					If 'Y' date completed

SANDWELL AND WEST BIRMINGHAM HOSPITALS NHS TRUST

IQPR Report to the Board: 5th September 2019 July 2019 IQPR

1. New Exceptions in July month

This section focuses on in month variations to targets and unexpected drop in performance.

- A&E delivery is at 81.4% in July below the internal target (81.8% Last Month).
- 1x never Event (retained foreign object (Trocar)) in an Ophthalmology patient; we reported 3x never events in the last three months.
- Late cancellations on the day were at 46 in July (40 LM) above the 20 internal target and above the 0.8% national standard (cancellations against total elective admissions) in the last few months; Theatre 'Perfect Week' will focus on cancellations and recovery target date has been agreed at OMC for August 2019.
- Diagnostic DM01 performance sustains recovery from last months and reports 99.2% in July with Imaging breaches being significantly reduced. DMO1 performance will fail in August due to pressures on Cardiac Imaging but expectations are that this will recover in September.
- RTT delivers at 92.03% for July and is expected to achieve in August. There are 4x specialities below this target. Nil 52 week breaches have been confirmed following query process with the Deputy COO. We are seeing a growing WL (39,115) in July which accounts for c8% growth since March of which c1.8% is due to referral growth indicating therefore potentially a longer pathway management / treatment timeline.
- MRSA screening rates continue to under achieve the new 85% target and will now be moved to being a Persistent Red. The Chief Nurse is looking into the cause of this and the correlation to the Safety Plan.
- MSA performance in July reported 44 breaches (9 LM).
- Serious Incidents (Sis) reported to StEIS (Strategic Executive Information System) in July were at 32, which is almost four times more than any other month in 18mths trend (last month 12). On investigation, 23 out of 32 Sis STEIS reported relate to PUs. The Director of Governance is enquiring as to whether other Trusts have seen a jump in their SIs since the re-categorisation around Pressure Ulcers – we may need to rebase this indicator.
- Our Risk Adjusted Mortality Index (RAMI) jumps from 99 to 107. This is due to a National rebasing. Our weekend RAMI is now lower than in midweek one.
- The 62 day Cancer standard will fail in July. August is tracking at ~83%. We still expect to achieve the standard for Q2 overall. Despite significant volume increases (especially I Dermatology) the 2WW targets will succeed in August.

2. IQPR Persistent Reds

- Now that we have the data of falls per 1000 bed days we can see that we are performing. On this basis falls has been removed from the persistent reds.
- With the removal of falls and the subsequent addition of MRSA screening and ED performance (from next month) there will be are now 18 persistent reds;

- Bed moves has a data quality note against it. Presently it tracks patients inappropriately for their moves (on the system the patient cannot be moved until their VTE assessment has been carried out even if they are physically moved beforehand). Whilst this will be resolved post Unity, P&I and Operations are looking at whether this can be resolved prior to Unity via an alternate route.
- We now have recovery plans and trajectories for the majority of the persistent reds. We are working to have recovery plans with trajectories for them all by 1 October 2019.
- Of the 12 with trajectories we are on trajectory with 5 and behind trajectory with 7 (see tracking planned trajectory column below)

Exec Lead	<u>16</u>	Indicator <i>Note: Some are grouped (two or more indicators)</i>	Standard Expected	Delivery of Plan	Revised Recovery Expected	Jul Actual Perf	Tracking Planned Trajectory
Dr DC	1	• Mortality Reviews within 42days	90%	✓	Dec-19	85%	✓
RG	1	• Mandatory Training (staff % where MT 100% complete)	85%/95%	✓	Dec 19/Mar 20	64.4%	X
	1	• Sickness Absence Rate (wards only to 3%, hold the rest)	3%	✓	Mar-20	5.8%	X
	1	• Sickness Absence long term cases	<140	✓	Apr-20	159	✓
RB	1	• Treatment Functions below 92% RTT	0	✓	Aug-Nov19	4	X
	1	• Patients Waiting >52 weeks	0	✓	Oct-19	0	✓
	1	• Open Referrals	30,000	✓	Sep-19	54,000	✓
	1	• Neck of Femur - to surgery within 36 hours	85%	✓	Jul-19	63%	X
	1	• Cancellations (20pm)	20	✓	Aug-19	46	X
	1	• Cancellations as %age of elective admissions	0.80%	✓	Aug-19	1.1%	X
	1	• Patient Bed Moves	220	✓	Nov 19 subject to DQ resolution in month	684	Recast when DQ resolved
	1	• Stroked Ward Admissions (Within 4 hrs)	80%	✓	Aug-19	79.1%	✓
	1	• Emergency Care Patient Impact - Unplanned Reattendance Rate (%)	5%	✓	To be agreed at next OMC	5.1%	No Traj
PG	1	• Nursing Turnover (Qualified Only)	10.70%	To be agreed by 1 October	TBC	12.3%	No Traj
	1	• FFT Response Target	25%	✓	Dec-19	23%	No Traj

