Report Title	Integrated Quality & Performance Report – September 2019/20		
Sponsoring Executive	Dave Baker, Director of Partnerships and Innovation		
Report Author	Yasmina Gainer, Head of Performance and Costing		
Meeting	Public Trust Board	Date	7th November 2019

1. Suggested discussion points *[two or three issues you consider the Trust Board should focus on]*

The Trust did not achieve all constitutional standards in month. Four hour waits and diagnostic breaches were beyond tolerance. The latter will rapidly return to compliance. The former is covered elsewhere in the Board's agenda.

The report summarises persistent reds and specifies which have agreed plans being monitored via PMC. It is these which should be the focus of Board discussion. The P&I team are supporting work on late cancelled operations.

Infection control has been a focus of work in month with the NHSM inspection moving us to amber status. Continued focus on MRSA screening is required. SIs and mortality are covered elsewhere on the Board's agenda. The material deterioration in stroke admission venue was the focus of Q&S discussions.

As previously advised we are working to link our internal reporting to the emerging Oversight Framework from NHSE/I. Next month we will also have sight of the RPIR and be clear thereby the cross-cover with CQC monitoring. Finally we are looking for 2020/21 to both incorporate key pillar plan indicators and to separate lead/lag indicators more clearly. **A revised At A Glance Report will be issued from January.**

1. Alignment to 2020 Vision *[indicate with an 'X' which Plan this paper supports]*

Safety Plan	X	Public Health Plan	X	People Plan & Education Plan	X
Quality Plan	X	Research and Development		Estates Plan

2. Previous consideration *[where has this paper been previously discussed?]*

OMC, PMC, CLE, Q&S

3. Recommendation(s)

The Board is asked to:

a.	Acknowledge the context of the month in terms of landing Unity and reporting through different systems;
b.	Note the September 2019 performance;
c.	Note the persistent red performance

4. Impact *[indicate with an 'X' which governance initiatives this matter relates to and where shown elaborate]*

SANDWELL AND WEST BIRMINGHAM HOSPITALS NHS TRUST

Report to Trust Board: November 2019

Integrated Quality and Performance Report Sept2019

1. Data impact from Unity Implementation

- September data is a mixture of data collected from CapMan (post 21 September) and PAS (pre 21 September).
- Unity implementation has also identified a new series of data quality issues which are being worked through.

2. New Exceptions in September month

2.1 This section focuses on in month variations to targets, unexpected drops or improvement in performance:

- 2x >12 hour Trolley Waits have been reported for September, just after Go Live
- 33 West Midlands Ambulance Service (WMAS) handovers over 60 minutes
- Diagnostic DM01 performance has failed to recover in September mainly due to CT Cardiac tests, but recovery is projected for October
- Whilst the September month cancer 62 day standard has failed to deliver the 85% target (at 84.3%), the standard has delivered the overall quarter2 performance. All other indicators have met their performance standards
- Angioplasty (Door to Balloon time in 90 minutes and call to balloon time in 150 minutes) are both below target (80%) in the month, reporting at 78% and 66% respectively; both are routinely delivering and root cause analysis points to Unity implementation impact
- 16x MSA breaches in September, all were authorised
- The 12 month Hospitalised Standard Mortality Rate (HSMR) which reports to May 2019 drops by 10 from 115 to 105 (April 2019). In comparison to May 2018 the reduction has been by 22 from 127 to 105.

2.2 Live Bed Moves reporting information was requested from Board in October for November. This has not been possible due to Data Quality Issues. There is a more detailed explanation below. This means that current IQPR reported figures are still based on PAS reports.

3. IQPR Persistent Reds

3.1 Some performance slippage against set improvement trajectories :

- Emergency Care delivery is at 74.08% in September below the internal target trajectory of 85%
- Late cancellations performance worsened significantly to 57 cancellations on the day, above the internal target of 20 and failing national target of 0.8%. 32 (56%)

cancellations were classified as avoidable hence further scope for improvement is possible.

- Patients admitted to Stroke ward within 4 hours is at 47.4% for September
- Neutropenic sepsis drop in performance to 86% in month clearly driven by the last two weeks performance being impacted by Unity and resulting in 6 patients being treated in given time framework.
- Meanwhile, open long term sickness cases achieves target for the first time at 131 v 140 and Neck of Femur to surgery within 36 hours achieves target for the second consecutive month.

