learning disabilities. People with learning disabilities should be flagged on the NHS central registration system in all healthcare record systems. [The Department of Health, NHS England and the Health and Social Care Information Centre] | 3          | Identification of patient with a learning disability on the casualty card (including new version) and Patient Assessment Record.  Identification of patient with a learning disability flag on the Electronic Bed Management System. (Flag is put on from point of admission to discharge)  Learning disability flag available on ICM,  Pathways for referral to Learning Disability Liaison Nurse | Learning Disability flag continues to be put on at point of admission to discharge. Work to be completed at City Hospital.  To continue to gain consent to flag on ICM. 255 people with a Learning Disability will be flagged by end of December 2015.  Same system will be introduced to City when Learning Disability Nurse in post. (To capture patients with a learning disability from Birmingham)  Learning disability referrals are picked up at City presently by Learning Disability Liaison Nurse (Sandwell) if Learning Disability flag is put on or through telephone contact.  Easy read appointment letter and | LDLN | March<br>2016 |

|   |  |   | (LDN) at Sandwell Hospital and Health Facilitation (HF) at City Hospital however due to changes within the HF team patients are not being seen promptly.   | complaints letter designed. (Unable to implement, as we could not identify patients with a learning disability. With permanent flagging in place, will need to address this as patients with a learning disability can be identified on ICM.).                                    |              |               |
|---|--|---|--|---|--------------|---------------|
|   | PP: 'I will find out the best way to make sure that people with a LD are flagged when in hospital and put this in place'   |   | Referrals to LDN at Sandwell come via e-mail (also email link from flag on EBMs), staff, carers and providers of services in the community.  | Progress— this is partly achieved in that as the LDLN receives the notification via EBMS a permanent flag is generated. This equates to 255 patients to date and will improve on the recruitment of the second LDNS and following our communication strategy to the organization. |              |               |
| 2 | CIPOLD 2 Services should make changes called reasonable adjustments. This is so that people with learning disabilities can use them as easily as everybody else. Reasonable adjustments to be audited annually. Examples of best practice to be shared across agencies and organisations | 2 | Evidence of reasonable adjustments made including longer appointment times, carers in anaesthetic room and recovery in theatre. Confidential inquiry into premature deaths of people with an LD (CIPOLD) group is chaired by a person with a Learning Disability and there are representatives from advocacy group Changing our lives. | Audit of reasonable adjustments required Jayne Leeson has put in a bid to CEO for COL doing an audit of reasonable adjustments.   | COL<br>(TBC) | April<br>2016 |

|  | PP:' I will ensure that reasonable adjustments are put in place for individuals in hospital and work with others including outside organisations to find ways for this to be audited referencing the Quality of Health Principles' | Patient story to Trust Board LDN offered to attend provider meetings to gather Feedback. Patient survey includes patients with a Learning Disability.Feedback from carers , families and providers.  Audit completed in 2012 regarding the care of patients with a learning disability by changing our Lives. | Progress: COL worked closely with the organization in 2009/2010 to undertake an 'audit' evidence of reasonable adjustment in terms of physical access, admission ,staff knowledge and discharge planning. A joint action plan was agreed and a business plan for the first LDLN funded.  Another audit by COL would enable review against Quality of Health Principles* undertaken by service users. Mortality reviews determine preventable deaths on an individual basis —plans in 2016 to analyse findings based on population of patients with LD as a proportion of the whole population . |  |
|--|--|---|---|--|
|--|--|---|---|--|

| 3 | CIPOLD 7 People with learning disabilities should get the same investigations and treatments that other people get. Reasonable adjustments should be made if needed. | 2 | Reduction of concerns raised by other agencies via safeguarding route.  Although there is no specific protocol in place there are Evidence of reasonable adjustments via patient and carer stories available.  Evidence of referrals via family and friends to LDN following successful patient experience previously.  Visiting policy.  Carers assessment on PAR and then referral to Social care Highlight of young carers within PAR.  Use of relative rooms available and improved parking rates etc | Continues to be a reduction in concerns raised by other agencies. Learning Disability liaison nurse continues to work with SWBH's to make reasonable adjustments.  Staff training on learning disabilities awareness addresses reasonable adjustments and advises that any reasonable adjustment made should be documented in medical notes. (Evidence for audit)   | LDLN        | On-<br>going |
|---|--|---|---|---|-------------|--------------|
| 4 | PP: 'I will put in place actions to increase the awareness and competency of staff working positively with people with LD and using reasonable adjustment'           | 3 | Although no specific protocol for routine training there is Training package completed ensuring consistency across both Sandwell and City  Hospitals Ward and departmental training.  | Learning Disability Awareness training continues to be offered to staff at SWBH's and Community staff. Includes reasonable adjustments.  Learning Disability Awareness training for Acute Student Nurses for 2016 both at Sandwell and City Hospitals.  Working with Skills for Health on an elearning training package for learning disability awareness training. | DT/<br>LDLN | Jan<br>2016  |

#### TRUST BOARD

| DOCUMENT TITLE:               | Financial performance – P08 November 2015   |
|-------------------------------|---|
| SPONSOR (EXECUTIVE DIRECTOR): | Tony Waite – Finance Director               |
| AUTHOR:                       | Tim Reardon – Associate Director of Finance |
| DATE OF MEETING:              | 7 January 2016                              |

#### **EXECUTIVE SUMMARY:**

#### Key messages:

- ➤ Headline improvement in month but underlying deterioration; I&E remains off plan year to date.
- ➤ I&E outlook indicates plausible route to original plan target but with significant delivery risk.
- Necessary reliance on significant contingencies to meet key financial targets. Additional measures mobilised to underpin delivery of those targets. No clear route to delivery of stretch surplus target.
- > Step improvement in monthly run rate required to secure exit run rate consistent with medium term financial plan. Focus of organisation firmly on remedy to deliver original plan.
- Capital programme reviewed and re-profiled to be consistent with now confirmed requirements of retained estate and IM&T strategies consistent with effective delivery of MMH models of care.

#### **Key actions:**

- Confirm and deliver revised demand and capacity plans consistent with remedy of year to date under-performance on planned care. Delivery to be contained within original plan costs.
- Reduce pay bill run-rate in the first instance through reduction in premium rate agency spend to a level consistent with that achieved in Q3 / Q4 of 2014.15.
- Resolve dispute in respect of ante-natal secondary provider charges and establish fit for purpose SLA
- Discipline in delivery of CIP schemes to realise plan value on a full year effect basis.
- Expedite delivery of those necessary additional measures consistent with safe services.
- Progress identified actions to manage resources within approved External Finance & Capital Resource Limits having regard to any reliance on non-cash contingencies and revised capital programme.

#### **Key numbers:**

- o Month surplus £505k being £241k favourable to plan; YTD deficit £(821)k being £(1,991)k adverse.
- o Forecast surplus £3.8m in line with original financial plan.
- o Pay bill £24.4 (vs. £24.6m) in month; Agency spend £1.6m (vs. £1.4m) in month; £12.0m YTD.
- o CIP delivery to date £9.1m being £0.3m adverse to TDA plan. Step up in CIP in Q3 / Q4 required.
- o Capex YTD £10.5m being £1.8m below plan. Capital commitments £5.3m.
- Cash at 30 November £28.9m being £3.0m above plan due to timing differences
- New FSRR 3 to date being as plan despite adverse EBITDA performance; forecast 4 vs. plan 4
- Capital Resource Limit (CRL) charge under-shoot £500k on £20.2m plan expected.
- $\circ$  External Finance Limit (EFL) charge forecast at £(0.7)m being consistent with approved EFL.

#### **REPORT RECOMMENDATION:**

The Board is recommended to RECEIVE the report and REQUIRE & SUPPORT those actions necessary to secure key financial targets consistent with the delivery of safe, high quality care.

| ACTION REQUIRED (Indicate with 'x' the purpose that applies): |          |                                       |                        |   |  |  |  |  |

### **Summary & Recommendations**

Period 8 2015/16

| Statutory Financial Duties         | Value   | Outlook | Note |
|------------------------------------|---------|---------|------|
| I&E surplus                        | £3.8m   | ٧       | 1    |
| Live within Capital Resource Limit | £20.2m  | ٧       | 2    |
| Live within External Finance Limit | £(0.7)m | ٧       | 3    |

- 1. Plausible route to £3.8m original plan but with significant delivery risk. No clear route to stretch target surplus £5.0m.
- 2. Capex control totals being managed to secure £500k CRL undershoot in support of I&E surplus delivery.
- 3. Management of working capital including creditor stretch necessary as I&E delivery reliant on non-cash contingencies.

#### Outlook

- Issues in respect of continued under-delivery of planned care volumes compromising income recovery and sustained use & cost of premium rate interim staffing.
- Target delivery includes significant use of contingencies.
   Focus remains on delivery of improved recurrent exit run rate consistent with medium term financial plan.
- Consequent cash erosion managed on a basis consistent with the trust meetings its obligations as they fall due.

