

# Exceptions: Improvement Recovery Plans

**Notes:**

- Exceptions may overlap with persistent red indicators. Where this is the case, these will not be replicated in this section;
- this section shows other exception reporting as overseen by the OMC and Group Reviews.
- PowerPoint slides have been implemented to position recovery plans, these have been transferred here to graphically present progress.
- More exception targets have been agreed at June OMC and these will be built in for next month's reporting
