

AGENDA

Trust Board – Public Session

Venue: Board Room, SGH

Date: 4 February 2016; 1330h – 1630h

Members attending:

Mr R Samuda (RSM) Chairman
 Ms O Dutton (OD) Vice Chair
 Dr P Gill (PG) Non-Executive Director
 Mr M Hoare (MH) Non-Executive Director
 Mr H Kang (HK) Non-Executive Director
 Mr R Russell (RR) Non-Executive Director
 Cllr W Zaffar (WZ) Non-Executive Director
 Mr T Lewis (TL) Chief Executive
 Mr T Waite (TW) Director of Finance
 Dr R Stedman (RST) Medical Director
 Mr C Ovington (CO) Chief Nurse
 Ms R Barlow (RB) Chief Operating Officer
 Miss K Dhami (KD) Director of Governance
 Mrs R Goodby (RG) Director of Organisation Development

In attendance:

Mrs C Rickards (CR) Trust Convenor
 Ms R Wilkin (RW) Director of Communications
 Mr A Kenny (AK) Director of Estates

Board Support

Mr D Whitehouse (DW) Head of Corporate Governance

Time	Item	Title	Reference Number	Lead
1330	1.	Apologies	Verbal	DW
	2.	Declaration of interests <i>To declare any interests members may have in connection with the agenda and any further interests acquired since the previous meeting.</i>	Verbal	Chair
1335h	3.	Patient story	Presentation	CO
1355h	4.	Minutes of the previous meeting <i>To approve the minutes of the meeting held on 7 January 2016 as a true and accurate records of discussions</i>	SWBTB (01/16) 218	Chair
	5.	Update on actions arising from previous meetings	SWBTB (01/16) 219	DW
1405h	6.	Questions from members of the public	Verbal	Chair
1420h	7.	Chair's opening comments	Verbal	Chair
	UPDATES FROM THE BOARD COMMITTEES			
	8.	Update from the <u>Configuration Committee</u> held on the 22 January 2016	To follow	RSM/ TL
	9.	Update from the <u>Public Health, Community Development & Equality Committee</u> meeting held on the 28 January 2016	To follow	RSM/ TL

Time	Item	Title	Reference Number	Lead
	10.	Update from the <u>Audit and Risk Committee</u> meeting held on the 28 January 2016	To follow	RR/ KD
	11.	Update from the <u>Finance and Investment Committee</u> meeting held on 29 January 2016	To follow	RSM/ TW
	12.	Update from the <u>Quality & Safety Committee</u> meeting held on 29 January 2016	To follow	OD/ CO
	MATTERS FOR APPROVAL OR DISCUSSION			
1435h	13.	Chief Executive's report	SWBTB (02/16) 225	TL
1450h	14.	Trust Risk Register	SWBTB (01/16) 226 SWBTB (01/16) 226(a)	KD
1500h	15.	Board Assurance Framework	SWBTB (01/16) 227 SWBTB (01/16) 227(a)	KD
1510h	16.	Draft 3 Year Clinical Effectiveness/ Quality Objectives	SWBTB (01/16) 228 SWBTB (01/16) 228(a)	RST
1520h	17.	3 Year Safety Plan: Draft Always Events	SWBTB (01/16) 229 SWBTB (01/16) 229(a)	CO
1530h	18.	R&D Plan update	SWBTB (01/16) 230 SWBTB (01/16) 230(a)	RST
1540h	19.	Financial Performance – P09 December 2015	SWBTB (01/16) 231 SWBTB (01/16) 231(a)	TW
1550h	20	Integrated Performance Report	SWBTB (01/16) 232 SWBTB (01/16) 232(a)	TW
1600h	21.	Safe Nurse Staffing	SWBTB (01/16) 233 SWBTB (01/16) 233(a)	CO
1610h	22.	Information Governance Toolkit	SWBTB (01/16) 234 SWBTB (01/16) 234(a)	KD
1620h	MATTERS FOR INFORMATION			
	23.	Q3 Complaints and PALs Report	SWBTB (01/16) 235 SWBTB (01/16) 235(a)	KD
	24.	Any other business	Verbal	All
	25.	Details of next meeting The next public Trust Board will be held on 3 March 2016 at 1330h in the Anne Gibson Board Room, City Hospital.		

Sandwell and West Birmingham Hospitals

NHS Trust

TRUST BOARD PUBLIC

Venue Anne Gibson Board Room, City Hospital**Date** 7 January 2016 1.30pm – 5.10pm**Members Present**

Mr Richard Samuda	Chair
Ms Olwen Dutton	Vice Chair
Dr Paramjit Gill	Non-Executive Director
Mr Mike Hoare	Non-Executive Director
Mr Robin Russell	Non-Executive Director
Cllr. Waseem Zaffar	Non-Executive Director
Mr Toby Lewis	Chief Executive
Ms Rachel Barlow	Chief Operating Officer
Miss Kam Dhami	Director of Governance
Mrs Raffaella Goodby	Director of Organisation Development
Mr Colin Ovington	Chief Nurse
Dr Roger Stedman	Medical Director
Mr Tony Waite	Director of Finance & Performance Management

Also in attendance:

Mrs Chris Rickards	Trust Convenor
Ms Ruth Wilkin	Director of Communications

Board Support:

Mr Duncan Whitehouse	Head of Corporate Governance
-----------------------------	------------------------------

Minutes	Paper Reference
1. Apologies.	
Apologies were received from Mr Harjinder Kang.	
2. Declaration of interests	
There were no declarations of interest.	
3. Patient Story	
Due to technical issues with the IT equipment the patient story was not shown.	
4. Minutes of previous meeting – 3 December 2015	SWBTB (11/15) 204
<p>Resolved: the minutes of the previous meeting were agreed as an accurate record with the addition of Mr Mike Hoare being in attendance and the changes as discussed.</p> <p>In regard to the Integrated Performance Report the dataset in terms of workforce vacancy figures were being analysed through the Group Review process over the coming weeks. This was part of the assurance process in terms of getting an accurate vacancy figure for the Trust. A line by line exercise was being undertaken to ensure a starting point for business planning for the coming year that was accurate. Mr Lewis suggest that he expect the 'true' vacancy figure would</p>	

be closer to 400-500 rather than the current 780 once the data had been cleansed.	
5. Update on actions arising from previous meetings The action log was agreed.	
5.1. Patients on waiting list pre dating eDTA introduction Ms Barlow provided an update on patients on the waiting list pre dating eDTA introduction. There was one patient waiting in December who had now received treatment. This was important because our consent model relies on completion prior to wait listing. In response to a question from Mr Lewis Miss Dhami highlighted that monthly audits were being carried out and the upshot of those would return to the Board in May.	
6. Questions from members of the public	
There were no questions from the public on this occasion.	
7. Chair's opening comments	
Mr Samuda highlighted the event that would be taking place on the 22 January 2016 to mark 1,000 days until the opening of the Midland Metropolitan Hospital. He encouraged as many Board members to attend the event as possible. He highlighted the amount of work still left to do. He once again wanted to thank everybody involved in getting us to this point. He was also heartened by the number of partners that had agreed to attend the event.	
8. Minutes of the Quality and Safety Committee held on the 27 November 2015	SWBTB (12/15) 117
Ms Dutton introduced the minutes of the previous Quality and Safety Committee meeting highlighting the positive lessons that were being learnt from the SAU move in terms of bringing disciplines together and building a culture of effective working relationships. The Committee had also discussed performance in respect of readmissions and cancer care waiting times. Mr Samuda highlighted that the Safety and Quality Plans would be coming to the Board in February which provided an opportunity to reflect on the forward programme for the committee.	
9. Minutes of the Workforce and Organisational Development Committee meeting held on the 3 December 2015 and 7 December 2015.	
Mrs Goodby highlighted the detailed discussions that had taken place in regard to the workforce transformation proposals for 2016-18 and the focus on sickness absence and leadership development. Mr Lewis stated that work was taking place within the Executive to ensure recruitment aligned with the pace of priorities the Trust was committed to with the right skills in place to deliver against our ambitions. Mrs Goodby suggested that in March she would bring that work back to the Board. Ms Dutton challenged the communication messages needed in terms of recruiting nurses from overseas whilst making redundancies and the perception this create for some members of the public. Mrs Goodby highlighted there were specific areas where there were shortages in skilled staff and that there were targeted recruitment campaigns to address these shortages which	

included seeking skilled staff from overseas. It was important to recognise that some of these staff shortages were a national issue and not unique to Sandwell and West Birmingham Trust. Mr Lewis made clear that whilst there could be future redundancies, there was no foreseeable expectation that that would affect the areas being recruited abroad.	
In response to a query from Mr Zaffar it was confirmed that no staff were on zero hour contracts that were directly employed by the Trust, although bank contracts were inevitably zero hours.	
Action: workforce vacancies would form part of the discussion on the workforce transformation work that would be brought back to the Board at its March meeting.	RG
Action: A convincing recruitment end to end process and 'pitch' would be brought to the Board.	RG
10. Minutes of the Finance and Investment Committee held on the 27 November 2015	
Mr Samuda introduced the minutes highlighting the discussions that had taken place around the Capital Programme and the management of the Trust's financial outlook. In response to whether there was any further information from Lord Carter in terms of his national review Mr Waite stated that additional information had been supplied in terms of reference costs and benchmarking information but this needed to be set within the context of more granular local data that would enable informed decisions to be taken going forward. Headline details put the Trust in region of being 3% inefficient which equated to a potential saving in the region of £51m. Further detail was expected from Lord Carter but timescales were unclear.	
11. Minutes of the Charitable Funds Committee on the 3 December 2015	
Mr Zaffar outlined the work that was being undertaken to consolidate and rebrand the trust charity. The changes provided greater flexibility in the use of the funds and importantly would raise the internal and external profile of the charity. There would be further discussion on the Private Board agenda on the matter.	
12. Minutes of the Public Health, Community Development and Equality Committee held on the 26 November 2016	
Mr Samuda introduced the minutes highlighting the conversations that had taken place around protective characteristics. In terms of the Public Health Plan the main area of deviation related to objective 5: reducing alcohol related admissions which was now receiving detailed attention from Dr Stedman. In terms of objective 6: serving food that promotes healthy choices Mr Lewis stated that chip purchases on the Trust's site had reduced by over 50% with a shift to smaller portion sizes. From April new 24-7 hot food vending machines would be offering healthy options together.	
13. Chief Executive's Report	
Mr Lewis introduced the report highlighting in particular the actions taken in response to the failure of the CDA IT system in the run up to Christmas. This had resulted in the loss of data for the period July –December 2015. The majority of data had been recovered and work continued. Some of this data was available in hard copy where it would not be value for money to digitalise. At this point in time it was not possible to give a guaranteed assurance that such failures would not occur again. Dr Stedman stated that a root cause analysis meeting had been organised for the following week in respect of the system failure. He reiterated that the majority of data had been restored but that there were some known areas of complete data loss.	
Mr Lewis outlined the position whereby the Trust's register of backup systems appeared incomplete. This was being remedied and that he would receive assurances over this and the	

<p>areas of greatest risk over the coming days. In terms of data guardianship the requirements were focussed on a loss of data in terms of confidentiality breaches rather than a complete loss of data.</p> <p>In regard to Oncology there was good progress in terms of recruitment. Discussions were ongoing with UHB and NHSE. Whilst there remained some outstanding issues the intention was to be able to brief patients and GPs during February 2016.</p> <p>Mr Lewis went on to highlight the ongoing work needed around cancer services. Services were safe but needed to be modernised with patient waits still being measured in weeks rather than days. The intention was to quickly move to the standard of service that is delivered elsewhere. There remained practices which if modernised would be more effective.</p> <p>The Board re-agreed to support Aston Medical School, subject to the caveats previously approved in 2014. It was agreed that capacity would be assessed within the Board's workforce committee, and the commercial terms would be considered in the finance and investment committee. Dr Gill sought assurances around the relationship with the University of Birmingham and whether this would impact upon capacity in terms of training places. Mr Lewis gave an assurance that that relationship would continue. He noted that the University of Birmingham was itself looking to alter placement numbers and perhaps focus more work on the Queen Elizabeth Hospital.</p> <p>Ms Dutton sought assurances on the progress against the top 10 annual plan commitments outlined in the Annex to the report. In particular she asked for clarity on actions in regard to commitments 3, 5 and 17.</p> <p>In regard to commitment 3 Mr Ovington stated that work was continuing since the last update to the Board in regard to Ten out of Ten. Implementation continued to be variable which was frustrating but actions were in place to deliver against the plan. Ms Barlow added that most admissions were through the Assessment Units where the holistic assessment of patients was still not consistent on every occasion. Some of these messages came through the recent mock CQC inspections.</p> <p>In terms of commitment 5 (tackling caseload management in community teams) Ms Barlow highlighted that a caseload measurement tool was in place and re-profiling of workloads was underway. Ms Barlow retained close oversight until she has assurances that the right progress was being made. Mr Lewis stated that it was important to define what success would look like.</p> <p>In terms of priority 17 (creating balanced financial plans) Mr Waite noted that most Groups continued to not live within their budget. The LTFM was based on starting the new financial year in a clear recurrent balance position. Levers in terms of CIP delivery and pay control were essential with managers having a clear focus on these.</p>	
<p>Action: The Board supported ongoing negotiations with Aston University and asked the Workforce Committee to review any capacity issues and the Finance and Investment Committee to review any financial implications over the coming 6 months whilst negotiations continued.</p>	RSt
<p>14 Trust Risk Register</p>	SWBTB (01/16) 207 SWBTB (01/16) 207(a)
<p>Miss Dhami introduced the Trust Risk Register drawing the Board's particular attention to the following:</p> <ul style="list-style-type: none"> Planned care activity had been below plan with a risk in terms of SLA income. 	

<ul style="list-style-type: none"> • An ongoing reliance on premium rate temporary staff and the subsequent impact on pay costs. • The scale and pace of CIP development and delivery being behind plan. <p>Mr Samuda challenged the extent to which the remedies that had been put in place were truly sticking. Ms Barlow responded by saying that in terms of planned care there was capacity if theatres operated differently to how they do now. She had met with Clinical Directors who understood the need to utilise full capacity of the theatre lists and that under utilisation could not continue to be tolerated. In terms of booking capacity on a six week cycle then there was not yet consistent oversight in terms of recycling appointments where patients had cancelled. There remained variance across specialities which needed to be there and demand/ capacity issues needed to be managed more effectively.</p> <p>Mr Lewis pointed out that improvements could no longer be made through the use of premium rate working. Capacity needed to be built without recourse to throwing money at the issue. He highlighted the income plans for the coming year and the plans around planned care and elective outpatient procedures and in terms of repatriating work.</p> <p>Ms Dutton challenged the extent to which middle managers were brought in to the journey that needed to be taken and their role in managing the financial pressures facing the organisation.</p> <p>Ms Barlow highlighted that that in terms of middle managers the Trust was on a journey. Buy in was strong in some areas and less so in others. Mr Lewis reiterated the need to book capacity against all three priorities in terms of case mix, weight and volume with volume being the key priority moving forwards.</p> <p>In terms of pay bill costs Mr Waite stated that pay remained flat. Significant action had been taken to address agency usage with agency requests now being signed off at Executive level by the Chief Nurse. There was a shift away from the use of premium rate agency staff.</p> <p>In terms of sickness absence November had seen an increase to 5.1%. Mr Lewis highlighted the expectation that there would be a spike in ill health dismissals as a firmer grip of long term sickness management came through the system.</p> <p>In terms of CIP delivery the major schemes had been identified. The need was to ensure effective and timely planning and execution of these. Mr Lewis highlighted the key issues around reaching end of year targets and the cash burn that had been occurring. He asked for the Board Assurance Framework to be brought to the February Board meeting to permit a wider discussion of the risks and control measures in place against our key priorities.</p> <p>Ms Dutton queried the RAG rating of some of the risks highlighted in the register. Taking risks 566 and 770 as examples it was unclear why the residual risk score remained red when there appeared to be adequate remedies in place. It was agreed that the residual risks scores would be reflected upon outside of the meeting.</p>	
<p>Action: that the Board Assurance Framework be added to the agenda for the February Board meeting.</p>	<p>KD</p>
<p>14.1 Line management of doctors</p>	<p>SWBTB (01/16) 191 SWBTB (01/16) 191(a)</p>
<p>Ms Barlow introduced the paper stating that the report had been produced to ensure clarity around the line management arrangements and how these would be standardised across the Trust in terms of consistency of responsibilities and accountabilities and in terms of ensuring staff</p>	

<p>welfare.</p> <p>Mr Samuda queried whether there had been any resistance to the changes proposed. Ms Barlow responded by saying that there was a risk around wanting to protect professional silos. A lot of progress had been made however and discussions had been positive such as in terms of how registrars were managed. Surgery B and Women and Children's stood out in terms of performance but there remained a few senior leaders who retained an old fashioned approach.</p> <p>Mr Lewis suggested that in his experience medical staff were not resistant to the proposals. The issue was with managers having the confidence and being comfortable managing a multi-disciplinary team including clinical staff.</p> <p>Dr Gill sought assurances that the welfare of doctors was effectively being picked up. Ms Barlow gave an assurance that they were. Clarity of the working relationships would be made explicit as part of induction of junior doctors.</p>	
<p>Action: Updates on this would be brought through to the Workforce and OD Committee as a standing item.</p>	<p>RB</p>
<p>15 Integrated Performance Report</p>	<p>SWBTB (01/16) 209 SWBTB (01/16) 209(a)</p>
<p>Mr Waite introduced the report highlighting that performance against the 4 hour wait standard had fallen in December and hence was unlikely to achieve the monthly or quarter 3 standard. Relative performance was however holding up well. The 62 day cancer wait target had been the subject of discussion at the last Board meeting and December targets were due to be met. Internal and national standards had also been met for Fractured Neck and Femur performance.</p> <p>Ms Barlow highlighted that in terms of Rapid Access Chest Pain standards these were likely to be delivered in January compared to a fall in performance in November. Issues were being addressed in terms of referral and tracking systems on a cross site basis. The expectation in terms of RTT was that incomplete RTT measure will be met over the coming 3 months.</p> <p>Miss Dhami highlighted the ongoing progress in terms of responding to complaints within agreed timescales. The change in data in April was a consequence of a miscalculation against the definition which had now been corrected. Overall 100% of complaints were being acknowledged within 3 working days of receipt.</p>	
<p>15.1 Learning Disabilities: Peoples Parliament</p>	<p>SWBTB (01/16) 210 SWBTB (01/16) 210(a)</p>
<p>Mr Ovington introduced the report highlighting that with the introduction of a Lead Nurse for Learning Disability at the City site there was now consistent coverage over the two sites. There was an action plan in the report that set out the compliance and next steps against local and national standards. There was a proposal to work with organisations such as Changing our Lives to undertake an audit of progress against the standards from April 2016.</p> <p>Mr Zaffar sought clarity over the extent to which staff were trained in regard to the Mental Capacity Act. Mr Ovington confirmed that training was delivered to all staff through induction with targeted awareness raising sessions across the organisation where appropriate. Dr Stedman highlighted that the Trust had commissioned work around mortality of those with a Learning Disability.</p> <p>Mr Lewis challenged the plan, and suggested that it should not be approved by the Board, because the forward actions did not reconcile to the five commitments. In that vein he sought</p>	

<p>further assurances around certain elements of the plan including effectively identifying and flagging patients with LD, patients' records developed in conjunction with service users and increasing the number of people with LD employed by the Trust. There was a lot of work being undertaken in these areas but further assurances were needed. Tangible deliverables and success criteria were also needed.</p> <p>Mr Lewis went on to highlight frustration in terms of GPs having an LD register that the Trust was unable to access. There may be potential to work with a small group of local GPs to develop options around how to more effectively share information going forward. This would be best achieved through informal channels, as for 18 months the approach being used locally had not delivered.</p>	
<p>Action: A revised more detailed action plan to be brought back to the Trust Board in Q1, together with an update on progress.</p>	CO
<p>16. Financial Performance Report</p>	SWBTB (01/16) 211 SWBTB (01/16) 211(a)
<p>Mr Waite introduced the report highlighting the focus on the delivery of an improved run rate position. Target delivery included significant use of contingencies. In November I&E saw a deficit of £821,000 which was £1,991, 000 adverse to plan. There was now no clear route through to achieving a £5m stretch surplus target.</p> <p>Mr Lewis informed the Board that there remained a number of disputes with local bodies in terms of payments that were being progressed through dialogue. He highlighted that the Audit Committee may want to reflect on the accounting of these as the outcomes of these negotiations became known. Mr Waite highlighted that the Trust had issued a draft SLA in respect of Maternity Services which was currently out for comment then agreement. There had been constructive feedback from the Women's Hospital who had been supportive in the drafting of the SLA.</p> <p>Dr Gill raised the issue of the cost of drugs and the opportunities to work with local GPs around prescribing discrepancies in terms of the cost of the drugs. Dr Stedman highlighted the role the Area Prescribing Committee had in terms of issues of this nature. Mr Lewis stressed the opportunity to start discussions around this with local GPs to work this idea up further. He suggested that work be undertaken outside of the meeting with a report brought back to the June Board.</p>	
<p>Action: discussions to take place around developing local protocols around prescribing drugs and the use of generic drugs where appropriate.</p>	RST
<p>17. CQC Improvement Plan</p>	SWBTB (01/16) 212 SWBTB (01/16) 212(a)
<p>Miss Dhimi introduced the report stating that following on from previous discussions at the Board the report provided an update on the delivery of the CQC Improvement Plan and how the in house inspection process had been used to test progress against the plan. Headlines in terms of the feedback from the recent mock inspections was that action had been taken in some areas such as new lockable trolleys, the identification of patients with a DNACPR order and resuscitation trolley check. There were however also examples of actions that needed further attention such as person centred care documentation, the embedding of Ten out of Ten and reductions in sickness rates and consistent hand hygiene. There remained clear messages around staff being caring.</p> <p>The intention was to link clinical and internal audit activity to the improvement plan to retain a focus on improvement. Consideration would also be given to peer audits. Mr Samuda queried whether these mock inspections would continue now that we had feedback from the first round.</p>	

Miss Dhami said that the mock inspections had gone well and had received very positive feedback from those that had taken part. We were currently taking stock and considering how these could be rolled forward in the future taking on the feedback provided.	
18 Wider Safe Staffing- taking a wider view	SWBTB (01/16) 213
<p>Mrs Goodby introduced the report that provided a detailed update in regard to safe staffing beyond simply nursing staff. This work included a focus on ward clinical teams and clinical time spent directly caring for patients. The 7 day working pilot work was being fed into this process.</p> <p>Dr Stedman highlighted the number of out of hours contact with patients and the example of 4 junior doctors covering one ward during the day and the same number of junior doctors covering a number of wards at night.</p> <p>Ms Barlow expressed caution in terms of the data accuracy and the need for a more in depth table top review of rotas to more effectively identify and verify the time spent on wards and for verification through Group management structures.</p> <p>Mr Lewis stressed the need to be in a place where we could clearly articulate where people worked especially given the work being undertaken around workforce transformation.</p>	
Action: The Chief Operating Officer, Chief Nurse, Medical Director and Director for Organisation Development to undertake further work with a report back to the Board in April 2016.	
18.1 Safe nurse staffing	SWBTB (01/16) 214 SWBTB (01/16) 214(a)
<p>Mr Ovington introduced the report highlighting the ongoing manual collection of data which was being checked daily. This method was providing the most accurate picture of what was going on the ground.</p> <p>In terms of issues then in terms of Maternity and Women's and Children's the figures were not reflecting the feedback from the nurses in those areas. Mr Ovington reported that the bank nurse module had been introduced but was being subject to testing in terms of assurances on accuracy. A report was requested back to the March Board in terms of e-rostering.</p> <p>Mr Lewis highlighted the data in terms of the Children's Wards at Sandwell and if these were not correct the fact that this was yet to provide real assurance to the Board.</p>	
Action: that the March safe staffing report include an update on e-rostering.	CO
19. Fully staffed-apprenticeship delivery at SWBH	SWBTB (01/16) 215 SWBTB (01/16) 215(a)
<p>Mrs Goodby introduced the paper setting the context in terms of the announcement made to introduce an Apprenticeship Levy where all organisations with a pay bill in excess of £3m would be required to pay a levy equivalent to 3% of their wage bill and collected through PAYE. This levy would come into effect from April 2017. The Trust had a target of creating 100 apprenticeship roles annually. The new national targets would increase that to 200. The new announcements would mean they would now form part of the Trust's staffing establishment.</p> <p>The paper set out three options as to the actions the Trust could take with option two being the recommended option. These options were to:</p> <ul style="list-style-type: none"> Continue with the Trust's existing approach but double the number of apprenticeships. 	

<ul style="list-style-type: none"> • Introduce apprenticeship first where an apprenticeship is the first choice for vacant band 1-3 positions • Introduce a combination of options one and two over a transition period <p>Mr Samuda sought clarification on whether there would be any exceptions. Mrs Goodby highlighted that potential exceptions would include where there would be a large number of apprenticeships in one area unbalancing the skill and experience mix within a team, where there may be permanent staff at risk or where there was no training path or formal skill requirements.</p> <p>Mrs Rickards highlighted potential issues in apprenticeships being offered one years training and support whilst regular appointments to a role may expect to be trained after 2-3 weeks. This may lead to people being paid on an apprenticeship rate when actually fulfilling the full role after a short period of time. She also challenged why the focus on only bands 1-3 roles. There was a need to look at substantive posts and where there were appropriate career opportunities. She warned of the risk of timing in terms of implementation. A sudden increase in apprentices at a time when redundancies were being made risked people accusing the Trust of making cuts to permanent roles to replace them with cheaper apprenticeship roles. If the apprenticeship programme was to work then there needed to be the right mix of staff.</p> <p>Mr Lewis queried why we would exclude certain groups of staff in terms of the opportunities for apprenticeships. He reiterated that it was government policy to increase the number of apprentices across larger organisations. He rebutted any concerns anybody had in terms of cheaper workforce reiterating the Trust's commitment to the minimum wage. He also highlighted that the Trust already had higher banded apprenticeships that were working successfully. He said it would be important to monitor hire rates for apprenticeships to dispel the accusation that apprentices were being taken on but then not hired after 1 year resulting in a perpetual apprenticeship cycle in some roles. He highlighted that the Trust's commitment was already to ensure all jobs came with a training commitment which was a core value of the Trust. Mr Lewis made clear that the funding of the levy was a corporate risk.</p>	
<p>Resolved: that the Board endorse the option of an apprenticeship first approach from April 2016 in advance of the government requirement of April 2017, applying it to all bands 1-4 roles</p>	RG
<p>20. Annual Equality Report</p>	SWBTB (01/16) 216 SWBTB (01/16) 216(a)
<p>Mr Ovington introduced the report stating that the Trust is required to produce an annual diversity report which must be published by the 31 January 2016. An updated version would be shared at the end of the week and feedback from Board members was welcomed. Mr Lewis queried the references to volunteering within the draft document.</p> <p>It was agreed that Board Members provide feedback to Mr Ovington and that the final version be agreed and signed off by the Public Health, Community Development and Equalities Committee before the deadline for submission.</p>	
<p>Action: that the Board provide feedback to Mr Ovington on the Annual Equality Report and that it is delegated to the Public Health, Community Development and Equality Committee to sign off the final version of the report.</p>	RG
<p>21 Any Other Business</p>	
<p>No items were raised under any other business.</p>	
<p>22 Details of the next meeting : 4 February 2016</p>	

The next meeting will be held in the Board Room, SGH, commencing at 1:30pm.

REPORT TO THE TRUST BOARD HELD IN PUBLIC

Chief Executive's Report – February 2016

The period being reported at today's Board has been one of considerable contrast. As last month I am reporting significant pressures and business continuity issues. And again at the same time, the tremendous community and partnership celebration behind our 1000 day countdown clock launch has energised many for what is ahead of us. Darren Cooper, John Clancy, Nick Harding, and MPs John Spellar and James Morris supported the celebration ourselves and Carillion undertook on January 22nd - as we look forward to October 2018. The multi-faith blessing for the ground to be developed and the labour ahead talked of a beacon of hope at Grove Lane, both for the NHS and local communities.

Addressing our medium term IT needs through the business case that we will consider in early April (choosing between two suppliers) has to be managed alongside the immediate resilience issues we have seen with CDA and the continued issues with PACs. These slowed care for a week in our Trust. A key theme of our 2015 improvement plan was to make it easier to work in our organisation, thereby tackling retention and morale. The organisation has pulled together to address these issues, but it is wearying for individuals and teams. Modernisation cannot come soon enough.

1. Our patients:

In mid-January, our nursing leaders travelled to Manchester to report on the work we have done on focused care. This is typically the enhanced care offered to those with additional needs especially dementia. The four pilot wards at the Trust presented significant improvements in quality of care and experience, and looked ahead to work to be done during 2016. This includes the implementation of John's Campaign in our organisation, designed to welcome and support carers who stay with and help inpatient loved ones. This national initiative sits well with our 2020 vision, and follows on from the open visiting project we applied Trust-wide during 2015. Like Ten Out Of Ten, and the issues implied by today's reports on our three year safety ambitions, the challenge is to take the great practice in some areas and make it Trust-wide. There remains real focus on compassion at the bedside in our Trust, and in the midst of winter pressures it is encouraging to see in the IPR that overnight patient bed moves have again been cut.