### Financial Performance for the 8 months to 30 November

I&E deficit £821k being £1,991k adverse to plan;
Capital expenditure £10.5m being £1.8m below plan;
Cash at 30 November £28.9m being £3.0m more than plan.

#### **Opportunities & risks**

The Trust has initiated a programme of additional measures necessary to the achievement of key financial targets and which include all identified opportunities.

There are specific risks to that plan and which are the subject of measures to seek to mitigate adverse impact:

- CQUIN and other income penalties
- Unfunded winter pressures
- Planned care activity recovery does not materialise
- Recruitment delays and sickness absence continue to drive excessive agency demand
- Adverse antenatal pathway settlement

#### Recommendation

- Progress those actions necessary to secure key financial plan targets consistent with safe, high quality care.
- Maintain focus on delivering exit run rate consistent with medium term financial plan.

### Performance to date – I&E and cash

Period 8 2015/16

#### I&E

The key I&E issues are:

- Planned care income below plan levels;
- Sustained use of premium rate interim staffing;
- Rate of cost reduction below that required to meet medium term financial plan trajectory

In month underlying performance deteriorated driven by income under-recovery. Headline reported performance supported by use of contingencies.

The year to date headline I&E deficit is after the benefit of £6.9m of balance sheet contingencies realised to support the reported position.

Reserves planned but not spent or accrued to date total £4.0m.

#### Savings programme

Progress reported through the Trust's savings management indicates delivery to date below TDA plan profile for the first time. The concern is on-going with regard to the delivery of full year plans where significant savings remain to be identified and allocated. Bottom-up forecasts from Groups re CIP achievement confirm this concern.

#### **Capital & Cash**

Capital expenditure to date stands at £10.5m against a full year plan of £20.5m. A further £5.3m of firm commitments have been made to date. Schemes reviewed and expected to deliver to schedule and budget.

CRL undershoot of £500k planned on back of under-budget delivery of land remediation programme.

Positive cash position reflects capital programme and extended payables which continue to include disputed payments in particular for maternity pathway charges. Receivables are above plan levels and include sums due from local authority for delayed discharges penalties.

#### **Better Payments Practice Code**

82% performance for NHS bodies in month brings the YTD up to 86% by value.

Non-NHS performance remains below target at 89% by value. Delay in receipting of orders continues to be a significant impediment to performance.

#### **Financial Sustainability Risk Rating**

Rating of 3 year to date compares with planned rating of 3. Forecast is 4 consistent with plan.

| DH Surplus/(Deficit)              | 5,006                    | 264                  | 505                    | 241                      | 1,170                 | (821)                   | (1,991)                   | 5,006                     |

This table shows the YTD I&E position for the Trust.

In month surplus and year to date deficit supported by use of contingencies.

The underlying rate of improvement is less than that necessary to secure an exit run rate consistent with medium term financial plan.

Out-turn plan as stretch target.

| Outlook                   | Reported<br>YTD<br>£'000s | Mth<br>9<br>£'000s | Mth<br>10<br>£'000s | Mth<br>11<br>£'000s | Mth<br>12<br>£'000s | FY<br>2015/16<br>£'000s |

| EBITDA                    | 13,663                    | 2,167              | 2,531               | 1,639               | 3,613               | 23,613                  |
| Non-Operating Expenditure | (14,320)                  | (1,697)            | (1,697)             | (774)               | (1,080)             | (19,568)                |
| IFRIC12                   | (164)                     | (20)               | (20)                | (20)                | (20)                | (246)                   |
| DH Surplus/(Deficit)      | (821)                     | 450                | 813                 | 844                 | 2,513               | 3,800                   |

Plausible route to original plan surplus £3.8m but with significant delivery risk. No clear route to stretch plan surplus target.

Reliance on the use of significant contingencies remains.

Rate of underlying improvement is key to delivery of any surplus in the 2015/16 financial year.

This table shows the Trust's year to date SLA income performance by point of delivery.

The impact of the shortfall in planned care activities can be seen in the adverse variance for day cases and elective activity. That these have only been partially offset by additional activity on outpatients and non-elective work underlines the importance of the elective demand and capacity work to the recovery plan.

The headline variance on total Patient Related Income to date is £(3,191)k.

The difference to SLA income shown above is primarily related to pass through costs of drugs & devices being above plan £1.5m and which are offset by an equivalent variance on non-pay costs.

### Pay bill & Workforce

Period 8 2015/16

#### **Paybill & Workforce**

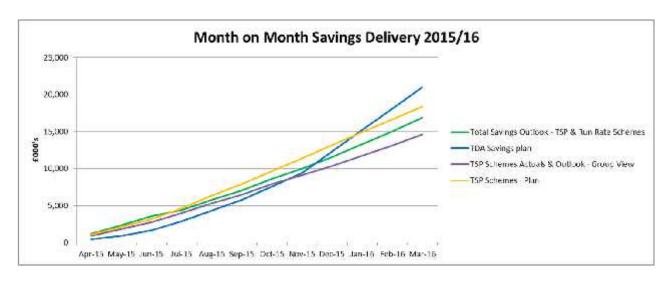

- Total workforce of 6,674 WTE [being 345 WTE below plan] including 184 WTE of agency staff.
- Total pay costs in November (including agency workers) £24.4m [vs. £24.6m previous month] & being £0.2m adverse to plan.
- Significant reduction in temporary pay costs required to be consistent with delivery of key financial targets. Focus on improvement in recruitment time to fill and effective sickness management. Escalated approval controls also reintroduced. Noted spend increase is inconsistent with reported WTE reduction due to review & correction of recognition of interim 'consultancy' costs adjusted for cumulatively in November.
- The Trust did not comply with new national agency framework guidance for agency suppliers in November. Minimal number of shifts procured outside of this are subject to escalated executive approval and is driven by commitment to maintaining safe staffing.
- Similarly, the Trust exceeded the national agency rate cap effected from 23 November 2015. Minimal number of shifts procured outside of this are subject to executive approval and CEO review and is driven by commitment to maintaining safe staffing.

### **CIP** achievement

Period 8 2015/16

This chart shows the savings profile in our plan submission to TDA; the plan value of identified TSP savings schemes; the value of those TSP schemes delivered to date and outlook.

The chart also shows a total savings plan from TSP & run rate schemes included in our forecast reported to TDA.

£21m of TSP schemes is necessary to meet the requirements of the trust's plan. Run rate schemes are tracked part of group 'route to balance'.

At P08 [TSP] savings delivery was £0.3m adverse to TDA plan with £9.1m of savings delivered against a plan of £9.4m.

TSP savings delivery was also £2.3m adverse to the plan value of those schemes with £9.1m delivered against a plan of £11.4m.

A group view of the outlook suggests a shortfall in TSP delivery of £6.3m against TDA plan target £21.0m.

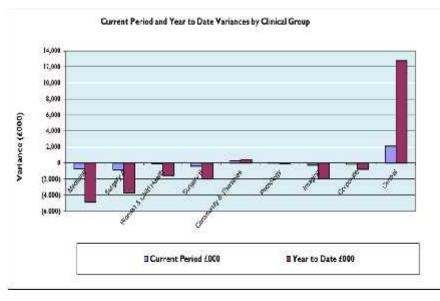

This is the subject of specific escalation.

The full year effect of plan schemes is £21m being consistent with recurrent plan target.

### **Group Analysis - Month & YTD**

Period 8 2015/16

| Group Variances from Plan (Operating income and expenditure) | Current<br>Period £000 | Year to<br>Date £000 |
|--|------------------------|----------------------|
| Medicine   | (731)                  | (4,929)              |
| Surgery A  | (856)                  | (3,723)              |
| Women & Child Health   | (7)                    | (1,584)              |
| Surgery B  | (380)                  | (2,008)              |
| Community & Therapies  | 256                    | 358                  |
| Pathology  | 70                     | (46)                 |
| Imaging  | (266)                  | (1,945)              |
| Corporate  | (188)                  | (794)                |
| Central  | 2,104                  | 12,759               |

#### **Performance of Clinical Groups**

- Medicine: Key risks continue to be medical and nursing agency; delivery of savings plans especially the major scheme around closure of capacity.
   Delivering winter plan within budget also major risk. Significant CIP Plans value were identified but actual delivery significantly away from plan.
- Surgery A: Key risks are, delivery of contract, and delivering CIP target.
   Demand and Capacity work is forecasting significant improvement against contract. Identification of CIP plans and delivery remains a concern.
- Women & Child Health: Settlement of Maternity Pathway forward SLA & historic payments key for the Group. Management of position largely via holding vacancies; workforce plan assuring sustainability & safety.
- Surgery B: Intensive work around Demand and Capacity recovery on-going; expectation that significant improvements can be delivered. Significant gap in CIP identification and delivery are also a concern, although work on D&C and delivery of improvements should address significant proportion of these.
- Community & Therapies' position includes significant vacancy management as route to CIP savings. workforce plan assuring sustainability & safety.
- Imaging: Significant use of Premium Rate Working, contracted out reporting (now ceased) and mobile MRI scanner in order to deliver activity. Use of agency staff remains high. Have been a number of opportunities for improvement identified, and delivery of these vital in order to move toward financial balance.