Note: Long term sickness showing as 223 on IQPR but Director of People and OD provided assurance of 159. Looking into why the IQPR is reporting differently. We will resolve why this is happening in September.

3. Recommendations

- The Board is asked to note the July overall position and recognise exceptions;
- Discuss and assure itself that persistent red trajectories are delivering and agree revisions to plans if appropriate;

Yasmina Gainer
Head of Performance & Costing

JULY 2019				
Infection Control	Harm Free Care	Obstetrics	Mortality & Readmissions	Stroke Care & Cardiology
CDiff - compliant <ul style="list-style-type: none">The Cdiff objective for S&WB Trust for 2019-20 has increased from 29 to 41 full year. However, the case definitions for attribution has changed too, and therefore the Trust is expected to see an increase in the number of Trust apportioned / reportable cases.1x C. Diff case reported during the month of July taking year to date cases to 4 vs target of 14 so the trust is continuing to perform very well	Safety thermometer - compliant <ul style="list-style-type: none">The Trust continuous, since June 2018, to report Patient Safety Thermometer based on only 'new harm'; as at July 2019 we report performance at 95.4% against the 95% target	C-section rate - non compliant <ul style="list-style-type: none">The overall Caesarean Section rate for July in month is 30.5% mainly driven by an increase in non-elective C-Sections; year to date at 27.4% above the 25% target; but considered still in line with other trustsElective rates are at 10.7% (historical long term avg trend of 8.8% so trending reasonably well against this) andNon-elective rates are 19.7% in July against a long term average trend of ~17.3% hence observing an increase of non-elective C Sections.Performance considered at Q&S & Board and to be kept in view.	Mortality - alerts against Trust HSMR & RAMI (being validated still) <ul style="list-style-type: none">The Trust overall RAMI for most recent 12-mth cumulative period is 107 (available data is as at Apr19)RAMI for weekday and weekend each at 107 and 105 respectively, showing weekend rate slightly up from last month but still lower than in previous periodsSHMI measure which includes deaths 30-days after hospital discharge is at 105 for the month of Dec18 (latest available data)HSMR Mortality indicator an outlier at 115, which is still outside statistical confidence limits, but showing reductions against previous months. Trust Board continues to monitor routinely.	Patient Stay on Stroke Ward - compliant <ul style="list-style-type: none">In July 90.2% of patients spent more than 90% of their time on a stroke ward, which is above the 90% operational threshold in the month; improvement plans are in place to recover the standard are on the face of it working; year to date we are just fractionally below the 90% standard at 89.9%
	Falls <ul style="list-style-type: none">x86 falls reported in July with x2 falls resulting in serious harm (defined as death or severe harm);Falls therefore per 1,000 bed days rate in July are at 3.9 against the trust target of 5.0.x22 falls within I-Cares Community (reducing significantly from last months), x64 in acute settings broadly similar to last month.Falls remain subject to ongoing CNO scrutiny and routine tracking of the Safety Plan on falls reduction; falls monitoring is an integral part of 'ward dashboards' including now newly set ward specific targets to match the trust desired rate.			
MRSA - compliant <ul style="list-style-type: none">No MRSA Bacteraemia was reported in July; 1x case year to date.Annual target 19/20 set at zero.	Pressure Ulcers <ul style="list-style-type: none">x55 total PUs have been reported in July showing similar position to last monthOf which 27 PUs reportable in acute setting resulting in a PU /1000 bed days rate of 1.2x28 cases reported within the district nursing caseloadCNO monitors as part of Safety Plan and ward nursing dashboards	<ul style="list-style-type: none">Adjusted perinatal mortality rate (per 1,000 births) for July year to date is at 4.92 vs. threshold level of 8 ;The indicator represents an in-month position and which, together with the small numbers involved provides for sometimes large variations.	<ul style="list-style-type: none">Deaths in Low Risk Diagnosis Groups (RAMI) - month of Apr19 (latest available data) is at 98. This indicator measures in-month expected versus actual deaths so subject to larger month on month variations, but sits in the right area of the control limits.Crude in-month mortality rate for Jun19 month is 1.3% caused by lower deaths in month;There were x117 deaths in our hospitals in the month of June, less than last year, same period, which was at 124	Scans - compliant <ul style="list-style-type: none">Pts receiving CT Scan within 24 hrs of presentation delivery in month of July are at 97.9% meeting the 95% standardPts receiving CT Scan within 1hr of presentation is at 70.2% in July against the 50% target; both indicator consistently meet the imaging performance.
	WHO Safer Surgery (Audit - brief and debrief - % lists where complete) <ul style="list-style-type: none">WHO Safer Surgery - Audit - brief and debrief (% lists where complete) is not compliant at 99.8%The other two indicators are at 100%Indicators in IQPR currently reporting only the main theatre lists; a full review of other areas is in progress currently following outcomes of the data quality review in April19 and actions are in place to address this by end of November at which time the IQPR will report holistically on all areas that are eligible for compliance.	The level of births in July is at 460; lower compared to the same period of last year (488) - we observe a general downward trend in births		