As we meet we have a ward at Sandwell closed to flu. This is in spite of the Trust again being in the top 10 nationally for vaccination work. It only serves to underscore the dangers and risks. Good infection practice is being applied, although bed pressures have meant that a clinical risk based judgement led us to have to re-open the ward earlier than we would have wished. Since Christmas we have consistently had 50+ beds open at Sandwell above our winter plans. These rely on temporary doctors and nurses, and inevitably stretch substantive staff further too. In addition to the immediate risks, we risk normalising a completely unacceptable position. It is encouraging that the IPR shows our work to cut unplanned readmissions is beginning to succeed. But for next winter, this summer, and 2018, we need to find the route to cutting average length of stay by half a day.

Meanwhile, we continue to press for a root and branch re-look at how better care funds monies are being committed, given the comprehensive failure of both local programmes to cap or cut admission rates.

Unavoidable elective cancellations have fallen to their lowest level for some time. On the other hand elective volumes are below our plans, with consequent effect on our finances. Our wait list numbers have continued to fall sharply and we remain a low wait organisation compared to local peers. We again met cancer and diagnostic waiting times. Whilst these are national minimum standards, we are sustaining good care. Our commitment to cut first outpatient waits to six weeks or below remains, and we would expect to enter March achieving that in 70% of cases. Cutting DNA rates is part of our plan to balance demand and supply, and it is too early to say with certainty whether our partial booking work is succeeding in that regard. In looking again at elective work for 2016-17 we will need to examine apparently large rises in referrals from areas such as Worcestershire, and whether we truly have capacity to address routine care needs from further afield here.

During 2015-16 we have completed two major service reconfigurations: The move of interventional cardiology to City and the transfer of acute surgery to Sandwell. Data on our key metrics continues to suggest that these have both succeeded in improving quality of care. There is work to do in spring to drive down emergency surgery waiting times further in line with our ambitions. But concerns that the extra travel time involved would create safety or workforce pressures have not been borne out by events, because of the actions taken by our teams. In January's staff feedback seminars (hot topics) we asked for commentary on how patient feedback drove our work. Lots of good ideas were shared. But what is also striking is how we do not always explain that it is patient feedback that underpins many of our changes – these two included. We will make sure we focus survey work in these areas as the changes bed down to make sure that we can match qualitative improvement with the quantitative gains we have reported.

I advised the last Board meeting about our significant progress around food, and the wider public health agenda. Most saliently, chip consumption has halved over the last year. In April new menus kick in which aim to ensure that all 'green' food is the dominant offer at each sitting. Our food summit produced other firm outcomes for coming weeks and months: The installation of 24/7 health hot food dispensers took place this week; efforts to localise supply intensify and we are exploring the right food waste recycling model. Our porcelain plate pilot has not met our wishes and we are now reverting to melamin. In line with the Board's wishes all servings now monitor 'last dish' temperature, as well as first dish.

2. Our workforce

The Trust has exceptional feedback on the training experience of junior doctors in our organisation. As we prepare for the upcoming combined foundation/undergraduate inspection it is clear that we deliver exceptional education and a supportive environment. Since last autumn executive directors have attended every monthly junior doctors' forum to try and improve further communication and learning between the organisation and trainees who routinely bring insight into care at the frontline. During April we will restructure how medical education is organised within the Trust to ensure a single multi-site approach, but also to give even more time to supporting methods like simulation.

We continue that work of engagement and education, but now do so against the disappointing background of the January 12th strike. It is important to reiterate that at City we were able to maintain safety and to observe the action. However, at Sandwell bed flow pressures led to the Local Negotiating Committee (LNC) and Trust leaders agreeing a recall from action. That did not go according to the pre-agreed plans. Attached to this report is a lessons learned review from that failure, reflecting the ideas and views of those involved, and influenced too by feedback from trainees. In summary our plan did not meet a probably foreseeable set of circumstances. It was insufficiently scenario based. At the same time agreed arrangements about how to respond were overruled from London. Our strike planning for February 10th has sought to learn lessons from these experiences, and in particular to operate a command structure from 24 hours prior to the strike that makes major decisions rapidly. Named consultant staff will be in place on each ward and in A&E where typically over 70% of our medical workforce is drawn from trainee ranks. How we cope will reflect in large part the day and night before the strike itself. We will publish on that day documents agreed with the regional BMA about our strike response plans. On February 10th, as on January 12th, our overwhelming priority will be patient and staff safety.

Autumn months had begun to see improvement in our sickness rates. Data for December is less encouraging, with a rise in short term ill health. Seven of eight groups have seen long term sickness fall. This must be the basis with which to enter 2016-17 determined to continue the emphasis on support to staff but also on timely intervention. Dismissal rates are rising as we aim to ensure that by 28 days into someone's absence there is a clear, credible, firm plan understood at Group or Executive level.

We published on time our annual Equality Duty declaration. This month we deploy the tolerance guidance that we debated and agreed in August 2015 at the Board. This is an important change, both for staff, and for patients. It makes unambiguous what we will accept and what we will not. It is clear that for planned care we will exclude patients who abuse our staff, including abusing their race, faith, gender or orientation. Similarly with employees it is clear that the organisation is not neutral in how we view 'banter' or comments, including those on social media. There are no excuses at all for islamophobia or bigotry about disability in our organisation. In the last six months we have taken firm steps to improve safety and security at work in the face of violence. This new guidance takes the same firm stance on psychological attacks.

3. Our partners

The Black Country Alliance that we launched in summer 2015 is beginning to see some progress made. After Easter we expect to share interventional radiology cover across a number of local sites at weekends which will make us safer. And we are developing a shared rheumatology service in support of patients in Walsall. This change is part of the wider programme SWBH has to change the shape of medical specialties, getting the balance right between primary care, outpatient medicine and time for specialist and inpatient work. Clearly given research excellence in rheumatology, the larger scale of the BCA is an important step.

The CQC have chosen to place Walsall Healthcare into their special measures regime. It is too early to assess the impact of this on local services in our area. However, investment in physical facilities at Manor may help to slow the flow of ambulance born patients into Sandwell, which has grown

sharply since changes in Stafford. We are exploring any issues arising from the CQC report where we might be able to provide support to our neighbours and partners.

Close collaboration partnerships are being developed with a number of local GP groupings. Two are now at the stage of developing memorandums of understanding as a precursor to longer term contracts. It remains to be seen how this works with CCG-led commissioning. Ideally, we are together able to develop longer term service agreements more consistent with changing and reforming services, which can take longer than the standard twelve month model.

National planning guidance requires provider Trusts to contribute to documents to plan the sustainability and transformation of systems at scale. We understand that we are obliged to join the same system as our CCG decides is relevant, and latest discussions are moving away from the Right Care, Right Here footprint and towards a broader Black Country one, allied to West Birmingham. It is unclear what the Sustainability and Transformation Plans are intended to achieve but we will seek to contribute actively to them as we move towards June. These plans are different to the renewed Better Care Fund work, being undertaken locally, which is no longer focused on preventing admissions (an objective in which it failed in 2015-16) but on reducing other forms of delay including delayed transfers of care. Given the continuing challenges we are faced with from these issues, especially in Birmingham, this could be an important piece of work in the coming months.

4. Our regulators

Other than the issuing of planning guidance, there has been limited interaction with regulators in the last month. Our own in-house inspection process continues and the Board has seen plans for that to be deployed in 2016. We have agreed with the NHS Retirement Fellowship that they will provide some ex-NHS employees, drawn locally and regionally, to contribute a perspective to our inspection squads.

Toby Lewis, Chief Executive

29 January 2016

Annex A – Lessons Learned submission arising from Junior Doctor’s strike January 12th 2016

Tuesday 12-01 saw a 24 hour trainee doctor strike which locally was well observed. The Trust built a plan to maintain services where possible, cancelling planned care where necessary. Nationally the BMA expectation was of Christmas Day cover. This was problematic because inpatient acuity and emergency department demand were not remotely akin to Christmas Day, nor were our discharge expectations.

On 11-01, as on 04-01 and for one day in December, Sandwell was considered to be at a level 4 state of escalation. This reflected in particular 50+ beds open beyond our routine bed base and a surge in demand in early afternoon on Monday 11th. This meant stretched cover, but also that there was physically no remaining space for surge capacity on the site.

NHS England guidance issued on 08-01 indicated clearly that sustained pressure should be considered a basis to alter local strike arrangements. This position was not agreed with the BMA.

Services at Sandwell were safe. At City we succeeded in maintaining services and facilitating action. It is very disappointing to everyone that we were not able to do the same at Sandwell. In practice a handful of trainees returned to help, and enormous effort for consultant and nurse practitioner staff saw discharge volumes achieved sufficient to enter the evening of 12-01 in a stable position.

In addition to discussions with the LNC subsequently, a one-off meeting with trainees hosted by the Chief Executive, we completed a post-event review with those involved. This gives rise to some lessons learned relevant to future strike and incident planning. They are listed below.

Issue arising / lesson learned	Suggested future remedy
<u>Plan:</u> The plan agreed with the LNC was not scenario based but static. The EMS escalation agreed with the LNC was belated (16.00 on Monday 11.01)	A clear mathematical model for what will be done in each step of increased pressure is needed. This should be done further in advance than in this case.
<u>Plan:</u> The plan was, at every stage, agreed with relevant local trade union representatives. They were over-ruled from London on January 12th. This raises both practical and perhaps ethical questions.	A written delegation agreement is needed in working with the BMA. This can then be used to tackle untruths with staff and the media and to reinforce trust.
<u>Plan:</u> Standard control group arrangements were not deployed the day <u>before</u> the strike. This allowed confusion to develop about decision making. Decisions were slower and not wholly consistent from 2pm-10pm.	A written normative restatement of how we operate major projects will be shared, together with written instruction to executive directors about decision hierarchy. No external inputs or guidance will vary or confuse this local accountability model.
<u>Plan:</u> For major disruption, we would expect a decision countdown to be in place, together with a clear separation of silver and gold structures. This was fuzzy.	A day-plan will be in place with decision points, permitting senior staff to overview the position. All serious incidents will have a gold and silver command in place, as was true from Tuesday 12 th am.
<u>Decision making:</u> It cannot be definitively established that the <i>only</i> way to speedily discharge 40+ patients was to recall some FY1/2s. Clinic doctors could have been redeployed the day before. By the time of decision, this was not feasible.	Every ward must have sufficient on the ground manpower to both make decisions and execute them. Visibility of these named individuals should be in place in the control room.
<u>Guidance:</u> No single repository of external guidance and advice was maintained, leading to slower decision making. National guidance was unclear what was agreed with the dispute parties and what was not.	All single signatory documents will be treated as un-agreed in future (e.g. Keogh letter 08-01). Shared drive arrangements will span departments allowing control room access to guidance to allow judgements where that guidance is inconsistent.

<u>Guidance:</u> Internal communications with staff show confusion, or potential confusion, between major and serious incidents. The term major incident was used in the media extensively, where the position was a serious incident with the potential to deteriorate further.	All staff communications for employees in strike situations will be cleared through the communications function.
<u>Communication:</u> There is only 1 area where the Trust did not do what we said we would in the plan. We told staff we would telephone them, but instead wrote to them, once at 4.30 pm on 11-01 and once at 8am on 12-01..	If we do not do not what we say we would, we should be explicit about the change and articulate why it has happened. The letters did not explain why a phone call was not made, albeit phone calls took place between 08.00-10.00 am on 12-01.
<u>Communication:</u> To succeed in deploying c.10 employees we contacted over 200 employees explaining who we needed. There must have been a smarter way to do this.	Our communication model with doctors in training will no longer rely on consultants or medical personnel at FY2 and above level. Local managers will know how to do this, and a central dataset will exist in plans such as a strike.
<u>Communication:</u> No briefing of partners or other organisations occurred before 10am. This was regrettable and may have inhibited public statements of support when the BMA appeared to rescind their prior agreement.	This reflects the failure to create early enough a gold/silver structure, where gold would take responsibility for external liaison. On January 12 th good communication was maintained with relevant national bodies to brief them on the issues faced in the Trust.

Discussions with junior doctors illustrate the frustration they feel at the way in which the issues were handled. BMA junior doctors' reps were heavily involved in planning January 12th and will be even more involved for February 10th. Understandably events bring other issues to the fore, including the pressure faced by trainees in winter months. Extensive hours monitoring took place during 2015, but further hours monitoring commenced on February 1st. In addition, we have sought to reinforce the many and various ways in which trainee doctors can raise concerns or issues as they arise, preventing any sense of accumulated grievance.

Annex A – top 10 annual plan commitments : January Monitoring Report

Ref	2015/16 Priority	Exec Lead	Ops Lead	Current status	RAG	Actions in Q4
Safe, High Quality Care						
1	Reducing admissions by 2%*	RB	NR	There is an improving rate in readmissions for December with readmissions (in-hospital) reported at 7.3% for December in-month [8.3% rolling 12 months]. This is reflective of recent improvements across the trust but remains a key area of focus.		A continued focus on specialty wards and AMU opportunities and build on hot clinic model now running in surgery.
3	Achieving the gains promised within our 10/10 programme*	CO	DT	There is a concerted focus on consistent implementation of 10/10. This effort is however yet to be translated in consistent application across the Trust. There will be a clear focus on the programme over the coming weeks particularly across ward clinical teams. The CQC mock inspections further highlighted inconsistent application of the standards.		The Board has reaffirmed the importance of consistent application of the 10/10 programme and will continue to seek clear assurances that the plans in place to address inconsistent application are having impact.
5	Tackling caseload management in community teams*	RB	FS	As per prior Board papers work is ongoing, but a single plan of action is not yet visible.		There remains, with focus, a chance to make this a green item, but a change of pace is now needed.

Ref	2015/16 Priority	Exec Lead	Ops Lead	Current status	RAG	Actions in Q4
Accessible & Responsive						
9	Deliver our plans for significant improvements in our Health Visiting provision so children 0-5 years and their families receive high standards of professional support at home	RB	EN	Performance continues to improve but further work still needed to meet KPI thresholds.		Continued improvement is needed to achieve the metrics specified later in Q4.
10	Work within our agreed capacity plan for the year ahead	RB	AM	The Trust is within our capacity plan but is not delivering sufficient volume of care. Reform to remove premium rate working is strong in Surgery A and WCH, less so in medicine, imaging and especially Surgery B.		There is some evidence of change in bookings, but it is not yet translating into productivity indices improvement nor higher overall volumes of work done. The 8-6-4-2 model is proven to be effective but needs to be applied consistently.
Care Closer to Home						
12	Implement our Rowley Regis expansion plans, so that by March 2016 we have in place our Right Care Right Here model on the site*	RB/AK		Plan supported by the Board after extensive patient and staff consultation. Due to finish in next 2 months.		Ensure that the changes in care models in OPD are implemented, not merely a change in physical layout. Finalise the pharmacy option.
Good Use of Resources						
17	Create balanced financial plans for all directorates, and deliver Group level	TW	PS	Ongoing conversations taking place at Trust Board, national bodies and		Continued focus on our 3 areas of emphasis: CIP delivery, agency

Ref	2015/16 Priority	Exec Lead	Ops Lead	Current status	RAG	Actions in Q4
	income & expenditure on a fully year basis*			external auditors. The timing of CIP delivery, agency control and activity booking remains the key issue.		control, and activity booking.
21st Century Infrastructure						
21	Agree Electronic Patient Record Outline Business Case, and initiate the procurement process, whilst completing infrastructure investment programme*	AD	ME	Infrastructure project contracts let and on site. EPR running to timetable with hosting options to be agreed by the Board in February.		Meet the timescales previously agreed and see improvement from infrastructure investment in network resilience.
22	Reach financial close on the Midland Met Hospital*	AK	DL	Financial close took place in December to plan with final decisions signed off by the Chairman, Chief Executive and Director of Finance and Performance Management.		The next phase of work is now well underway and the MPA Committee has been established to oversee progress against all major projects.
An Engaged & Effective Organisation						
26	Cut sickness absence below 3.5% with a focus on reducing days lost to short term sickness*	RG	LB	Whilst progress is being made in terms of long terms absence with the expectation of a spike in ill health dismissals coming through the system over coming months short term absence has begun to creep upwards again in December.		There needs to be a strong focus on effective management intervention and support consistently applied across the Trust with a marked improvement in return to work interview rates and recording on the EPR

						system.

Annex B – Board Equality and Diversity Plan (vs. October 2014 version – July 15 revisions)

Key deliverable	Commitment at July 15 board	Current state – Jan 16
The CLE education committee is overseeing analysis of training requests and training funds vs ESR protected characteristics data.	Work is ongoing with the overseeing of the analysis of training requests and training funds. A comparative exercise will be undertaken in regard to overall band staff profile. A draft will be completed in time for the annual declaration.	On track
The CLE equality committee and whole Board have received initial training in the duties of the Act and in the precepts of the EDS system.	A session is being planned for the February Board Development session.	This <u>will</u> happen during February.
We would undertake an EDS2 self-assessment for any single directorate in the Trust. Almost all directorates have submitted to post a draft for review.	It is to be reviewed in full and final form at the next meeting of the Board's PHCD&E committee.	On track.
Collect, collate and examine protected characteristics data on our workforce and, largely, on our staff: We will undertake a one off ESR data validation.	The use of outpatient kiosks (from Q3) will be our vehicle to improving patient data. Both will be compared through our Board committee against the demographic for SWB as per the ONS.	The start of this was planned for Dec 15 and has been delayed.
Undertaking monthly characteristics of emphasis in which we host events that raise awareness of protected characteristics (PC)		There is a clear schedule for the year ahead in place.
Add into our portfolio of leadership development activities a series of structured programmes for people with PC	Raffaella Goodby will determine how we move ahead by October 2015 with an unambiguous programme which will certainly include a specific BME leadership offer.	Plan developed, staffside consulted - implementation date to commence Q4.
We proposed and agreed with staff-side that Harjinder Kang, as	This work has commenced. Critically we are looking to determine not simply whether our	Method agreed,

Key deliverable	Commitment at July 15 board	Current state – Jan 16
JCNC independent chair, would review whether our workforce policies and procedures match (if implemented) our ambitions and commitments. This was due to occur in Q2 but will now occur in Q3.	policies avoid overt discrimination, but whether they actively take steps to promote diversity.	timetabling to be shared <u>for completion by end of February 16</u>
With partners to ensure a peer group in each protecting characteristic is active [we have BMSOG and there is an emerging LGBT group]	The next CLE committee will review the progress made with Raffaella Goodby in an effort to set a clear timetable for progress,	Consulted with staffside colleagues & programme confirmed at PHCD&E committee (Nov).
Work with senior leaders with protected characteristics for them to provide visible support within the organisation to others	We will start by producing a pictorial representation, and data graph, of who our leaders are. We will also use the next stage of the leadership development programme to explore how issues of diversity can become a more explicit part of our leadership programmes.	Plan developed, implementation date to commence Q4.

TRUST BOARD

DOCUMENT TITLE:	Trust Risk Register
SPONSOR (EXECUTIVE DIRECTOR):	Kam Dhami, Director of Governance
AUTHOR:	Mariola Smallman, Head of Risk Management
DATE OF MEETING:	4 February 2016

EXECUTIVE SUMMARY:

The Trust Risk Register compromises high (red) risks that have been through the validation processes at directorate / group and Executive Committee levels.

The Trust Risk Register was last reported to the Board at its January meeting and Executive Director updates are highlighted where these were provided for the meeting. There is one additional risk submitted for the Board to review and decide whether to include on the Trust Risk Register. There is one risk that has been fully mitigated and it is therefore proposed that it is removed from the Trust Risk Register.

REPORT RECOMMENDATION:

- **RECEIVE** monthly updates on progress with treatment plans from risk owners for risks on the Trust Risk Register
- **REVIEW and DECIDE** whether to include the additional risk on the Trust Risk Register and to remove the mitigated risk.

ACTION REQUIRED *(Indicate with 'x' the purpose that applies):*

The receiving body is asked to receive, consider and:

Accept	Approve the recommendation	Discuss
	✓	✓

KEY AREAS OF IMPACT *(Indicate with 'x' all those that apply):*

Financial	✓	Environmental	✓	Communications & Media	
Business and market share		Legal & Policy	✓	Patient Experience	✓
Clinical	✓	Equality and Diversity	✓	Workforce	✓

Comments:

ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:

Aligned to BAF, quality and safety agenda and requirement for risk register process as part of external accreditation programmes.

PREVIOUS CONSIDERATION:

Clinical Leadership Executive, January 2016

Trust Risk Register

Report to the Trust Board on 4 February 2016

1. EXECUTIVE SUMMARY

- 1.1 This report includes the Trust Risk Register and an update on the implementation of the electronic risk system.

2. TRUST RISK REGISTER (TRR)

- 2.1 Clinical Group and Corporate Directorate risks were reviewed at Risk Management Committee and Clinical Leadership Executive in January.

- 2.2 There is one additional risk highlighted for escalation to the Board:

- As a result of significant reliance on non-recurrent measures and balance sheet flexibility to support the Trust's financial performance cash balances have been eroded and there is a risk that this may compromise future investment plans. (risk reference: **1603**)

- 2.3 The risk related to no longer being able to offer Rfa or USGF has been updated as the actions have been completed (two replacement Sonosite machines have been delivered). As this is no longer a high risk for Surgery A it has been downgraded by the Group and its removal from the Trust Risk Register is therefore requested. (risk reference: **775**)

- 2.4 Following discussions at various Executive committees all current (residual) risk scores have been reviewed and updated to reflect where mitigation measures are having a positive effect and/or the frequency of a risk is considered less than originally scored (based on reported incidents, complaints, litigation, etc.). Likelihood scores have therefore been amended for risks **119** (2nd on-call theatre team); **172** (TDA annual plan sign-off); **221** (EPR); **228** (IT stabilisation); **330** (Gynae. US); **410** (SGH Eye OPD); **534** (Oncology standards); **538** (Chemotherapy wait times); and **771** (risk of cancellation).

- 2.5 The risk related to lack of assurance of standard process and data quality approach to 18 weeks has been updated based on the findings of a review of the breaches. (**214**)

- 2.6 Actions to recall approximately 1400 babies affected by the national BCG shortage are progressing; as at mid-January babies that are under 3 months old have been vaccinated and those that are over 3 months old will be vaccinated by the end of March. (**332**)

- 2.7 The oncology risk related to differential and extended chemotherapy wait times between sites has been updated following successful recruitment and audit findings which provide assurances

that wait times have significantly improved; 9 days on each site. Monthly monitoring of performance will continue to check that staff recruitment maintains sustainable change. **(Risk 538)**

2.8 The trauma risk is anticipated to be mitigated January / February as a new trauma operating table is on order. Surgery A informed RMC that the residual (current) risk score was downgraded to a likelihood of 3 (previously 4) based on local mitigation measures. **(Risk number 770)**

2.9 As a reminder, the options available for handling risks are:

Terminate	Cease doing the activity likely to generate the risk
Treat	Reduce the probability or severity of the risk by putting appropriate controls in place
Tolerate	Accept the risk or tolerate the residual risk once treatments have been applied
Transfer	Redefine the responsibility for managing the risk e.g. by contracting out a particular activity.

3. ELECTRONIC RISK SYSTEM

3.1 Implementation of the electronic risk system is ongoing. All risk registers provided by clinical groups and corporate directorates have been imported onto the system and implementation is well underway. It is anticipated that all directorates will fully transfer management of their risk registers onto the electronic system during quarter 4 so that the electronic system is in use Trust wide by quarter 1, 2016-17. As at writing all Group / Directorate risks have been imported onto the system and demonstration / Q&A sessions have been held with risk leads from the following areas:

- Community and Therapies
- Imaging
- Pathology
- Facilities
- Women's and Child Health
- MDO: R&D and Informatics
- MMH
- Finance
- Strategy and Governance
- Surgery B

3.2 Electronic risk system demonstration / Q&A sessions are being scheduled with all remaining Groups / Directorates. A "How to...guide" and FAQ is available on the Safeguard landing page and the Risk team continues to provide support and advice.

3.3 Risk register reports at various levels, including the Trust Risk Register, are available for all staff to access on the Connect Intranet System.

4. RECOMMENDATION(S)

4.1 The Board is recommended to:

- **RECEIVE** monthly updates from Executive Directors for high (red) risks on the Trust Risk Register.
- **REVIEW and DECIDE** whether to include the additional Finance risk **(1603)** on the Trust Risk Register and to remove the mitigated Surgery A risk **(775)**.

Kam Dhami, Director of Governance
4 February 2015

Appendix: Trust Risk Register

Trust Risk Register

Risk Ref No.	Status	Directorate	Dept.	Type	Risk Statement	Initial risk rating (Likelihood x Severity)	Existing controls	Actions	Owner	Expected completion	Latest review	Review	Residual risk score (LxS)	Control potential
114	Live (With Actions)	Human Resources	Human Resources	Cost Improvement Not Met	Insufficient policy levers to ensure effective delivery of Trust workforce plan establishment establishment reduction of 1400 WTEs, leading to excess pay costs (1414MARWK03)	4x5=20	The Executive led delivery plan is progressing the reduction of WTEs alongside a change management programme. Learning from previous phases, changes in legislation and broad stakeholder engagement are factored into the delivery plan.	Safe & Sound 2 year programme of workforce change 2014/2016 delivered 407 WTE reduction. Early planning & engagement on 2016/2018 workforce change TDA Deep Dive (30 Sep) completed re. change delivery, learning and plans for 2016/2018. Workshops, consultation and engagement	Raffaella Goodby	31/03/2016	03/11/2015	Quarterly	3x4=12	Treat
119	Live (With Actions)	Maternity And	Maternity 1	Incident	There is not a 2nd on call theatre team for an obstetric emergency between 1pm and 8am. In the event that a 2nd woman requires an emergency c/s when the 1st team are engaged, there is a risk of delay which may result in harm or death to mother and/or child.	2x5=10	Monitoring of frequency of near misses On call theatre team available but not dedicated to maternity (but where possible maternity is prioritised)	Reviewed by TB who advised the risk will continue to be monitored / tolerated.	Rachel Barlow	31/03/2016	22/01/2016	Monthly	1x5=5	Tolerate

TRUST BOARD

DOCUMENT TITLE:	Board Assurance Framework 2015/16 – Quarter 3 update
SPONSOR (EXECUTIVE DIRECTOR):	Kam Dhami, Director of Governance
AUTHOR:	Duncan Whitehouse, Head of Corporate Governance
DATE OF MEETING:	4 th February 2016

EXECUTIVE SUMMARY:

An updated version of the Board Assurance Framework is attached covering quarters 3 of 2015-16. Of the 32 risks listed in the BAF:

- 26 have a reduced controlled residual risk score following risk controls and treatment and relevant assurances.
- 6 controlled residual scores remain the same following risk control and treatment plans.
- 5 remain red in terms of residual controlled risks scores (006-national waiting time standards; 007-doubling the number of safe discharges; 017-creating financial balanced plans, 018-developing our capital plans and 020-reform of how corporate services operate).
- The priority in terms of reaching financial close on the Midland Met Hospital has been completed.

The 5 red risks have been subject to scrutiny by the Board or relevant Board Committee over recent months.

