

<b>Report Title</b>	Integrated Quality & Performance Report (IQPR) September 2018						
<b>Sponsoring Executive</b>	Dave Baker, Director of Partnerships and Innovation						
<b>Report Author</b>	Yasmina Gainer, Head of Performance & Costing						
<b>Meeting</b>	Trust Board			<b>Date</b>	1 November 2018		
<b>1. Suggested discussion points</b> <i>[two or three issues you consider the Committee should focus on]</i>							
Mortality is due to be discussed in detail in December. The most significant constitutional issue remains emergency care performance which is below both standard and recovery trajectory. An external review takes place on 31st October and it is clear that November must see performance improvement if the Trust is to have confidence in the extant plan or delivery chain. Weekly data will be shared with the Board from week beginning November 5th. <b>Beyond this we might note:</b>							
<input type="checkbox"/> VTE performance which remains volatile at 92.8% but which has failed for three consecutive months - and achievement of the 100% standard is being covered in committee; <input type="checkbox"/> Diagnostic Performance (DM01) which was scheduled to recover by October and where that remains at risk. A quarter 4 sustainability plan is needed; <input type="checkbox"/> Neutropenic sepsis performance of 72% where 7/25 patients breached being the lowest performance since December 2016; <input type="checkbox"/> Two indicators in Stroke and Cardiology, one of which, unusually underperformed;							
<b>On the Persistent Reds we need to note:</b>							
<input type="checkbox"/> new successes around PDR and Medical Appraisal both of which get close to hitting target for the first time this year. <input type="checkbox"/> two indicators which, having been reported as resolved, earlier in the year have now missed the target for 2 consecutive months: NOF which has missed the target for 2 consecutive months; and Unplanned A&E Re-attendances which has now missed the target for 3 consecutive months;							
<b>Alignment to 2020 Vision</b> <i>[indicate with an 'X' which Plan this paper supports]</i>							
Safety Plan	X	Public Health Plan		People Plan & Education Plan	X		
Quality Plan	X	Research and Development		Estates Plan			
Financial Plan		Digital Plan		Other <i>[specify in the paper]</i>			
<b>1. Previous consideration</b> <i>[where has this paper been previously discussed?]</i>							
OMC							
<b>2. Recommendation(s)</b>							
The Board is asked to:							
a.	<b>Note the need for a sustainability plan for Q4</b> on the DM01						
b.	<b>Recognise</b> the success in two more persistent red areas;						
c.	<b>Confirm</b> that two indicators should be returned to the Persistent Red process;						
<b>3. Impact</b> <i>[indicate with an 'X' which governance initiatives this matter relates to and where shown elaborate]</i>							
Trust Risk Register		Risk Number(s):					
Board Assurance Framework		Risk Number(s):					
Equality Impact Assessment	Is this required?	Y		N	X	If 'Y' date completed	
Quality Impact Assessment	Is this required?	Y		N	X	If 'Y' date completed	

### 1. Overall Performance

The Committee is asked to note that the production of the IQPR has been significantly delayed due to the IT issues that the Trust has been experiencing.

All efforts have been made to sense-check data going back to April of this year to ensure that the year to date performance is as accurate as possible, but it has not been possible to sense-check all indicators in this short period of time.

Mortality, Emergency Care and Diagnostic Imaging (DMO1) performance remain unacceptable but do have plans in place. The strategic importance of the DMO1 target warrants a Q4 sustainability plan.

More good news on new persistent reds around PDRs and Medical Appraisal needs to be offset against dips in performance for previously resolved persistent reds on Unplanned Emergency Re-attendances and Fractured Neck of Femur.

VTE assessments missed for the third consecutive occasion in September reporting at 92.8% against the standard of 95% (514 assessments missed). A full quality improvement project plan is in progress to engage under-performing areas.

Diagnostics fails to recover to 99% standard for the seventh month running (98.27% in September). CT, MRI and ultrasound scanning were the main causes of under performance. The Executive team are well cited on the imaging pressures and action plans are in place.