#### **Corporate Areas**

 Pay underspends on management and administration of £0.8m are offset by share of SLA underperformance, savings under-delivery and non-pay overspending. Delivery of Demand and Capacity work in clinical Groups will have positive impact on position. Corporate Nursing & Facilities; and Operations remain the two Directorates under most financial pressure.

#### Central

 Release of balance sheet contingency and impact of deferred / avoided reserves spend.

The above table summarises the capital programme. A granular scheme specific schedule is provided as an appendix. The programme is being managed within respective category control totals and which reflect in-year plan flexing. A year on year and scheme by scheme review completed and which indicates expected delivery to schedule & budget.

The full year out-look indicates an expected £500k under-spend and which is specific to the under-budget delivery of land remediation works on the Grove Lane site.

That under-spend is expected to crystalise as a CRL capital to revenue transfer to underpin delivery of the plan I&E target. This remains to be confirmed with the TDA at P09.

The table opposite is a summarised SOFP for the Trust. The full year forecast reflects the Trust's decision to revalue Property at 1st April 2015 and this is represented in the variance from plan at 31st March 2016.

Cash held at the end of November exceeds the planned level. Delivery of the trust's financial plan is necessarily reliant on the use of balance sheet flexibilities. This will represent a drain on the trust's cash balances. Whilst this does not represent a near term risk it may be relevant to the trust's medium term investment plans.

Appropriate options to remedy any such impact will be considered and effected in due course consistent with securing the trust's medium term financial plans.

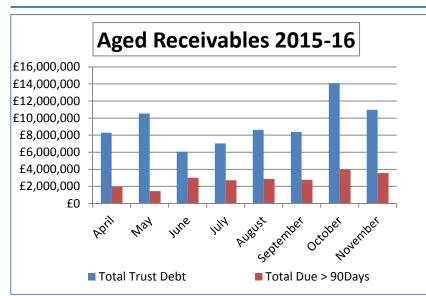

Necessary near term working capital management, including a stretch on payables, will be progressed to manage year end EFL target delivery.

#### Aged Receivables, Aged Payables, BPPC and Cash Forecast

Period 8 2015/16

#### Note

- Within aged receivables the level of over 90 days debt has reduced, however outstanding debt relating to SLA's with other NHS providers and DTOCs charges with local authorities remain. Discussions for both issues are underway at Executive level.
- BPPC is below target of 95% but reflects consistent performance to date. The main challenges in improving this relate to the trust P2P process and specifically the use of purchase orders, including receipting.

#### **EXECUTIVE SUMMARY:**

The attached paper provides a note on delivery of the CQC Improvement Plan and proposes ways in which the Board can test and check whether the work that has been carried out has been effectively implemented across the Trust and real change has resulted

The paper also describes the new in-house inspections that have been carried out during week commencing 23 November and provides some initial feedback from the inspectors.

#### **REPORT RECOMMENDATION:**

The Board is asked to receive and accept the update and provide ongoing support to the delivery of the Improvement Plan.

#### **ACTION REQUIRED** (*Indicate with 'x' the purpose that applies*):

The receiving body is asked to receive, consider and:

Safe high quality care

#### **PREVIOUS CONSIDERATION:**

CLE and Quality and Safety committee

### Our Improvement Plan – responding to the Care Quality Commission Report Update on delivery and initial in-house inspection feedback

Report to the Trust Board: 7 January 2016

- 1. The CQC report was published in March 2015 and identified 67 areas for improvement which we needed to carry out to improve the care and services provided to our patients. In response, an Improvement Plan was developed that we set out to achieve by the end of October 2015. Over the past 8 months work has been on-going to address the areas of poor practice found, with regular reports presented to the Board, Quality and Safety Committee and Clinical Leadership Executive.
- 2. There are many examples where actions have been completed such as new lockable trolleys and other storage containers to keep patient records secure, being able to identify patients with a DNACPR order on the eBMS system using a flag, resuscitation trolley checks carried out by Group DoNs, automated cabinets in place for improved storage, dispensing and governance of medicines etc.
- 3. In a number of areas work is on-going and needs to be concluded or a revised delivery plan considered. Examples include complete person-centred care documentation, embedding Ten out of Ten, reducing sickness rates, consistent hand-hygiene practice, and memory loss scoring for dementia patients in outpatients.
- 4. Organisation-wide improvements in communication, staff engagement and learning have continued to be strengthened since the CQC Inspection and have supported delivery of the Improvement Plan. Notable examples include Your Voice, Quality Improvement Half-Days, Ok to Ask, Urgent Care Challenge programmes and Board Rounds.
- 5. What needs to happen over a sustained period of time is to see if the changes made to working practices are real all the time, everywhere.

#### In-house inspection regime

- 6. To check if our response to the CQC findings have delivered real improvements on the ground and to identify any areas where attention is still needed, a series of unannounced in-house inspections, **32** in total, took place across the Trust over a 7-day period ending on 29 November.
- 7. The response to the request for 'volunteer' inspectors was positive, with 50 staff from a range of disciplines and grades taking part. The visits were mostly carried out in pairs, with one person being a clinician, and involved talking to staff, observing interactions, checking out the environment and, where possible, speaking to patients. To ensure impartiality staff were not allocated to inspect their own work place or areas with whom they had close links. Further independence was introduced with the involvement of the TDA, CCG and the Trust's Members Leadership Group on some inspections.
- 8. For the areas visited to feel like they have been through as close to real CQC inspection as we could reconstruct the in-house team were required to wear an inspector's badge and carry a clipboard. To build consistency into the process all inspectors were working to a checklist, but were free to pursue areas, both good and of concern, as necessary.

- 9. One of our learning points from the CQC Inspection last year was that staff and managers need to be better at receiving inspectors and talking about how they and the team work and describing their interactions with others outside their area. By creating 'mock ups' of this experience we can begin to address this for next CQC visit, as well the many other inspections, e.g. peer reviews we receive.
- 10. A huge amount of information has been gathered by the inspectors with over **60** completed checklists returned. The feedback from the inspections will be shared with local areas and directorate group management teams as well as more widely across the Trust during January to ensure shared learning, with the good practice identified introduced in other areas and corrective actions taken as required.
- 11. Initial feedback suggests that the majority of patients and visitors are happy with the care received and find staff helpful and friendly. This mirrors what the CQC inspectors found last October. Some inspectors came across areas where practices were inconsistent, for example, hand washing, awareness and following of the Ten out of Ten patient safety standards checklist, care plan documentation.
- 12. The plan is to periodically carry out unannounced inspections, targeting good and problem areas as required. Feedback questionnaires were sent out to the in-house inspectors to get their thoughts on how the visits ran and ideas for improvement. Their comments will feed into the discussions the CLE has about future inspections.

#### Future approaches to validate sustained and improved practice

- 13. Last month Board members considered approaches in addition to the in-house inspections that it wanted to deploy and information it required to be assured of the successful delivery of the Improvement Plan and continued good practice, everywhere all of the time. The following options were agreed:
  - Using existing data and information more intelligently e.g. complaints, incidents, Your Voice, IPR
  - Including Improvement Plan related reviews in the 2016/17 Clinical Audit Plan (quarterly)
  - Deploying more Internal Audit time next year to validate areas self-assessed as performing well (a minimum of **40 days, May June**)
  - Commissioning external peer assessments (October November)
  - Carrying out snap shot audits in selected areas
  - Find exemplar health care practices across the NHS, and more widely, and learn from their experiences to successfully introduce changed / new ways of working locally.

#### **Conclusion**

14. The unachieved actions in the Improvement Plan now need to be completed at pace and the shortcomings identified through the inspections addressed. A programme of work is being developed to test and measure achievements in delivering the Plan so that additional actions can be taken, with the aim of moving from a 'requires improvement' rating to 'good' and 'outstanding' across all of our services.

Kam Dhami Director of Governance

| DATE OF MEETING:              | 7 <sup>th</sup> January 2016                                       |

# **EXECUTIVE SUMMARY:**

This paper provides a more detailed update on the information presented to the Trust Board on 3<sup>rd</sup> December 2015.

It sets out the detail of an exercise undertaken to understand and illustrate clinical ward team staffing levels beyond nurse numbers i.e. multidisciplinary teams.

# **REPORT RECOMMENDATION:**

Accent

- This update is accepted by the Board.
- Wider safe staffing is an integral part of the Trust's main work programmes.
- That a watching brief is kept on national developments for safe staffing and the associated work programme.

#### WIDER SAFE STAFFING – TAKING A WIDER VIEW

# **UPDATE 7<sup>th</sup> January 2016**

## 1. Introduction

This paper provides a more detailed update on the information presented to the Trust Board on 3<sup>rd</sup> December 2015 with regard to safe staffing, in particular in light of the on-going national Sir Mike Durkin work that is about taking safe staffing beyond nursing numbers.