REPORT RECOMMENDATION:

The Committee is asked to receive and accept the updated Board Assurance Framework and discuss the assurances given that the risks are being managed

ACTION REQUIRED *(Indicate with 'x' the purpose that applies):*

ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:

Annual plan - Safe high quality care objectives

PREVIOUS CONSIDERATION:

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
COO	001-SHQC	Reducing readmissions MF	There is a risk that re-admission rates for the Trust remain significantly in excess of national norms, particularly at Sandwell Hospital, as result of poor coding or failure to deliver pathway changes accessing urgent acute or community assessment and ambulatory care. This not only represents poor care for patients but also carries a significant financial risk where tariff rules are strictly applied.	Q&SC	5	3	15	A refreshed approach to the treatment plan took place in December integrating readmissions into the Urgent Care Delivery Programme. 2 challenge weeks have brought focus to key elements of improvement : <ul style="list-style-type: none"> Data quality improvements – planned readmissions for urgent care initiated pathways Risk stratification and triage to follow up in community after discharge from AMU at city piloted from December 2015; this creates a virtual ward. The impact of the pilot is to be considered in February LACE score and discharge pathways from wards 	Internal: Overall trust readmission rates are reported in the IPR as well as by Clinical Group. The urgent care delivery group t a s k force meets fortnightly. Quarterly report to Quality & Safety Committee. Trust Board paper in Q4.	3	3	9		<ul style="list-style-type: none"> Assess the impact of the virtual ward and community follow up pilot in February. Confirm future operating model and resource. Review robustness of specialty level MDT for high frequency attenders / readmissions 	Q4 15/16	2	3	6
COO	002-SHQC	Improving outpatients by implementing phase 2 of our Year of Outpatients programme	There is a risk that the intended benefits of the projects in Year of Out Patients (YOOP) do not realise their full benefits due to failure to deliver technical infrastructure or change the workforce and organisational delivery model which may lead to long waits, poor patient experience and wasted capacity	Q&SC	3	4	12	YOOP delivery programme in place. Self-Check in Kiosks completed; the call systems are for completion in Q4. Partial Booking phase 1 completed. Under evaluation, with plan for full roll out in Q4. and other developments in line with YOOP programme. KPI measures include 6 week waits, DNA rate, patient satisfaction	Internal: IPR, programme exception report and minutes and action trackers from CLE, Q & SC and Trust Board. Patient satisfaction results. DNA rates. Communications on intended changes and benefits.	3	4	12		Work continues to strengthen staff and user engagement	March -16	2	4	8
CN	003-SHQC	Achieving the gains promised within our 10/10 programme MF	There is a risk that patient safety could be compromised as a result of not delivering fundamental checks and baseline assessments within the first 24 hours after admission to hospital which could lead to poor planning.	Q&SC	3	3	9	An ongoing training programme has been implemented and a monthly KPI dashboard has been introduced to report compliance. Individual patient checklists and audit tools were launched in December with care plans available via Connect. A set of smarter KPIs to be introduced from which assurance can be drawn up. Focused reintroduction of the tool into the assessment units to garner dedicated staff attention for the implementation at the point patients are brought into the hospital	Internal and peer: Audit of compliance with 10/10	1	3	3		Introduction of a review of KPIs at Clinical Group review meetings	Sep-15	1	3	3

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
DG	004-SHQC	Meeting the improvement requirements agreed with the Care Quality Commission	There is a risk that the scale of the task leads to inconsistent implementation of the required standards and practices across the organisation leading to a statutory breach of the fundamental standards of care,	Q&SC	3	4	12	Clearly defined outcomes set for each action. Planned and spot audits and unannounced visits to validate compliance. Evidence vault. Protected time for discussions at a local level at QIHDs. Monitoring and oversight of delivery by the CLE, QSC and Trust Board.	Internal: Observed practice during walkabouts and First Friday. Audit findings and action plans. Staff and patient feedback e.g. Your Voice, FFT, complaints. Incident data.	2	4	8		Improvement Plan evidence vault to be created and launched March 2016. A further round of in-house inspections is planned for April – May 2016, building on the experience from the pilot inspections carried out in November 2015. The existing team of 50+ staff inspectors is to be strengthened with the introduction of 20-25 people from the NHS Retirement Fellowship, which will give us more bandwidth of experienced NHS staff.	March 2016	1	4	4
COO	005-SHQC	Tackling caseload management in community teams MF	There is a risk that a caseload of community nursing teams remains too high and above benchmark as a result of poor management systems, too many patients being admitted to the case load, poor discharge patterns or the absence of team members leading to short appointments or too few appointments to be effective	Q&SC	4	3	12	Workload dependency tool (GEL) has been introduced for monitoring the position. Implementation of FASTA in community pediatrics. Improvement plan agreed with key milestones. New Director of Nursing for Adult Community has started in November. Complete the implementation of GEL and staff training across all teams. <ul style="list-style-type: none">Redesign work adult community services in Q3 – 4 has commenced:Cohorting non-essential home visits to clinics near home, decreasing travel timeImproved schedulingImproved use of PCAT	Internal and peer: Results of audit of caseload management and data monitoring from GEL. Group reviews.	2	3	6		The IT platform review for community needs completion and possible capital investment- to be reported back in February. Evaluation of adult community service redesign progress due end January	March -16	2	3	6
COO	006-AR	Meet national waiting time standards and deliver from October a guaranteed maximum six week outpatient wait	There is a risk that specialty compliance of the standards are not met due to failure to implement demand and capacity plans and associated workforce plans which may lead to un-forecast underperformance, poor patient experience and financial penalties.	Q&SC	4	4	16	Intensive work and focus remains in this area of planned care; incremental improvements at Trust level can be seen in the minimum 6 week wait. Specialties have delivery plans to deliver by March. 2 high risk areas are T&O and Dermatology who are under executive review. RTT delivered for incompletes which is the current focus nationally. Specialty level compliance planned for Q4; Daily PMO in place looking at forward bookings and theatre board monthly.	Internal: IPR scorecard monitoring discussions. The minutes of Group reviews, OMC, Q&S, and Trust Board. Balanced scorecard. Peer: CCG contract review meeting and TDA performance review	4	4	16		Electronic referral management in Q4 is planned for implementation. Contract under deliver affecting pace of specialty reduction of > 18 week RTT ; 8642 theatre scheduling process to be fully implemented to gain expected impact and benefits. Review of demand and capacity to be completed in Q4. Delivery chain for OP to be clarified. New substantive head of elective access to start in February.	March -16	2	4	8

Sandwell and West Birmingham Hospitals NHS Trust																	
COO	007-AR	Double the number of safe discharges each morning and reduce by at least a half the number of delayed transfers of care in Trust beds	There is a significant risk that the volume of patient discharges from hospital beds each morning is insufficient as a result of poor understanding of expected date of discharge, poor discharge planning or the coordination of activities to effect a safe discharge leading to not enough beds available to admit patients with an emergency or urgent requirement for hospital care and financial penalties	Q&SC	4	4	16	1. An Urgent Care Board has been established and standard operating procedures for 7 day safe discharge across all Clinical Groups have been developed 2. Full realisation of benefits of ADAPT pathway. 3. Arrangements for delivery and monitoring of associated KPI daily / weekly are in place 4. Monitoring through Capacity meeting. 2. ADAPT workshop successfully defined work programme for Q4 with measurable KPIs. 3. Additional community capacity (McCarthy Ward opened in December)	Internal: CLE discussions, Q&S reports up to Trust Board Peer: CCG contract review meeting, System Resilience Group and TDA performance review	4	4	16	1. ADAPT – programme delivery 2. Review with AMU triumvirate on holistic assessment on admission related to ADPAT and EDD ambitions. Focused support to deliver may be required. 3. Development of ward clinical teams including embedding the role of a supervisory ward manager has commenced through UC challenge week 3; however there needs to be further work to embed a new performance and development framework in Q4. Unmet demand for residential and nursing homes in SMBC and EAB beds in BCC area remains an unmitigated risk to DTOC.	March- 16	2	4	8

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
MD	008-AR	Implement advice and guidance support for GPs in all specialities and expand the use of video technology to consult with patients	There is a risk that we fail to meet contractual requirements to implement A&G and lose engagement and reputation with our primary care partners. There are financial penalties in the contract if we fail to implement A&G	Q&SC	3	3	9	Implementation of advice and guidance is a key objective of the Year of Outpatients change program. At a national level the new electronic referral management system will be implemented on 15th June 2015. Uptake of A&G to improve steadily as primary care increase uptake of eRMS (choose and book 2)	Each Clinical group has reported back to YOOP services that have made available A&G through current systems that are commensurate with requirements	2	3	6		New National ERMS (choose and book 2) to become available June 2015	Q3 15/16	1	3	3
CN	009-AR	Deliver our plans for significant improvements in our universal Health Visiting offer MF	There is a significant risk that children and families may not have adequate access to a comprehensive range of NHS, Local Authority and voluntary services as a result of lack of knowledge or poor co-ordination by health visitors which could lead to physical, mental or social developmental delay, or poor use of safeguarding facilities	Q&SC	3	4	12	1. A recruitment programme into health visitor vacancies is in place. 2. Leadership development programme 3.regular performance reports are demonstrating continued improvement in universal screening	Internal and peer: 1. Report describing improvements in Universal Health Visiting 2. Annual report of performance	2	4	8		Portfolio of services to be developed. An integrated model of midwifery and health visiting has been proposed and work is ongoing with the commissioners and GP's on the detail	Jul-15	2	4	8
COO	010-AR	Work within our agreed capacity plan for the year ahead, thereby cutting Do Not Attend rates, cancelled clinic and operation numbers, largely eliminate use of premium rate expenditure and accommodating patients declined NHS care elsewhere MF	There is a risk that sustainable demand and capacity plans are not delivered as a result of failure to resolve capacity gaps and / or optimise resources both workforce and service assets e.g.; theatres or out patients. This may lead to unplanned costs and activity.	FIC	4	4	16	1. Demand and capacity plans agreed at start of year. 2. Underperformance of contract year to date 3. 8642 scheduling process implemented; current intensive support to realise full benefits with expectation to improve delivery and meet contract 4. Partial booking roll out in train and due for completion in Q4.	Internal: Project group review and via IPR and direct update reports via Group reviews, OMC, FIC to Trust Board.	3	4	12		Review of OP capacity in train Jan/Feb and implementation of '642' booking and scheduling Demand and capacity planning for 16-17 in train Q4.	March-16	2	4	8
COO	011-CCH	Expand iCares and heart failure services to provide improved provision in West Birmingham, by agreement with local practices	There is a risk that expansion of services fails lack of commissioning and a shortfall in workforce and marketing of new services which may lead to SWBH patients receiving varying levels of access to community services resulting in longer length of stay, readmission and differing satisfaction levels	Q&SC	4	4	16	Services established	Internal: CLE scorecards and minutes , Group review External; CCG contract meeting	3	4	12		Evaluation of new services end Q4/Q1	Dec-15	2	4	8

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
COO	012-CCH	Implement our Rowley Regis expansion plans (Rowley Max) so that by March 2016 we have in place our RCRH model on the site MF	There is a risk that the infrastructure required to deliver the plan is not in place as a result the delivery of the RCRH model for the Rowley site is delayed resulting in loss of market share and demand and the inability to redesign clinical service provision on the residual acute sites	CC	3	4	12	In year reconfiguration of specialty clinics to Rowley and active promotion and marketing of site.	Internal: Board Committee minutes	3	4	12		Market share analysis and train and post code analysis of current Trust patients to inform further profile of services at Rowley Regis.	Apr-16	2	4	6
CN	013-CCH	Ensure that we improve the ability of patients to die in a location of their choosing, including their own home	There is a risk that patients are not given a choice about the place they would prefer to die as a result of the Trust's inability to co-ordinate services in a timely manner which could lead to patients dying in one of our hospitals leading to high levels of dissatisfaction or complaints	Q&S	3	3	9	1. An End of life strategy is in place 2. An End of Life group has been established, leading implementation of new pathway 3. A set of KPIs to monitor the position have been developed, with arrangements in place to monitor these on a monthly basis	Internal and peer: An audit of preferred place of death	2	3	6		Evaluation of development in year to be assessed in February	Aug-15	2	3	6
CEO	014-CCH	Support agreed GP partners through the CCG's 'push sites' initiative, designed to fit care models to local population	Diverse projects, structures and relationships militate against sufficient successful delivery in 11 months that 16-17 decisions can be made by Trust and commissioners	TB	4	2	8	Primary care liaison team to track projects, in liaison with CCG, reporting monthly to the Chief Executive, and through him to EG and CLE. Increasing attempts to link this work into RCRH.	Assurance via senior involvement, escalated to formal review with CCG at mid-year if off track.	3	2	6		Project plans as necessary for key workstreams	Oct-16	2	2	4
COO	015-CCH	Respiratory medicine service sees material transfer into community setting, in support of GPs	There is a risk that the clinical service model remains with too much Direct Clinical Care time committed to routine clinic work in the acute hospital which will potentially result in late intervention on community patient pathways, which may result in a continued rate of readmissions	Q&S	4	4	16	1. Community respiratory service in place across Sandwell (now part of iCares) 2. Respiratory COPD discharge bundle launched in December.	Internal: Readmissions reports to Clinical Effectiveness Committee, Demand and Capacity reports to FIC, New clinical model through Group review is reported to CLE.	3	4	12		7 day services are not provided in Birmingham yet. Early review of impact of discharge bundle required in Q4	March 16	2	4	8
CEO	016-GUR	Implement successfully and safely the new tariff regime (ETO) as the Trust moves to a PBR system with all commissioners by 2017	Marginal rate for specialist services in ETO necessitates active rationing of care and care modalities. Risk that this creates inequity, and reduces quality of care offered (as distinct from safety).	QSC	3	4	12	Explicit approach with Board oversight, supported by written policy taken through CLE. Escalation to CCG CQMS meeting if Q3/4 as active rationing needed.	Patient level tracking of any delayed care decisions	3	4	12		Highly likely ETO marginal rate will be abolished for 16-17 contract. No further controls required.		3	2	6

TRUST BOARD

DOCUMENT TITLE:	R&D Plan update
SPONSOR (EXECUTIVE DIRECTOR):	Dr Roger Stedman, Medical Director
AUTHOR:	Prof Karim Raza (R&D Director) & Dr Jocelyn Bell (Head of R&D)
DATE OF MEETING:	4 th February 2016

EXECUTIVE SUMMARY:

The Trust Board has requested an R&D update following the R&D report submitted to the October 2015 Board meeting. That report is included as Appendix 1 (page 7 onwards). The current document provides **an update** in relation to the Objectives in the Trust's R&D plan. I have, in general, avoided repeating achievements described in the previous report.

REPORT RECOMMENDATION:

To review progress against Objectives 1-9 in the context of the recent restructuring of the R&D Department. Performance against these will be monitored via the 2 monthly R&D committee chaired by Dr Roger Stedman.

ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:**PREVIOUS CONSIDERATION:**

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
DOF	017a-GUR	Create financial balanced plans for all directorates and deliver Group-level I & E balance on a full year basis MF	There is a risk that the identified opportunity for financial improvement is insufficient to deliver balanced financial plans across each and all directorates. There is a risk that the scale & pace of financial improvement delivered is insufficient. This is caused by a lack of necessary capacity and capability and risk of compromise to the safety and quality of services provided. This could result in a failure to generate those financial surpluses necessary to underpin the approval & delivery of key strategic investments.	FIC	4	5	20	Effective use of comparative information including peer benchmarking, best practice review and expert scrutiny. Focussed executive support to directorates to develop plans. Expedited recruitment to fit for purpose senior management structures and follow through on senior leadership development programme. Utilisation of expert support as necessary and appropriate. Effective QIA / EIA process. Transparent & explicit process for plan signs off. Routine reporting & performance management of plan delivery at directorate level. Transparency & timely engagement in necessary remediation at group, executive & CLE level. Business planning process designed to address 2016-18 cost efficiency improvement need. Includes scaled and specific workforce change.	Management assurance. Routine reporting of historic and prospective financial performance and remedial action plans at all relevant meetings. Independent assurance. Internal audit review of core systems & processes including financial planning, budgetary control, CIP delivery and data quality. External audit review of arrangements for securing VFM. Regulator scrutiny of safe, effective, financially viable services.	3	5	15		Completion of necessary recruitment and leadership development programme. Confirm and establish fir for purpose change and improvement capability function. Effective use of Lord Carter review outputs to provide meaningful business intelligence to underpin real improvement opportunity and delivery. Confirm scale of challenge and route to remedy underlying run rate shortfall carried over from 2015-16 financial year. Confirm and progress plan to restore cash balances consistent with those necessary to meet forward investment plans	06/16 04/16 04/16 04/16 03/17	3	5	15
DOF	018-GUR	Develop our capital plan and execute in line with that plan on a quarter by quarter basis	There is a risk that the capital plan is constrained by the requirement to secure key financial metrics and which compromises the timely progression of key estate development and necessary equipment replacement without compromise to key statutory standards. There is a risk that the scale and pace of capital programme delivery is delayed as a result of lack of necessary capacity and capability and which compromises the timely progression of key estate development and necessary equipment replacement.	FIC	4	5	20	Detailed review of absolute and sequenced capital requirements in particular for imaging, medical equipment replacement and retained estate development. IM&T programme confirmed. Routine consideration of full range of financing options to optimise flexibility within financial plan. Appropriate focus and development of senior leadership. Transparent & explicit process for plan sign off. Routine reporting & performance management of plan delivery at directorate level. Transparency & timely engagement in necessary remediation at group, executive & CLE level.	Management assurance. Routine reporting of historic and prospective capital plan performance and remedial action plans at all relevant meetings. Independent assurance. Internal audit review of core systems & processes including financial planning & budgetary control. External audit review of arrangements for securing VFM. Regulator scrutiny of arrangements for compliance with statutory standards. The 2016-21 Capital Plan was approved by the Trust Board in December 2015	3	5	15		Conclusion of MES contract during 2015.16 for delivery of key fixed equipment from 2016.17. On track for contract closure 1 April 2016 Development of confirmation of granular Capital Development Control Plan. Establishment of Major Projects Authority as committee of the Trust Board Develop and confirm balanced financial plans as per 017a above	04/16 04/16 03/16	3	5	15

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
COO	019-GUR	Reform how corporate services support frontline care, ensuring information is readily available to teams from ward to Board	The risk is that we do not achieve a performance cycle that drives changes required to delivery the annual and long term plan supported by an intelligent suite of business information. The impact is that may result in failure or delay to fully deliver efficiency, effectiveness in clinical services, with sound governance and assurance from board to ward	TB	4	4	16	<ul style="list-style-type: none"> IPR initial version produced for day 5 of the month Q4 resets performance cycle at Directorate and Group level Kite mark assessment completed for all elements of the IPR 	Internal: Trust Board, CLE, Group review reports. A reporting tool is in place at frontline service level and standard reports are visible monthly to support performance improvement cycle	3	4	12		Specify and procure dashboard information system Data quality group to be established	Oct-15	2	4	8
DOF	020-GUR	Reform how corporate services operate to create efficient transactional services by April 2016 that benchmark well against peers within the Black Country Alliance	There is a risk that corporate functions provide an inadequate level of support to front line teams as a result of an extended period of significant change and which may lead to a delay in service and financial improvement and failure to secure middle & back office efficiency at necessary scale.	TB	3	4	12	Follow through of revised arrangements for information production and effective performance management across finance & information functions. Development of IPR and related dashboards on basis aligned to and providing consistent information through the organisation structure. Routine reporting & coherent performance management arrangements. Middle & back office transformation effected through robust programme management arrangements and with expert support as necessary and appropriate. Limited progress during 2015-16 financial year.	Management assurance. Routine reporting of IPR & related dashboards at all relevant meetings. Independent assurance. Internal audit review of core systems and processes including performance management and data quality assurance programme. Regulator scrutiny of 'well led' assessment.	2	4	8		Establishment & implementation of effective middle & back office transformation programme. To include programme of work with BCA partners. Business planning process 2016-18 specifically includes plans for corporate functions workforce change and which requires ways of working to be improved.	03/17 04/16	2	4	8
MD	021a-21CF	Agree EPR outline business case and initiate procurement process, whilst completing infrastructure investment programme MF	There is a risk that due to inadequate IT infrastructure and lack of management capacity and capability within the IT team that we fail to achieve or fully realise the benefits of the procurement and implementation of the EPR prior to the move to midland Met	FIC	5	4	20	External contractors have been brought in to conduct a deep dive review of IT infrastructure across the entire estate. A remedial investment and action plan will result from the deep dive which will be actioned in advance of the implementation phase of the EPR project. A departmental workforce review will take place during 15/16 in order to ensure a team structure fit for purpose. Deep dive concluded with implementation programme in place. Upgrade to be completed by June 2016 and investment in team follows supplier selection in April.	Internal: Progress on these will be reported regularly through IT committee and thence to CLE. Direct reporting to FIC on progress of the EPR procurement and to MPA Committee on infrastructure and EPR implementation. Matter is subject to consideration by the Trust Board.	3	4	12		Until deep dive infrastructure review complete and work force review complete the risk remains	Q2 15/16	2	4	8

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
DOF	022a-21CF	Reach financial close on the Midland Met Hospital MF	There is a risk that approving bodies [TDA, DH, HMT] delay or fail to approve the business case. This may be as a result of lack of confidence in the business case or trust ability to deliver, political or policy change, absence of a compliant bid, withdrawal of commissioner support or other significant reason. This would give rise to delay or absence of financial close and with potential requirement for expedient service change to secure safe, effective & financially viable services. There is a risk that the senior debt funding competition fails to secure sufficient funds as a result of lack of market appetite and which may cause the case to fail. Financial close occurred in December 2015 with the Trust Board delegating authority to the Chief Executive in consultation with the Chairman to agree the terms of the financial close. This priority is now closed but with a risk register being developed for the next phases of the programme.	CC	4	5	20	Delivery of coherent appointment business case consistent with OBC evidenced with sufficient cost improvement and workforce plans. Ongoing delivery against approval conditions. Confirmation of compliant bid through conclusion of evaluation process. Effective engagement with EIB to secure their commitment to [part-] funding of the development. Routine oversight and management through Stakeholder Board and Trust Configuration Committee.	Management Assurance. Routine oversight and assurance through trust Configuration Committee. Independent assurance. Due diligence using external advisors of bid and key elements of business case.					Further development of cost reduction and workforce plans and commissioner confirmation of downside plans. Contract closed. No residual risk to this objective.				
COO	023a-21CF	Complete consultation on, implement and evaluate the reconfiguration of interventional cardiology and acute surgery between our acute sites	The risk is that the patient pathways and intended benefits of reconfiguration are delayed through late delivery of estates infrastructure or not realised due to pathway or clinical service model implementation resulting in unintended outcomes such as increased LOS and negative impact on patient / staff experience	CC	3	4	12	Both configurations completed	Internal: Estates plans, pathway and clinical infrastructure via Group Review, project group and configuration committee reports.	2	4	8		Evaluate impact in Q4	Aug-15	2	4	8
COO	023b-21CF	Cardiology	The risk is that the patient pathways and intended benefits of reconfiguration are delayed through late delivery of estates infrastructure or delays in procurement resulting in continue risk and down time from aging equipment and the challenge of dual site rotas	CC	3	4	12	Configuration completed in Q3	Internal: Estates plans, pathway and clinical infrastructure via Group Review, project group and Configuration Committee reports.	2	4	8		Evaluate impact in Q4	Aug-15	2	4	8

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
COO	023c-21CF	Acute surgery	The risk is that the patient pathways and intended benefits of reconfiguration are delayed because of a lack of complete multiprofessional engagement and ownership to deliver a standardised workforce and clinical model. This may result in delay in implementation resulting in unintended outcomes such as increased LOS and negative impact on patient / staff experience	CC	4	4	16	Configuration completed in Q2	Internal: Estates plans, pathway and clinical infrastructure via Group Review, project group and configuration committee reports.	3	4	12		Evaluate impact in Q4	Aug-15	2	4	8
DENHP	024-21CF	Develop, agree and publicise our final location plans for services in the Sandwell Treatment Centre	There will remain a risk that the final location plans may need to change in response to service need, business plans funding constraints.	CC	3	4	12	Monitoring arrangements are in place through the board and subcommittee structures, reports and risk registers. These arrangements will remain in place for the 2016 – 19 period whilst the STC programme is developed and implemented. The STC programme will report to the Major Projects Authority Committee which will be established from March 2016.	The December 2015 Trust Board received a specific STC paper as part of its assurance review of the MMH development and prior to signing contacts and Financial close. The Trusts January 2016 Heartbeat paper will be used to publicise location plans for those clinical and non-clinical services which will be provided from the Sandwell STC.	3	4	12		Detailed work to confirm delivery of the programme is ongoing and will be completed by March 2106. The programme has 3 phases over the 2016-19 periods. Discussions with individual services to confirm the scope/brief of works to be undertaken will identify any new or additional risks not previously identified and actions to be taken to mitigate and manage those risks.	Jun-15	3	3	9
COO	025-21CF	Finalise and begin to implement our RCRH plan for the current Sheldon Block as an intermediate care and rehabilitation centre for Ladywood and Perry Barr	The risk is that the commissioning of intermediate care is neither timely nor adequate for the demand and implementation. This may result in delay of gap in this level of care which may lead to increased delayed discharges and negatively impact on patient experience and outcomes	CC	3	4	12	1. Secure contract for activity. 2. With Estates working to identify estates plans and capital investment in agreed timeframe. This will include decant programme from Sheldon block for other services that are not located there in the RCRH model. 3. Community workforce strategy includes workforce model for Sheldon services with supporting recruitment plan.	Internal: Confirmed estates plans. Workforce scorecard discussed at Clinical Group Review. Signed contract to provide service discussed at Clinical Group Review External; Contract meetings	3	3	9		Delivery of successful recruitment campaign (Community Clinical Group working jointly with Medicine on recruitment plan) supported by corporate recruitment and communications expertise. Assess any further implementation requirements based on contract.	Mar-16	2	2	4

Executive Lead	Risk Ref	Annual Priority	Risk Statement	Primary Assurance Committee	Initial risk score			Summary of Risk Controls and Treatment Plan	Assurance Received (Internal, Peer or Independent)	Controlled residual risk score			Risk movement	Risk controls and assurances scheduled / not in place and associated actions	Completion date for actions	Tolerable risk score		
					Likelihood	Severity	Risk Rating (LxS)			Likelihood	Severity	Residual risk rating				Likelihood	Severity	Residual risk rating
DOD	026-EO	Cut sickness absence below 3.5% with a focus on reducing days lost to short term sickness MF		W&ODC	5	3	15	Full complement of escalated measures agreed at October. CLE. Increased confirm and challenge with group leads including a case by case focus on long term sickness and a focus on consistent application of disciplinary process.	Internal: Assessed through sickness absence data, Your Voice and national staff survey results	4	3	12		Development if a cohesive plan, embracing effective leadership, group ownership, Health and wellbeing use of business intelligence, coupled with consistent application of sickness absence management process		3	3	9
DOD	027-EO	Finalise our long terms workforce plan, explaining how we will safely remove the paybill equivalent of 1000 posts between 2016 and 2019	There is a risk that future staffing models will not be well enough defined to enable the identification of sufficient posts to be removed leading to an inability to formulate a robust workforce plan which may lead to the non-delivery of the required workforce and pay cost savings between 2016 to 2019	W&ODC	4	4	16	Bottom up workshops held Sep-Dec 2015 Close alignment to business planning process planning for 16/18 Close scrutiny of board and WODC December 15	Workforce change schemes tracked through TPRS. Exec led PMO. TDA workforce returns	3	4	12		downside scenarios explored and planned - April 2016 Cross dependencies and alignment with training / development needs April 16		2	4	8
DOC	028-EO	Create time to talk within our Trust so that engagement is improved. This will include implementing Quality Improvement half days, revamping Your Voice, Connect and Hot topics and committing more energy to First Fridays	Poor staff engagement levels that could be contributed to by ineffective internal communications systems and visibility, leading to lack of understanding of the Trust's vision and objectives, lack of ability to share good practice and improve services, low staff morale and high turnover.	W&ODC	4	3	12	Internal communications strategy in place and approved by June 2015. Quality Improvement Half Days implemented from April 2015. Improved engagement with Your Voice including how teams change and improve as a result of staff feedback. Increased attendance and team feedback at Hot Topics monthly briefings with implementation of hot topics improvement plan. Increased visibility of senior leaders with new multi-media films.	Internal: Engagement scores on Your Voice and improved feedback rates on internal communications systems Independent: National staff survey results	2	3	6		Publish internal communications strategy - June 2015; Implement Quality Improvement Half Days - April 2015, Relaunch Connect intranet site; December 2015,	Jun-15	2	3	6
DOD	029-EO	Agree and begin to implement our three year Education Plan	The loss of highly skilled staff is a problem. The inability to recruit highly qualified staff is also a problem. The perception of staff is that there is no money to support training. The lack of visibility around who accesses the funding and the lack of clarity about Education Training and Development does affect staff morale and retention.	W&ODC	3	3	9	A draft strategy has been developed for agreement by the E, L&D Committee (April 15). Trust training plan has been collated and developed to show all Trust staff accessing development support and funding. Revision of the study leave policy is being progressed to address the issue of staff leaving upon completion of higher level education and training programmes. Plan agreed at August 2015 board and published	Internal: Minutes from the E, L & D Committee	1	3	3		Publish the strategy in June 15. Publish Trust Training plan in May 15. Monitor via E, L&D committee. Operational engagement and communications plan needed to be re-launched March 2016	Jul-15	1	3	3

TRUST BOARD

DOCUMENT TITLE:	Draft 3 Year Clinical Effectiveness/ Quality Objectives
SPONSOR (EXECUTIVE DIRECTOR):	Dr Roger Stedman, Medical Director
AUTHOR:	Dr Roger Stedman, Medical Director
DATE OF MEETING:	26 January 2016

EXECUTIVE SUMMARY:

The enclosed quality objectives set out our ambitions as a Trust to equal or exceed the best quality standards in the NHS, across all the services we provide. These objectives have been developed through consultation with senior colleagues including the Clinical Leadership Executive.

In considering these objectives the Board are particularly asked to give feedback in terms of:

1. Are the outcomes meaningful from a patient's perspective? If they are not then which aspects of the objectives need to be reframed?
2. Are the targets, where these have been set, ambitious enough?
3. Does the Board think these objectives cover the breadth of activities we undertake as a Trust, if not what is missing?