Whilst the average door to needle time remains good despite increasing from 43 to 47 minutes, Neutropenic sepsis performance in September reports at 72% with 7/25 patients breaching. This is the lowest performance since Dec2016.

In Stroke and Cardiology: only 50% of patients were admitted to stroke wards within the 4 hours for September. This indicator has now underperformed for 5 of the last 6 months; 94.1% of patients received a CT scan within 24 hours against the 95% target. This is the first time this has missed since August 2017.

NOF performance at 81% for a second month behind target

## 2. IQPR Persistent Red indicators

- Have progressed well and we are improving further items;
- Workforce improvement targets have now been agreed by the Director of People & OD and see good progression against some of the indicators e.g. PDR and Medical Appraisals, but we fail to deliver the RTW improvement as planned.
- However, in September we report a re-lapsed indicator which is being validated more fully to ensure this is not due to data issues (unplanned A&E re-attendance). Irrespective of the data check this and the Fractured Neck of Femur indicator should return to the Persistent Reds process.

Total Indicators	<b>23</b>	<b><i>Note: Some are grouped and are in fact two or more separate indicators</i></b>	<b>Delivery Expected</b>
Resolved so far	5	<ul style="list-style-type: none"> <li>• WHO Safer Surgery (to 100%);</li> <li>• Early Booking Assessment;</li> <li>• Patient Safety Thermometer (to 95%);</li> <li>• Cancellations (20pm)</li> <li>• Cancellations as %age of elective admissions (0.8%)</li> </ul>	
Achieved standard for 2 months	0		
Achieved standard for 1 month	0		
Significant improvement close to target	2	<ul style="list-style-type: none"> <li>• PDR (to 95%) .. at 94% in October</li> <li>• Medical Appraisal (to upper quarterile) .. at 91% in Aug</li> </ul>	<ul style="list-style-type: none"> <li>• Oct2018</li> <li>• Oct2018</li> </ul>
Working towards target improvement plans & expected to deliver in the near future	6	<ul style="list-style-type: none"> <li>• Mandatory Training (to 95%)</li> <li>• Sickness Absence Rate / Sickness Absence cases (to 3%)</li> <li>• Nursing / Workforce Turnover</li> <li>• Treatment Functions Under 92% RTT</li> <li>• Patients Waiting &gt;52 weeks</li> <li>• Weekday Theatre Utilisation (to 85%)</li> <li>• Diagnostics (to 99% standard)</li> <li>• Unplanned A&amp;E re-attendances;</li> <li>• Neck of Femur (to 85%)</li> </ul>	<ul style="list-style-type: none"> <li>• May2019</li> <li>• Mar2019</li> <li>• Mar2019</li> <li>• Oct2019</li> <li>• Apr2019</li> <li>• Jan-Mar2019</li> <li>• Oct2018</li> <li>• Investigating cause of relapse</li> <li>• Actions TBC</li> </ul>
<b><u>Newly added and relapsing indicators</u></b>			
Without target improvement plans at this stage	7	<ul style="list-style-type: none"> <li>• Open Referrals</li> <li>• Patient Bed Moves</li> <li>• Mortality Reviews within 42 day</li> <li>• Falls</li> <li>• FFT Score &amp; Responses</li> </ul>	<ul style="list-style-type: none"> <li>• Not identified</li> <li>• Not identified</li> <li>• Not identified</li> <li>• Trajectory in progress</li> </ul>
Missing the set recovery plan	2	<ul style="list-style-type: none"> <li>• Neutropenic Sepsis</li> <li>• Return to work interviews</li> </ul>	<ul style="list-style-type: none"> <li>• Actions TBC</li> <li>• Was Sept - Actions TBC</li> </ul>