3.2 We have recovery plans and trajectories now for 16/18 indicators. The 2 outstanding items are unplanned A&E Re-Attendance and Patient Bed Moves (Awaiting accurate baseline)

- 8 indicators are off their planned trajectory for September indicated with X in the table below).

Exec Lead	18	Indicator <i>Note: Some are grouped (two or more indicators)</i>	Standard Expected	Plan in Place	Recovery Expected	Sept Actual Perf	Tracking Planned Trajectory
Dr DC	1	• Mortality Reviews within 42days	90%	✓	Dec-19	85%	✓

Recommendations

The Board is asked to:

- a) Acknowledge the context of the month in terms of landing Unity and reporting through different systems;
- b) Note the September 2019 performance;
- c) Note the persistent red performance

Group Performance	

SEPTEMBER 2019				
Infection Control	Harm Free Care	Obstetrics	Mortality & Readmissions	Stroke Care & Cardiology
CDiff - compliant • The Cdiff objective for S&WB Trust for 2019-20 has increased from 29 to 41 full year. However, the case definitions for attribution has changed too, and therefore the Trust is expected to see an increase in the number of Trust apportioned / reportable cases. • 2x C. Diff case reported during the month of September taking year to date cases to 8 vs target of 21 so the trust is continuing to perform very well	Safety thermometer - not compliant • The Trust continuous, since June 2018, to report Patient Safety Thermometer based on only 'new harm'; as at September 2019 we report performance at 94.8% just below the 95% target so recovering well from last month's unusual dip.	C-section rate -compliant • The overall Caesarean Section rate for September in month is 27.6% mainly driven by an increase in non-elective C-Sections; year to date at 27.4% above the 25% target; but considered still in line with other trusts regionally • Elective rates are slightly higher than usual trend of 9% and at 10.7% in September (historical long term avg trend of 9% so trending reasonably well against this) and • Non-elective rates are 16.8% in September against a long term average trend of ~17.3% hence a static level of non-elective C Sections. • Performance considered at Q&S & Board and to be kept in view.	Mortality - alerts against Trust HSMR & RAMI • The Trust overall RAMI for most recent 12-mth cumulative period is 105 (available data is as at June19) • RAMI for weekday and weekend each at 105 and 103 respectively, some positive movement on the weekend rate reducing steadily • SHMI measure which includes deaths 30-days after hospital discharge is at 105 for the month of Dec18 (latest available data) • HSMR Mortality indicator an outlier at 105, reducing significantly, but still outside statistical confidence limits. Trust Board continues to monitor routinely.	Patient Stay on Stroke Ward - compliant • In September 88.2% of patients spent more than 90% of their time on a stroke ward, which is below the 90% operational threshold ; recent improvement focus has clearly recovered the performance to the required standard.
	Falls - compliant to target rate per 1,000 Occupied Bed Days • x78 falls reported in September with zero falls resulting in serious harm (defined as death or severe harm); • September Falls per 1,000 bed days rate is at 3.8 against the trust target of 5.0. • Falls remain subject to ongoing CNO scrutiny and routine tracking of the Safety Plan on falls reduction; falls monitoring is an integral part of 'ward dashboards' including now newly set ward specific targets to match the trust desired rate.			Adjusted perinatal mortality rate (per 1,000 births) for September the rate is at 2.14 vs. threshold level of 8; year to date the rate is in line with target at 5.1 vs 8 target • The indicator represents an in-month position and which, together with the small numbers involved provides for sometimes large variations hence this is not considered as an issue by the service. The level of births in September is at 447; slightly compared to the same period of last year (452) - we observe a general downward trend in births in the Trust and the service is reviewing this position in comparison to other providers.