REPORT RECOMMENDATION:

That the Board provide feedback on the quality objectives as currently drafted.

ACTION REQUIRED *(Indicate with 'x' the purpose that applies):*

The receiving body is asked to receive, consider and:

Annual plan - Safe high quality care objectives

PREVIOUS CONSIDERATION:

Quality Plan Objectives 2016 – 2019

The Vision

- Our Vision for 2019 is to provide the outcomes that are equal or exceed the best in the NHS, across all the services we provide. We will do this by doing the right things in the right way, innovating and ensuring our teams base their practice on the best available evidence.
- Clinical effectiveness is about developing and delivering high quality care based on best available research evidence, together with clinical expertise and patient involvement.
- The Trust's vision of delivering safe high quality care for all clinical services requires a determined focus on the effectiveness of the care we provide for patients and the outcomes our services achieve. The Clinical Effectiveness plan sets out the Trust's commitment to deliver on these aims.

Below are a draft set of quality objectives and proposed measures which will drive our collective improvement trajectory in terms of clinical effectiveness and quality across the Trust.

	Objective	Proposed Measures	Current Performance	2019 Target
1	By 2019 the Trust will be ranked in the top quartile of relevant peers for the reduction of Avoidable Hospital Mortality	Avoidable Hospital Deaths as a % of total deaths in hospital Number of deaths reviewed within 42 days	3% 90%	<2% 100%
1a	To ensure there is early recognition and treatment of sepsis leading to a reduction in avoidable deaths attributable to sepsis	Reduction in hospital deaths for which sepsis was a contributory factor Percentage of patients screening positive for severe sepsis receiving sepsis 6 bundle within 1 hour	50% 50%	[40%] 100%
1b	To achieve a year on year reduction in hospital associated venous thromboembolisms (pulmonary emboli [PEs] and deep vein thromboses [DVTs])	Year on Year reduction in number Hospital Acquired thrombosis per 1000 bed days Year on year reduction in number of deaths in hospital with thrombosis as a primary or	2015 Data: Total episodes of care with VTE diagnosis: 165 Total number of Hospital Acquired Thrombosis: 44 Total number of HATs for which	

	Objective	Proposed Measures	Current Performance	2019 Target
		secondary diagnosis	RCA conducted: 43 Total number of deaths with VTE as 1° or 2° : 37 [Per 1000 bed days data not yet available]	
1c	For the Trust to be amongst the best performers for implementing care processes for patient admitted with an acute stroke and for the rate of deaths in hospital within 30 days of admission	SSNAP Audit performance 30 day mortality: Crude Risk adjusted ratio	1Q SSNAP level B 12.1% 86	4Qs SSNAP level A [8%] [<80]
1d	The Trust will demonstrate the most effective management of patients admitted with a heart attack (Acute myocardial Infarction) by ensuring that they have prompt access to treatment in order to achieve the best possible outcomes	MINAP Audit performance – Top Quartile door to balloon times <90 minutes. 30 day mortality: Crude Risk adjusted ratio	England Average – 92% City Hospital – 79% Sandwell Hospital – 92% 7.5% 92.8	England top Quartile – Trust – 100% [5%] [<80]
1e	Patients presenting to the Trust as an emergency with a fractured neck of femur are routinely operated on within 24 hours and achieve outcomes that are better than selected peers	NHFD Audit – Operations within 36hrs Return to own home Best Practice Tariff 30 day mortality: Crude Risk adjusted ratio	Trust (National) 69.8% (72.9%) 96% (59.9%) 67.7% (63.3%) 7.7% 102.7	[>80%] [98%] [>80%] [5%] [<80]
1f	For all high risk surgical patients an assessment of mortality risk will be made explicit to the patient and recorded clearly on the consent form and in the medical record so that the most appropriate level of care is provided in order to achieve the best possible outcomes	Patients with Acute abdomen receiving PPOSSUM Score before surgery Percentage of patients with a mortality risk from PPOSSUM of >10% receiving critical care 30 day mortality from high risk surgery	Unknown Unknown [8.5%]	100% 100% [5%]
2	Outcomes for the treatment of all common cancers will be amongst	1 year and 5 year survival for:		

	Objective	Proposed Measures	Current Performance	2019 Target
	the best in the UK	Breast Colorectal Ovarian / Endometrial / Cervical Prostate / Bladder / Renal Skin Haematological Head and Neck Lung Upper GI		
3	By 2019 avoidable readmissions are reduced to a minimum as a result of enhanced care coordination across interfaces between care settings and patient education and support for self-management.	Emergency 30 day readmission rate	8.6% (6%)	<5%
4	By 2018, our Trust will be amongst the best performers in avoiding preventable sight loss	Posterior capsule rupture in cataract surgery Retinal detachment VR surgery AMD / Glaucoma national audit performance	2.3% (1.7%) Data not available Data not available	<1.5%
5	To ensure that Trust operated screening services exceed national norms for uptake by local populations.	Breast Screening service Bowel Screening	53.6% Unknown	>70%
6	To reduce avoidable causes of peri-natal mortality	Number of still births with CESDI level 3 Number of still births with IUGR as a feature	Data not available Data not available	[100% reduction] [50% reduction]
7	The majority of our patients for whom death is expected and not avoidable will do so in the place of their choosing – receiving excellent end of life care	Percentage of appropriate patients for whom the SPICT tool is applied and an advanced care plan made Number of admissions to hospital in the last year of life	Data not yet available >3	[50%] <2
8	Paediatrics and	Paediatric Acute Hospital	No data yet	No data yet

	Objective	Proposed Measures	Current Performance	2019 Target
	Community Child Health Services – Days of School Lost	length of stay Paediatric day procedures staying overnight		
9	By 2019 the overall average adjusted health gain in the general health status reported for the Trust for patients undergoing all 4 index PROMS procedure, is higher than the national average	Average adjusted health gain for all procedures measured to be above average for UK	Currently Hernia is a lower limit statistical outlier. All other procedures are within statistical limits. None are above average.	[All above England average]

TRUST BOARD

DOCUMENT TITLE:	3 Year Safety Plan: Draft Always Events		
SPONSOR (EXECUTIVE DIRECTOR):	Colin Ovington, Chief nurse		
AUTHOR:	Debbie Talbot - Deputy Chief Nurse Alison Binns – Deputy Director of Governance Kam Dhami – Director of Governance		
DATE OF MEETING:	4 th February 2016		
EXECUTIVE SUMMARY:			
<p>Trust Board have discussed the proposed safety plan on a number of occasions. This is the penultimate draft of objectives for consideration and sign off.</p> <p>The clinical leadership executive have been consulted on a number of occasions about the plan and asked to consider whether the plan is sufficiently ambitious but workable and has the right ingredients to ensure that safety has been considered for every patient that needs to use the services of the Trust.</p> <p>This is the high level plan behind which there needs to be detailed implementation plans with a focus on delivery and measurement.</p> <p>The Board are asked to consider how we might consider the plan in the context of the diversity of the populations we serve. The plan does not currently detail any objectives that deal with equipment, the environment or safe staffing.</p>			
REPORT RECOMMENDATION:			
Trust Board are requested to discuss and agree the objectives and support the development of an implementation programme

3 Year Safety Plan

The Vision

SWBH will have the safest
community and hospital
services in the country

The Aim

To reduce patient harms in
SWBH by 75% over the next 3
years

January 2016

We will always ensure that no adult patient has avoidable harm from a pressure ulcer, fall or catheter related urinary tract infection

Why is this a priority? (rationale)

Prevalence data on pressure ulcers, falls, catheter related UTIs through use of the Safety Thermometer provides the Trust with an opportunity to review all harms at local level, determine if patients suffer more than one harm and identify potential clinical areas for further education, equipment, support and monitoring. (some level of national benchmarking can be utilised although designed as an improvement tool).

Current SWBH position

The Trust reports at least one harm on an average of 5% of patients reviewed monthly in all adult inpatient areas. Multiple harms on individual patients is rare.

Prompts for discussion

- Key is the frequency of assessment and measurement.
 - Currently measurement captured from safeguard with an aim to capture from EBMS
- Aim for 100 % avoidable harm free
- Important that the measure reflects community settings.

We will always ensure that no child or young person has avoidable harm because of deterioration, an intravenous infusion into the tissues, pain or damage to skin integrity

Why is this a priority? (rationale)

Prevalence data on pressure ulcers, falls, catheter related UTIs through use of the Safety Thermometer provides the Trust with an opportunity to review all harms at local level, determine if patients suffer more than one harm and identify potential clinical areas for further education, equipment, support and monitoring. (some level of national benchmarking can be utilised although designed as an improvement tool).

Current SWBH position

The Trust reports at least one harm on an average of 5% of patients reviewed monthly in all adult inpatient areas. Multiple harms on individual patients is rare.

Prompts for discussion

- Key is the frequency of assessment and measurement.
- How are these counted and recorded
- Important that the measure reflects community settings.

We will always ensure that no patient's clinical condition deteriorates as a result of a lack of timely monitoring of vital signs and escalation

Why is this a priority? (rationale)

Review of cardiac arrests and EMRT illustrate a need to improve patient treatment plans, monitoring and recording ceilings of treatment. Multiple alerts for the same patient indicate missed opportunities to review the patient pathway and expectations of outcomes.

Current SWBH position

Current Vitalpac performance highlights delays in recording observations of our most ill patients.

Prompts for discussion

- Need to reflect community settings.
- Should always be reflective of
- NEWS – new early warning score,
PEWS – paediatric early warning score
MEWS – maternity early warning score
- Not all areas have vital pac and continue to collect observations on paper charts where necessary.

We will always ensure that no patient has an avoidable use of antibiotics

Why is this a priority? (rationale)

The potent effect of antibiotics can alter the normal gut flora and make patients very susceptible to contracting serious infections such as *Clostridium difficile*. The second effect is that over use of antibiotics over time reduces their therapeutic effect

Current SWBH position

Antibiotic stewardship is led by a microbiologist and a dedicated pharmacist. There is a recognised list of antibiotics recommended for use across the trust which also includes duration of prescription in an attempt to control use.

Prompts for discussion

- Antibiotic usage to be discussed every 24 hours for any patient with a prescription

We will always ensure that no patient has an unplanned medication omission

Why is this a priority? (rationale)

Omission of medication is a medication error particularly relevant for high risk drugs (as defined within the medication Safety Thermometer document) and for management of long term conditions. Medicines reconciliation and provision is an essential part of a patient's care.

Current SWBH position

Medication omission charts are completed and audited by pharmacy with general improvements required in most areas regarding omission.

Prompt for discussion

- Focussed on ensuring we always administer prescribed medication on time. Any deviations recorded and reviewed.
- Medicines effectively reconciled.
- Effective coding.

We will always ensure a *Ten out of Ten* safety checklist is fully completed for every patient within 24 hours of admission

Why is this a priority? (rationale)

Ten out of Ten was developed to encourage real time patient centred assessment and treatment planning. Acting as an aide memoire to the multi-disciplinary team the aim is to assess all patients for key safety risks identified for that patient group. Discussion and challenge from patients/carers promotes partnership in health care.

Current SWBH position

The *Ten out of Ten* checklist has been introduced into adult in- patient wards with ad hoc integration. Individual patient checklists have been introduced in Surgery for a while and have now been disseminated to all wards. Audits are undertaken one day a month highlighting difficulties with health education.

Prompts for discussion

- Work underway to trial an approach which will work in community settings.
- Focused approach to re-implementation – starting with assessment units

We will always ensure that no patient will suffer harm from avoidable delay in diagnosis

Why is this a priority? (rationale)

Mortality reviews, serious incident investigations and complaints identify that some patients have suffered through delays or failures in making a correct diagnosis along the pathways.

Current SWBH position

Mortality reviews reveal preventable death and promote learning individually and corporately. This is a retrospective response.

Prompts for discussion

- Need to reflect the level of ambition regarding this objective.
- This an always event around effective diagnosis.
- Is it a matter of 'preventable' harm?
- Pathway measures.

We will always ensure that no patient will suffer harm due to an avoidable delay in requesting diagnostic tests or a failure to review the results

Why is this a priority? (rationale)

Mortality reviews, serious incident investigations and complaints identify that some patients have suffered through delays or failures in making a correct diagnosis along the pathways.

Current SWBH position

Mortality reviews reveal preventable death and promote learning individually and corporately. This is a retrospective response.

Prompts for discussion

- Need to set expectations in regard to the performance standards. Patients definition of a delay may differ to ours.
- This links closely to the work around 7 day working.

We will always ensure that all patients undergoing invasive procedures will have received timely and adequate information to make an informed decision with consent evidenced

Why is this a priority? (rationale)

Monthly audit data shows that documented evidence of information provision to patients is not robust and consistent.

Current SWBH position

Audit of consent forms reveals XX. Consent must be taken by a practitioner able to undertake the procedure or by a trained delegate

Prompts for discussion

- POSSUM score
- Evidence of consent key.

We will always ensure that no patient has an invasive procedure without having a safety checklist undertaken prior to commencement

Why is this a priority? (rationale)

The Trust has a history of Never Events, largely in surgical procedures. The recent introduction of National Safety Standards for Invasive Procedures (NatSSIPs) further emphasises the need for improving use of checklists. Localisation of these (LocSSIPs) will promote the use of checklists more widely.

Current SWBH position

The WHO checklist has been implemented for all invasive procedures and compliance is audited. Modified checklists have also been introduced and audited in some units (e.g. CCS)

Prompts for discussion

- WHO checklist.
- Other bespoke checklists e.g. imaging

We will always ensure that fully completed assessments must be undertaken and an informed plan of care documented with every patient

Why is this a priority? (rationale)

Electronic and paper based health care records are a communication and audit tool . 'If it wasn't written it did not happen' reviewing of complaints and incidents illustrates elements of poor record keeping . Professionals are contravening their codes of practice if they fail to maintain appropriate records. The CQC also identified non-completion of forms as an issue.

Current SWBH position

Health Care Records Audits and Case Reviews illustrate gaps for including evidence of patient 'sign up' to care plans.

Prompts for discussion

- Important that completed assessments and plans of care are undertaken with the involvement of every patient. All clinical professionals need to consider how this will be evidenced.

We will always learn for the excellent care given and from those times when care is a concern for patients or falls short of acceptable standards

Why is this a priority? (rationale)

Continuous learning is everyone's business and is central to not repeating mistakes. Learning is our focus the prevention of harm and for the improvement of services and experience for patients. A culture of learning encourages openness when things go wrong, will help improve organisational reputation, it will also help us to target use of resources at key improvements.

Current SWBH position

Specific learning has been arranged when never events have taken place and shared across the trust, however it would be difficult to evidence other learning in a systematic way. Quality Improvement Half days is protected learning time when learning can be spread across the trust consistently

Prompts for discussion

- Learning is about driving positive behaviours.
- Need to draw links with the Trust's promises.
- Need to reflect the learning as an organisation but also that these are always events applied consistently with each and every patient.

TRUST BOARD

DOCUMENT TITLE:	R&D update report
SPONSOR (EXECUTIVE DIRECTOR):	Dr Roger Stedman, Medical Director
AUTHOR:	Prof Karim Raza (R&D Director) & Dr Jocelyn Bell (Head of R&D)
DATE OF MEETING:	4 th February 2016

EXECUTIVE SUMMARY:

The Trust Board has requested an R&D update following the R&D report submitted to the October 2015 Board meeting. That report is included as Appendix 1 (page 7 onwards). The current document provides **an update** in relation to the Objectives in the Trust's R&D plan. I have, in general, avoided repeating achievements described in the previous report.

REPORT RECOMMENDATION:

To review progress against Objectives 1-9 in the context of the recent restructuring of the R&D Department. Performance against these will be monitored via the 2 monthly R&D committee chaired by Dr Roger Stedman.

ACTION REQUIRED *(Indicate with 'x' the purpose that applies):*

The receiving body is asked to receive, consider and:

ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:**PREVIOUS CONSIDERATION:**

R&D Update for the Sandwell and West Birmingham Hospitals NHS Trust Board meeting: February 2016

The Trust Board has requested an R&D update following the R&D report submitted to the October 2015 Board meeting. That report is included as Appendix 1 (page 7 onwards). The current document provides **an update** in relation to the Objectives in the Trust's R&D plan. I have, in general, avoided repeating achievements described in the previous report.

OBJECTIVE 1: To increase the *number of patients recruited to clinical studies* adopted onto the National Institute for Health Research (NIHR) portfolio from ca 2,000 patients per year to 6,000 patients per year by April 2017.

2014-15 saw us recruit our largest ever number of patients to NIHR portfolio adopted studies (2,085 patients). Current recruitment (as of December 2015) is 1822 patients (data will be up to 12 weeks behind real time due to delays in national uploading of recruitment information) i.e. **we are now exceeding our 2014-15 recruitment** and are on track to reach 2500 patients (the number predicted in the previous report to the Trust Board) by end March 2016.

A number of new and important trials are in the SWBH pipeline, for example:

- The NOAH trial (Principal Investigator **Prof Paulus Kirchhof**), a trial of anticoagulation in pacemaker patients, will start enrolment in the 2nd quarter of 2016. <https://clinicaltrials.gov/ct2/show/NCT02618577>

OBJECTIVE 2: To increase the *internationally recognised excellence* of our research portfolio. Specifically we will develop an additional two areas of research excellence.

Over the last three months, investigators at the Trust have secured a number of **new major research awards** for example:

- **Prof Karim Raza** (Rheumatology) is a co-investigator on the Arthritis Research UK Strategic Programme Award ‘The microbiome as a therapeutic target in inflammatory arthritis’: £2 million.
- **Miss Si Rauz** (Ophthalmology) is a co-investigator on a Direct Pathway Finding Scheme MRC Major Award to develop a sight-saving synthetic, optically-transparent, patient-delivered, biologically-smart dressing for the prevention of corneal scarring during acute microbial keratitis. This is one of the largest grants awarded to Ophthalmology-based research in the UK: £2.36 million.

SWBH based researchers have been appointed to **prestigious national roles**. An example from the last few months includes:

- **Prof Sean Kehoe** (Gynae-Oncology) has been appointed as Gynaecological Cancer Chair for the National Cancer Intelligence Network PHE; this role will involve developing epidemiological publications on gynaecological cancers.

SWBH based researchers continue to publish important research findings in **journals of the highest international calibre** to benefit patient outcomes. Examples from the last few months include:

- **Clarke CE** et al. Physiotherapy and occupational therapy vs no therapy in mild to moderate Parkinson disease: a randomized clinical trial. *JAMA Neurol.* Jan 2016
- McInnes IB, **Buckley CD**, Isaacs JD Cytokines in rheumatoid arthritis - shaping the immunological landscape. *Nature Reviews Rheumatology.* Jan 2016

We are seeing our **upcoming research areas** continue to develop. An example from the last few months includes:

- **Dr Sissi Isopoglou** has commenced recruitment to the HIPPS trial assessing the of the hippocampus role in post stroke dementia and delirium.

OBJECTIVE 3: To increase the *breadth* of our clinical research portfolio. Specifically we will develop a **new research portfolio** in at least **five disease areas** where research activity was absent / modest between 2011 -2014.

We continue to raise the profile of research amongst Trust staff using a number of strategies including:

- Promotion of R&D activity in Trust publications including Heartbeat and Innovation and via social media including Twitter.
- The institution of a regular forum for current and potential Investigators to meet and discuss best practice and the potential for collaborative opportunities.

We have worked with clinical groups to develop research in areas of historically limited activity. For example, we have developed new research portfolios in the following specialities with specific examples of recently approved studies as follows:

- **Renal medicine:** Principal investigator, Prof Paul Cockwell. SPIRO-CKD study. Approved 24/09/2015
- **Clinical Immunology:** Principal investigator, Dr Sadia Noorani. NIHR Bioresource Rare Diseases, the BRIDGE Study. Approved 22/10/2015
- **Dermatology:** Principal investigator Dr Amirtha Rajasekaran. Home Intervention and Light Therapy for the treatment of Vitiligo, the HI-light Vitiligo Trial. Approved 07/01/2016

OBJECTIVE 4: To increase the *range of health care professionals* contributing to our clinical research portfolio. Specifically we will promote the involvement of Nurses and Allied Health Professionals (AHPs) in research, ensuring that at least three NIHR portfolio adopted studies are led at SWBH by Nurses / AHPs.

We continue to support AHPs undertaking clinical research. For example, and as described in the previous report, a physiotherapist, **Roanna Burgess**, is currently studying towards a PhD. Another physiotherapist, **Neil Smith**, has commenced his NIHR funded MRes and as part of this: [1] Will be studying 'The role of suprascapular nerve block in the conservative management of shoulder pain' [2] Has started research taster session at SWBH.

OBJECTIVE 5: To translate research into *better and safer clinical care*. Specifically we will develop innovative ways of implementing evidence based health care in at least new three domains.

SWBH based researchers continue to publish important research findings in journals of the highest international calibre **to benefit patient outcomes**. Examples from the last few months include:

- **Fabritz L, Kirchhof P.** Expert consensus document: Defining the major health modifiers causing atrial fibrillation: a roadmap to underpin personalized prevention and treatment. Nature Reviews Cardiology. December 2015
- Flint J, ..., **Gordon C**, Giles I. BSR and BHPR guideline on prescribing drugs in pregnancy and breastfeeding-Part I: standard and biologic disease modifying anti-rheumatic drugs and corticosteroids. Rheumatology (Oxford). January 2016

OBJECTIVE 6: To align R&D with the Trust's vision of being renowned as the best integrated care organisation in the NHS. Specifically we will develop a new forum with representation from primary and secondary care within which we can develop a strategy for research at the primary / secondary care interface.

No new developments in this area since last report.

OBJECTIVE 7: To align R&D with the strategic aims of our academic partner organisations. Specifically we will develop our links with our partner Universities to develop at least **two** new joint positions to support Objective 2 (Promoting internationally recognised excellence in clinical research).

The R&D Directors of SWBH, Dudley Group NHS Foundation Trust and Walsall Healthcare NHS Trust have held a series of meetings to discuss research opportunities within the Black Country Alliance (BCA). At the request of the BCA board, a SWOT analysis is currently being developed but specific activities where progress is being made across the BCA include:

- Access to statistical support for SWBH based researchers via the BCA, with the SWBH based statistician having retired in 2015.
- The Lead for Stoke Research at SWBH and Deputy Lead for Stroke Research in the West Midland Clinical Research network (Dr Sissi Ispoglou) has met with clinical teams at Walsall and will meet with the clinical team in Dudley on 9th February to plan Stroke research developments across the BCA.
- Discussions have begun with Professor Greg Lip and Professor Paulus Kirchhof regarding potential cardiovascular research studies that could extend across the BCA.
- Professor Karim Raza has suggested Rheumatology studies that are active at SWBH and that could be rolled out to other BAC partners and these are currently being considered.

OBJECTIVE 8: To make patients aware of R&D and empower them to influence it. Specifically we will: (i) Develop a consistent approach to the branding of the Trust's R&D activities. (ii) Develop the R&D website and the effective use of social media. (iii) Expose patients to R&D from the time of their initial contact with the organisation with a focus on electronic check in desks with 70% of all outpatients being asked if they would be interested in taking part in research. (iv) Ensure patient representation in decision making processes via patient representation on the R&D committee.

No new development in this area since last report.

OBJECTIVE 9: To ensuring rigorous governance processes and necessary infrastructure. Specifically (i) The Research Management team will ensure that all research studies are reviewed and set up in accordance with national time lines and delivery of studies is performance managed to ensure adherence to national recommendations. (ii) We will have increased annual income generated from commercial research and through IP management from £400,000 to £1,000,000 by 2017

R&D space:

The SWBH R&D Director has been meeting with Alan Kenny to plan R&D space in MMH, the Sandwell site and other areas of the Trust post 2018. A significant amount of work needs to be done in this domain to ensure that R&D space is fit for purpose.

Research quality:

Internal concerns about the quality of local data collection in the context of a commercial clinical trial running at SWBH led us to request an audit of the trial from the Industry Operations Manager at the West Midlands CRN. This audit highlighted a number of issues including patient follow-up visits not taking place according to the study schedule, study documentation being incomplete and patients being recruited over the age detailed in the study eligibility criteria. This report has been discussed with the Medical Director and has been forwarded to the study's Sponsor. No further patients are being recruited to this study at SWBH and specific measures have been put in place to address issues highlighted in the report in the context of the relevant study. In addition, this has led us to review our internal monitoring and quality assurance processes and a number of approaches are being put in place to reduce future risks:

- We will increase the number of studies at SWBH for which we conduct internal audits and have arranged for external audit training for senior R&D staff to increase the capacity for auditing projects.
- We are reviewing all our Standard Operating Procedures, updating and developing new ones as necessary.
- We have instigated a system of more detailed review of studies prior to approval, including a requirement for a meeting with the study team, to ensure that all feasibility issues have been adequately addressed before local permissions are given.

Research funding:**Core funding from the West Midlands Clinical Research Network (CRN):**

Core funding is based on research activity. Our 2015-16 core funding budget was £626,818. Our indicative core funding budget for 2016-17 is £750,273.

Strategic funding from the West Midlands CRN:

- Prior to 2014 we had not been awarded strategic funding.
- In 2014-15 we bid for, and were awarded, £10,000.
- In 2015-16 we bid for £295,921 and were awarded £218,489.
- For 2016-17 we submitted bids for strategic funding for a total of £252,745. Across the West Midlands, the CRN received bids totalling £5.6 million against a strategic fund of £1.048 million (reduced from previous years). I was informed on 25.01.2016 that, of our bids, only one (valued at £35,247) was giving the highest ranking (meaning this amount is almost certain to be funded) with two other (valued at £40,124) being given the second highest ranking (meaning that funding will be allocated if the CRN itself receives additional funding from central resources). In conclusion, the funding we received from the CRN strategic fund will fall significantly in 2016-17 compared to the funding we secured in 2015-16 (£218,489).

Overall CRN funding:

Our overall funding from the CRN is likely to be lower in 2016-17 than it was in 2015-16.

Implications for R&D:

We are currently reviewing our commercial income with the finance team to understand our total income position.

Appendix 1:

R&D Report for the Sandwell and West Birmingham Hospitals NHS Trust Board meeting: October 2015

The Trust's 2014-17 Plan R&D Plan focuses on nine key objectives (below).

This report provides an update on **progress towards those objectives** with relevant **contextualisation** and a **summary of key threats and opportunities**.

OBJECTIVE 1: To increase the *number of patients* recruited to clinical studies adopted onto the National Institute for Health Research (NIHR) portfolio from ca 2,000 patients per year to 6,000 patients per year by April 2017.

OBJECTIVE 2: To increase the *internationally recognised excellence* of our research portfolio. Specifically we will develop an additional two areas of research excellence.

OBJECTIVE 3: To increase the *breadth* of our clinical research portfolio. Specifically we will develop a **new research portfolio** in at least **five disease areas** where research activity was absent / modest between 2011 -2014.

OBJECTIVE 4: To increase the *range of health care professionals* contributing to our clinical research portfolio. Specifically we will promote the involvement of Nurses and Allied Health Professionals (AHPs) in research, ensuring that at least three NIHR portfolio adopted studies are led at SWBH by Nurses / AHPs.

OBJECTIVE 5: To translate research into *better and safer clinical care*. Specifically we will develop innovative ways of implementing evidence based health care in at least new three domains.

OBJECTIVE 6: To align R&D with the Trust's vision of being renowned as the best integrated care organisation in the NHS. Specifically we will develop a new forum with representation from primary and secondary care within which we can develop a strategy for research at the primary / secondary care interface.

OBJECTIVE 7: To align R&D with the strategic aims of our academic partner organisations. Specifically we will develop our links with our partner Universities to develop at least **two** new joint positions to support Objective 2 (Promoting internationally recognised excellence in clinical research).

OBJECTIVE 8: To make patients aware of R&D and empower them to influence it. Specifically we will: (i) Develop a consistent approach to the branding of the Trust's R&D activities. (ii) Develop the R&D website and the effective use of social media. (iii) Expose patients to R&D from the time of their initial contact with the organisation with a focus on electronic check in desks with 70% of all outpatients being asked if they would be interested in taking part in research. (iv) Ensure patient representation in decision making processes via patient representation on the R&D committee.

OBJECTIVE 9: To ensuring rigorous governance processes and necessary infrastructure. Specifically (i) The Research Management team will ensure that all research studies are reviewed and set up in accordance with national time lines and delivery of studies is performance managed to ensure adherence to

national recommendations. (ii) We will have increased annual income generated from commercial research and through IP management from £400,000 to £1,000,000 by 2017.

Why Research and Development matters at Sandwell and West Birmingham Hospitals NHS Trust

Research is integral to our ambition to continually improve the safety and quality of the care we provide to our patients.