This supports the Trust's top priority to provide safe high quality care. In addition, in August 2015 the Chief Nurse of NHS Improvement wrote to all Chief Nurses in the Trust's across the UK to inform them of a shared work programme that aims to improve the safety and quality of NHS staffing, this was formally launched in October 2015. To date there is no further information setting out the programme of work or timetable despite the high profile launch. Therefore this 'pre work' will set SWBH in good stead to respond in timely way when the work does progress.

# 2. Update

In November 2014 SWBH's Chief Nurse led a nurse staffing establishment review that resulted in an agreed leadership model, minimum safe standards for nurse:bed ratio and the normal balance between registered and non-registered practitioners for early, late and night shifts. In addition to the safe staffing levels determined it is acknowledged that there are a number of critical inputs from other clinicians that form a multidisciplinary team and contribute to safe care for our patients.

A further exercise has now been undertaken to work up what constitutes the 'ward clinical team' and to illustrate, in very broad terms, how much time the various clinicians are present at ward level contributing to the overall inpatient care outcomes and experience. Key stakeholders including Health Education West Midlands (HEWM), NHS TDA and regional colleagues have confirmed that there is no defined approach, best practice or guidance available to inform how to define the overall inputs of the wider clinical team.

National benchmarking data of all acute sector staff hours to occupied bed days was used to determine SWBH's number of occupied bed days. According to NHS statistics between July and September 2015 the Trust had 790 overnight beds open with an occupancy rate of 74.7%. This equates to 54,308 occupied bed days. This calculation was used along with national norms, set out below, for time spent by physiotherapists, pharmacists and occupational therapists on a ward:

July 2015 - September 2015

| Physiotherapist           | 300 physiotherapy contacts per 1,000 days 29 mins average length of face to face contact 1,588 contacts per WTE | Therefore across this period there were approx. 600 physio contacts which on average is 3 hours physio time per 30 bed ward per day.                     |
|---------------------------|---|--|
| Occupational<br>Therapist | 147 OT contacts per 1,000 days 34 mins average length of face to face contact 1,252 contacts per WTE            | Therefore across this period there were approx. 600 OT contacts which on average is 1.5 hours OT time per 30 bed ward per day.                           |
| Pharmacist                |   | According to NHS benchmarking the average number of hours spent on wards per week (all pharmacists) per 100 beds in 2014 for Acute trusts with Community |

| services is 59 hours                |
|-------------------------------------|
| This equates to for a 30 bed ward   |
| (30/100)*(59/7) = 2.5 hours per day |

In summary, using national benchmarking metrics applied to SWBH occupied bed days indicates that in broad terms the SWBH Trust average for which physiotherapists, occupational therapists and pharmacists are present on the ward is 7 hours within a 24 hour period. This is broken down in the table below:

# SWBH average benchmark

| Staff Role             | Average hours per<br>patient (30 beds) over<br>24 hours |
|------------------------|---|
| Physiotherapists       | 3   |
| Occupational Therapist | 1.5   |
| Pharmacist             | 2.5   |
| Total                  | 7.0   |

An additional exercise has been undertaken to review a specific 35 bedded ward within SWBH. The information was contributed by SWBH stakeholders but demonstrated that detailed information is quite difficult to obtain. Existing workforce modelling, timetables and rotas, where available, were used and professional judgements and intelligence has been relied upon to build upon this further.

In this scenario, we attempt to illustrate very broad assumptions and apply these to the specific roles that comprise the multidisciplinary team. It must be noted that the complexity of patient case mix and acuity etc will impact on the number and type of staff deployed daily and this piece of work has taken a broad 'on average' overview.

The 6.61 hours/time spent by clinicians providing patient care includes direct/hands-on patient care and indirect patient care such as making referrals, planning discharges, sharing information, dealing with families, writing up notes etc.

The two scenarios below demonstrate a SWBH respiratory ward on Monday -Friday and a weekend.

Physical presence doesn't account for hours on call

# 3. Summary

This update provides a broad overview of the role and inputs of the wider clinical ward team. The subject of safe staffing and the inputs of the wider clinical team will feature heavily in our on-going pieces of workforce planning including:

- 2016-2018 business planning and new LEAN & efficient ways of working
- Plans for the leadership and management of doctors that was agreed at a recent CLE
- 7 day working implications and pilots

The Trust will continue to keep a watching brief on the national position and outcomes of work led by Sir Mike Durkin and NHS Improvement and will be in a good position to respond to instructions on wider safe staffing levels or best practice recommendations as a result.

| DATE OF MEETING:              | 7 <sup>th</sup> January 2016 |

# **EXECUTIVE SUMMARY:**

- 1.1 This report is an update on safe nurse staffing November 2015 data.
- 1.2 The daily checking of nurse staffing data has been used to provide this report and provides a realistic picture of staffing on the wards
- 1.3 It is my recommendation that this manual system will continue until the bank module on the e-rostering system can be validated against the daily staffing numbers.
- 1.4 Key questions for the board today continue to relate to gaining confidence in the manual data collection until a better electronic solution can demonstrate the same degree of accuracy.

# **REPORT RECOMMENDATION:**

To receive an update at the February Trust Board meeting

To support the manual, daily checking of nurse staffing as the means of collecting the necessary information to make the national submission.

## SAFE NURSE STAFFING UPDATE

# Report to Trust Board on 7<sup>th</sup> January 2016

## 1 EXECUTIVE SUMMARY

- 1.1 This report is an update on nurse staffing data collected for November 2015.
- 1.2 The daily data check on nurse staffing has formed the basis of the calculations included in the report, this will continue until the bank modules can be fully assessed on the e-rostering system, this is currently under way. The daily checking is time consuming but means that the actual staff on duty is counted by senior nurses to assure themselves that the required levels of nurse staffing is sufficient to meet safety standards and to re-deploy staff where necessary before using temporary resources. This provides better assurance about what is happening shift by shift on all in patient wards and assessment units across the trust.

# **2 NOVEMBER DATA UPDATE**

The fill rates of registered nurses across our medical and surgical wards remain in a safe state with the use of temporary staff to supplement our permanent staff. Group directors of Nursing and matrons are re-deploying staff on a shift by shift basis to ensure that the balance of our own staff to temporary staff is managed. This is not always popular with staff but does ensure that we have a spread of our own staff across the trust which is for the benefit of patient safety. 9% of shifts in medicine and surgery fall below the required numbers despite efforts to keep them at the right level. It continues to be more difficult to fill shifts on our community wards. As detailed in the report about maternity services last month work continues to recruit midwives, some newly qualified staff are being inducted and therefore not included in the overall staffing numbers reported

## **3 RECOMMENDATION**

The Board are requested to receive this update and agree to publish the data on our public website.

Chief Nurse continues to work with the information team to produce consistent and assured data in relation to ward nurse staffing.

Testing of the bank nurse module against the daily manual check will be undertaken during January, this will not form the basis of next months report but the board will be given a view on progress.

Colin Ovington, Chief Nurse

| DOCUMENT TITLE:               | Fully Staffed – Apprenticeship Delivery at SWBH                         |  |  |  |
|-------------------------------|---|--|--|--|
| SPONSOR (EXECUTIVE DIRECTOR): | Raffaela Goodby – Director of Organisation Development                  |  |  |  |
| AUTHOR:                       | James Pollitt – Associate Director of Education, Learning & Development |  |  |  |
| DATE OF MEETING:              | 7 <sup>th</sup> January 2016  |  |  |  |

# **EXECUTIVE SUMMARY:**

This paper makes recommendations in response to the government's recent announcement to introduce an apprenticeship levy. This levy states that all public organisations must have 2.3% of their workforce made up of apprentices. This will mean a cost of approx. £1.4m for SWBH when the levy is introduced.

SWBH already runs a successful apprenticeship programme, which currently employs over 100 apprentices in the Trust and has won regional and national awards, demonstrating this is an area of good practice. The report outlines the steps that need to be taken to meet the government's policy change, and suggests a timeline that is practical for the Trust to implement to be able to support recruiting managers and the apprentices involved.

# **REPORT RECOMMENDATION:**

It is recommended that:

- 1. The Trust adopts option 2 to implement an 'apprentice first' option to all vacant band 1-3 posts with minimal exceptions
- 2. Implementation starts from April 2016 to allow a preparatory year to embed the culture change needed ready for the government's deadline of April 2017.

# PREVIOUS CONSIDERATION:

# Apprenticeship Delivery - the government's 2020 vision

## Strategic context

The Conservative Government made a manifesto pledge to deliver 3 million apprenticeships by 2020. On the 7 December 2015, the Prime Minister David Cameron announced "Today, we're going even further with our Apprenticeship 2020 vision. We will make every part of the public sector – from Whitehall to local government, the NHS to the police ensure that apprentices form at least 2.3% of the workforce".

The changes will all be set out in a package of measures called "English Apprenticeships – Our 2020 vision", with the vision of hoping to increase the ratio of 16- to 18-year-olds starting an apprenticeship to 1 in 10 by 2020.