MRSA Screening - non compliant <ul style="list-style-type: none">Non-elective patients screening at 79.5% against 85% targetElective patients screening at 85.3% achieving target of 85%Both indicators are expected to deliver immediate milestone target of 85% increasing to 95%	WHO Safer Surgery (Audit - brief and debrief - % lists where complete) <ul style="list-style-type: none">WHO Safer Surgery - Audit - brief and debrief (% lists where complete) is not compliant at 99.8%The other two indicators are at 100%Indicators in IQPR currently reporting only the main theatre lists; a full review of other areas is in progress currently following outcomes of the data quality review in April19 and actions are in place to address this by end of November at which time the IQPR will report holistically on all areas that are eligible for compliance.	<ul style="list-style-type: none">Still birth rate (per 1000 babies) at 6.51 in JulyZero Neonatal death rate (per 1000 babies) in July	Mortality Reviews within 42 Days - not compliant, but consistently improving <ul style="list-style-type: none">Mortality review rate in May19 at 85% and whilst below trust target of 90% it has shown improvement since the introduction of medical examiners in the review process;Revised Learning from Deaths arrangements are being implemented, which will provide for routine 100% deaths review, coupled with implementation of a Medical Examiner screening process this will streamline the 1st and 2st stage mortality reviews.	Angioplasty - compliant <ul style="list-style-type: none">July Primary Angioplasty Door to balloon time (<90 minutes) was at 93.8% vs target of 80% .Primary Angioplasty Call to balloon time (<150 minutes) at 93.3% against a target of 80%.Both indicators consistently meet performance targets.
		Admissions to Neonatal Critical Care - compliant <ul style="list-style-type: none">0.87% admissions to the NCC have occurred in July against the 10% target; 1.64% on a year to date basis vs 10% target		
MSSA - compliant <ul style="list-style-type: none">MSSA Bacteraemia (expressed per 100,000 bed days) showing a rate of 4.2 year to date compared to target of 9.4	VTE Assessments - compliant <ul style="list-style-type: none">Compliance at 95.9% in July at Trust level with Medicine group, at 93.9%, below standard of 95%	Breastfeeding - compliant <ul style="list-style-type: none">July month count is at 79.4% achieving the 74% target; over-achieving target routinely	Emergency Readmissions (in-hospital within 30 days) <ul style="list-style-type: none">Reported at 7.9 % for June cumulative position; improving against the dip in February and to March, but still on the high side.The Trust's performance against the 4-hour EC wait target in July was at 81.4% % against the internal improvement plan 88.5% for the month.3,542 breaches were incurred in July, higher than last month but proportionally less against the July total patient attendances of 19,047 (18,091 last month)Looking at the rolling 12 mths rate this has slightly reduced to 7.9%, but higher than Trust ambition	RACP - compliant <ul style="list-style-type: none">RACP performance for July continuous at 100% exceeding the 98% target consistently
Cancer Care	Patient Experience - MSA & Complaints	Patient Experience - Cancelled Operations	Emergency Care	Referral To Treatment
Cancer standards - compliant <ul style="list-style-type: none">Reporting always one month in arrears hence IQPR latest reported period is June 2019.In June all cancer standards have been met including 62 days at 87.3% vs 85% target, including the 2 weeks (Breast Symptomatic).Q1 Trust delivery of the 62 Day target is at 87.9%Un-validated position for July is at risk	MSA <ul style="list-style-type: none">The standard is zero breaches in any given monthIn July we are reporting 44 validated breaches	Cancelled Ops - non compliant <ul style="list-style-type: none">46 sitrep declared late (on day) cancelations were reported in July; still significantly higher than local target of 20 per month as well as tolerated target of x26 cancellations which would still deliver national standard.Cancelations, as a proportion of elective admissions, represent 1.1% in July against the national 0.8% target;	EC 4hr standard - not compliant <ul style="list-style-type: none">The Trust's performance against the 4-hour EC wait target in July was at 81.4% % against the internal improvement plan 88.5% for the month.3,542 breaches were incurred in July, higher than last month but proportionally less against the July total patient attendances of 19,047 (18,091 last month)	RTT - compliant (but not signed off yet) <ul style="list-style-type: none">Trust level delivery currently at 92.0% for July compliant with the 92% incomplete standard4x specialities are below the 92% standard in JulyThe patient wait list is at 39,115 in July with 3,118 patients being on the backlog (>18weeks)
Patient Waiting times <ul style="list-style-type: none">x7.5 patients waited longer than the 62 days at the end of June0.5 patient waited more than 104 days at the end of JuneThe longest individual patient waiting time for treatment, as at the end of June, was 91 daysIn April the Trust has introduced shadow monitoring of the new 28 Day Cancer standard (faster 28 day diagnosis); cancer services confirming that there is much more work to be done to ensure the recording of 'patient told' information is in place. The new standard takes effect in April 2020 and IQPR will be introducing the shadow reporting soon.	Friends & Family <ul style="list-style-type: none">IP response rates in July at 23% achieving internal target of 25%.The IP 'likely to recommend' rate at 92% against target of 95%Outpatient / maternity response and score rates are scheduled for improvement.	28 Day & Urgent Breaches - compliant <ul style="list-style-type: none">There were no breaches of the 28 days guaranteeThere were no urgent cancellations	Trolley Waits > 12 hours - compliant <ul style="list-style-type: none">There were no Trolley Waits > 12 hours was reported in July	