A strong culture of research at Sandwell and West Birmingham Hospitals matters to us because:

- It matters to our patients. Extensive research has shown that patients believe it is important for the NHS to carry out clinical research with the vast majority wanting to be treated in a hospital where research takes place.
- It allows us develop and deliver more effective ways of looking after our patients.
- It matters to our staff. Encouraging and facilitating our clinical staff to ask questions, to develop research strategies to address them and to contribute to local, regional, national and international research studies will allow our healthcare workforce to develop to its full potential. A culture of research in any NHS organisation empowers its staff to think critically and facilitates innovation.
- It allows for income generation through innovation to support the development of research capability and the translation of research findings into improvements in patient care.
- It matters to the NHS. The Government is committed to the promotion and conduct of research as a core NHS role, recognising that this is an integral component of its strategy to *“improve the health and wealth of the nation”*.

In becoming an organisation recognised as delivering the highest quality health research, and in developing our unique R&D portfolio, we will:

- Meet our patients’ expectations that they are cared for in an environment where research is at the centre of improving the safety and quality of their healthcare.
- Attract patients who want to be looked after in such an environment.
- Attract the highest calibre of staff to work in our organisation.
- Attract investment from commercial and non-commercial organisations to underpin growth and development.

How the Trust's 2014-17 R&D Plan fits with our strategic objectives:

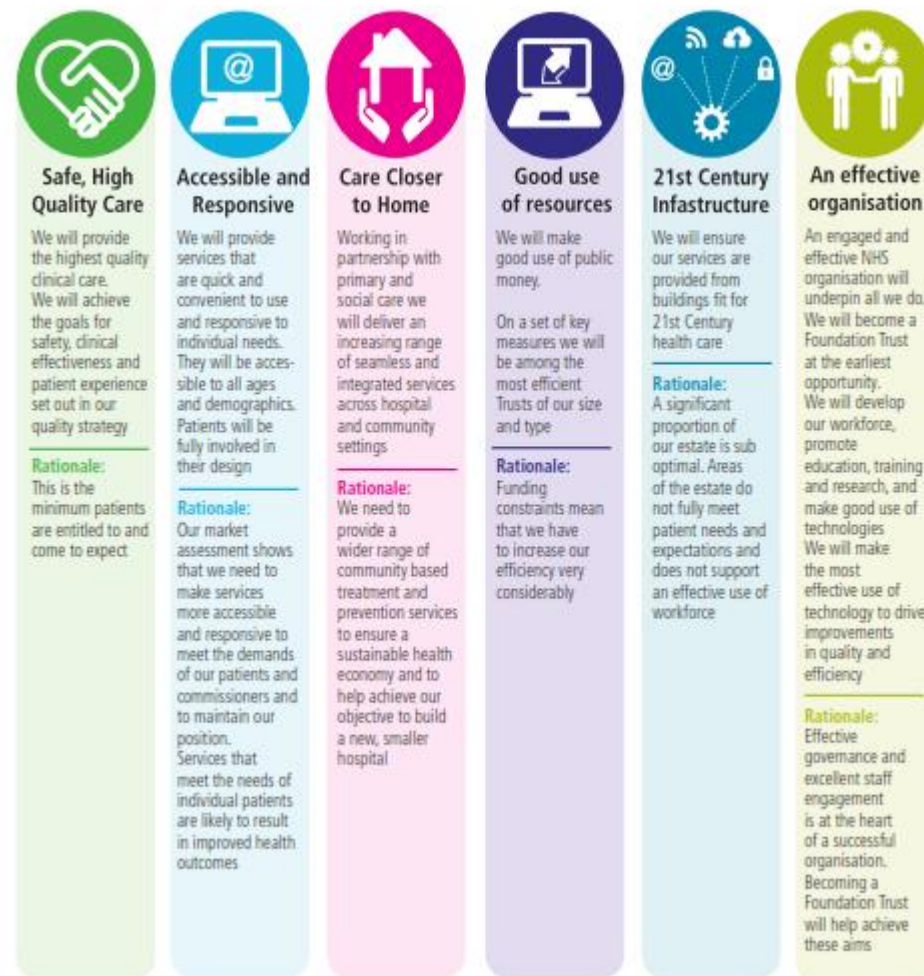

Delivering safe high quality care is at the centre of everything we do. Making care safer and of higher quality is the critical objective of the research we undertake and is why the R&D plan is so important.

There some areas in which research at SWBH is already of the highest standard and where our work has influenced approaches to disease management at both national and international levels. We want to grow those areas. But we also want to increase the breadth of our research, empowering the full spectrum of health care staff to deliver research and to give all our patients the opportunity to take part in research. In doing, so we will make ourselves truly responsive to our patients' needs.

The Trust serves a large and ethnically mixed population and has excellent links into the community, where the care of many patients with chronic longer term condition is increasing focussed. This population and these links put us in a privileged position to develop a diverse and innovative research programme.

High quality research requires considerable resource. We already have the two most important elements of that resource— committed and enthusiastic staff and patients who are keen to work with us. We will continue to develop our resource recognising that the success of R&D plan will be facilitated by the success of all the Trust's plan, for example the IT plan. To deliver to our full potential we will, however, need to engage more actively and strategically with our partner organisations. The Universities in the West Midlands are some of the best in the country and our local enterprise are some of the most innovative. We will develop our links with them, ensuring that our plan complements that of important local and regional initiatives such as the Institute for Translational Medicine, under the direction of Birmingham Health Partners, and the West Midlands Academic Health Sciences Network.

We begin from a strong position. Three years is not long but it is long enough to position ourselves as an organisation with a unique focus which delivers outstanding clinical research and contributes as a critical stakeholder to translational biomedical research in the West Midlands.

Current excellence in Clinical Research at Sandwell and West Birmingham Hospitals NHS Trust

The Trust has a long and proud track record of excellence in clinical research. The following examples give a flavour of our ability to attract significant research grant funding, and to develop new products and approaches to clinical management that have improved the quality of life of many of our patients.

Our **Cardiologists** have developed risk scores for stroke (CHA2DS2-VASc) and bleeding (HAS-BLED) specifically for use in atrial fibrillation, providing clinicians with simple tools to assess stroke and bleeding risk and allowing them to identify and counsel patients, thereby improving clinical practice and patient safety. This, amongst other achievements, led to the 'BMJ Group Cardiovascular Team of the Year' award in 2013. These 2 risk scores are recommended within the 2014 NICE guidelines for atrial fibrillation.

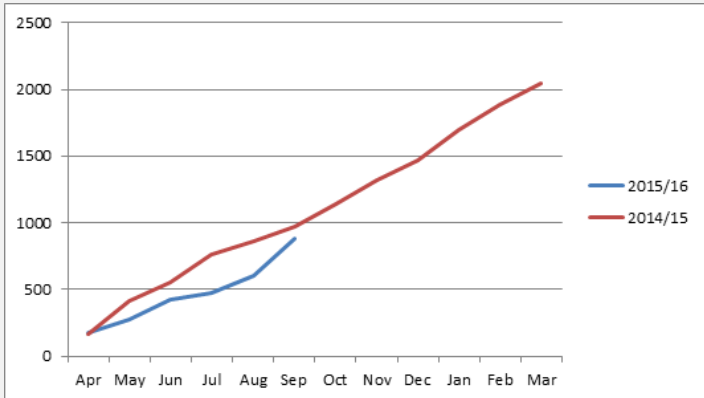

Our **Rheumatologists** have been awarded the Arthritis Research UK Centre of Excellence in the Pathogenesis of Rheumatoid Arthritis (RA), and lead a European Union consortium funded at €5.7M to develop strategies to predict and prevent the development of RA in those at risk. They have identified that the earliest phase of joint inflammation in those destined to develop RA is characterized by a distinct pattern of inflammation, a finding which has significant implications for the approaches to the treatment of early disease.

Our **Neurologists** have recently published, in *The Lancet*, the largest drug study in Parkinson's disease ever conducted. It shows that levodopa therapy leads to better patient-rated quality of life than dopamine agonists and MAOB inhibitors and will lead to changes in clinical practice at an international level.

Our **Ophthalmologists** have been developing a synthetic flowable dressing to prevent scarring of the cornea, currently a leading cause of worldwide blindness, and a tool to measure conjunctival scarring. In addition they have made important discoveries regarding the roles that cell of the immune system play in conditions causing inflammation at the front and the back of the eye. Excellence in these areas was central to SWBH being awarded the status of National Centre of Excellence for Beçhet's Disease.

Our **Gynaecological Oncologists** have developed new approaches to diagnostic testing in patients with gynaecological cancer and have been commissioned by the National Institute for Health and Care Excellence to develop and deliver a study to investigate approaches to the treatment of ovarian cancer.

The 2014-17 Plan: Main deliverables – then and now

	Then: 2014	Now: 2015
<p>OBJECTIVE 1:</p> <p>Increasing clinical research activity</p> <p>The central objective of the R&D plan is to bring about an increase in recruitment achieving 6,000 patients recruited to NIHR (National Institute for Health Research) portfolio adopted studies by April 2017.</p> <p>The increase will be incremental as follows: 2,500 patients in year 2014-15, 4,000 patients in year 2015-16 and 6,000 patients per year by April 2017.</p>	<p>In 2013-14, 2,042 patients were recruited from SWBH into clinical studies on the NIHR research portfolio. This itself was our best ever year in the context of the numbers of patients recruited.</p>	<p>2014-15 saw us recruit our <i>largest ever number of patients to NIHR portfolio adopted studies</i> (n=2,085).</p> <p>Current recruitment in 2015-16 is shown below (data for 2015/16 will be up to 12 weeks behind real time due to delays in national uploading of recruitment information):</p>  <p>Despite a slow start we predict that we will exceed the number of patients recruited in 2014-15 and anticipate recruiting circa</p>

		<p>2,500 patients this year. This enhanced rate of recruitment will be facilitated by:</p> <ol style="list-style-type: none"> 1. Vacant R&D posts being filled in October / November 2015 giving us access to more delivery staff. 2. Likely high recruiting clinical studies becoming active in October / November 2015-16. <p>This increase activity in 2014-15 and 2015-16 has been achieved in the face of reduced staff resource. The reasons for failing to meet the original target within the R&D plan are described on p12 (Contextualisation).</p>
<p>OBJECTIVE 2:</p> <p>Promoting national and international excellence and leadership in clinical research</p> <p>We will continue to support and develop our areas of research excellence.</p> <p>We will expand our portfolio of research by developing at least two disease areas in which we are national / international leaders.</p>	<p>Researchers at SWBH lead internationally recognised research programmes in several disease areas including:</p> <ul style="list-style-type: none"> • Atrial fibrillation • Gynaecological malignancies • Inflammatory eye disease • Parkinson's disease • Rheumatoid arthritis • Systemic lupus erythematosus <p>Research carried out at SWBH has:</p> <ul style="list-style-type: none"> • Led to significant advances in our understanding of disease mechanisms. Enhanced our ability to predict, prevent and treat common diseases 	<p>Over the last year we have achieved considerable success in developing research by securing major national grants in a range of areas including:</p> <ul style="list-style-type: none"> • Behçet's disease: MRC funding secured for a clinical trial investigating 'Optimal utilisation of biologic drugs in Behçet's Disease: a randomised controlled trial of infliximab vs alpha interferon, with genotyping and metabolomic profiling, towards a stratified medicines approach to treatment'. • Systemic lupus erythematosus: MRC funding secured for 'Maximizing SLE therapeutic potential by Application of Novel and Stratified approaches (MASTERPLANS)'. • Rheumatoid arthritis: MRC funding secured for 'Maximising Therapeutic Utility for Rheumatoid Arthritis using genetic and genomic tissue responses to stratify medicines (MATURA)'. • Gyane-oncology: NIHR funding secured for 'ROCKETS -

	<p>associated with major health burdens.</p> <ul style="list-style-type: none"> • Informed national and international guidelines on disease management. 	<p>Refining Ovarian Cancer Test Accuracy Scores’ and ‘SOCQER-2: Surgery in Ovarian Cancer – Quality of Life Evaluation Research’ has been commissioned by NICE.</p> <ul style="list-style-type: none"> • Cardiology: NIHR funding secured for ‘CBT-AF: Cognitive Behavioural Therapy to reduce anxiety and depression in patients with atrial fibrillation’. • Neurology: Funding secured for ‘PD COMM: Lee Silverman Voice Treatment versus standard NHS Speech and Language Therapy in Parkinson’s Disease’ study’. <p>Working with Jessica Barlow, Library Services Manager, we have collated data on all research publications from SWBH staff in 2014-15. This exercise will be repeated annually. Moving forward we will capture the extent to which these publications have been cited as a surrogate measure of their impact. This will serve as one of a number of objective measures in relation to Objectives 2 and 3 in our R&D Plan.</p>
<p>OBJECTIVE 3:</p> <p>Increasing the breadth of our clinical research portfolio</p> <p>It is our vision that all patients looked after at the Trust are given the opportunity to take part in clinical research.</p>	<p>Our research portfolio has breadth as well as depth. In addition to disease areas where we are recognised as leaders in the field, we actively contribute to nationally and internationally recognised research across all clinical directorates with active research programmes in areas including:</p>	<p>We have raised the profile of research amongst Trust staff using a number of strategies including:</p> <ul style="list-style-type: none"> • Promotion of R&D activity in Trust publications including Heartbeat and Innovation and via social media including Twitter. • The institution of a regular forum for current and potential Investigators to meet and discuss best practice and the potential for collaborative opportunities. <p>We have worked with clinical groups to develop research in areas of historically limited activity. Specifically we have</p>

	<ul style="list-style-type: none"> • Dermatology • Diabetes • Gastroenterology • Haematology • Metabolic medicine • Oncology • Paediatrics • Reproductive health • Stroke 	<p>developed new research portfolios in the following specialities:</p> <ul style="list-style-type: none"> • Respiratory medicine • Renal medicine • Clinical Immunology • Anaesthesia & Critical Care
<p>OBJECTIVE 4:</p> <p>Increasing the <i>range of health care professionals</i> contributing to our clinical research portfolio</p> <p>We will have promoted the research leadership by Nurses and Allied Health Professionals (AHPs), ensuring that at least three NIHR portfolio adopted studies are led at SWBH by Nurses / AHPs.</p>	<p>Our research portfolio is led predominantly by doctors. There are however several examples of Nurses and Allied Health Professionals (AHPs) conducting research as part of educational projects e.g. MSc projects and PhD training Fellowships.</p>	<p>We have achieved notable success in promoting research amongst AHPs for example:</p> <ul style="list-style-type: none"> • Mohammed Tallouzi, a Surgical Care Practitioner working in BMEC, has been successful in gaining an NIHR/HEE Clinical Doctoral Research Fellowship. • Roanna Burgess, a Consultant Physiotherapist, has been successful in obtaining funding to pursue a Doctoral Research programme between SWBH and the Arthritis Research UK Centre of Excellence in Primary Care at the University of Keele. • Neil Smith, a Physiotherapist, has been funded to study for an MRes at Coventry University.
<p>OBJECTIVE 5:</p> <p>Translating research into better and safer clinical care</p> <p>In addition to our current approaches, we will</p>	<p>The National Institute for Health and Clinical Excellence works to facilitate the implementation of evidence based healthcare throughout the NHS and Governance systems at the Trust ensure that guidelines are</p>	<p>We have contributed to the ‘Preventable Incidents, Survival and Mortality Study 2 (PRISM2)’ and though this are involved with the development of a national system for mortality reviews.</p> <p>We are an active participant in ‘Enhanced Peri-Operative Care for High-risk patients (EPOCH) Trial: A stepped wedge cluster randomised trial of a quality improvement intervention for</p>

continue to work with the CLAHRC-WM to institute changes in clinical practice at the Trust in at least 3 clinical domains. This will improve the quality and safety of the care that we provide to our patients	integrated into clinical care. We have worked with CLAHRC-WM (Collaborations for Leadership in Applied Health Research – West Midlands) to improve the quality of care we provide in relation to our Readmissions project and our 10 out of 10 safety in healthcare project	<p>patients undergoing emergency laparotomy’.</p> <p>Via the CLAHRC, researchers from Warwick Business School have worked with clinicians at SWBH in relation to ‘Implementing a ‘Patients Know Best’, Personal Health Records pilot’.</p>
<p>OBJECTIVE 6:</p> <p>Aligning with the Trust’s strategy</p> <p>The Trust’s vision is to be renowned as the best integrated care organisation in the NHS provides an ideal environment within which to strengthen a research programme operating at the interface between secondary care and, for example, primary care and social care.</p> <p>Research themes operating at these interfaces will be supported through close engagement between researchers at the Trust and local partner groupings and organisations.</p> <p>We will have developed a new forum with representation from primary and secondary care within we can develop strategy for research at the primary / secondary care interface.</p> <p>We will host research programmes to:</p>	Several of our current research themes align with the Trust’s objective of delivering ‘care closer to home’ through an integrated service across hospital, intermediate care and community settings.	<p>A number of examples have developed over the last year which demonstrate innovate ways of working at the primary care / secondary care interface:</p> <ul style="list-style-type: none"> • The Community Rheumatology clinic, operating within the Vitality Partnership, now recruits patients from primary care directly into research studies operating in secondary care. • The Cardiology IMPRESS-AF study now identifies patients directly from primary care to participate in a secondary care based interventional trial.

<ul style="list-style-type: none"> • Understand the earliest phases of disease and to facilitate appropriate referral to secondary care. • Develop strategies for integrated care for patients with long term conditions including diabetes, heart failure and arthritis. 		
<p>OBJECTIVE 7:</p> <p>Aligning with the strategic aims of our academic partner organisations</p> <p>We will develop our longstanding and highly successful academic links with the University of Birmingham and Aston University.</p>	<p>Many researchers at SWBH have very close links with local academic organisations, in particular the University of Birmingham and Aston University. These links have enabled the development of outstanding translational research programmes capitalising on the clinical strengths of SWBH and the scientific strength of its associated universities.</p>	<p>Dr Depak Kotecha has been appointed to a joint UoB / SWBH position in academic Cardiology.</p> <p>Prof Paulus Kirchhof has been successful in securing a British Heart Foundation Senior Clinical Research Fellowship.</p> <p>Links with the University of Birmingham have facilitated free access to the Health Research Bus, currently based at Sandwell Hospital but that will facilitate research across the Black Country Alliance.</p>
<p>OBJECTIVE 8:</p> <p>Making patients aware of R&D and empowering them to influence it</p> <p>We will increase the visibility of R&D and the research opportunities within it so patients are aware of studies they may be able to participate in.</p>	<p>We carry out our research to benefit our patients and can only do our research with our patients' support.</p> <p>Many of our research groups actively involve patients in the development, delivery and dissemination of research and individual examples of excellence in Patient and Public Involvement have been recognised at a national level.</p>	<p>We have developed a strategy to expose patients to R&D from the time of their initial contact with the organisation with a focus on electronic check-in desks. Through this we will develop a database of patients interested in taking part in research studies.</p> <p>We have involved a patient representative in decision making processes, allowing the patient voice to help shape the direction of R&D and approaches to its delivery. Mr Brin Heliwell now acts as Patient Representative on the Trust's R&D Committee. Mr Heliwell is a passionate advocate for clinical research (http://www.theguardian.com/healthcare-network/nih-cr-partner-zone/2015/jun/05/my-research-</p>

		<p><u>journey-video</u>), is a PPI representative on several national research studies and has direct experience of working in the state sector having held senior teaching and management roles in secondary education.</p> <p>We have actively promoted research to members of the public through, for example, the Stroke Research Awareness Day 2015 and International Clinical Trials Day 2014.</p>
<p>OBJECTIVE 9:</p> <p>Ensuring rigorous governance processes and necessary infrastructure</p> <p>We continue to ensure that our research is carried out to conform to the requirements of the Research Governance Framework and the highest standards of Good Clinical Practice and that we meet the delivery requirements of the National Institute for Health Research.</p> <p>The development of our R&D portfolio will be supported by an expansion in core members of the Research Management and Governance team and the Research Delivery team. This will be facilitated by income generated through:</p> <ul style="list-style-type: none"> • Increased NIHR portfolio research • Increased commercial research • The effective management of intellectual property generated by researchers at the Trust <p>Specifically we will increase the annual income which supports R&D, and that is generated</p>	<p>R&D activities at the Trust are supported by a Research Management and Governance team, and dedicated Research Nurses, Clinical Trials Practitioners and Data Coordinators.</p> <p>These teams work to ensure that approvals for clinical studies take place in a timely fashion and that the research process follows appropriate governance standards.</p>	<p>We have submitted successful bids for strategic funding from the Clinical Research Network:</p> <ul style="list-style-type: none"> • Prior to 2014 we had not been awarded strategic funding. • In 2014-15 we bid for, and were awarded, £10,000. • In 2015-16 we bid for £295,921 and were awarded £218,489. <p>Importantly, the number of Activity Based Funding (ABF) Units that our recruitment of patients to NIHR portfolio adopted studies has attracted this year is greater than last year (data for 2015/16 will be up to 12 weeks behind real time due to delays in national uploading of recruitment information):</p>  <p>The ABF Unit cycle runs from October-September (as opposed to the cycle of number of patients recruited to studies which runs from April-March (see graph on p5)). The increased ABF</p>

from research grants, commercial research and IP management, from £400,000 to £1,000,000.		<p>Units this year is a result of (i) an increased number of patients recruited (ii) an increased proportion of patients recruited to complex studies.</p> <p>In relation to income from commercial research, we achieved just under £600,000 in 2014/15 and are on track to reach £700,000 in 2015/16.</p>
---	--	---

Contextualisation:

2014-15 and 2015-16 have been challenging for R&D for the following principal reasons:

- **Reduced R&D staff capacity.** During the course of the workforce reviews, three R&D posts were disestablished (a data coordinator post, a finance post and the Sandwell Medical Research Unit manager post). In addition, a number of members of staff have left to take up post at a range of organisations including University Hospitals Birmingham, Birmingham Children's Hospital, the Clinical Research Network and in the private sector. A feeling of lack of security at SWBH played a role in a number of these departures. Considerable Trust procedural delays in appointing to vacant posts have meant that we have been operating at below capacity for at least a year. **For example we currently have 10 posts unfilled out of a workforce of 40.**
- **New Governance systems** introduced by the Health Research Authority (HRA) have created significant additional work for the Research Management and Governance staff.

Although we are currently doing more with less (for example we recruited more patients to research studies in 2014-15 with a smaller number of staff in post compared with the previous year and are likely to do the same again in 2015-16), **we recognise that to meet our key objectives we need to improve efficiency further.** A number of approaches have been / are being taken in relation to this:

- The **Research Nurse team has been restructured.** We have disestablished the Band 8 Lead Research Nurse post and have replaced it with three Band 7 posts with each Band 7 research nurse managing a smaller pool of R&D delivery staff. The expectation is that this will allow each team to operate in a more efficient way with members of the teams providing more effective cover for studies across the team's portfolio.
- A new forum has been established within which all members of the R&D team meet 2 monthly to review progress towards the Objectives within the R&D plan.
- We have engaged with Dr Hilary Brown (Senior Fellow and Co-Director of Policy, Health Services Management Centre, University of Birmingham) who is conducting a study with R&D staff and local stakeholders exploring the role of the Clinical research nurse and addressing issues of 'productivity',

identifying limiting factors and examining the structures/mechanisms that support research nurses effectively. Data will be made available once the second round of interviews is complete.

- Time sheet data have been collected from R&D staff and are currently being analysed by Lakbir Virk. This will help us to identify examples of excellence in productivity from which we can learn and also areas of weakness that we need to address.

Relevant R&D developments in Birmingham that will impact on SWBH:

- The multi-million pound **Institute of Translational Medicine (ITM)** <http://www.birmingham.ac.uk/university/colleges/mds/about/institute-translational-medicine.aspx> has recently opened at the University Hospitals Birmingham NHS Foundation Trust site. The ITM is a joint initiative between University Hospitals Birmingham NHS Foundation Trust, the University of Birmingham and Birmingham Children's Hospital as part of Birmingham Health Partners (BHP). It is likely that the ITM will attract resource from its partner organisation and will attract staff for neighbouring organisations.
- Plans for a Medical School at **Aston University** raise the possibility of joint clinical academic appointments with Aston. In particular the appointment of Mrs Shagaf Bakour as Director of Medical Education at Aston University creates the opportunity to appoint a joint academic post in Obstetrics with Aston.
- Discussions are underway as to how the **Black Country Alliance** can facilitate research across its partner organisations. Shared resources, for example statistical support for researchers, and shared Governance reviews represent examples of potential benefit.

TRUST BOARD

DOCUMENT TITLE:	Financial performance – P09 December 2015
SPONSOR (EXECUTIVE DIRECTOR):	Tony Waite – Finance Director
AUTHOR:	Tim Reardon – Associate Director of Finance
DATE OF MEETING:	4th February 2016

EXECUTIVE SUMMARY:

Key messages:

- In month deterioration of headline & underlying performance; I&E remains off plan year to date.
- I&E outlook indicates no meaningful route to plan surplus from matters in SWBH gift to deliver.
- Necessary reliance on significant contingencies. Additional measures mobilised to underpin delivery of best financial result possible consistent with safe care and clean audit opinion.
- Erosion of underlying cash balances consequent on use of contingencies and which will require to be remedied to underpin forward investment programme. No risk to ability to meet current obligations.
- Step improvement in monthly run rate required to secure exit run rate consistent with medium term financial plan. This will not be achieved by P12 and is being addressed through 2016.18 business plan.

Key actions:

- Confirm and deliver revised demand and capacity plans consistent with remedy of year to date under-performance on planned care. Delivery to be contained within original plan costs.
- Reduce pay bill run-rate in the first instance through reduction in premium rate agency spend to a level consistent with that achieved in Q3 / Q4 of 2014.15.
- Resolve dispute in respect of ante-natal secondary provider charges and establish fit for purpose SLA
- Discipline in delivery of CIP schemes to realise plan value on a full year effect basis.
- Expedite delivery of those necessary additional measures consistent with safe services.
- Progress identified actions to manage resources within approved External Finance & Capital Resource Limits having regard to any reliance on non-cash contingencies and revised capital programme.

Key numbers:

- Month deficit £403k being £668k adverse to plan; YTD deficit £(1,224)k being £(2,659)k adverse.
- Forecast surplus £3.8m in line with original financial plan.
- Pay bill £24.4 (vs. £24.4m) in month; Agency spend £1.6m (vs. £1.6m) in month; £13.5m YTD.
- CIP delivery to date £10.3m being £2.0m adverse to TDA plan. Step up in CIP in Q4 required.
- Capex YTD £11.8m being £2.8m below plan. Capital commitments £5.5m.
- Cash at 31st December £33.3m being £7.4m above plan due to timing differences
- New FSRR 3 to date being as plan despite adverse EBITDA performance; forecast 4 now at risk
- Capital Resource Limit (CRL) charge under-shoot £500k on £20.2m plan expected.
- External Finance Limit (EFL) charge forecast at £(0.7)m being consistent with approved EFL.

REPORT RECOMMENDATION:

The Board is recommended to RECEIVE the report and REQUIRE & SUPPORT those actions necessary to secure key financial targets consistent with the delivery of safe, high quality care.

ACTION REQUIRED *(Indicate with 'x' the purpose that applies):*

Finance Report

Summary & Recommendations

Period 9 2015/16

Statutory Financial Duties	Value	Outlook	Note
I&E surplus	£3.8m	X	1
Live within Capital Resource Limit	£20.2m	✓	2
Live within External Finance Limit	£(0.7)m	✓	3
1. No meaningful route to original plan or TDA stretch surplus from matters within SWBH gift to deliver.			
2. Capex control totals clear & to be managed to secure compliance with CRL. IM&T focus of attention.			
3. Management of working capital including creditor stretch necessary as P&L delivery reliant on non-cash contingencies.			

Outlook

- Actions being progressed to secure best financial out-turn possible consistent with safe services and clean audit opinion.
- Any formal adjustment to plan out-turn requires TDA agreement. National financial position very challenging.
- Exit run-rate significantly adverse to plan compounding 2016.17 financial challenge. Work to resolve on-going.

Financial Performance for the 9 months to 31st December

- I&E deficit of £1,224k being £2,659k behind plan;
- Capital spend of £11.8m, £2.8m behind plan;
- Cash at 31st December £33.3m, being £7.4m more than plan.

Opportunities & risks

The Trust has three specific external risks in total:

- Ante-natal provider to provider tariff improvement.
- Recovery of DTOC fines to local authority.
- Resolution of education contract reduction

The Trust is working with both the TDA and CCG in exploring opportunities for financial improvement. These include fines cap reduction, income recovery and asset valuation. No reduction in services currently proposed.

Recommendation

- Note high level of risk attached with outlook position and implication for 2016.17
- Maintain focus on driving step change in underlying run-rate – planned care income, agency pay reduction, CIP delivery

Finance Report

Performance to date – I&E and cash

Period 9 2015/16

I&E

The key I&E issues are:

- Planned care [elective IP & DC] income below plan levels;
- Premium rate interim staffing spend above plan levels;
- Rate of cost reduction not yet consistent with that required to meet medium term financial plan trajectory

The reported I&E deficit is after the benefit of £8.1m of balance sheet flexibility released to improve the position.