In his Autumn Statement, the Chancellor of the Exchequer introduced an Apprenticeship Levy which is designed to generate the income required to fund the additional apprenticeships being offered. This will be applied to organisations with a salary bill of over £3 million at a rate of 0.5% of the wage bill and will be collected through PAYE and payable alongside income tax and national insurance. This will come into effect from April 2017. The levy payment for SWBH Trust will be approximately £1.4 million per annum.

Our Trust needs to position itself so it can meet the government's requirements without impacting negatively on our financial position and staffing numbers. That will require a significant change relating to the employment and training of apprentices. Changes will be required:

- in the recruitment and selection process of employees in band 1-3
- a contractual change in our approach to employing apprentices
- agreement from Staffside regarding these changes.

#### **Current situation**

SWBH Trust already has a self-set target to deliver 100 new apprenticeships annually which we are on track to achieve. The apprentices currently on our programme are classed as supernumerary. This means that although their salary is funded from service budgets, they are not occupying a vacant post and as such are not counted in the staffing figures.

This latest announcement changes that position as apprentices will now have to be part of our staffing figures. Early consultation with the staff side convenor and other trade union colleagues has taken place regarding the government announcement and how the Trust responds to the challenge faced. At PPAC on the 23<sup>rd</sup> December 2015 it was agreed by all that this is a must do, and that more detailed planning is needed to fully embed apprentices into the organisation.

# **Review of Options**

1. **Option 1** – Continue with the current SWBH approach, but double the number of apprentices to circa 200 which represents about 2.3% of the workforce.

Currently we are delivering the agreed 100 apprenticeships. This will provide an annual income of around £250k based on an average of £2k per apprentice from Skills Funding Agency (SFA) and potentially £500 from Health Education England. Both these income streams cannot be guaranteed and can change with little notice. If we increase the number of apprentices to 200, it will double the income but will need additional infrastructure to support the increased delivery of apprenticeships. The cost of this increase would be circa £125k per annum.

The recruitment and selection process would also have to change as the apprentices would no longer be considered supernumerary. However there will not be a job offer at the end as they will not be filling a vacancy. Financially this option would create a funding deficit of circa £900k against the proposed apprenticeship levy.

2. **Option 2** – Introduce an 'apprentice first' approach that places an apprentice as a first option in all vacant band 1-3 vacant posts.

This strategy would require a significant change in how we recruit, select and succession plan our workforce in order to provide the number of apprentice opportunities required.

There would need to be an 'opt out' clause; however these must be kept to a minimum. Suggested clauses would be:

- If there was significant risk to service delivery due to the number of trainees in the service area or ward
- Where staff are at risk
- Where no formal qualification is required for the role e.g. domestic services.

The apprentice would be counted in the staffing numbers as they would be training to fill a live vacancy. There would be expectation that the apprentice would automatically secure the vacant position upon successful completion of the apprenticeship.

Adopting this approach would provide the income described in option 1 (£500k) but would also provide an in-year efficiency against the salaried post of around £9k based on a Band 2 post. (Apprentice salary = £6500, Band 2 midpoint = £15,432). Working on the 2.3% of the workforce having to be apprentices and based on 7000 staff we would have to deliver 214 apprentices per year.

This would provide an annual salary efficiency of circa £1.9million. This money would be used to offset the apprenticeship levy (£1.4m) with the financial surplus held centrally as contingency funds. The additional funds from SFA would be used to support the increased infrastructure required for apprenticeship delivery and staff development.

**3. Option 3** – Introduce a combination of options 1 and 2 over a transition period.

This would enable the Trust to continue to successfully deliver apprenticeships as it has done in the past and allow time for the development and embedding of the process described in option 2. It would be a practical solution designed to create some flexibility during the early implementation\ transition period of option 2. This period would be April 2016 – April 2017. The financial benefits realised will be a combination of those described in option 1 and 2.

# Conclusion

There are still a lot of unknowns in the recent changes to the apprenticeship funding and delivery, however, progress made to date within the Trust regarding the support and employment of apprentices has been positive.

There has been a significant shift towards the use of apprentices in SWBH, but there remains some cultural barriers which need to be addressed around employing apprentices in the Trust. All options above will present organisation challenge which will require support for recruiting managers and process change to enable the level of apprentices to be recruited and supported that is needed.

# Recommendations

It is recommended that:

- 3. The Trust adopts option 2.
- 4. Implementation starts from April 2016 to allow a preparatory year to embed the culture change needed ready for the government's deadline of April 2017.

|-------------------------------|---|--|--|
| SPONSOR (EXECUTIVE DIRECTOR): | Colin Ovington – Chief Nurse                  |  |  |
| AUTHOR:                       | Estelle Hickman – Equality and Diversity lead |  |  |
| DATE OF MEETING:              | 7 <sup>th</sup> January 2016                  |  |  |

# **EXECUTIVE SUMMARY:**

The Trust is required to produce an annual report on equality in January 2016. The draft report was previously discussed at the Board subcommittee on Public Health, Community Development and Equality. The final amendments to be made include the addition of data which has traditionally been by calendar year and therefore cannot be produced in advance of the Board meeting. This data will be circulated as soon as it is prepared and in advance of the publication date.

# **REPORT RECOMMENDATION:**

Discuss and approve the report in draft stage and to agree that the data can be checked by the Chief Executive, Chief Nurse and Director of Organisational Development prior to publication on the Board's behalf.

# <u>Appendices</u>

Appendix 1 - Workforce Equality Data

**Appendix 2** - Public Sector Duty workforce data report

**Appendix 3** - Patient Data Disaggregated

# **Executive Summary**

This document is the Trust response to the Public Sector Equality Duty requirement to publish Equality monitoring data of our workforce and service users and to show how we are:

- ➤ Eliminating unlawful discrimination, harassment and victimisation and any other conduct prohibited by the Act.
- Advancing equality of opportunity between people who share a protected characteristic and those who do not.
- Fostering good relations between people who share a protected characteristic and those who do not.

The New Equality regulations require us to publish 'relevant, proportionate information demonstrating our compliance' annually and to set and publish 'specific, measurable equality objectives' every 4 years.

Equality and Diversity is a corporate function and remains a key priority of the Trust we are compliant with the Care Quality Commission, the Equality, Diversity and Human Rights (EDHR) Public Sector Duties and with current Equality Legislation.

The Trust has made significant progress over the years in ensuring that the well being of patients, visitors and staff remains central to all of it functions. We aim to consistently provide quality health care that meets the needs of our local communities and make sure that the services we offer are inclusive. Our staff work hard to create an environment which ensures equal access regardless of age, disability, gender, religion or belief, ethnic background, sexual orientation, gender reassignment, or socio-economic status.

As an employer, we ensure that our staff are kept informed, involved and are competent and confident in delivering the services we provide. Through proactive leadership we support and promote equality and diversity to ensure that our staff can work in environments free from discrimination.

As a service provider, we ensure that the needs of our patients inform the provision and delivery of our services, with the adoption of the equality delivery system2 template. Our engagement agenda provides us with the opportunity to listen, act and learn whilst enabling our service users to be involved and have confidence in what we do.

Whilst we have been able to demonstrate compliance through our achievements and ongoing progress with the equality agenda we cannot become complacent. We have a number of projects and future actions to undertake that will ensure we remain steadfast in our resolve to achieve better health outcomes for all and reducing the health inequalities experienced by many groups within our communities.

The Trust Board is committed to developing ever more consistent links into our local communities, working with voluntary sector, faith, and grassroots organisations. The development of our governing body and the expansion plans we have for our charitable foundation will also reinforce this work.

# **Public Sector Publishing Obligations**

In accordance with Public Sector Equality Duty requirements we have to provide information on our workforce and patients around the following protected characteristics:

- Ethnicity [Race]
- Disability
- Age
- Religion or belief
- Sex
- Sexual Orientation
- Gender Reassignment
- Pregnancy & maternity
- Marriage & Civil Partnership

# Public Sector Equality Duty Equality Report

**Section one: Overview** 

# 1.1 **Introduction**

The Trust is committed to achieving equality and inclusivity both as an employer and as a provider of services. We are determined to ensure that our policies and practices meet the needs of all service users as well as those of our staff. We will publish our equality assurance and objectives on our websites and in print format on request.

# **Organisation Profile**

Sandwell and West Birmingham Hospitals NHS Trust is an integrated care organisation. We are dedicated to improving the lives of local people, to maintaining an outstanding reputation for teaching and education, and to embedding innovation and research.

Our teams are committed to providing compassionate, high quality care from City Hospital on Birmingham's Dudley Road, from Sandwell General Hospital in West Bromwich, and from our intermediate care hubs at Rowley Regis and at Leasowes in Smethwick (which is also our standalone Birth Centre's base). The Trust includes the Birmingham and Midland Eye Centre (a supraregional eye hospital), as well as the Pan-Birmingham Gynae-Cancer Centre, our Sickle Cell and Thalassaemia Centre, and the regional base for the National Poisons Information Service – all based at City. Inpatient paediatrics, most general surgery, and our stroke specialist centre are located at Sandwell. We have significant academic departments in cardiology, rheumatology, ophthalmology, and neurology. Our community teams deliver care across Sandwell providing integrated services for children in schools, GP practices and at home, and offering both general and specialist home care for adults, in nursing homes and hospice locations.