## Key IQPR Indicators Summary for September 2018-19 (month 6):

---

### Infection Control :

- Performing very well overall.
- The Trust has had zero CDiff case in September, performing very well against this standard with year to date position of 6 cases against the year to date target of 14. Tracking well against the annual ceiling of 29.
- At trust level MRSA screening, electively and non-electively achieves targets routinely, but PCCT and Medicine & EC are not.
- MSSA Bacteraemia (rate per 100,000 bed days) in September the rate is at 5.5 compared to target of 9.42; year to date is also in line with target at 5.3 vs 9.42 target

### Harm Free Care :

- Achievement of 100% target against the WHO Safer Surgery continued into September; manual intervention is still required as the system for capturing the briefings information is not fully working (being addressed with clinical effectiveness and IT).
- Safety Thermometer at 99.1% in September against the 95%, this reports 'new harm' only caused by SWB.
- In September there were 10x PUs (hospital acquired, avoidable), an increase to previous month; all are reported at grade 2; the PUs per 1,000 Occupied Bed Days rate is 0.5; additionally there was 1x PU case in the district community setting.
- In September there were 80 falls reported, slightly higher than the long term average, but none resulting in serious injury.
- VTE assessments have been below required levels for a third time at an all-time low of 92.8% missing 514 assessments in the month. A project plan has been put into action to address compliance rates, but all effort is being made to recover the October position to target. The major under-performing areas are the assessment units.
- We continue to maintain zero never events or significant medication errors.
- Open Central Alert System (CAS) Alerts beyond deadline date worth highlighting as we have 4 beyond the agreed deadline. This is unusual for the Trust.

**Note:** Pressure Ulcer monitoring is changing and guidance has been released which will require a change in how we count non-compliance.

### Access Targets :

#### 1 RTT & Diagnostics

- Not confirmed as yet for September as validation is ongoing to close out final position.
- The Modality pathway impact on RTT was reviewed to assure that the Trust is counting all RTT relevant pathways appropriately and due to the novel arrangement with Modality there may be some reviews and tweaking of process required. Patient Access to take this forward and to report any issues and actions resulting.
- Acute Diagnostics (DM01) reporting at 98.27% in September. 156 total breaches reported by the trust. CT/MRI/Ultrasound accounted for 141 of these. A 10 week improvement plan had been put in place. Recovery was planned for October, but unlikely to deliver until the back-log is cleared up.

## 2 Cancer

- Cancer performance reports one month in arrears to allow cancer network validations to take place; in September we report therefore the August position.
- Recognised as a delivering Trust; meeting routinely most of the cancer standards and this continuous into August.
- There were 10.5 breaches of the 62 day standard in August overall resulting in the performance of 86.5% above the target of 85%
- 62 Days standard has been confirmed to fail in September; however this will not compromise the Trust's Q2 cancer delivery.
- 2.5 patients waited above 104 days. The case studies are routinely now submitted to the CEO for review
- Neutropenic sepsis in September has seen the lowest performance since Dec2016. In September 18/25 patients have been treated (72% patients treated) and 7 patients breached due to a number of different reasons (detailed, separate OMC report). All breaches are RCAed at the time and subject to a full review at a Breach Meeting. The Door to Needle time in September rose to 47 (from 43) minutes compared to the 60 minutes requirement.

**Note:** Referral to Faster diagnosis; a new cancer diagnosis standard, designed to ensure that patients find out within 28 days whether or not they have cancer, will be introduced in 2020. Data collection starts in 2019.

## 3 Emergency Care & Patient Flow

- September performance at 83.02% not achieving trajectory agreed with NHSi of 90.01% for the month
- Trajectory agreed with NHSi to get to 95% in March 2019. A joint A&E Rapid Improvement Plan is being implemented to take forward initiatives across the system which started at the end of September.
- 3,013 September breaches (2,999 Aug; 3,001 in July; 3,418 in June, 3,746 in May) of the 4 hour target were experienced against the 17,740 attendances in the month.
- Fractured Neck of Femur Best Practice Tariff delivery for September at 81% below the 85% target in the month.
- Patient bed moves for non-clinical reasons in September at 47 against aspiration of zero.