Reserves planned but not spent or accrued to date total £4.7m.

Savings

Progress reported through the Trust's savings management system TPRS continues to deteriorate relative to plan. The concern remains with regard to the delivery of full year plans where significant savings remain to be identified and allocated. Recent forecasts from Groups re CIP achievement confirm this concern.

Capital & Cash

Capital expenditure to date stands at £11.8m against a full year plan of £20.5m. A further £5.5m of firm commitments have been made to date. The revised programme is intended to be managed within the Trust's notified capital resource limit. This is reflected in the cash position, as is payables which continue to reflect disputed payments to NHS suppliers, including those for maternity pathway attendances at other Trusts. Payments due from the local authority for delayed discharges are disputed and so the debtors variance is partially offsetting any benefit on creditors.

Better Payments Practice Code

70% performance for NHS bodies in month brings the YTD down to 84% by value.

Non-NHS performance remains below target at 87% by value. Lack of receipting of orders continues to be a significant impediment to performance.

Financial Sustainability Risk Rating

Rating of 3 year to date consistent with planned rating of 3. Stretch plan out-turn of 4 at risk due to

Finance Report

Outpatient Telephone Consultation	9,658	8,820	(838)	218	211	(8)
Other	45,814	51,690	5,877	6,283	6,803	520
Total				294,613	288,839	(5,774)

This table shows the Trust's year to date SLA income performance by point of delivery.

The impact of the shortfall in elective work can be seen in the adverse variance for day cases and elective activity. That these have only been partially offset by additional activity on outpatients and non-elective work underlines the importance of the elective demand and capacity work to the recovery plan.

The variance on total Patient Related Income to date is £(3,770)k.

The difference to SLA income shown above is primarily related to pass through costs of drugs & devices being above plan £1.6m and which are offset by an equivalent variance on non-pay costs.

Finance Report

Pay bill & Workforce

Period 9 2015/16

Paybill & Workforce

- Total workforce of 7,059 WTE [being 58 WTE above plan] including 267 WTE of agency staff.
- Total pay costs in December (including agency workers) were £24.4m [vs. £24.4m previous month] being £0.5m over plan.
- Significant reduction in temporary pay costs required to be consistent with delivery of key financial targets. Focus on improvement in recruitment time to fill and effective sickness management.
- The Trust did not comply with new national agency framework guidance for agency suppliers in December. Shifts procured outside of this are subject to COO approval and is driven by strict commitment to maintaining safe staffing.
- The Trust exceeded the national agency rate cap effected from 23 November 2015. Trust implementation and compliance is subject to granular assurance that there is no compromise to securing safe staffing levels.

Variance From Plan by Expenditure Type	Current Period £000	Year to Date £000	Pay & workforce	Current period	Previous period	Change in period

Finance Report

CIP achievement

Period 9 2015/16

This chart shows the savings profile in our plan submission to TDA; the plan value of identified TSP savings schemes; the value of those TSP schemes delivered to date and outlook.

The chart also shows a total savings plan from TSP & run rate schemes included in our forecast reported to TDA.

£21m of TSP schemes is necessary to meet the requirements of the trust's plan. Run rate schemes are tracked part of group 'route to balance'.

At P09 [TSP] savings delivery was behind TDA plan with £10.3m of savings delivered against a plan of £12.3m.

TSP savings delivery was, also below the internal plan value of those schemes with £10.3m delivered against a plan of £13.2m.

A group view of the outlook suggests a shortfall in TSP delivery of £6.7m against TDA plan target £21.0m.

This represents a significant deterioration in the group view of TSP savings delivery outlook from that at P05. It also indicates a slight deterioration month on month from P08

Urgent escalation of savings delivery is necessary and in hand.

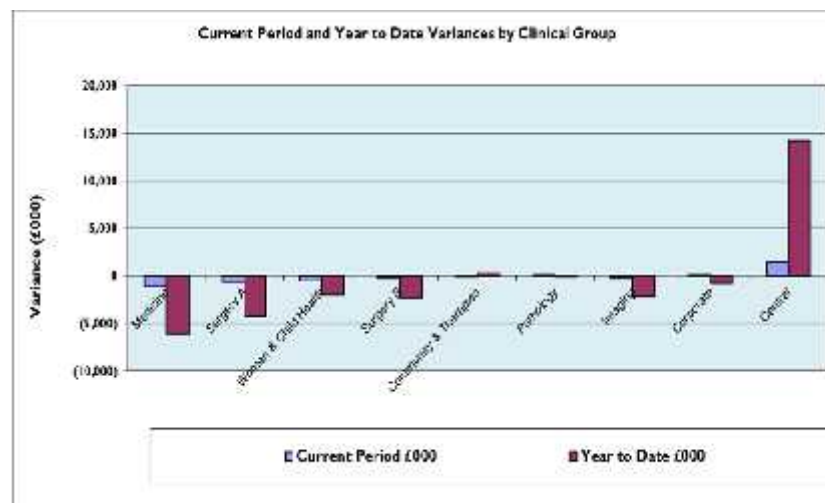

Measurement of success remains delivery of "bottom right" surplus and within that any necessary and sufficient CIPs. Delivery of CIPs to plan is key but not necessarily sufficient to that success.

Finance Report

Group Analysis – Month & YTD

Period 9 2015/16

Group Variances from Plan (Operating income and expenditure)	Current Period £000	Year to Date £000
Medicine	(1,095)	(6,025)
Surgery A	(581)	(4,304)
Women & Child Health	(471)	(2,055)
Surgery B	(275)	(2,283)
Community & Therapies	(12)	346
Pathology	43	(3)
Imaging	(281)	(2,226)
Corporate	45	(749)
Central	1,452	14,211

Performance of Clinical Groups

- Medicine:** Key risks continue to be medical and nursing agency; delivery of savings plans especially the major scheme around closure of capacity. Delivering winter plan within budget also major risk. Significant CIP Plans value were identified but actual delivery significantly away from plan.
- Surgery A:** Key risks are, delivery of contract, and delivering CIP target. Demand and Capacity work is forecasting significant improvement against contract. Identification of CIP plans and delivery remains a concern.
- Women & Child Health:** Settlement of Maternity Pathway forward SLA & historic payments key for the Group. Management of position largely via holding vacancies; workforce plan assuring sustainability & safety.
- Surgery B:** Intensive work around Demand and Capacity recovery on-going; expectation that significant improvements can be delivered. Significant gap in CIP identification and delivery are also a concern, although work on D&C and delivery of improvements should address significant proportion of these.
- Community & Therapies'** position includes significant vacancy management as route to CIP savings. workforce plan assuring sustainability & safety.
- Imaging:** Significant use of Premium Rate Working, contracted out reporting (now ceased) and mobile MRI scanner in order to deliver activity. Use of agency staff remains high. Have been a number of opportunities for improvement identified, and delivery of these vital in order to move toward financial balance.

Corporate Areas

- Pay underspends include December reduced agency are offset by share of SLA underperformance, savings under-delivery and non-pay overspending. Delivery of Demand and Capacity work in clinical Groups will have positive impact on position. Corporate Nursing & Facilities; and Operations remain the two Directorates under most financial pressure.

Central

- Release of balance sheet contingency and impact of deferred / avoided reserves spend.

Finance Report

Capital
Period 9 2015/16

Summary Capital Expenditure: FY 2015/16

Expenditure Category	Flex Plan £'000s	YTD Actual £'000s	Gap £'000s	Full Year			
				TDA Plan £'000s	Flex Plan £'000s	Outlook £'000s	Variance £'000s
Estates	9,475	7,689	(1,786)	10,759	12,385	11,885	(500)
Information	1,932	2,203	271	5,100	4,754	4,754	0

The table opposite is a summarised SOFP for the Trust including the actual and planned positions at the end of December and the full year. Full year forecast reflects the Trust's decision to revalue Property at 1st April 2015 and this is represented in the variance from plan at 31st March 2016.

The Receivables variance from plan is predominantly related to the aged NHS debt position which is subject to on going negotiations.

Payables have increased during December that reflects the reduction in payments in the month as the Trust seeks to ensure a robust cash position to support the final 2015/16 I&E position. Progress has been made on addressing the Non-NHS aged creditor profile. Variance from plan also reflects the status of outstanding invoices relating to Maternity Pathways, discussions for which are underway at Executive level.

Graphs to represent the profile of Receivables and Payables are shown below.

Finance Report

Aged Receivables, Aged Payables, BPPC and Cash Forecast

Period 9 2015/16

Note

- Within aged receivables position shows an increase but includes £4m of invoices raised for Health Education that relate to the MADEL contract for Q4 2015-16, excluding these the overall debt position has decreased. However outstanding debt relating to SLA's with other NHS providers and DTOCs charges with local authorities remain. Discussions for both issues are underway at Executive level.
- BPPC is below target of 95% but reflects consistent performance to date. The main challenges in improving this relate to the trust P2P process and specifically the use of purchase orders, including receipting.

TRUST BOARD

DOCUMENT TITLE:	Integrated Performance Report
SPONSOR (EXECUTIVE DIRECTOR):	Tony Waite, Director of Finance
AUTHOR:	Yasmina Gainer, Head Performance Management & Costing
DATE OF MEETING:	4 February 2016

EXECUTIVE SUMMARY:

The report is presented to inform the Committee of the summary performance for the Trust for the period to December 2015.

1) IPR – Summary Scorecard for December Month

Summary Scorecard	Section	Red Rated	Amber Rated	Green Rated	None	Total	<ul style="list-style-type: none"> December performance has 49 [vs. 47 last month] exceptions (red rated) indicators. Relevant recovery plans are overseen through the executive Performance Management Committee.
	Infection Control	2	0	4	0	6	
	Harm Free Care	5	1	6	2	14	
	Obstetrics	2	0	5	6	13	
	Mortality and Readmissions	1	0	0	11	12	
	Stroke and Cardiology	4	0	7	0	11	
	Cancer	1	0	8	4	13	
	FFT. MSA, Complaints	8	2	6	6	22	
	Cancellations	4	1	4	0	9	
	Emergency Care & Patient Flow	6	0	7	7	20	
	RTT	4	0	3	0	7	
	Data Completeness	2	0	8	1	11	
	Staff	10	0	1	12	23	
	Total	49	4	59	49	161	

2) Matters to draw to the Board's attention**Positives**

- Improvement in readmission rates which show reduction to 7.3% in month
- Improvement in rapid access chest pain to 94% from 71% & with expectation of full delivery in January
- Improvement in complaints timeliness of handling

Requiring attention

- VTE - one of our baseline care commitments better but requires further improvement – expected January
- Thrombolysis within 60 mins of admission – under-performance in December bucks good track record
- Sickness & absence increase in month to 5.5%; increasing nurse vacancies

REPORT RECOMMENDATION:

The Trust Board is asked to consider the content of this report.
Its attention is drawn to the matters above and commentary at the 'At a glance' summary page.

Group Performance	

At Glance - December 2015

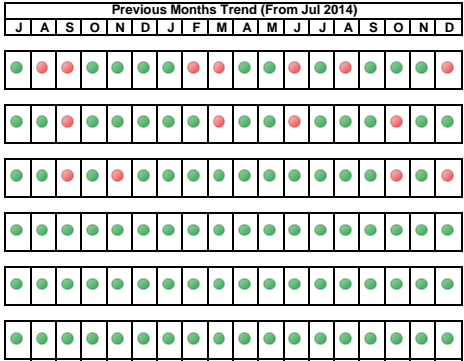

Infection Control	Harm Free Care	Obstetrics	Mortality & Readmissions	Stroke Care & Cardiology
x3 C. Diff cases reported during the month of December (all in medicine). The number of cases year to date is at 20 against a YTD target maximum of 23 [30 full year].	Overall Harm Free Care as assessed through the NHS Safety Thermometer indicates a level of Harm Free Care of 94.5% for December beneath the 95.0% operational threshold. This marginal under-performance is persistent month on month.	The overall Caesarean Section rate for December is 23.1% (vs. 25% target). 25.2% and hence slightly above the target on a cumulative year to date basis. Elective and Non-Elective rates cumulatively are 8.8% and 16.5% respectively.	The Trust overall RAMI for most recent 12-mth cumulative period is 91 (latest available data is as at September). The RAMI for weekday and weekend each at 92 and 88 respectively and considered within statistical confidence limits.	Stroke data for December indicates 98% of patients spending >90% of their time on a stroke ward being compliant with the 90% operational threshold (year to date delivery at 92.5%). Sustaining this performance will bring year end performance in line with target for the year.
No cases of MRSA Bacteraemia were reported in December. 2 cases reported year to date versus a target of zero.	x75 falls reported in December (49 Acute; 26 Community) with 1 fall resulting in serious injury (Community). No reduction on previous months.	Adjusted perinatal mortality rate (per 1000 births) for December is 10.71 being in excess of target rate 8%. Group consideration of risk. 6/9 months this year delivering within target. The indicator represents an in-month position and which, together with the small numbers involved provides for some natural variation. Nationally this is monitored using a 3 year cumulative trend, based on which the Trust is within normal confidence limits.	SHMI measure which includes deaths 30-days after hospital discharge is at 98 for the month of August (latest available data). Consistent with previous months.	December admittance to an acute stroke unit within 4 hours remains relatively stable at 82.5% (falling short on 90% local target, but compliant with 80% national target). Year to date delivery at 81.2%. The trust is still striving to improve on this level of performance.
MRSA Screening - Elective patients meet target overall (target 80%) across all groups except Medicine which is at 71% elective screening; Non-elective patients meet full screening compliance across all groups.	There were 5 cases of avoidable, hospital acquired pressure ulcers reported in December (4 cases in Medicine, 1 case in Surgery A). 4 out of 5 were a grade 3 and 1 case was a grade 2. Noted significant improvement winter 2015 on winter 2014.	Early Booking Assessment (<12 + 6 weeks) - SWBH Specific definition target of 90% has consistently not been met; December delivery 78.6%, performance is consistently delivering to nationally specified targets.	Deaths in Low Risk Diagnosis Groups (RAMI) - month of September is at 80. This indicator measures in-month expected versus actual deaths so subject to larger month on month variations.	Pts receiving CT Scan within 1 hour of presentation 66.7% in month [73.1% YTD] being compliant with 50% standard. Pts receiving CT Scan within 24 hrs of presentation has failed to deliver to the 100% target in the month, delivery at 98.2% (99.2% YTD). The service will aim to achieve the target for the year end.
	There were 2 serious incidents reported in December (incl 1 fall serious injury).	Breastfeeding initiation is at 73.16% on a cumulative basis as at quarter 3, below the target of 77% in the last quarter.	Crude in-month mortality rates remain similar to previous periods and tracks against established averages. Mortality review rate in November is only at 79% for the Trust against the internally set target of 90%.	In December patients receiving thrombolysis within 60 minutes of admission was at 80% (vs. 100% last month) against a target of 85% - a significant worsening month on month. 84.4% YTD just below target.
	There were no medication error causing serious harm in December.		Readmissions (in-hospital) reported at 7.3% for December in-month [8.3% rolling 12 mths]. For CQC diagnostic group reporting 8.6% rolling 12 months (vs. peer 6.0%). This indicates an improving trend based on the in-month figures which are linked to recent improvements across the trust.	For December, Primary Angioplasty Door to balloon time (<90 minutes) and Call to balloon time (<150 minutes) is at 100% (80% targets); both indicators delivering year to date target.
The incidence of MSSA Bacteraemia (expressed per 100,000 bed days) for the month of December is 10.7 versus the target of 9.42; year to date at 3.7 and in line with target. 2/4 latest months have exceeded target level. Last occurred autumn 2014.	There were 9 [vs. 4 last month] Open CAS Alerts reported at the end of December, of which none were overdue at the end of the reporting period.			RACP performance for December is at 94.2% (significant improvement from 71.3% previous month following action plans); 5/9 mths failed standard; impacting therefore the year to date performance which is now at 93.6% (target of 98%). The service is now looking at improvements across the full pathway, in particular, the GP referral process and is expecting full recovery in January (tracking close to 100%).

Cancer Care	Patient Experience - MSA & Complaints	Patient Experience - Cancelled Operations	Emergency Care	Referral To Treatment
The Trust has met all its national cancer targets in November including the 62-day urgent GP referral to treatment target, with overall performance of 90.3% (vs. 85% target) which is a significant improvement to last month. x5 breaches in month across tumour-site specialties. December targets have also been met and therefore meeting Q3 overall.	There were no mixed sex accommodation breaches reported during the month of December.	The number of elective operations cancelled at the last minute went up to 1% in month a worsening to last month (0.8% in November) hence failing the target of 0.8%. The year to date performance is at 0.9% and again just above the required level.	The Trust's performance against the 4-hour ED wait target of 91.02% during the month of December. Performance for Q3 is at 93.12% and hence missing the target of 95%. Performance for Q2 was 94.57% and Q1 at 92.99%. Despite this, the Trust remains one of the top performing A&E departments nationally.	RTT incomplete pathway for December was at 92.01% just meeting the 92% target. This is the only pathway now monitored nationally. The forecast is that incomplete RTT will be met over the next 3 months.
Internal hospital referrals which are being monitored are below the 90% target and at 87.5% indicating delayed referrals in Gynae.	FFT is meeting the target in respect of inpatient score, however not against set response rates. Failing the A&E and Outpatients score for December. Low response rates continue in inpatients and A&E.	No breaches of 28 days guarantee in December.	WMAS fineable 30 - 60 minutes delayed handovers at 121 in December (vs 67 last month) almost doubling from last month. Over 60 minutes delayed handovers reported at 8 cases in December (3 cases in November) so here also worsening. WMAS - Handover Delays > 60 mins (% all emergency conveyances) is at 0.18% versus target of 0.02%.	Admitted and non-admitted RTT pathways continue to be monitored & both under-achieved in December as per projections.
The projection is that in January the trust will not deliver on all targets (particularly around 2WW from GPs where referrals have increased by c30%); with performance recovering in February and delivery overall for Q4 and thus for the year.	The number of complaints received for the month is at 83 (avg for this year is 96), with 3 formal complaints. All have been acknowledged within target timeframes. The level of responses exceeding agreed dates is at its lowest rate this year at 2.5% in December (4.1% in November) so consistently showing improvement. The oldest complaint on the system is 59 days old.	39 [vs. 57 last month] of all cancelled patients experienced multiple cancellations in December which is an improvement to previous months.	Fractured Neck of Femur - information outstanding at this stage.	At the end of December 2 [vs. 4 last month] patients were waiting more than 52 weeks for commencement of treatment; none of these were on the incomplete pathway.
In November, 6 [vs. 13 last month] patients were waiting over 62 days and 2 [8] patients were waiting more than 104 days. There is now a national focus on this cohort of patients (104 days waiters) and the trust submits detailed patient level information for this indicator. The longest waiting patient is at 138 days.	The Learning Disability indicator is red. The service is on an action plan to ensure compliance is as per latest guidance, and this is being progressed.	The number of sitrep cancellations increased in December 40 [vs 33]. There were no urgent cancellations reported in the month of December.	Patient out of hours bed moves are showing a reducing trend, but need to follow CQUIN principles which is being actioned and will inform this indicator going forward.	24 Treatment Functions failed the respective RTT pathway performance thresholds for the month of December. The failing specialties are mainly within Medicine and Surgery A, and are all subject to closely monitored improvement plans.
		Theatre utilisation is below the target of 85% at a Trust average of 68.9% as at December. Notable the performance in Cathlab is very low due to the new system (Labyrinth) being integrated into trust reporting. The theatre capacity and performance is being managed closer going forward with clear action plans in place.	DTOCs are at 2.4% in the month of December (vs. 2% previous month), below the target of 3.5%.	Diagnostic waits beyond 6 weeks were 0.26% December in-month, remaining well beneath the operational threshold of 1.00%.

Data Completeness		Staff	CQUIN	Ext Assessment Frameworks & Data Quality	Summary Scorecard - December (Month)																																																																																				
The Healthcare and Social Care Information Centre (HSCIC) assess the percentage of Trust submitted records for A&E, Inpatients and Outpatients to the Secondary Uses Service (SUS) for completeness of valid entries in mandatory fields. AE, OP and Community parameters remain above target, but IP data with valid entries has fallen just below the required threshold in previous months, recovering in November.		PDR overall compliance as at the end of December is at 86.2%. The Medical Appraisal / Revalidation rate as at December is 86.9% measuring only validated appraisals, not appraisals 'carried out'. Both indicators are below targets of 95%.	The Trust will be submitting the Q3 returns to CCG and SCG. The results are being collated and will be reported to set timelines. Several schemes continue to be challenging in terms of delivery due to system/development issues. Manual audits continue which is a significant effort.	The TDA Observation & Escalation assessment of the trust remains at 'level 3 - Intervention'. The Trust's internal assessment of the completion of valid NHS Number Field within inpatient data sets is below the 99.0% operational threshold, with actual performance (completeness) during December reported as 97.0%. Outpatient, Community and A&E data sets continue to exceed their respective thresholds. Coding for Ethnicity is at 90% versus a target of 90%.	Mandatory Training at the end of December is at 87.1% overall against target of 95%. Health & Safety mandatory training at 97.6%.	The Trust annualised turnover rate is at 13.6% as at December and static to last month. Specifically, nursing turnover has been recorded at 15% for the month.	Data Quality (DQ) - the Performance Committee has agreed to re-visit all IPR indicators in respect of DQ. DQ kitemark assessments have been progressing as part of an ongoing improvement cycle. Detailed action plans are being prepared - all groups need to submit their plans during January which will form part of the Audit Action Tracker.																																																																																						
Open Referrals as at November are at 228,862. The trust is following up previous reviews earlier this year, and again assessing the process and policy in respect of this indicator which aims to maintain appropriate levels of open referrals. Progress is being made to improve and embed a robust open referral management process within the Trust. A full roll out of improvements is planned by end of Jan2016.	Sickness in the month of December has gone up by 0.5% to 5.5%. Cumulative sickness is at 5.0%. Return to work interviews at 69.9% for the month.			The Trust will be submitting the Q3 returns to CCG and SCG. The results are being collated and will be reported to set timelines. Several schemes continue to be challenging in terms of delivery due to system/development issues. Manual audits continue which is a significant effort.	The TDA Observation & Escalation assessment of the trust remains at 'level 3 - Intervention'.																																																																																				
	The Trust annualised turnover rate is at 13.6% as at December and static to last month. Specifically, nursing turnover has been recorded at 15% for the month.	The Trust will be submitting the Q3 returns to CCG and SCG. The results are being collated and will be reported to set timelines. Several schemes continue to be challenging in terms of delivery due to system/development issues. Manual audits continue which is a significant effort.	The TDA Observation & Escalation assessment of the trust remains at 'level 3 - Intervention'.																																																																																						
	Qualified nurse vacancies as at December reported at 293 (267wte LM) implying that we had a greater nursing turnover, which is at 15% as at December, not replenished with new starters.			The Trust will be submitting the Q3 returns to CCG and SCG. The results are being collated and will be reported to set timelines. Several schemes continue to be challenging in terms of delivery due to system/development issues. Manual audits continue which is a significant effort.	The TDA Observation & Escalation assessment of the trust remains at 'level 3 - Intervention'.																																																																																				
	Nurse Bank & Agency utilisation continues to be high; a high proportion of the filled shifts has been via Bank nurses.	The Trust will be submitting the Q3 returns to CCG and SCG. The results are being collated and will be reported to set timelines. Several schemes continue to be challenging in terms of delivery due to system/development issues. Manual audits continue which is a significant effort.	The TDA Observation & Escalation assessment of the trust remains at 'level 3 - Intervention'.																																																																																						
				The Trust will be submitting the Q3 returns to CCG and SCG. The results are being collated and will be reported to set timelines. Comments
13 out of 14 GPs taking part: all have shown improvements and many at desired improvement target of 5% uptake. GPs not taking part shown deterioration; MD to write to non-participating GPs
Patient letter gone out, but 6mths period in which to attend screening so results - uptake unlikely, count of uptake due on 5th February.

Overview

The Trust is contracted to deliver a total of 20 CQUIN schemes during 2015 / 2016. 7 schemes are nationally mandated, a further 5 have been agreed locally, 5 identified by the West Midlands Specialised Commissioners and 3 by Public Health. The collective **financial value** of the schemes is **c.£8.8m**.

The Trust is reporting on Q3 performance at the end of January which is being prepared . Both Q1 and Q2 full funding payments have been achieved.

Highlights - Quarter 3 Reporting Period (December 2015) ...

Overall, the majority of schemes are delivering and are managed extremely well. Delays in system developments have caused large workaround and CQUIN leads and other staff have displayed significant effort on working around this.

Risks ...

Schemes to focus on for the last three months are at the highest risk of non-delivery and hence non-payment:

- Mental Health Diagnosis codes in A&E, previously declared as delivering but on review below target
- AKI manual auditing continuous until the discharge letter is developed, now expected in February.
- Sepsis A was of concern as Oct and Nov month slipped below target delivery. This was mainly in relation to expected system developments not being in place. A manual audit was put in place in December to salvage delivery which has been achieved. It is uncertain though if CCG will expect only one month delivery in the quarter.
- Other schemes not able to report for in December lack reporting discipline rather than failure to deliver, but an up to date position has not been received.

Projections - Quarter 4 ...

- The above highlights the risk across a couple of major schemes, however it is expected that each scheme will deliver full year.
- Specialised schemes have fallen behind target milestones for a number of reasons, some outside of trust control, so the likelihood is that some will not be payable on a full annual basis. We are yet to discuss with SCG the outcome for these.
- The CQUIN leads have to work intensively against those schemes

Activity Summary

Data up to December 2015

Activity - Variance expressed as a percentage between actual activity and planned (contracted) activity is reflected for the month and year to date in the graphs opposite. Additionally, there is a year on year comparison of current year with previous year for the corresponding period of time.

Adverse variances to plan in elective and outpatient care are being addressed through the demand and capacity work being led by the Chief Operating Officer. The plan focusses on maintaining underlying contract plan levels of activity during Q3 and Q4 through daily reporting of booked admitted and non-admitted activity and management challenge of differences from target.

There has been some movement in point of delivery activity since plans were set with plans set as daycase procedures but now recorded in the outpatient setting. Outpatient procedures continue to perform well in month 9 however daycases have continued to slide from their improved performance in October, and elective procedures continue to show significant adverse variance.

Unplanned admissions in total continue to over perform year-to-date however this includes under performance in long stay emergency payments being offset by short stay tariff and non-emergency activity, and our emergency departments continue to underperform – particularly at the City site.

Maternity activity levels remain similar to the average seen so far this year however in December we have seen lower levels of standard and intermediate pathways with a slight increase for complex pathways.

KEY					
EL	IP and DC Elective	OPTEL	Outpatient Telephone Conversation	OCL	Other Contract Lines
NEL	IP Non Elective	MATY	Maternity Pathways	UNBUND	Unbundled Activity
NOP	New Outpatient	OCD	Occupied Cot Days	COMM	Adult and Child Community
ROP	Review Outpatient	ED I	ED City & Sandwell Acute and Mailing		
OPPROC	Outpatient Procedures	ED II	ED BMEC

Each outer segment of indicator is colour coded on kitemark to signify strength of indicator relative to the dimension, with following key:

Red	Insufficient
Green	Sufficient
White	Not Yet Assessed

The centre of the indicator is colour coded as follows:

Red / Green	As assessed by Executive Director
White	Awaiting assessment by Executive Director

If segment 2 of the Kitemark is Blank this indicates that a formal audit of this indicator has not yet taken place

TRUST BOARD

DOCUMENT TITLE:	Safe Nurse Staffing
SPONSOR (EXECUTIVE DIRECTOR):	Colin Ovington – Chief Nurse
AUTHOR:	Colin Ovington – Chief Nurse
DATE OF MEETING:	4 th February 2016

EXECUTIVE SUMMARY:

1.1 This report is an update on safe nurse staffing December 2015 data.

1.2 The daily checking of nurse staffing data has been used to provide this report and provides a realistic picture of staffing on the wards with the exception of maternity and children's wards. Corrective actions have been implemented; these will be checked prior to the next board meeting.

1.3 The bank module is being tested and initial reports produced from the system, it is the intention to use the bank module to help produce the data in the future taking out the manual counting which is the current strength.

REPORT RECOMMENDATION:

To receive an update at the March Trust Board meeting

To support the manual, daily checking of nurse staffing as the means of collecting the necessary information to make the national submission.

ACTION REQUIRED *(Indicate with 'x' the purpose that applies):*

The receiving body is asked to receive, consider and:

Accept	Approve the recommendation	Discuss
	X	X

KEY AREAS OF IMPACT *(Indicate with 'x' all those that apply):*

Financial		Environmental		Communications & Media	X
Business and market share		Legal & Policy		Patient Experience	X
Clinical	X	Equality and Diversity		Workforce	X

Comments:

ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:

Relates to our safety objectives and BAF

PREVIOUS CONSIDERATION:

SAFE NURSE STAFFING UPDATE**Report to Trust Board on 4th February 2016****1 EXECUTIVE SUMMARY**

1.1 This report is an update on nurse staffing data collected for December 2015.

1.2 The daily data check on nurse staffing has continued and forms the basis of this report.

1.3 This data provides better assurance about what is happening shift by shift on all acute adult in-patient wards and assessment units across the trust.