Sandwell and West Birmingham employ around 7,500 people and contains some of the most diverse localities within the West Midlands and is considered one of the most diverse urban areas of Britain (Office for National Statistics). The Trust is responsible for the care of 530,000 local people from across North-West Birmingham and all the towns within Sandwell.

# Committed to public health and local regeneration

We are a key partner in efforts to change the shape of care in our area. The 'Right Care, Right Here' partnership has now run for ten years. Our intention is to provide substantially more care at home and rely less on acute hospitals. We aim to move 350,000 appointments out of traditional settings and close a further 20% of our hospital beds, as we have safely closed 25% over the last ten years. Whilst most of the programme involves investment in GP surgeries and health centres, we still plan to relocate our acute care into a single purpose built hospital. A site on Grove Lane in Smethwick has been purchased for this purpose, following public consultation in 2006. Our plans were approved in 2014-15 and we will open our new facility (Midland Metropolitan Hospital) in 2018-19. The new hospital will act as a major employment opportunity for local people and is part of a wider scheme to develop the area adjacent to the site.

Our training and education team are outward facing in sourcing the workforce we need for the long-term. We have a very active programme of apprentices and school experience joint working. We are partners in the Sandwell University Technical College development. More widely we work closely with Birmingham City University, Wolverhampton University, Birmingham and Aston Universities. The Learning Works is our community-based recruitment and training resource.

During 2014-15 we published our Public Health and Community Development strategy, which outlines the contribution we currently make and plan to make to tackling the underlying causes of ill-health in the communities that we serve.

# **Trust Vision**

Our vision is to help improve the health and wellbeing of people in Sandwell, Western Birmingham and surrounding areas, working with our partners to provide the highest quality healthcare in hospital and closer to home.

We have been working on our 2020 vision since 2014 with teams and services, clinicians and managers, having time to consider and develop their ambitions and plans for transforming the care they provide. Starting with our leadership conference in 2014, workshops, surveys and other tools have allowed us to test and refine the ideas of our staff, and to engage patients in developing ideas.

In July 2015 we launched our draft vision for care in 2020 and engaged with staff, patients, stakeholders and third sector organisations to gain their views. Our 2020 vision now reflects that feedback.

Our eight clinical groups have worked through how they can support each other's plans. This work has led us not just to choices about priorities but also to a descriptive series of patient stories showing how care models will change. In many cases most care will be delivered in the same way, and certainly to high quality standards but in all sorts of ways we expect to change the coordination of care - joining up more effectively with patients and their relatives, with GPs and other care partners, and across our own organisation, between sites and specialties. This coordination is a seven day a week ambition.

Our detailed plans will evolve as time moves on but the direction of travel is clear and consistent, in line with this 2020 vision. We want to take a lead role in disease prevention. We aim to provide care for long-term conditions in different ways and in partnership with GPs. Acute hospital care will be specialised and centralised for excellence and longterm rehabilitation and social care will be part of what we do, working alongside others to meet the changing needs of our population.

#### **Trust Values**

The Trust vision is underpinned by its values and as an employer and provider of services we pride ourselves in being;

- Caring and Compassionate
- Accessible and Responsive
- Professional and Knowledgeable
- Open and Accountable
- Engaging and Empowering

The Trust annual report published in September 2015 set out our priorities and our achievements to date. For more information about our Trust please view a copy of our annual report and annual plan at: <a href="http://www.swbh.nhs.uk/our trust/annual-reports">http://www.swbh.nhs.uk/our trust/annual-reports</a>

# 1.2 **Public Sector Duty**

The Equality Act 2010 places a Public Sector Equality Duty [PSED] on public bodies and others carrying out public service functions. The aim is to embed equality considerations in the day-to-day work of public bodies. It requires us to consider how our activities as an employer and our decision making as provider of services, affect people who share different protected characteristics.

.

- > Age
- Disability
- ➤ Gender Reassignment
- Marriage and Civil Partnership
- Pregnancy and Maternity
- Race, including ethnic or national origins, colour or nationality
- Religion or belief
- > Sex
- Sexual orientation

The Equality Duty has three main aims which are to:

- ➤ Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act.
- Advance equality of opportunity between people who share a protected characteristic and those who do not.
- Foster good relations between people who share a protected characteristic and those who do not.

Regulations came into effect in September 2011 requiring all public sector bodies to publish 'relevant, proportionate information demonstrating compliance' and to set 'specific, measurable equality objectives'. As an NHS organisation we are required to:

- Publish a report annually which explains how we achieved the general duty and provide information about people who share a 'protected characteristic'.
- Publish our Equality Objectives by 6 April 2012, which will include a plan of what we intend over the next four years.

# 1.3 **Key Achievements**

Over the last few years we have introduce a number of initiatives and measures to improve the experiences and outcomes for our patients and staff. These include:

- Introduction of designated Baby feeding facilities.
- Introduction of our Customer Care Promises.
  - To improve patient confidence and experience in our care delivery
- ➤ In-house patient experience surveys across all clinical settings.
  - To ensure that our services meet the needs of our patients
- > Improved Signage and accessibility to our buildings, wards, departments and car parks.
  - Enabling equal access to all our patients, visitors and staff

- Introduction of Website access and route plans to our hospitals and departments via 'DisableGo' website, the link is on the Trust website.
  - Our patients and visitors are able to view and print off the route to their destinations within the hospital, at home
- Improved access resources/equipment for identified equality patient groups, e.g. disability, other disadvantaged groups.
  - ensuring that our patients and visitors can access appropriate wheelchairs, hearing loops, lowered reception counters, information kiosks, PALS
- ➤ Language Line and face to face interpreters via our Interpreting Services.
  - introduction of an in-house trust bank service offering interpretation of the top 10 languages.
  - ensuring our patients are involved with their treatment and care, and confident in their decision making.
- Initiatives to improve our services to vulnerable adults and those with dementia and Learning Disability.
  - Introduction of dementia-friendly wards.
  - Appointment of activity coordinators to interact with dementia patients.
  - Appointment of Learning Disability Liaison Nurse
  - Each clinical area have 'The Hospital communication Book' designed by the Clear Communication People Ltd, to improve patients care, confidence and safety.
- ➤ The successful integration of the Community Services into the Acute Trust.
  - Enabling a seamless approach to care and service delivery for all patients.
- Increased staff awareness of Equality, Diversity and Human Rights agenda via our in-house training programmes (98.19% of our staff have received training to date).
  - Equality, Diversity and Human Rights training is now included in the Trust Mandatory Training programmes to ensure that all staff access the training.
- ➤ Host staff Equality and Diversity conferences
  - We have hosted two Equality and Diversity conferences for staff as part of our awareness campaign. Staff feedback included statements such as:

"Should be a must for all Trust employees"

"Pt experience stories – excellent and powerful"

"Excellent content - Very thought provoking"

"Very informative and an eye opener for those who feel they have no issues"

- Improved patient menu choices
  - Our patient and community engagement enabled us to improve the food we provide for our patients.
- Improved the diversity of our chaplaincy/spiritual care team
  - We have appointed our Faith Specialist Chaplains for Sikhs and Muslim women and children
  - We have introduced a 'Bank of Locum chaplains' to enable to provide a wider range of faith specialist chaplain's e.g. Buddhists and black Christians.

To ensure that the diverse needs of our patients and staff are integrated into our work at all times we have in place:

- > The commitment of the Trust Board
- Continuous improvements of policies and practices based on our Ward and departmental reviews

- Our equality delivery framework ensuring monitoring and regular reporting
- Effective community engagement activities
- Equality Impact assessments of our policies, services and functions.
- Continuous roll out of the Equality Delivery System (EDS2).
- Introduced a Cultural Ambassador programme
  - The aim is to ensure fairness in how BME employees are treated in formal processes.
  - Ambassadors will act as mentors to affected employees and join panels for formal processes.
  - They will work alongside our new investigations unit for disciplinary and grievance procedures.

# **Section Two – Equality Activities**

The Trust wants to support its local communities by providing quality health care that meets their needs, by making sure that the services we offer are inclusive. We work hard to create an environment which ensures equal access regardless of age, disability, gender, religion or belief, ethnic background, sexual orientation, gender reassignment or socio-economic status.

# 2.1 **Equality Delivery System**

Sandwell and West Birmingham Hospital Trust adopted EDS2 as a framework to deliver better outcomes for both staff and service users and embed equality into our mainstream activities. The EDS2 is intended to help us with the analysis of our equality performance that is required by section 149 of the Equality Act 2010 (the public sector equality duty), in a way that promotes localism, whilst helping us to deliver on the NHS Outcomes Framework, the NHS Constitution and the Human Resources Transition Framework. It also will help the Trust to continue meeting the Care Quality Commission's (CQC) 'Essential Standards of Quality and Safety'.