Neutropenic sepsis - not compliant <ul style="list-style-type: none">The Trust operates a 100% standard against this indicator. Only clinically driven breaches are tolerated.In July, 28/31 patients (90.3%) of patients have been treated within the hour, 3 patients (9.7%) of patients failed to receive treatment within prescribed period (within 1hr). There are process improvements identified with those - longest wait over 3hrs for one patient.Performance reporting continuous to monitor daily, weekly and monthly tabled at the OMC; all breaches are routinely reviewed in dedicated, quarterly meetings.	Complaints <ul style="list-style-type: none">The number of complaints received for the month of July is 98 with 3.1 formal complaints per 1000 bed days demonstrating still a higher level than usual but some reduction to last month100% of complaints have been acknowledged within agreed timescales100% in-month responses have been responded within agreed target time;		WMAS Handovers <ul style="list-style-type: none">WMAS fineable 30 - 60 minutes delayed handovers at 123 in July.only x5 cases were > 60 minutes delayed handovers;Handovers >60mins (against all conveyances) calculates at 0.11% (5 cases) vs target of 0.02% against total WMAS conveyances of 4,658	52 Week Breaches - no breaches in July
Inter-Provider Transfers - not compliant <ul style="list-style-type: none">64% of tertiary referrals were met within 38 days requirement in June.			21+LOS - tracking against trajectory <ul style="list-style-type: none">There were 129 patients in the hospital at July month end whose LOS was at 21 days+This equates to 95.8 beds occupied by this LOS patient cohort, tracking well against the NHSI trajectory of 96.7 for July and working towards end of March 2020 reduction to 82 beds.	
Data Completeness <ul style="list-style-type: none">The Trust's internal assessment of the completion of valid NHS Number Field within inpatient data sets compliant in mth with 99.1% meeting the operational threshold of 99%; OP and A&E datasets deliver to target.ED required to improve patient registration performance as this has a direct effect on emergency admissions. Patients who have come through Malling Health will be validated via the Data Quality Department.Ethnicity coding is performing for Inpatients at 91% against 90% target, but under-delivering for Outpatients. This is attributed to the capture of data in the Kiosks and revision to capture fields is being considered.	Workforce <ul style="list-style-type: none">PDR & Medical Appraisals -not input at this stagePDR scores were due at the end of June organisation wide, but early indicators are that the target rate of 95% will not have been met as the scores have not been entered promptly as per the June deadline.Medical Appraisals are reporting at 95.7% vs 90% standard.	Local Quality Requirements 19/20	Fractured NOF - non compliant <ul style="list-style-type: none">Fractured Neck of Femur Best Practice Tariff (surgery within 36 hours) is at 63% compared to the 85% targetThe performance is variable month on month, often driven by patients conditions are preventing surgical interventions in this 36hr timeframe.	Indicator Performance : Persistent Red Focus <div><ul style="list-style-type: none">The Trust is progressing 16 indicators on the 'persistent red focus'; details can be found on the persistent red tabOversight and assurance is provided through OMC and PMC routinely<div><ul style="list-style-type: none">Progress is good for most indicators in July, however, we have missed some July trajectories.Some indicators are missing stepped trajectories until full delivery and this does prevent us from monitoring progress, the August PMC has been asked to confirm those with the Executive leads.</div></div>
Open Referrals <ul style="list-style-type: none">Open Referrals, referring to patients in the system without a future waiting list activity, stand at c54,000 as at July showing a decrease since last month again being the result of a focussed effort to validate and remove open referrals from the system using a combination of actions driven by clinical groups and auto-closures;	Nursing Turnover & Vacancy rate (Qualified Nursing only) - not compliant <ul style="list-style-type: none">The nursing turnover rate is at 12.3% vs the 10.7% internal target.The nursing vacancy rate is at a high 16.1% in July below the trust target of 11%	Local Quality Requirements (LQRs) 2019/20 are monitored by CCG and the Trust is fineable for any breaches in accordance to contract. <ul style="list-style-type: none">LQRs re reported via the SQPR (Service Quality Performance Report; exceptions are summarised in the IQPR on the relevant tab (page 15).As at June we continue to see some continuing under-performance against a few indicators:Morning discharges at 17% vs target of 35%;Community pressure ulcer assessments recovering the 95% standard and at July reporting 97%Community falls assessments reporting at 98% in July, close to, but not meeting the standard of 100%.	Bed moves after 10pm and before 6am - not compliant <ul style="list-style-type: none">There were 684 reported bed moves in July in the period from 10pm-6am. Improvement plans are in place. The data count is impacted by data quality issues, which are not allowing patient moves to be recorded on a real time basis. This is being looked at and Unity implementation is anticipated to remove those data quality issues fully.	

