Meeting	Trust Board	Date	6 June 2019

1. Suggested discussion points *[two or three issues you consider the Trust Board should focus on]*

The IQPR and Persistent Reds table is provided for review. The thresholds for performance are not yet agreed across the executive will be remedied next month. There are marginal variations.

The PRM review with NHS Improvement was broadly positive with a focus on further improvement required in 21-day LOS, ambulance turnaround times and the four hour standard. However, in month we are also reporting fails of the DM01 and 52 week standard. Improvement trajectories have been considered at PMC and in the case of DM01 will see a return to compliance from June. Failures of oversight within the clinical group have been remedied through new data-flows being provided into the production plan PMO.
