

**Referral to Report** Project - imaging

In June we delivered the following wait times for imaging reports across the Trust, regardless of referral source.

This month the data is 'cut' two ways:

- June referrals
- June reports

May's data is shown for comparison. Progress in July is expected to be rapid given a transfer of responsibility for bookings, which in June has necessitated some long wait patients being prioritised.

<b>Based on Reported in Month</b>	<b>May</b>	<b>June</b>
% Inpatient tests reported in less than 1 day	65%	69%
% of urgent other tests reported in less than 5 days from request for test by all referrers (inclusive of GPs)	71%	71%
% of all imaging work reported in less than 4 weeks from request for test	87%	87%

<b>Based on Referrals Received in Month</b>	<b>May</b>	<b>June</b>
% Inpatient tests reported in less than 1 day	75%	74%
% of urgent other tests reported in less than 5 days from request for test by all referrers (inclusive of GPs)	74%	74%
% of all imaging work reported in less than 4 weeks from request for test	90%	84%