### Obstetrics:

- C-Sections in September reported at 27.1% against target of 25%; year to date at 26.8%;
- Stillbirth rate in September reported at 0.0 per 1,000 babies which is exceptionally good;
- Adjusted Perinatal Mortality Rate (per 1000 babies) year to date coming down to 6.6 compared to target rate of 8.
- Breastfeeding initiation continues to routinely deliver, but a small blip in September taking performance to 73.2% against the 74% target, which we believe to be an isolated case being looked into.

### Stroke & Cardiology:

- At this stage in the month the IQPR reports the WD5 position (not post-validated WD20 position) reporting a drop in performance against a couple of indicators.
- Thrombolysis within the hour is often affected by clinical reasons and some operational processes, which are RCAed routinely and managed. September is at 100% vs 85% target;

- ❑ Admissions to Stroke Ward within 4 hours remained inconsistent month on month most likely impacted by bed capacity in September performing at only 50%; year to date below the target at 67.6%;
- ❑ Patient Staying on Stroke Ward meets target of 90% reporting at 94.55%. Year to date at 89.9%
- ❑ TIA (High Risk) Treatment <24 Hours from receipt of referral is 100% in September vs target of 70%
- ❑ TIA (Low Risk) Treatment <7 days from receipt of referral is at 97.2% in September vs target of 75%. Both TIA indicators delivery routinely to standard.
- ❑ For September Primary Angioplasty Door to balloon time (<90 minutes) is meeting the target of 80% at 100% delivery. Primary Angioplasty Call to balloon time (<150 minutes) at 100% vs 80% target. Both are consistently delivering.
- ❑ Rapid Access Chest Pain - seen within 14 days consistently delivering at 100% again consistent performance here for a number of years.

### **Workforce :**

- ❑ Mandatory Training in September reporting at 90.6% against target of 95%;
- ❑ Health & Safety related training is below the 95% target at 93.3% in September and sees a dip in performance after a number of months achieving the standard.
- ❑ PDR completion approach has changed to an annual cycle reporting quarterly delivery this year; in September the performance was at 91.6%. We can already see October performance at 94% which is getting very close to the Trust target.
- ❑ September in-month sickness rate is at 4.7%, a slight improvement on last month with a cumulative rate at 4.5% against Trust aspirations of 3%. In September we had 1,033 employees sickness count (August we had 961) (made up of long and short term) which shows an increase in absolute number of staff being off but clearly with shorter absence days resulting in a lower September rate than August. Last year, same period which was at 922 hence showing a year on year increase of 12%).
- ❑ The Sickness improvement trajectory (persistent red focus) was at 4.09% for September lower than our actual rate of 4.7%
- ❑ September return to work interviews in-month at 84.4% below the trust target of 100%. The team are still working on chasing in the outstanding records in ESR, which will further improve the position if made compliant.
- ❑ The Trust annualised turnover rate for September is at 12.1%; the Qualified Nursing turnover at September reporting at 12.8% (the lowest number for 8 months) vs 10.7% target.

### **Mortality:**

- ❑ Mortality indicators are in line with confidence limits against most of the mortality indicators, other than our HSMR which is currently reported (May 2018 – latest data) at 127 for SWBH and outside statistical confidence limits. There is ongoing Trust scrutiny and oversight of mortality statistics at the Executive Quality Committee.
- ❑ A report was commissioned with HED, analytics provider, which concluded: Sandwell General Hospital is a statistically significant HSMR outlier. City Hospital remains within expected limits.
- ❑ Following MDO review of emergent divergence between weekday and weekend rates, this will result in a focus on the Sandwell site weekend mortality; the weekend rate reports at 119 for the latest period which is June 2018 and hence not moving significantly in the right direction.
- ❑ Mortality reviews in the Trust are at 42% for the latest period. There is renewed effort to support reviews including introduction of medical examiner screening. Mortality reviews are discussed at the Learning from Deaths Committee, where a holistic review process needs to be embedded and measurable.