1.4 The data for maternity and children's continues to have problems although the wards have the right nu

2 DECEMBER DATA UPDATE

The average fill rates across the trust which includes permanent, bank and agency staff for all shifts is above 92%. There were some operational pressures through December with some additional beds opened. We have maintained safe staffing across all the acute medical surgical wards within the agreed staffing parameters. This has meant that staff have been deployed between wards and some between hospitals. The children's wards are not fully using the bank module on the e-rostering system consequently the data shows gaps in the numbers which is not reflecting the staff on duty, this has been corrected by the team going forward but may not be evident in the data for another month. All areas have continued with recruitment events to fill vacancies with some success.

Testing the bank module has continued and is proving to be a useful tool in the bank office as they are now able to challenge temporary staffing requests if there is no gap on the rota. Some test reports have been produced from the system, amendments are being made to these and the next step will be to use the reports with Group Directors as part of the accountability challenges in relation to nurse staffing.

3 RECOMMENDATION

The Board are requested to receive this update and agree to publish the data on our public website.

Chief Nurse continues to work with the information team to produce consistent and assured data in relation to ward nurse staffing.

Colin Ovington, Chief Nurse

27th January 2016

ALIGNMENT TO TRUST OBJECTIVES, RISK REGISTERS, BAF, STANDARDS AND PERFORMANCE METRICS:

Aligned to BAF, quality and safety agenda and requirement for Information Governance HSCIC self-assessment submission.

PREVIOUS CONSIDERATION:

Audit and Risk Committee January 2016

Information Governance

Report to the Trust Board on 4 February 2016

1. EXECUTIVE SUMMARY

- 1.1 This report provides an update on the Trust's position against the 2015-16 Health and Social Care Information Centre (HSCIC) Information Governance (IG) Toolkit standards. The Trust's overall score for the 2014-15 self-assessment submission was 74%; the aim set for 2015-16's self-assessment submission is to achieve 85% (the deadline is 31 March 2016).

2. BACKGROUND

- 2.1 Information Governance is to do with the way organisations process or handle information and includes patient, staff and corporate information.
- 2.2 The IG toolkit is commissioned by the Department of Health and is developed / maintained by the HSCIC. The IG Toolkit is a set of standards (45 of which apply to Acute Trusts), which the Trust is required to carry out an annual self-assessment of compliance. The standards are broadly group into the following themes:
- IG management
 - Confidentiality and Data Protection
 - Information Security
 - Clinical Information
 - Secondary Use
 - Corporate Information

3. IG TOOLKIT THEMES

3.1 IG management

The ongoing IG work programme components are delivered through a number of specialist executive and operational committees and groups (Informatics Committee, OMC, RMC, Information Governance Group, EPRR, HRSC, L&D, etc.). During 2015-16 quarterly meetings have been held with the Chief Executive and Senior Information Risk Owner (SIRO – this role is fulfilled by the Director of Governance) IG training continues to be available through a variety of mechanisms. The IG webpages and Connect policies and procedures web pages include a wide variety of IG related materials and staff in IG, Risk and IT provide advice and support as required.

3.2 Confidentiality and Data Protection

Information sharing systems and processes are in place to ensure third party agreements meet Data Protection and Confidentiality requirements. Work is ongoing to improve data capture of information flows and how patients are informed about how the Trust may use their data. The

standards also relate to subject access requests, for which there is an established policy and procedure. The Medical Director continues to fulfil the Caldicott Guardian role for the Trust.

3.3 Information security

Informatics colleagues are working on the Trust wide IT infrastructure and security project. This work includes updates to the network, software and security as well as working closely with the EPRR lead, who is liaising with directorates to further test and develop local business continuity measures. Informatics colleagues maintain a record of all IT systems, which is updated on an ongoing basis to capture current information about asset owners, criticality, information security and resilience, etc. These standards also relate to the Trust's SmartCard and Registration Authority responsibilities.

3.4 Clinical Information

The majority of these standards relate to data quality assurances (use of NHS number, pseudonymisation, audit, traceability, etc.), which is managed by Information / BIU, medical records and clinical audit.

3.5 Secondary Use

These standards largely relate to data quality, external reviews and audits and how the Trust has utilised this information to bring about improvements.

3.6 Corporate Information

Corporate information standards relate to staff and corporate records but do not include patient records. The standards include corporate information procedures and audit as well as Freedom of Information requests processing.

3.7 IG related incidents

IG and IT related incidents continue to be monitored and corporately followed-up where required, e.g. CDA failure and cryptolocker. IG / IT incidents are managed and investigated as per standard incident reporting procedures. As at writing there are no open incidents awaiting a decision from the Information Commissioner's Office regarding any enforcement action.

3.8 IG risks

IG risks are reported and managed according to the Trust's standard risk management policy and procedure. IG risks can be identified across any work programme / department in the Trust as well as overarching strategic risks, such as the IT infrastructure stabilisation programme, which features on the Trust Risk Register (alongside others) that are monitored by The Board on a monthly basis.

4. IG TOOLKIT 2015-16 SELF-ASSESSMENT

4.1 The 2015-16 annual IG Toolkit self-assessment submission deadline is 31st March 2016. Appendix A provides:

- a summary of the standards
- level of attainment to be achieved for 2015-16 with a comparison of 2014-15
- where applicable Internal Audit review findings*

- 4.2 Many of the themes do not change year on year. Scoring is based on three levels, with evidence requirements set out within each level of each standard. **Level 1** evidence is typically basic documentation and responsibilities are clearly defined; **Level 2** is typically where policies and procedures are fully implemented and for some that audits have been acted on; **Level 3** is typically where actions following audits and other improvement activities have been fully implemented and that monitoring arrangements can be evidenced to ensure compliance and effectiveness of policy/procedures.
- 4.3 *An annual Internal Audit review of a selection of standards is also carried out. In previous years the Internal Audit review has been carried out during quarter 4; during 2014-15 this was brought forward to quarter 3 to ensure any actions can be completed well before the 31 March 2016 deadline. **Appendix B** includes a summary of actions identified by the quarter 3 Internal Audit review.

5. QUARTER 4, 2015-16 ONGOING ACTIONS

- 5.1 Specialist executive and operational committees and groups (Informatics Committee, OMC, RMC, Information Governance Group, EPRR, HRSC, L&D, etc.) will continue to progress actions as identified in the Internal Audit Review and /or ongoing work programmes to achieve the agreed levels for the 2015-16 IG Toolkit submission.
- 5.2 A summary of key areas of improvement progressed during 2015-16 include:
- Extensive IT infrastructure and software investment, which is an ongoing work programme;
 - Trust-wide QIHD IG corporate theme in September 2015, which helped over 800 staff increase their awareness and meet their mandatory training requirement;
 - “IG Month” campaign in November 2015, which included key messages, posters, quiz and launch of several IG and IT related policies, procedures and guidance;
 - Updated tools to collate Trust-wide information on data transfers and IG risks.
- 5.3 A key area of focus for quarter 4 remains IG toolkit standard 112 in relation to mandatory training. A concerted effort involving all levels of staff, including support from the Chief Executive and Director of Workforce and Organisation Development, will target areas of non-compliance to meet the required levels of staff trained (95%).

6. RECOMMENDATION(S)

- 6.1 The Board is recommended to:
- **NOTE** the contents of the report.

Kam Dhami, Director of Governance

4 February 2015

Appendix A: IG Toolkit summary

Req't Ref Number	Description	Evidence Summary	Team / Person Responsible	Accountable Lead	Attainment Level 2015-16 Aim	2014-15 Final Submission
101	There is an adequate Information Governance Management Framework to support the current and evolving Information Governance agenda	IG Policies; Assigned IG responsibility in JDs; IG related committee ToRs and minutes, IG development plan, framework review and sign off.	Loretta Bradley	Kam Dhami	3	3
105	There are approved and comprehensive Information Governance Policies with associated strategies and/or improvement plans	Comprehensive IG related policies, evidence of policy-approval and sign off, staff communications and awareness about policies, IG development plan, annual review of framework and IG development plan	Loretta Bradley	Kam Dhami	3	3
110	Formal contractual arrangements that include compliance with information governance requirements, are in place with all contractors and support organisations	Contracts and data processing agreements in place stating IG requirements, examples of clauses; list of contractors involved in data processing identified; third party contract checks carried out.	Justin Mitchell / Craig Higgins	Tony Waite	2	2
111	Employment contracts which include compliance with information governance standards are in place for all individuals carrying out work on behalf of the organisation	Contracts containing IG compliance requirements, staff comms about IG responsibilities – staff bulletin, policies, training materials, etc. Spot checks on staff compliance with IG and monitoring; incident reports.	Lesley Barnett	Raffaella Goodby	3	3
112	Information Governance awareness and mandatory training procedures are in place and all staff are appropriately trained	Documented responsibility for leading IG training agenda, TNA to include recommended role based IG training, documented and owned actions regarding training, training materials, reports of annual training compliance for staff. Evidence of 95% compliance across all staff (annual mandatory training requirement). IA review (Q3) follow-up from previous audit: evidence not at Level 2 minimum – plan to address shortfall in progress	Jim Pollitt	Raffaella Goodby	3	2
200	The Information Governance agenda is supported by adequate confidentiality and data protection skills, knowledge and	Caldicott Guardian in place, role is documented. Documented evidence of Caldicott performance and training and plan, which is signed off (IG Devt Plan). Informatics Committee and IGG ToR and minutes.		Roger Stedman	3	3

	management procedures that are accessible to all staff	communicated to staff. Contracts and agreements with partners contain clear reporting requirements.	Bradley			
303	There are established business processes and procedures that satisfy the organisation's obligations as a Registration Authority	Board or senior committee assigned overall responsibility for RA which is documented. RA policy / procedures approved by senior management.	Sarah Cooke	Alison Daily	2	2
304	Monitoring and enforcement processes are in place to ensure NHS national application Smartcard users comply with the terms and conditions of use	Signed off Smartcard plan/ procedure – regarding staff awareness of Ts&Cs of usage. RA manager JD (assigned responsibility), IS policy referencing Smartcard use. Audit reports for monitoring Smartcard compliance regarding usage and disabling access.	Sarah Cooke	Alison Daily	3	2
305	Operating and application information systems (under the organisation's control) support appropriate access control functionality and documented and managed access rights are in place for all users of these systems	Assigned responsibility for defining and documenting requirements for both system and user access controls. System Level Security Policy. Associated access management procedures such as user registration and deregistration including temporary access. Information Security policy.	Martin Evans	Alison Daily	2	2
307	An effectively supported Senior Information Risk Owner takes ownership of the organisation's information risk policy and information risk management strategy	SIRO in place appropriately trained. Updated Information Asset register. Documented risk findings from IAR reported to SIRO. Regular risk reviews of information assets carried out.	Loretta Bradley / Lee King	Kam Dhami / Alison Daily	3	2
308	All transfers of hardcopy and digital person identifiable and sensitive information have been identified, mapped and risk assessed; technical and organisational measures adequately secure these transfers	Data flows identified. Risks addressed where risks identified. Risks appropriately escalated. Log of all data sharing and transfer agreements.	Loretta Bradley	Kam Dhami	3	2

Appendix A: IG Toolkit summary

Req't Ref Number	Description	Evidence Summary	Team / Person Responsible	Accountable Lead	Attainment Level 2015-16 Aim	2014-15 Final Submission
309	Business continuity plans are up to date and tested for all critical information assets (data processing facilities, communications services and data) and service - specific measures are in place	Documented approved strategy and associated programme. All business critical systems identified and supported with BCPs. All IAOs analysed effect of disruption on their assets and linked to risk register/ reported to SIRO. Staff made aware of BCP requirements. Example system level security policies. Updated Information Asset Register are evidenced. DR arrangements documented.	Matthew Dodd	Rachel Barlow	2	2
310	Procedures are in place to prevent information processing being interrupted or disrupted through equipment failure, environmental hazard or human error	Infrastructure plan. Documented and approved procedures and controls based on risk assessment results to prevent disruption/ interruption of information assets. Summary of risk assessment findings.	Lee King	Alison Dailly	2	2
311	Information Assets with computer components are capable of the rapid detection, isolation and removal of malicious code and unauthorised mobile code	Information Assets reviewed and where those identified vulnerable to malicious code it has been addressed through SLSPs. The measures have been implemented (shown through anti virus SoP and reports from AV software.	Lee King	Alison Dailly	2	2
313	Policy and procedures are in place to ensure that Information Communication Technology (ICT) networks operate securely	Information Security Policy. Identified controls are implemented. A network security policy has been produced for each ICT network and approved by the SIRO (IS Policy as evidence). ICT networks asset owners have reviewed risks and controls. (Breast screening SLSP and risk assessment, infrastructure risk assessment, CLE minutes evidenced). Controls have been approved by SIRO.	Lee King	Alison Dailly	2	2
314	Policy and procedures ensure that mobile computing and teleworking are secure	Documented approved procedures for mobile working, log kept of all authorised staff and where permissions are removed, staff are informed of responsibilities, robust remote access solutions are in place.	Lee King	Alison Dailly	2	2
323	All information assets that hold, or are, personal data are protected by appropriate organisational and technical measures	Existence of Information Asset Register that includes all assets that comprise or hold personal data with accountable owner, plan to capture any missing assets, risk assessments have been carried out and technical safeguards are in place for assets. IA review (Q3) finding: evidence meets level 2	Lee King	Alison Dailly	2	2

Appendix A: IG Toolkit summary

Req't Ref Number	Description	Evidence Summary	Team / Person Responsible	Accountable Lead	Attainment Level 2015-16 Aim	2014-15 Final Submission
		minimum				
324	The confidentiality of service user information is protected through use of pseudonymisation and anonymisation techniques where appropriate	A plan for implementing pseudonymisation and anonymisation for secondary uses is in place, processes have been implemented.	Matthew Maguire	Rachel Barlow	2	2
400	The Information Governance agenda is supported by adequate information quality and records management skills, knowledge and experience	Information Quality and Records Managers/Officers roles assigned, approved documented strategies for information quality and records management identifying required support for necessary work, senior corporate responsibility identified, all staff appropriately trained.	Matthew Maguire	Rachel Barlow	2	2
401	There is consistent and comprehensive use of the NHS Number in line with National Patient Safety Agency requirements	Process is in place to ensure all new systems comply with NHS number requirements and old systems where problems exist with implementation are addressed.	Matthew Maguire	Rachel Barlow	2	2
402	Procedures are in place to ensure the accuracy of service user information on all systems and /or records that support the provision of care	Responsibility has been assigned, approved documented procedures in place, reports are received by a senior committee, procedures are available to all relevant staff, staff are trained, reconciliation is performed as required.	Matthew Maguire	Rachel Barlow	2	2
404	A multi-professional audit of clinical records across all specialties has been undertaken	A clinical records audit process is documented and in place, all relevant staff are informed of their responsibilities regarding clinical record keeping.	Simon Parker	Kam Dhami	3	3
406	Procedures are in place for monitoring the availability of paper health/care records and tracing missing records	Documented and approved procedures in place to monitor the availability of paper health/care records, action taken where issues identified.	Trish Kehoe	Rachel Barlow	3	3
501	National data definitions, standards, values and validation programmes are incorporated within key systems and local documentation is updated as	All key service user information systems incorporate national NHS and/or care definitions and values. Validation programmes are built in to systems and are kept up-to-date and cannot be switched off/ overridden, local system documentation is regularly reviewed and updated.	Matthew Maguire	Rachel Barlow	2	2

Appendix A: IG Toolkit summary

Req't Ref Number	Description	Evidence Summary	Team / Person Responsible	Accountable Lead	Attainment Level 2015-16 Aim	2014-15 Final Submission
	standards develop	Responsibility is assigned, Job descriptions, updated training materials, reports and minutes provided as evidence.				
502	External data quality reports are used for monitoring and improving data quality	An approved process for using external data quality reports for monitoring data quality in place with assigned accountability, process available to all relevant staff, external DQ reports received and issues addressed, senior management kept informed of DQ report use and issues. Evidenced by DQ policy, JDs, DQ reports and minutes to evidence review of reports and actions agreed. IA review (Q3) management action: evidence not at level 2 minimum – plan to address shortfall in progress	Matthew Maguire	Rachel Barlow	2	2
504	Documented procedures are in place for using both local and national benchmarking to identify data quality issues and analyse trends in information over time, ensuring that large changes are investigated and explained	Assigned responsibility, approved procedures in place, relevant staff have been trained, issues are identified and addressed and monitored and reviewed over time. Job descriptions, DQ Policy, minutes, training materials, reports, trend analysis as evidence. IA review (Q3) finding: evidence meets level 2 minimum.	Matthew Maguire	Tony Waite	2	2
505	An audit of clinical coding, based on national standards, has been undertaken by a NHS Classifications Service approved clinical coding auditor within the last 12 months	Documented procedures annual audit of clinical coding in place. Audit programme undertaken and, accuracy levels meet minimum standards. Annual clinical coding audit required and evidence of action completion where identified.	Matthew Maguire	Rachel Barlow	3	2
506	A documented procedure and a regular audit cycle for accuracy checks on service user data is in place	Responsibility is assigned, an approved audit plan is in place, staff are advised regarding accuracy, accuracy reported to Board/ senior management committee.	Matthew Maguire	Rachel Barlow	2	2
507	The Completeness and Validity check for data has been completed and passed	Responsibility is assigned for the checks. Requirement for the checks is documented in the DQ policy. Checks have been carried out to required standard. Agreed improvement plan in place. Results are reported to the relevant committee.	Matthew Maguire	Rachel Barlow	2	2

Appendix A: IG Toolkit summary

Req't Ref Number	Description	Evidence Summary	Team / Person Responsible	Accountable Lead	Attainment Level 2015-16 Aim	2014-15 Final Submission
508	Clinical/care staff are involved in validating information derived from the recording of clinical/care activity	Responsibility is assigned, an approved strategy is in place, staff are informed and engaged. DQ policy, results shared with staff and results showing staff engagement is evidenced.	Matthew Maguire	Rachel Barlow	2	2
510	Training programmes for clinical coding staff entering coded clinical data are comprehensive and conform to national standards	TNA and Training plan is in place. Staff training evidenced.	Matthew Maguire	Rachel Barlow	3	3
601	Documented and implemented procedures are in place for the effective management of corporate records	Responsibility is assigned. Documented approved policy/ procedures for Corporate Records Management which have been implemented and staff informed.	Duncan Whitehouse	Kam Dhami	3	2
603	Documented and publicly available procedures are in place to ensure compliance with the Freedom of Information Act 2000	FOI responsibilities assigned. Procedures are published and accessible and provided to staff. There is existence of a publications scheme and legal requirements are being met. Job description, training and awareness materials, assurance reports, publication scheme, request log.	Duncan Whitehouse	Kam Dhami	3	3
604	As part of the information lifecycle management strategy, an audit of corporate records has been undertaken	Responsibility is assigned, approved plan is in place, audit completed, actions have been identified and addressed.	Duncan Whitehouse	Kam Dhami	3	2

Appendix B: Internal Audit Review Summary of Actions

Req't Ref	Standard	Actions for management	Implementation date	Responsible owner
112	Information Governance awareness and mandatory training procedures are in place and all staff are trained (95% compliance required)	Work has already begun on ensuring that the Trust fully complies.	31st March 2016	Associate Director of Education, Learning and Development
203	Patients, service users and the public understand how personal information is used and shared for both direct and non-direct care, and are fully informed of their rights in relation to such use	Since the review additional evidence has been uploaded. The remaining action is on track and once uploaded will meet Level 2 requirements.	31st March 2016	Information Governance Manager / Deputy Chief Nurse
301	A formal information security risk assessment and management programme for key Information Assets has been documented, implemented and reviewed	Since the Internal Audit Review additional evidence has been uploaded to ensure full compliance.	22nd January 2016	Chief Information Officer
502	External data quality reports are used for monitoring and improving data quality	Since the review some evidence has been uploaded, although the Level 2 standard has not yet been achieved.	31st March 2016	Head of Information / BIU
209	All person identifiable data (PID) processed outside of the UK complies with the Data Protection Act 1998 and Department of Health guidelines	Since the review the revised Data Flow Mapping survey has been issued. As at writing over 50 responses received. A review of all responses will be carried out to identify any overseas transfers and whether these meet legal requirements.	31st March 2016	Information Governance Manager / Head of Risk Management

TRUST BOARD

DOCUMENT TITLE:	Complaints & PALS report: 2015/16 quarter 3				
SPONSOR (EXECUTIVE DIRECTOR):	Kam Dhami, Director of Governance				
AUTHOR:	Karen Beechey, Head of PALS & Complaints				
DATE OF MEETING:	4 th February 2016				
EXECUTIVE SUMMARY:					
<p>This report sets out details of Complaints and PALS enquiries received between October and December (Quarter 3).</p> <p>The report provides high level data on PALS and Complaints, demographics of the subject of the complaint if a patient, and the reasons those complaints were made.</p> <p>In this quarter, it is reported that the complaints activity has increased, and shows that 93% of complaints have been managed within their target date. Themes and outcomes remain consistent with previous quarters and shows a continued focus on lessons learned, 'action tracking' and quality responses that are caring, transparent, timely and responsive to the needs of complainants.</p>					
REPORT RECOMMENDATION:					
The Board is recommended to DISCUSS and NOTE the contents of the report.

Complaints and PALS Report

2015/16: Quarter 3

COMPLAINTS MAKING A DIFFERENCE

Complaints provide a learning opportunity for individuals as well as changes in practices or procedures which may not have been evident without the patient or their representative raising the issue. Below are examples of improvements made as a direct result of this feedback.

What we were told	Our response	The difference
Patient had cataract surgery on 1 June 2015 and got a follow up appointment on 11 August 2015 but only due to her persistence. Complainant unhappy that systems were not in place to ensure timely follow up appointments.	To ensure this does not happen again, plans are under-way to have a central booking team responsible for booking appointments (including those required within the community) and therefore provide a more streamlined service for patients.	Unacceptable delays in follow up will not occur for patients, and will reduce the inconvenience of patients having to chase their own appointments.
A carer from the residential home who accompanied the patient requested that their care be transferred to Russell Hall Hospital. It was agreed and a transfer form was completed. This was NOT at the request of the family and NOK was not asked. On three occasions, the family have requested to change the patient's address for appointment letters to the daughter's address, as the family have been unaware of appointments. Pt is 90 years old and suffers with dementia and therefore is not able to attend appointments on his own. The patient was discharged from the consultant as per the request of a carer and the hospital should not have acted on the carer's instructions.	Apology offered for the Trust's inflexible administrative systems. We confirmed that we have now changed the patient's address details to that of his daughter's address. Changes have been put in place across the medical secretarial teams and these systems are being audited by our Patient Administration Managers. The patient's care will now remain at BMEC.	Elderly and vulnerable patients will be supported by the most appropriate care giver including family and communication with families will be improved, reinforcing trust and improving outcomes for the patient.
The patient's solicitors requested his records from Legal Services on 24 August 2015, and they were delayed beyond the 40 day time frame given for Subject Access Requests. The	We have recently changed the way Subject Access Requests are managed and have introduced a database to identify at what stage they are at in the process and this in turn has made it much easier to	The new data base will ensure that anyone enquiring about the status of their request will be given accurate information, as well as supporting the team to manage these requests within the appropriate

What we were told	Our response	The difference
complainant also received conflicting information from a member of the team, and was not happy with their attitude.	update enquirers with more accuracy and to manage requests. In relation to the concern about the attitude of a member of the Legal Services team, and apology was offered and professionalism discussed with them, and the team as a whole.	timeframe, which is also now achieved in 93% of the case.
Patient had an appointment for an echocardiogram on 8 December 2015 at 9.45am. He spoke to the receptionist and apologised for being 20 minutes late but the receptionist advised that he could not be seen and did not want to know why he was late. The patient was concerned that the attitude of the receptionist influenced the decision not to allow the patient	The receptionist apologised as it was not intentional to appear rude and unhelpful. Reasons as to why the appointment could not go ahead were explained. The appointment letter has now been amended to ensure that this is clearer for patients who may be running late.	Patients are informed via their appointment letters, that if they are late, then their appointment will need to be rearranged. By advising all patients of this potential, they will be aware that this is potential and be better prepared for this outcome.
Patient is complaining about the new booking in system, feeling that we are in breach of confidentiality as when booking in for an appointment the patient's personal details come up on the screen and can be read by anyone nearby. Patient was told that there was no other method of recording attendance. Patient wants to know the justification of why there is such a disregard of the Data Protection Laws.	Apologies and explanations offered, including the benefits of the self-check in system. Privacy lines have now been affixed in front of check in kiosks to ensure privacy is maintained, and was implemented as a result of the this complaint, and other patient feedback.	
Patient was in surgery for a knee replacement. Before going into surgery she was given half the antibiotics by syringe (the other half to be administered once in theatre). The Anaesthetist picked up the wrong syringe and injected the patient with the wrong medication, resulting in an	This incident was raised under the Trust Incident Reporting process and was fully discussed at the September anaesthetic governance meeting to raise awareness and prevent a repeat. Emergency drugs are now kept separately from other drugs, such as antibiotics, interruptions in the anaesthetic	The risk of the likelihood of such an event has been significantly reduced, which in turn has improved patient safety.

What we were told	Our response	The difference
unexpected admission to the Critical Care Unit.	room do not occur during drug administration.	
Patient complained that they had 2 appointments for cardiology cancelled due to no doctor being available.	Apologies offered to the patient. The complaint has been discussed with the team involved who agreed a formal escalation process whereby any patients that are cancelled more than once by the Trust are offered an expedited appointment under an alternative clinician if agreeable with the patient. Furthermore to avoid any booking errors relating to clinicians not being available we have administered a 'flexible registrar' system whereby if the original clinician is unavailable for any reason then a speciality doctor is always on hand to ensure patients are seen in clinic and not turned away.	Waiting times for appointments will be reduced, and where unavoidable cancellations occur, and then patients who have experienced this will be prioritised, ensuring that they still feel valued.

COMPLAINTS AND PALS: 2015/16

Quarter 3 data highlights

1.	The total number of PALS concerns registered was 634 , down by 23. Strategy and Governance, and Imaging saw the most significant decrease, with Surgery B seeing an increase concerns particularly around appointment. (page 21)
2.	The total number of Complaints logged was 261 , a decrease of 66 complaints across the quarter compared to Q2 2015/16. 26 of these were withdrawn by the complainant at some point during the quarter leaving 235 to manage. There were 7 more complaints made in October 2015 compared to October 2014, 18 more complaints made in November 2015 compared to November 2014, and 1 more made in December 2015 compared to December 2014. (page 7)
3.	The total number of compliments collected for Q3 2015/16 was 220 compared to 285 in Q2 2015/16 and 358 in Q1 2015/16. It is now clear that the collection method is not supporting accurate data reporting, and a new method of collection is scheduled to be trialled in Women and Child Health in Q4 2015/16 and Q1 2016/17. (Appendix 11 page 39)
4.	The average number of days taken to resolve complaints saw a decrease by a further of 15.17 days from 44.65 (Q2 2015/16) down to 29.48 (Q3 2015/16). This decrease continues to be attributed to the resolution of fewer older complaints as well as a higher proportion of newer complaints being managed within their target dates and is set to stabilise as the case load is now managed within an average of 30 working days. (page 11)
5.	Complaints per 1000 bed days have decreased when compared to the previous quarter, with an average rate of 3.0 of against 3.4 in the previous quarter. This rate is lower than for the same period last year when the Q3 2014/15 rate was 4.5. This decrease has contributed to a continued downward trend over the last 7 quarters. (page 8)
6.	When looking at the complaints rate per 1000 FCE it is still Surgery B that has the highest complaints rate at 11.5 (an increase on last quarter's 9.5) all other groups seeing a decrease in rate. Woman and Child Health still has the lowest and whilst they had seen a steady increased from 2.5 in Q3 2014/15, to 4.6 in Q2 2015/16, it is now back down to 3.6 in this quarter. (page 9)
7.	'Not Upheld' complaints made up 27% of closed complaints against 24% in Q2 2015/16 and 24% in Q1 2016/16 and 26% in Q4 2014/15, but with no emerging trends in terms of Groups or themes. (page 18)
8.	The three themes that emerged out of complaints this quarter remain the same as the previous four quarters and are Attitude of Staff, Clinical Care and Appointments . Medicine still has the highest percentage of complaints across these categories at 42%. (page 14)
9.	Reopened cases totalled 53 with 2 of those re opened due to not all the issues being answered in our first response (4%). This compares to 40 reopened with 4 where not all issues were addressed in Q2 2015/16 and 49 reopened with 7 where not all issues were addressed in Q1 2015/1 and 44 reopened where 5 where not all issues were addressed in Q4 2014/15. There has been a reduction in the % of those reopened where not all issues were addressed, from 22% in for the same quarter last year, Q3 2014/15, down to 11% in Q4 2014/15, a slight increase to 14% in Q1 2015/16 and back down to 10% in Q2 2015/16. (page 19)
10.	There were 13 new PHSO enquiries of the Trust in this quarter, and 2 previous enquiries were closed off. This is the most significant increase of PHSO cases seen this year, details of the cases are detailed in the report. (pages 20)
11.	The new Complaints satisfaction survey was launched this quarter. The response rate was slightly low at 12.1% but the results were improved in some of the areas of complaints management surveyed. The results for overall well-handled went from 45% in Q1 2015/16 to 69% in Q3 2015/16 and being kept informed went from 34% in Q1 2015/16 to 77%. 85% of respondents also found the response easy to understand in Q3 2015/16 as opposed to 58% in Q1 2015/16. (page 12)
12.	There is no disproportionality the number of complaints made by (or on behalf of) either Pakistani patients (at 8% complaints vs 11% local population) but Black Caribbean patients featured as making up a higher proportion of complainants than that of the population as a whole. (at 13% complaints vs 6% local population). (page 14)

INTRODUCTION

Concerns and complaints raised by patients and visitors must be viewed positively as an unsolicited form of feedback. These are opportunities to improve our services and the care we provide based on user experience.