The Equality Delivery System2 (EDS2) is a set of nationally agreed objectives and outcomes comprising of 18 outcomes grouped under the following 4 goals:

- Better health outcomes
- Improved patient access and experience
- > A representative and supported workforce
- Inclusive leadership

We grade our equality performance against the EDS goals Red Amber Green rating below:

Excelling - Purple
 Achieving - Green
 Developing - Amber
 Undeveloped - Red

# 2.1.1 Implementation

Effective implementation is vital to the success of the EDS2 and the Trust is committed to achieving positive outcomes through this process. As part of the implementing and embedding the EDS2, we held a number of stakeholder events, recruited and trained 'Lay Assessors' across the Birmingham and Black Country region and have developed our own Trust 'Local Interest Group'. The Trust holds the Lay Assessor database which Black Country NHS organisations can access on request.

In partnership with our Local Interest Group we undertake assessment workshops with service leads and staff members as part of the Trust initial equality performance analysis. This work resulted in the development of our Strategic Equality Objectives.

A great deal of activity is taking place to support the implementation of EDS2 within the organisation.

## 2.1.2 **EQUALITY AND DIVERSITY SCHEME OBJECTIVES**

Building on discussion held by the Board to date we have framed our plans against the four components of the national scheme. That scheme will form a contractual obligation on the NHS in 2015-2016. The italicised materials are the things that we will do.

# **Better Outcomes**

As a trust we are committed to ensuring better health outcomes for all patients. We have a growing portfolio of data that demonstrates progress on this journey. What we need to be undertaking is an analysis against key protected characteristics, triangulated with our outcome data. This will demonstrate to us whether we are having an equitable impact and whether we need to concentrate efforts in a different way. We know that patient feedback via complaints or surveys does not demonstrate any real variation, this needs to have continuous monitoring as we embrace E&D further. In particular we need to ensure that we are acting to provide an acceptable environment of care for people who are deaf or visually impaired.

This data will be made available monthly to the CLE equality committee.

# Improved patient access and experience

The crucial element is for us to concentrate on actively valuing and supporting diversity, not simply ensuring that we comply with legislative minimum standards. We need to do this without creating any undue preferences, or discrimination or tokenistic gestures. Patients, visitors to the trust and our staff should be able to feel and talk about our inclusiveness in this context

We currently collect data about the patient populations who access our services. The use of outpatient kiosks will be our vehicle to improving patient data from quarter 3 this year. We then need to use this data to explore how people with the protected characteristics access and use our services.

We will agree a specific quarterly audit programme as part of our clinical and internal audit work for 2015-16. Where possible we will secure experts by experience from local groups to audit with us.

# A representative and supported workforce

We have strong trade union representation on E&D, particularly though the Royal College of Nursing and that has given rise to the Cultural Ambassadors programme which started during September. The aim is to ensure fairness in how BME employees are treated in formal processes and to have ambassadors who will act as mentors to affected employees and join panels for formal processes

Our BME ambassadors pilot has now commenced and will run until autumn 2015.

To ensure that we have a full understanding of the diversity of our staff groups we will undertake towards the end of 14-15 a one off ESR data validation, this will help us describe directional changes we need to make in creating a talented workforce for the future.

The CLE education committee is overseeing analysis of training requests and training funds vs ESR protected characteristics data. This will be available in draft at the end of January 2014, in time for

our annual Public Sector Equality Duty declaration. This will be compared to our overall by band staff profile.

Our workforce includes those people from our community who volunteer in the Trust, as we develop our voluntary services programme we will actively recruit not just for the values, skills and attributes they bring but also make due consideration about how we can make best use of their protected characteristics, e.g. cultural variations, language.

Our volunteering plan will reflect the opportunity to reach communities hitherto excluded from employment within the Trust.

In order to ensure that our workforce is able to reflect the characteristics the law protects and our population contains, we will look again to support peer groups in each of the nine characteristics. Presently we have one such group. Learning from past failures, this will be on the basis of supporting enthusiastic individuals with time off, rooms, material, rather than trying to 'corporatise' their work.

By the end of 2015 we expect to have groups covering each characteristic within our organisation.

# **Inclusive Leadership**

The proportion of band 8 and above senior leaders in the Trust with a protected characteristic rises to closely align to the workforce profile and to local demographics over a three year period. To help achieve this we will ensure that staff at all grades have access to the necessary preparatory training opportunities to help them achieve their career and leadership goals.

A specific programme of peer group mentorship will be put in place during 2014-15.

Finally, we have work to do to give a voice or platform to both individuals in senior roles from traditionally excluded backgrounds, and to issues faced by those with protected characteristics. Bearing that in mind, we will explore how we can:

- On a monthly basis, focus events and communication on specific protected characteristics in our population.
- Ensure much greater visibility within our promotional and staff communications material for

the genuine diversity we have in our midst at a senior level

# Measures of Success (to be included in annual plan 2015-16)

- The Trust can demonstrate progress on EDS2 scoring over a two year period, with role-model teams reaching the highest ratings over time and no red rating being judged in 2016 17
- ii. The Trust successful bids for accreditation in this field from relevant bodies (NHS Employers, Stonewall etc)
- iii. Patient feedback demonstrates that we have actively engaged with them and that no complaints are received in relation to discrimination
- iv. Staff with key protected characteristics have access to and receive training to support their career and leadership aspirations. The leadership cadre of the trust mirrors closely the protected characteristics of the population we serve by 2016/17
- v. The proportion of band 8 and above senior leaders in the Trust with a protected characteristic rises to closely align to the workforce profile and to local demographics over a three year period.

# 2.1.3 **Equality Performance Assessments**

In the first phase of the Trust EDS2 rollout programme we have successfully completed 23 service areas 3 of which have now been fully rag rated in accordance with the EDS2 toolkit. The assessments have been very successful in terms of local engagement - our last RAG rating panel workshop comprised of 15 local people representing majority of the Protected Characteristics.

# 2.1.4 **Grading Outcome**

The Services that have gone through the formal RAG rating workshops (Local Interest Group) have been graded as Amber (developing) or Green (Achieving), where there are Red (underdeveloped) ratings, action plans have been developed to address issues/concerns. The ratings illustrate that compliance within the equalities agenda is visible however there is no room for complacency as there is much work to be done. To view a copy of the grading report see:

https\\www.swbh.nhs.uk/about-us/trust-profile/equality-and-diversity/the-equality-delivery-system-and-equality-objective

Our Equality delivery Framework is monitored by a sub-committee of the Trust Board, the Public Health, Community Development and Equality Committee chaired by the Trust Chairman. There are three subgroups, each chaired by a senior manager, reporting into the Public Health, Community Development and Equality Committee;

This structure provides leadership, monitoring and reporting functions to give assurances to Trust Board. It also supports the organisation in the development and promotion of good practice in equality and diversity as a service provider and employer. Minutes of the meetings are available on request.

In April 2010 the Equality Act was published with a phased implementation to commence in October 2010.

A gap analysis has been completed to determine how the Trust complies with the new arrangements. The results showed that overall the organisation was able to meet the requirements of the legislation and where it was not able to demonstrate full compliance an action plan was developed. The actions were embedded into the appropriate existing action plans to ensure the issues were addressed and rectified at service level.

# 2.2 **Training**

**Board Training:** Equality and Diversity awareness and training has been part of the Board's development program, this has included workshops by external equality consultants such as Equality Works.

**Staff Training:** We have included Equality, Diversity and Human Rights training in the Trust Mandatory training programmes and it also forms part the Trust Personal Development Review (PDR). The programmes are designed in line the Knowledge and Skills framework (KSF) and delivered by the Equality and Diversity team. The content incorporates awareness of Dignity in the workplace, including the legal, moral and social duty to promote Fairness, Respect, Equality, Dignity and Autonomy (FREDA) in line with the Human Rights principles.

Other training such as Corporate Welcome, Conflict Resolution, and Customer Care also incorporate and discuss the principles of equality and duties in relation to behaviours and attitudes. The Training Focuses in particular on identification of discrimination, victimisation and harassment and the processes in place to support the elimination of such behaviours and practices in the workplace.

The E&D Advisor has developed bespoke training programmes aligned to the KSF Core dimension 6 levels 1 & 2 and 3 & 4. The level 1 & 2 programme is aimed non clinical staff at bands 1 -4 and clinical staff at bands 1-5 and the level 3 & 4 programme is aimed at all other staff within the organisation to ensure that equality and diversity is embedded into the core business areas of the Trust. The training will assist managers in supporting staff, challenge discrimination and develop an equality friendly environment.

E&D provides individual support to managers in undertaking Equality Impact Assessments and evidencing the Equality Delivery System2 within their areas.

The E&D Advisor is visible across the organisation providing support, advice and specialist information to staff. We provide team based training in clinical areas and departments, individual staff support as well as guidance to facilitate changes to improve the wellbeing of our patients and staff.