Persistent Reds Performance

	1	FFT Response Target	25%	✓	TBC	23%	n/a

Notes:

- TBC means that we are yet to work up detailed plans
- FFT response rate target agreed at 25%, but awaiting plan for achievement across all IP, OP and Maternity areas.
- Cancellations on the day reinstated to persistent red focus
- n/a in table = data not reportable at this stage
- the graphs are updated for latest available information, however where incomplete this is due to :
 - absence of 'improvement lines' means we are lacking stepped trajectory plans
 - mortality is two months behind due to reviews being 42 days behind the current month;
 - stroke is behind as it updates based on data signed off on WD21 each month, which is post clinical validations

Jul 2019	93.3	92.3	
Jul 2019	100.0	100.0	

The stroke indicators in the IPR are based on 'patient arrivals' not 'patient discharged' as this monitors pathway performance rather than actual outcomes which may / may not change on discharge. National SSNAP is based on 'patient discharge' which is more appropriate for outcomes based reporting. Both are valid but designed for slightly different purposes, however they will align overall, especially over a longer period of time (eg annually)

Each outer segment of indicator is colour coded on kitemark to signify strength of indicator relative to the dimension, with following key:

Red Insufficient
Green Sufficient
White Not Yet Assessed

The centre of the indicator is colour coded as follows:

Red / Green As assessed by Executive Director
White Awaiting assessment by Executive Director

If segment 2 of the Kitemark is Blank this indicates that a formal audit of this indicator has not yet taken place