This report sets out and provides commentary on the complaints, PALS enquiries, local departmentally resolved concerns and compliments, the way they were managed, who they were made against and what about. The important learning opportunities are evidenced and the subjects of the complaints are also profiled.

COMPLAINTS

1. Complaints Management

1.1 Total received

The total number of complaints received by the Trust financial year to date is 795, against 689 for the same period in 2014/15. The total number of complaints received in Q3 2015/16 was 261 compared to 297 in Q2 2015/16 and 237 in Q1 2015/16. In the same period the previous year, Q3 2014/15 235 complaints were received, 26 less. When broken down by month, year on year, there were 7 more complaints made in October 2015 compared to October 2014, 18 more made in November 2015 compared to November 2014 and 1 more complaint made in December 2015 compared to December 2014. It should also be noted that 26 complaints were withdrawn in this quarter, 5 less than in the previous quarter leaving 272 actively managed this quarter.

Q3 2015/16 complaints received by month

1.2 Complaints by Clinical Group

When analysing the complaints received in Q3 2015/16, by Clinical Group and Corporate Directorate, Medicine continue to receive the most complaints. **Appendix 1a** shows how these figures compare over the last 4 quarters. **Appendix 1b** shows how this is broken down by ward (where applicable).

Q3 2015/16 complaints received by Clinical Group/ Corporate Directorate

1.3 Complaints by 1000 bed days

The complaints rate, calculated as complaints per 1000 bed days for Q3 2015/16 is lower than the previous quarter at 3.0 against 3.4 for Q2 2015/16. The trend line is still downward. The 12 month rolling average has decreased to 3.2 against 3.3 when last reported. The trend line is shown in red and the rolling average is shown in blue.

Complaint rate over last 6 quarters showing trend and average

When comparing the rates of complaints by Clinical Group Surgery B appears very much higher, but it is worth noting that many patients in this group do not occupy a bed therefore the more accurate measure for this Group is the FCE rate.

Complaint rate per 1000 bed days for Q3 2015/16 by Clinical Group

1.4 Complaints received per 1000 FCE (Finished Consultant Episodes)

To more accurately compare which Clinical Group is receiving the most complaints, it is important to represent these not just as numbers of complaints, but as a proportion of the patients that have received care in these areas. This then puts these numbers into context. By comparing the numbers of complaints with FCE we can gauge better whether one service or another is attracting more dissatisfaction and once understood, drill down further into what aspect of that service needs to improve. This analysis was only applied to the largest of the Clinical Groups, as they contribute to 86% of the complaints. This is an increase of 7% from the 79% proportion from Q2 2015/16.

Complaints received per 1000 FCE (Finished Consultant Episodes) Q3 2015/16

Although the majority of complaints received are still made about Medicine, it is again Surgery B that has the highest number of complaints per 1000 FCE. Surgery B has been working closely with the Elective Access Team to improve the way that appointments are managed and utilised across the Group and this work started in Q4 2015/16. The plan is to speed up and streamline the triaging process, re-align clinic appointment schedules to maximise capacity, and review (looking forward) all clinics regularly at 1 week hence and 6 weeks hence. Meridian have been contracted to assist the Group with this work which commences with earnest week commencing Monday 18th January 2016.

Reference is also made to the theme of complaints in section 2.2 and **Appendix 7** in order to better understand the types of complaints made against Surgery B. **Appendix 2a and 2b** show the breakdown of complaints rates for both 1000 Bed days and 1000 FCEs by group.

Complaint rate per 1000 FCE for Q3 2015/16

1.5 Timeliness of Responses

As previously reported, Q2 and Q3 2014/15 showed a spike in the average days taken to respond to complaints, and this was largely due to the volume of older cases that had been finalised. Q4 2014/15 saw a predicted decrease, and this has continued through the first three quarters of 2015/16 as cases continue to be managed within agreed timeframes and the number of cases being closed (that had exceeded their response dates) becomes fewer still. The rate has gone down from 44.65 to 29.48, a reduction of 15.17 days.

Of the complaints made since April 2015 there has been 41 (out of 567) cases sent after their agreed target dates. This means that 93% have gone out on or before the agreed date.

Of note is the fact that the breached cases remain in the minority, but have increased. Reasons for this include the administration of complaints within the Governance team, and the need to prioritise quality over target dates, in a few cases.

Average days to respond by quarter in Q3 2015/16

Appendix 3 shows a further breakdown of this data by Clinical Group. It should be noted that this is the total time that the complaint took to resolve and includes all stages of the process.

1.6 Complaints managed by resolution meeting

It is recognised that for some complaints, a resolution meeting, as opposed to a written response can be more effective in addressing concerns. Complainants whose concerns relate to a patient who has died will always be offered a meeting. Some complainants will express a preference to meet with the Trust as opposed to receiving a written response, and other complainants may present cases or stories that would suggest a meeting is the more appropriate way to resolve it. The take up rate of complaints resolution meetings is monitored and for Q3 2015/16 this was 10% for both complaints being made for the first time, and those that are reopened. This compares to 12% in Q2 2015/16 and 7% for Q1 2015/16.

Given that this rate is still relatively low feedback from the complaints team on why include the following reasons:

- Complainants being too emotional soon after the death of their family/ friend to meet with the Trust in the first instance.
- Complainants wanting 'something in writing' first so that they can consider next steps.
- Availability to meet with us at the latter end of the year was an issue in some cases.

Work is now being undertaken to monitor all complaints that are flagged as being best managed by a meeting (every mortality complaint and those identified at triage) in order to ensure that the complaints process stays focused on the needs of complainants. This work is also being undertaken as a reaction to the survey result that suggests that complainants were not given this option when planning their complaint with them.

% of complaints that were managed by a resolution meeting as opposed to a written response. Q3 2015/16 compared to Q2 2015/16 and Q1 2015/16

1.7 Complaint satisfaction survey

All complaints closed from 1 October 2015 onwards are now receiving a revised satisfaction survey, sent 4 weeks after they have received their final response. The return rate was 12.1%, slightly lower than previous quarters (19.1% in Q4 2014/15 and 12.2% in Q1 2015/16.) No surveys were sent in Q2 whilst it was under revision.

Work has started on investigating how we can continue to encourage a higher response rate, including consideration as to whether the timing of when questionnaires are sent is appropriate. It is important to acknowledge that paper survey methods are out dated, and new methods of data collection should be trialled. In Q4 2015/16 we will however continue using the current method to ensure that this survey has been implemented for a sufficient enough period of time to judge whether the method is still appropriate.

Response rate for Complaint Satisfaction Survey for Q3 2015/16 compared to Q1 2015/16, Q4 2014/15, Q3 2014/15 and Q2 2014/15

Complaint Survey results by % Q3 2015/16

KEY POINTS

- Surgery B still have the highest complaint rate, a high number relating to appointment management, with work continuing to improve the management of Surgery B appointments.
- 93% of complaints resolved in this quarter were sent within their target date. This has increased slightly from the previous quarter, but remedial action is in place to ensure breaches remain rare, this is the first time for many years that the Trust has been able to report such compliance.
- The new Complaints Satisfaction Survey was started with good results in terms of feedback, but a poor response rate.

2. Complaints in detail

2.1 Profile of the subject of complaints

In order to check that our complaints process is accessible to all, it is important to understand the profile of complainants by certain protected characteristics. Gender, age and ethnicity are recorded and then compared to our hospital population and also the population of the geographic area that we serve in **Appendix 5a**.

Subject of complaint by % Ethnicity Q3 2015/16

In the last 3 quarters of 2014/15 there was disproportionality in the ethnic mix of complainant's versus our patient population. This trend continued to a degree into Q1 2015/16 with a lower rate of complaints from the Asian community. In Q2 2015/16 the rate has steadied and complaints rate for this quarter is proportionate at a 10% complaints rate, with the Pakistani community making up 10% of our local population. The same has been reported for Black Caribbean complainants although this was proportionate in Q1 2015/16 and remains so this quarter at 5% complaints rate and 6% of our local population. However once again in this quarter, Black Caribbean complainants made a disproportionately high number of complaints verses the rest of the complainant population. Appendix 5b breaks down the type and grade of complaint, and the Clinical Group it is about.

2.2 Formal complaints by theme

Broad themes that complaints fell into in Q3 2015/16 compared to Q2 2015/16, Q1 2015/16 and Q4 2014/15.

When analysing the top three themes complained about, these remain 'all aspects of clinical treatment', 'appointment delays', and 'staff attitude'. **Appendix 7** breaks down the themes of complaints by Group, profession and department for the most complained about themes.

In Q2 and Q3 2014/15 it was reported that Surgery B had a disproportionately higher rate of complaints about their management of appointments but this decreased in Q4 2014/15 and again in Q1 2015/16. In Q2 2015/16 there was a slight increase, and this has continued into Q3 2015/16. 33% of complaints about appointments relate to Surgery B, but it should also be noted that 30% were attributed to Medicine, the highest rate this Clinical Group has seen this year. The rate at which complaints are received about appointments has remained steady over the last 3 quarters, at around 18%.

Appendix 7 specifies the staff groups that feature in the complaints about 'attitude of staff.' In most of the previous quarters, when comparing doctors and nurses, it is more likely that it is the attitude of the doctor that causes concern, not nurses. However, in Q3 2015/16 this is reversed, with nurses having a higher proportion of these complaints.

2.3 Formal complaints by severity

The following is a breakdown of the 235 actively managed complaints by severity and shows that once again complaints considered high or significant (Levels 3 and 4) remain in the minority. However, it is noted that there has been a significant rise in the amount of grade 4 complaints, and they all relate to the death of a patient. This quarter, Level 1 and 2 complaints made up 83% (196) of those received which was 3% lower than the last quarter (86% in Q2 2015/16), and 2% lower than the quarter before. (85% in Q1 2015/16). There were 8 Level 4 complaints, all involving the death of a patient. Appendix 8 details each of these complaints including outcomes.

A breakdown the severity grade of complaint for Q3 2015/16

2.4 Formal complaints by profession

It has previously reported that there were no significant changes in the number of complaints received across the seven professional groups. In Q2 2015/16 there was a notable increase in the number of complaints about administrative and managerial staff. This has come down slightly but is still higher than in Q1 2015/16, Q4 2014/15 and Q3 2014/15.

Complaints by staffing group Q3 2015/16 compared to previous 4 quarters

KEY POINTS

- When broken down by ethnicity, complaints regarding Black Caribbean patients have again increased, with complaints about staff attitude notably higher for this ethnic group.
- Elective access are working to improve the way that appointments are managed across many clinical areas and whilst this work continues, this has not yet resulted in a decrease in complaints about appointments.
- Legal Services have completed the implementation of system improvements resulting a reduction of complaints within the Strategy and Governance Corporate Directorate for this quarter.

3. Formal complaints outcomes

3.1 Resolved complaints

250 responses were sent out this quarter compared to 257 in Q2 2015/16, 225 in Q1 2014/15 and 202 in Q3 2014/15.

3.2 Formal complaints upheld.

At the conclusion of a complaint, we categorise the outcome as one of the following three categories.

Upheld – we agreed that the complainant was found to have experienced poor care/ treatment/ customer service.

Partially upheld- elements of the complaint were found to be the case, but not all.

Not upheld- The investigation did not uncover any failings on behalf of the Trust.

The outcome of complaint responses remain mostly either upheld or partially upheld, and whilst there was a slight increase in the instances of partially upheld in the last quarter, Q2 2015/16 results have reverted back to outcomes that are more consistent with previous quarters.

The high percentage of these outcomes still demonstrates a continued commitment to 'Being Open' and integrity in general in complaints management.

Q3 2015/16 no. of complaint by outcomes

Complaints outcome Q3 2015/16 compared to Q2 2015/16, Q1 2015/16, Q4 2014/15

Learning from complaints

Complaints provide an important opportunity to improve service, learn from mistakes and identify systemic flaws in order to improve patient experience, and in some cases patient safety. The database used in the complaints process has an action tracker, and records any recommendations that are made for individual complaints.

Reported is a breakdown of all complaints by outcome, where recommendations for action were made. Appendix 6 is a snapshot of the tracker which monitors all complaints where there was an action, post complaint.

3.3 Reopened cases

Reopened cases totalled 53 in Q3 2015/16 with 2 (4%) cases reopened because not all issues were addressed first time round. This compares to 40 in Q2 2015/16 and with 4 (10%) cases reopened

because not all issues were addressed first time round. Reopened cases have increased this quarter, but the % reopened because not all issues were covered has more than halved. Most complainants, 64%, reopened because they didn't agree with our response.

Total number of cases reopened and why Q3 2015/16

Total number of cases reopened and why Q3 2015/16 compared to previous 4 quarters

Of those complaints that were reopened because we had not addressed issues the first time, both were for Surgery B. Over the past 3 quarters, there has been no particular Group that has contributed to this type of dissatisfaction as a pattern, and this is the first time Surgery B has featured in this type of reopened case for 6 months. **Appendix 9** shows all reopened complaints by Group and Grade, and continues to show that it is the medium grade (Level 2) complaints that are most likely to be reopened. Also shown in **Appendix 9** is a breakdown of the Medicine and Emergency care Group as this remains the group that received the most reopened cases. This breakdown is shown by both reason and grade.

3.4 Parliamentary and Health Services Ombudsman enquiries.

When the local complaints process is exhausted, any complainant who remains dissatisfied can have their complaint reviewed independently by the Parliamentary and Health Services Ombudsman (PHSO).

15 new PHSO complaints were logged in the three months of this quarter, and 2 enquiries were concluded during this same period. These are shown below.

The outcome of the 2 cases closed in Q3 2015/16

It is unusual to receive so many new complaints from the PHSO in one quarter, and a number of factors should be considered when assessing whether this is a concern for the Trust.

- We have sent far more complaints out in the last 9 months, than in the previous 9 months, and so the number of complainants who have had complaints concluded (and are therefore eligible to go to the PHSO) has increased.
- The PHSO have openly reported that one of the aims for this year and moving forward is to investigate more cases brought to them.
- With that in mind, a larger number of complaints have been accepted by PHSO that haven't been through Stage 2 of the local resolution process, (where a complainant can reopen a complaint giving the Trust an opportunity to review its investigation and final position.)
- The Trust have received an albeit small number of complaints where a mutually agreeable position had not been reached, where the PHSO were actively promoted to give the complainant the independent, escalated review that the complaint warranted.

There is still no pattern in regards to Clinical Group, grade or type of complaint that these 15 PHSO cases.

3.5 SWBH complaints featuring in external publications-

Parliamentary and Health Services Ombudsman (PHSO) in the news

In December 2015, the government announced that there will be a single Public Service Ombudsman (PSO) that will incorporate the work of the Local Government Ombudsman (LGO) and the Parliamentary and Health Services Ombudsman (PHSO). There was no timeframe quoted for the launch of this new body, but the essence of the move to create this new organisation was to make it

easier for the public to complain about public services without having to first work out which Ombudsman to approach.

Q2 2015/16

The PHSO reported that they received 2658 (compared to 2393 enquiries in Q1 2015/16) with 331 (compared to 659 in Q1 2015/16) being investigated. Of those, 45% were upheld by the PHSO. The PHSO received 26 enquiries relating to Sandwell and West Birmingham (compared to 67 in Q1 2015/16) with 3 (compared to 13 accepted for investigation for Q1 2015/16) being investigated by them. This was a relatively low rate for this quarter and of course a quarter behind this report. We do know already because of activity from the last three months that this rate will be reported as higher in Q4 2015/16.

4. PALS

The Patient Advice and Liaison Service (PALS) continue to play a vital role in providing patients with a local advocate who can investigate concerns. As well as reporting the standard enquiries, work has continued in the collection of compliments for this quarter, of which there were 220.

The total number of PALS enquiries made for Q3 2015/16 was 634, compared to 657 in Q2 2015/16, 564 in Q1 2015/16 at 564 and 554 in Q4 2014/15. The number of enquiries for Q3 2015/16 is only 4 less than for the same period this time last year in Q3 2014/15 at 638.

Graph shows the number of enquiries of PALS by quarter over the past since Q3 2013/14.

The following are the enquiries taken by PALS in Q3 2015/16 compared to Q2 2015/16

Appendix 10 reports all PALS enquiries compared to the last 4 quarters, and also broken down by Clinical Group and in future reports, will also compare this Clinical Group with previous quarters.

Appendix 11 shows the compliments collected this quarter.

5. Development work from previous quarters now implemented

- 5.1 Legal Services had systemic issues with the way that Subject Access Requests were being managed, resulting in there being a back log of requests which were not being managed within the 40 day time limit legislated for this type of request. Much work was done on improving monitoring systems, and refocusing staff in order to improve the efficiency of this work. In October 2015, approximately 45% of requests were over the 40 day limit and by the end of the quarter, this had improved to 7%.

6. Key areas for focus in Quarter 3 2015/16

- 6.1 **Integrated reporting across Governance** in order to better understand the link between an incident that results in a complaint and in turn may result in a legal claim. This involves using the Safeguard database system to ensure that episodes that are reported as incidents, logged as complaints and claimed for as medical negligence, are linked together. This reduces duplicated work and ensures cohesive responses to all stakeholders. This work still continues into Q4 2015/16.

- 6.2 Some consideration needs to be given to the collection of the **compliment data**. The current method of collection relies too heavily on a manual tick sheet that is not consistent, making the analysis of trends difficult. Safeguard (complaints database) can be used to record compliments, but it does rely on commitment from staff to record compliments on this database. This work is being discussed with the Patient and Staff Engagement Committee in order to implement this across the Trust. A trial was planned in Paediatrics for the beginning of 2016, but this had been put on hold in order to focus on patient care on the ward. This is tabled to be discussed again at the Patient and Staff Engagement Committee meeting in January 2016.
- 6.3 Work started to understand from **Black Caribbean and Pakistani** communities their complainant behaviour on the basis of the disproportionality of the rate vs population percentage. This trend however started to even out in Q1 2015/16. In Q2 2015/16 it is reported that there is no disproportionality and so this work has been suspended. Given that this imbalance reappeared in the data for Q3 2015/16 but specifically for just Black Caribbean and mainly around attitude of staff, there will a piece of work done with Equality and Diversity to develop a strategy in relation to staff training.
- 6.4 In order to test a different method of **Complaint Satisfaction Survey** complainants who supply an email address will receive an emailed with their attached to it (that can be filled in electronically) and the return rate will be monitored separately and reported upon in Q4 2015/16.

7. Conclusion

- 7.1 The total number of complaints has decreased this quarter and there has been return of higher rates of complaints about appointments about Surgery B and plans have been implemented to address this although this work is expected to take some time before eradicating the appointment concerns all together. There was also a return of the disproportionate complaint rate about Black Caribbean patients. There has also been a steed decrease about Legal Services and they have corrected systemic issues that were resulting in poor service to SARS (Subject Access Request) customers.
- 7.2 Complaints continue to be sent out largely on time, although there was a slight increase in those cases that did get sent out after the agreed target date.
- 7.3 PALS enquiries have decreased and they will continue to work towards improvement the rate that compliments are captured. A new method of capture will trial in Women and Child Health through part of Q4 2015/16 to investigate whether this would work if implemented across the whole Trust.

Appendix 1a

Complaints received by Clinical Group and Corporate Directorate for Q3 2015/16 compared to Q2 2015/16, Q1 2015/16, Q4 2014/15 and Q3 2014/15 (same time last year.)

Appendix 1b

Complaints received by Ward (where applicable) for Q3 2015/16 compared to Q2 2015/16, Q1 2015/16, and Q4 2014/15

Appendix 2a

Complaints rates by 1000 bed days for Q2 2015/16, Q1 2015/16, Q2 2014/15 and Q3 2014/15- by the top four Clinical Groups

Appendix 2b

Complaints rates by 1000 FCE for Q3 2015/16, Q2 2015/16, Q1 2014/15, Q4 2014/15 and Q3 2014/15 (this time last year)- by the top four Clinical Groups

Appendix 3

Complaints turn around by Clinical Group for Q2 2015/16, showing the number of days that each new, or reopened complaint took to close from the time it was received by the Complaints team to the time that it was signed off (compared to Q1 2015/16, Q4 2014/15 and Q3 2014/15).

Appendix 4

Break down of survey respondents by gender in Q3 2015/16

Break down of survey respondents by broad ethnic groups in Q3 2015/16

Break down of survey respondents by age

Appendix 5a

A breakdown of all complainants by % by age and gender where specified for Q3 2015/16

Gender (%)

Age (%)

A breakdown of all complainants by %, by ethnicity (where recorded) for Q3 2015/16 without White British

Ethnicity split by Sandwell and West Birmingham Population as taken from the 2011 census and quoted out to the Local Demography report prepared by the Trusts Equality and Diversity team in 2013.

Ethnicity split of patient population

Ethnicity split by Sandwell and West Birmingham Population as taken from the 2011 census and quoted out to the Local Demography report prepared by Equality and Diversity in 2013, without White British.

Appendix 5b

% of complaints made by or on behalf of Black Caribbean patients by grade for Q3 2015/16

% of complaints made by or on behalf of Black Caribbean patients by the 4 largest Clinical Group for Q3 2015/16

% of complaints made by or on behalf of Black Caribbean patients by complaint theme for Q3 2015/16

Appendix 6

Action tracker of complaints with post complaint action (for Q3 2015/16)

Response Date	Action Type	Action Details	Target Date	Completion Date	Complainant advised?
22/09/2015		DIRECT FROM TRUST RESPONSE - In light of your comments, we will review the pathway where repeat ABR tests show no or little change and look to offer parents the option of being sent a written summary of the results after appropriate peer review and analysis.	30/11/2015	03/11/2015	Improvement advised at the time of the complaint in the complaint response, implementation not advised since.
14/10/2015	Monitor Situation	Feedback to be given to doctor about how the patient felt at the time of the test. Complaint response apologised for this but assurance was given that the doctor would specifically receive this feedback.	20/11/2015	05/11/2015	Called patient to confirm that the doctor had now received this feedback.
23/11/2015	Raise Awareness	Departmental management have made contact with all staff within ophthalmology to remind them of the Trust Promises, including 'going the extra mile', and 'being polite, courteous and respectful'. It was also made clear that staff must introduce themselves when speaking with patients and relatives.	15/12/2015	23/11/2015	Improvement advised at the time of the complaint in the complaint response, implementation not advised since.
6/12/2015	Review Care Given	An action was agreed at the conclusion of the complaint resolution meeting that the patient should have their next appointment brought forward, rather than having to wait until February 2016 and this has been done.	31/12/2015	16/12/2015	Letter sent to patient confirming that new appointment had been made for 18 January 2016.
29/12/2015	Change Procedures	In response to feedback from the complaint, and with consultation from staff also, all bins on the unit have been replaced by bins with soft close lids.	22/12/2015	22/12/2015	Called complainant to advise that this has been done.

Appendix 7

A breakdown of the top three themes complained about, broken down by Clinical Group or Corporate Directorate for Q3 2015/16. Where there were no complaints for this theme for a Clinical Group or Corporate Directorate, then they are not featured in this breakdown.

A breakdown of the 'attitude of staff' theme by staff groups for Q3 2015/16

A breakdown of the 'all aspects of clinical treatment' theme by Trust wide clinical directorate Q3 2015/16

Appendix 8

BREAKDOWN OF ALL 8 GRADE 4 COMPLAINTS INVOLVING DEATH OF PT IN Q3 2015/6

Details of complaint	Who involved	Outcome/ investigation to date
Patient fell down stairs and suffered pains in his chest. When the family telephone WMAS they were told to monitor him at home. The family took the patient to the A&E at City where they were kept waiting for over 2 hours whilst the patient visibly deteriorated. Patient was admitted to CCS and died 5 days later.	Sandwell and West Birmingham Hospitals NHS Trust, Medicine and Emergency Care West Midlands Ambulance Service	Errors found from both organisations but ultimately it was felt that given the significance of the patient's injuries, along with his age, the outcome was likely to remain unchanged.
Parents feel that the poor care given to their son was a contributory factor to his death.	Sandwell and West Birmingham Hospitals NHS Trust, Women and Child Health	Protocols were followed by all staff involved in this child's care, and advice sought from a paediatric specialist from Birmingham Children's Hospital (BCH). The outcome would not have been avoided if the child would have been transferred to BCH.

Details of complaint	Who involved	Outcome/ investigation to date
The patient's death certificate states that the cause of death was 'hospital acquired pneumonia' (HAP)- the family feel that this is down the poor care and treatment she received whilst in Sandwell.	Sandwell and West Birmingham Hospitals NHS Trust, Medicine and Emergency Care	The complainant's concerns that her mother contracted HAP due to the use of endoscopy equipment being unclean have been investigated and nothing was found to suggest that the cleaning regime on the day the patient attended for her endoscopy was not followed.
The family had raised questions with regard to the withdrawal of the warfarin several times and no-one has ever got back to them, the patient went onto have a massive stroke and died.	Sandwell and West Birmingham Hospitals NHS Trust, Medicine and Emergency Care	Reintroduction of warfarin might have prevented the stroke, and thus the patient's death
The patient underwent an endoscopic retrograde cholangio pancreatogram (ERCP) which resulted in her death. Her daughter was not informed that she was to undergo this procedure. She thinks it important that changes are made to policies regarding the next of kin being notified and is claiming compensation for this and her mother's death.	Sandwell and West Birmingham Hospitals NHS Trust, Medicine and Emergency Care	This complaint is ongoing and the investigation is not yet concluded
Patient was rushed in to theatre for a C Section and the baby was born without signs of life, but was resuscitated and is now brain damaged.	Sandwell and West Birmingham Hospitals NHS Trust, Women and Child Health	It has not been concluded as to whether the brain damage was caused through lack of oxygen or whether this occurred prior to birth, but all emergency protocols were followed and the Trust has since met with the family to explain our findings.
Patient attended A&E where it was found that she had an infection in the stent in her left kidney. She was nil by mouth for 7 hours before the operation but during the operation she vomited and aspirated (some food went into her lungs). She was taken back to CCS but died.	Sandwell and West Birmingham Hospitals NHS Trust, Medicine and Emergency Care and Sandwell and West Birmingham Hospitals NHS Trust, Surgery A	This complaint is ongoing and the investigation is not yet concluded
Baby was being treated for GBS Meningitis and transferred from Stoke PICU to Sandwell. The doctors and nurses did not appear to realise how ill the baby was and didn't not listen to the parents. Is the baby still alive?	Sandwell and West Birmingham Hospitals NHS Trust, Women and Child Health	This complaint is ongoing and the investigation is not yet concluded

Complaints that have been reopened in Q3 2015/16 by Clinical Group and Corporate Directorate compared to Q2 2015/16, Q1 2015/16 and Q4 2014/15

Complaints that have been reopened in in Q3 2015/15 compared to Q2 2015/16, Q1 2015/16 and Q4 2014/15 by Grade.

Reopened complaints for Medicine and Emergency Care by grade for Q3 2015/16 compared to Q2 2015/16, Q1 2015/16 and Q4 2014/15

Reopened complaints for Medicine and Emergency Care by reason Q3 2015/16 compared to Q2 2015/16, Q1 2014//15 and Q4 2014/15

PALS enquiries for Q3 2015/16, compared to Q2 2015/16, Q1 2015/16 and Q4 2014/15 and Q3 2015/16

PALS enquiries broken down by group for Q3 2015/16, compared to Q2 2015/16, Q1 2015/16 and Q4 2014/15

Compliments Q2 2015/16

This shows the breakdown of compliments collated by the wards that responded for Q2 2015/16, totalling 220. A more comprehensive reporting tool (as opposed to the manual tick sheet currently in use) using the Safeguard data base will hopefully be trialled in Q1 2016/17 so encourage an increase in the number of compliments we record and report.