# 2.3 **Equality Impact Assessments**

We undertake Equality Impact Assessments (EIAs) on all new and reviewed policies, services, functions and transformation schemes.

Some of the outcomes from our EIAs have been highlighted previously in our key achievements. These have resulted in improved access and experiences for our patients and staff.

Embedding the practice of conducting equality impact assessments is ongoing to ensure that we continue to provide services and practices that meet the needs of all patients and staff. It also enables us to continuously promote of equality and challenge discrimination both as an employer and as a service provider.

# 2.4 Patient Engagement

Along with our patient surveys this activity provides one of the most effective ways to capture genuine and meaningful information which is important to each community. It provides powerful feedback that can influence the way the Trust provides its services, interact with individuals and create environments where people feel valued, respected and at ease. It also helps to build staff confidence and competence when caring for their patients.

# **Patients**

To support our engagement processes for patients, we have

- Patient Experience Surveys
- Patient Advisory Liaison Service (PALS)
- Equality & Diversity Local Interest Group

Patient Experience Surveys (Update pending – Kuldeep Singh)

# **Employees**

Employee's at all levels within the Trust are responsible for ensuring that their behaviour is consistent with our values, customer care promises and associated Trust policies and guidance. All managers are responsible for maintaining the equality principles within their areas and ensuring all equality issues are effectively managed. Employee's are made aware that it is the responsibility of all individuals to promote equality and avoid discrimination in their practices and behaviours.

Throughout the Trust there are a number of engagement methods used to ensure employee's are informed, engaged, have their views heard and able to influence. These include initiatives such as daily electronic Staff bulletins, Monthly Hot Topic meetings chaired by the Chief Executive or other members of the Executive team, Staff Magazine, local departmental meetings. Staff views are also sought via staff surveys and other consultations taking place within the Trust.

## **Volunteers**

Sandwell & West Birmingham Hospitals NHS Trust is developing its network of volunteers to support the Trust and its patients and visitors in a whole host of activities. We want you to join the team. Our volunteers provide invaluable support and make a real difference to people's lives. We want to grow our team. There are a range of ways that you can be involved in volunteering including:

- Mi Way Way-finding: helping direct people through the Trust's sites, buildings and facilities; helping people check-in for their appointments, accompanying people to their appointments
- Mi Day Recreational activities: helping people take part in activities while they are being cared for by our services
- Mi Plate Mealtime assistance: helping people at mealtimes who may need assistance either in hospital or in the community

# Where are we now?

A robust recruitment process is underway which will result in volunteers joining the service to be deployed across the Trust to support way finding [at check in kiosks] and provide support for patients in the inpatient settings [ support with nutrition, reading etc.]

# **Intentions for 2016 and beyond**

To work with the community

Volunteers offer a significant contribution across all disciplines not only to support staff in their endeavours but also as a means to share experiences and expertise and 'to give' back to the community at large. We will ensure this by making our message of involvement clear on our website and by ensuring use of appropriate social media. Also by entering into partnership with school and colleges about the opportunities to volunteer

# To be inclusive

SWBH NHS Trust serves a large and diverse population and consequently our volunteer service needs to reflect this and it is our intention to ensure that our volunteer colleagues are proportionately representative of the community we serve in order to gain the maximum benefit and enhance patient experience. We will achieve this by actively engaging with community groups and organisations to seek their support in identifying ways that will encourage people to want to work with us.

## To value our volunteers

When people take the time and trouble to offer her time to us we need to make sure this is recognised and appreciated. We will make sure that our substantive staffs recognise their part in appreciating volunteers. We will also hold regular updates for our volunteers on matters of interest/development. Working with our partner volunteers ie Agewell, cancer services, stroke etc we will hold regular updates to share ideas an developments and to develop a recognition award for the volunteers.

# • To be responsive

The success of volunteers depends upon true partnership between the Trust staff and those people who offer their time as volunteers. We will work with Clinical groups and divisions to seek the views/needs from a volunteer service to make sure that we are all engaged in the same effort.

## What does success look like?

Success will relate to the number of people we have recruited to volunteer and the length of time they continue to volunteer with us. The latter relative to the volunteer's motivation to volunteer.

A milestones and targets plan is drafted but in summary our measure of success would be that by 1<sup>ST</sup> January 2018 we would see:-

- A total complement 800 volunteers in the Trust deployed through the various Mi themes
- Volunteer support available 7 days a week through the various mi themes
- Weekly recruitment interviews with volunteers joining us every month
- Monthly updates to volunteers programme
- Volunteers supporting carers with patients in our care
- Volunteers in community settings supporting patients in out of hospital settings
- A volunteer workforce representative of the population served and of the protected characteristics
- A volunteer complement that when benchmarked with comparative Trusts has equal if not more than neighbouring Trusts
- A minimum of 30 regular volunteers in each clinical group depending on size and purpose

# **Community Engagement**

The Equality & Diversity team 'outreach' to a wide variety of community groups with sessions held in the community. People attending are asked to give their views on the care they have received with a particular emphasis on them as individuals. There is an acceptance by respondents that it would be an impossible task for the hospital to meet their individual needs and this is taken into consideration in their responses.

The feedback is reported through our Clinical Leadership Executive committee and to the individual managers where actions to address where possible. Questions asked are categorised into four areas; Hospital meals/food, Privacy and care, Environment/Cleanliness and Communication/language.

The information has already influenced a number of our key achievement outcomes for our patients and visitors.

During 2015 the Trust set up its first community engagement network, a network of SWBH staff who engage with different parts of the community. The group has had representation from equality and diversity, volunteering, maternity services, community children's services, learning and development, corporate nursing, fundraising, membership and staff side.

The purpose of the network is to share community connections so that the Trust can be more engaged in the diverse communities that we serve and to plan community engagement activities. Through the network Sandwell & West Birmingham Hospitals NHS Trust has engaged with a number of community groups, representatives and projects including the Health Lottery funded schemes supported by Aspire and Succeed for the Lozells area.

We have also worked with groups to identify work experience, volunteering and apprentice opportunities within the Trust.

The network has set its 2020 vision for community engagement and has identified some key ambitions. In 2020 we will:

- Have strong links with all established and transient community groups within the Sandwell and West Birmingham areas
- Have a vibrant, large group of volunteers who are active and reflect the local community,
   with particular involvement from BME groups and new communities
- Have an engaged membership that involves people from all of the community groups that we serve as well as meaningful patient networks
- Have a membership that is in contact with all areas of the Trust's work
- Have no cultural barriers for people who want to work with us or people who need to access our services
- Be renowned among Sandwell and West Birmingham community groups as a Trust that engages and gives back to the community, actively supporting health and wellbeing
- Have routes to learning and employment for people from the community who currently find it difficult to work with us
- Know we are succeeding because the community will tell us so.
- Have an embedded annual events programme designed around the needs of different communities

Our priorities for the year ahead are to:

- Promote the community engagement 2020 vision to colleagues within the Trust and externally
- Establish a programme of internal volunteering where every member of staff is able to volunteer for one day per year to support the local community

# **Section Three – Monitoring**

3.1 <u>Workforce Equality Information and Analysis</u> (Update pending – Andrew Harding and Raffeala Goodby Data will not be available until early in January 2016)

The NHS is the largest employer within the United Kingdom it employs in the region of 1.4 million people. There is a plethora of evidence and data regarding the NHS workforce and the experiences of its staff. The NHS represents society at all levels because of the diversity of its workforce.

Outlined below are some of the reported experiences of staff working within the NHS;

- 3.2 <u>Trust Workforce Equality Data</u> (Update pending Andrew Harding and Raffeala Goodby)
  - Staff in Post
  - Leavers
  - Promotions
  - Recruitment
  - Professional Development Review

- Cases in Formal Procedures
- 3.3 Pay Gap Audit (Update pending Andrew Harding and Raffeala Goodby)
- 3.4 <u>Staff Surveys</u> (Update pending Andrew Harding and Raffeala Goodby)

# 3.5 Workforce Equality Data (Update pending – Andrew Harding and Raffeala Goodby)

The Trust reports annually on its workforce disaggregated by Ethnicity, Gender, Age, Disability, Religion and belief and Sexual Orientation. With the introduction of the new equality legislation the number of protected characteristics has expanded to include Gender Reassignment, Pregnancy and Maternity and Marriage and Civil Partnership. The Trust is actively seeking to improve its workforce data, and our employees are encouraged to disclose equalities information.

# 3.6 Patient Data (Update pending - Matthew Maguire)

Our patient information can be disaggregated based on ethnicity, gender, age, marital Status and religion. Information on sexual orientation, disability and gender reassignment is not captured on a regular basis due to constraint on the current national Patient administration System [PAS] and therefore the data is limited.

The Equality and Diversity department is working with the Information Department to actively address the gaps in equality monitoring across the organisation.

A breakdown of our patient data by ethnicity for the period April to December 2014 can be seen in Appendix 3.

- 4.0 <u>Conclusion</u> To be completed
- 5.0 Future Activities To be completed