### **Cancellations and Theatre Utilisation:**

- Performance continues to be good against the patient cancellations on the day.
- In September we report cancellations on the day at 26 against the internal trust target of 20. Whilst slightly higher than the internal target of 20, this is still at the national level of 0.8% of cancellations on the day against elective admissions.
- Currently we do not have the avoidable/non-avoidable split for September;
- There were no 28 Day breaches in month and no urgent cancellations in the month of September.
- Theatre in-session utilisation is below target of 85%, 74.4% in September. Overall session utilisation (including outside routine session timings) for September is at 79.7%
- We now have a speciality level theatre utilisation improvement plan and trajectories. Monitoring will be overseen by the Theatre Board to ensure all specialities recover to 85% utilisation targets.

### **Data Completeness:**

- Open Referrals without Future Activity/ Waiting List Requiring Validation have increased to ~177,000 in September. This has been rising at 3000 per month but this month has gone up by 7000 (this may be due to IT issues).

### **Performance Notices & IBNs :**

- The CCG has issued a Performance Notice for the maternity indicator 9 CO Level >4ppm Referred For Smoking Cessation); working with the deputy director of midwifery we have made proposals on how to re-count this indicator and an action plan is progressed
- A&E Diagnosis codes indicator is also below the required threshold and the CCG are seeking for assurance on this – the service manager has been asked to work to improve performance
- Early morning discharges indicator (35% target for discharges between 6am-10am) has been failing persistently, the CCG has now requested to review internal processes on managing this.
- CQUINs for Q1 have not been submitted in required timelines, the CCG is considering issuing an IBN for this.

Sandwell and West Birmingham Hospitals

NHS Trust

**Admissions (%) to Acute Stroke Unit within 4 hours**

**CT Scan following presentation**

**TIA Treatment (%)**

The stroke indicators in the IPR are based on 'patient arrivals' not 'patient discharged' as this monitors pathway performance rather than actual outcomes which may / may not change on discharge. National SSNAP is based on 'patient discharge' which is more appropriate for outcomes based reporting. Both are valid but designed for slightly different purposes, however they will align overall, especially over a longer period of time (eg annually)

# Local Quality Indicators - 2017/2018

Data Source	Data Quality	PAF	Indicator	Measure	Trajectory	
					Year	Month
			WHO Safer Surgery - Audit - brief and debrief (% lists where complete) - SQPR	=> %	100	100
			Morning Discharges (00:00 to 12:00) - SQPR	=> %	35	35
			ED Diagnosis Coding (Mental Health CQUIN) - SQPR	=> %	85	85
			CO Level >4ppm Referred For Smoking Cessation - SQPR	=> %	90	90
			BMI recorded by 12+6 weeks of pregnancy - SQPR	=> %	90	90
			CO Monitoring by 12+6 weeks of pregnancy - SQPR	=> %	90	90
			Community Nursing - Falls Assessment For Appropriate Patients on home visiting caseload	=> %	100	100
			Community Nursing - Pressure Ulcer Risk Assessment For New community patients at initial assessment	=> %	95	95

Previous Months Trend (From Apr 2017)

Indicators which comprise the External Performance Assessment Frameworks	
•	NHS TDA Accountability Framework
a	Caring
b	Well-led
c	Effective
d	Safe
e	Responsive
f	Finance
•	Monitor Risk Assessment Framework
•	CQC Intelligent Monitoring

Groups	
M	Medicine & Emergency Care
A	Surgery A
B	Surgery B
W	Women & Child Health
P	Pathology
I	Imaging
PCCT	Primary Care, Community & Therapies
CO	Corporate

Each outer segment of indicator is colour coded on kitemark to signify strength of indicator relative to the dimension, with following key:

Red	Insufficient
Green	Sufficient
White	Not Yet Assessed

The centre of the indicator is colour coded as follows:

Red / Green	As assessed by Executive Director
White	Awaiting assessment by Executive Director

If segment 2 of the Kitemark is Blank this indicates that a formal audit of this indicator has not yet taken place