MRSA - compliant • No MRSA Bacteraemia was reported in September; 1x case year to date. • Annual target 19/20 set at zero.	Pressure Ulcers • x60 total PUs have been reported in September showing a reduced position to last month • 33/60 PUs reported in the acute setting resulting in a PU /1000 bed days rate of 1.54 • 27/60 cases of the total PUs are reported within the community setting • CNO monitors as part of Safety Plan and ward nursing dashboards	1x Maternal death has been reported in September • Still birth rate (per 1000 babies) at 2.24 in September • Zero Neonatal death rate (per 1000 babies) in September	Mortality Reviews within 42 Days - not compliant, but consistently improving • Mortality review rate as at July at 85% and whilst below trust target of 90% it has shown improvement since the introduction of medical examiners in the review process; • Revised Learning from Deaths arrangements are being implemented, which will provide for routine 100% deaths review, coupled with implementation of a Medical Examiner screening process this will streamline the 1st and 2st stage mortality reviews.	Angioplasty - non-compliant • September Primary Angioplasty Door to balloon time (<90 minutes) was at 77.8% vs target of 80% . • Primary Angioplasty Call to balloon time (<150 minutes) at 66.7% against a target of 80%. • Both indicators consistently meet performance targets, hence this is an unusual occurrence.
MRSA Screening - non compliant • Non-elective patients screening at 67% against 85% target • Elective patients screening at 80.6% vs target of 85% • Both indicators are expected to deliver immediate milestone target of 85% increasing to 95% by the year end and a review is taking place to achieve this.	WHO Safer Surgery - non fully reported; data quality review ongoing • Currently the indicators are reflecting performance only in main theatres rather than across the organisation • due to this the indicators are subject to a deep dive data quality review currently ongoing led by Clinical Effectiveness team and P&I Nil Never Event was reported in September, 3x year to date reported events • 12x serious incidents reported in September which is subject to review to ensure there are no errors in reporting			
MSSA - compliant • MSSA Bacteraemia (expressed per 100,000 bed days) showing a rate of 4.6 year to date compared to target of 9.4	VTE Assessments - compliant 96.6% in September at Trust level • Compliance at	Breastfeeding - compliant • September month count is at 87.5% achieving the 74% target; over-achieving target routinely in recent months		RACP - compliant RACP performance for September continuous at 100% exceeding the 98% target consistently TIA Treatments - not reported for September • TIA (High Risk) Treatment <24 Hours from receipt of referral delivery as at August at 75% against the target of 70%. • TIA (Low Risk) Treatment <7 days from receipt of referral delivery at August is 90.9% against a target of 75%. • Both indicators are consistently delivering the required standard and it is unusual for these indicators not to hit the required standards
Cancer Care	Patient Experience - MSA & Complaints	Patient Experience - Cancelled Operations	Emergency Care	Referral To Treatment
Cancer standards - compliant • Reporting always one month in arrears hence IQPR latest reported period is August 2019. • In August all cancer standards have been met other than the 62 days at 84.3% vs 85% target • Un-validated position for September is that the 62 day standard has been met and the trust will therefore achieve full Q2 position against this standard and other cancer standards.	MSA • The standard is zero breaches in any given month • In September we are reporting 16 validated and COO authorised breaches Friends & Family - not compliant • IP combined (DC & Elective) response rates in September at 23% not achieving revised target of 25%, although Elective response rates is above 25%, the DC rate is below 10%. • The IP 'likely to recommend' rate falling to 89% against target of 95% • Outpatient / maternity response and score rates are scheduled for improvement. • Revised national FFT guidance have been issued and corporate nursing team are reviewing the impact and revision to reporting in the trust.	Cancelled Ops - non compliant • 57 sitrep declared late (on day) cancellations were reported in September; the highest levels this year (59 cases in March 2018) and well above the local target of 20 per month • 32 (56%) were avoidable indicating a scope for further improvement • Our cancellations are at 1.5% cancellations against elective activity compared to a national target of 0.8%.	EC 4hr standard - not compliant • The Trust's performance against the 4-hour EC wait target in September was at 74.086% % against the internal improvement plan 85%for the month. • 4,764 3,252 breaches were incurred in September (3,252 August), against the September total patient attendances of 17,973 (17,657 August) hence indicating higher level of breaches compared to the similar level of attendances when looking at August	RTT - compliant • Trust level delivery at 92% for September compliant with the 92% incomplete standard • 4x specialities remain below the 92% standard in September (Cardiology, Gastro, Oral and Ophthalmology) • The patient wait list is at 39,634 in September with 3,168 patients being on the backlog (>18weeks waiting time) showing an increased waiting list for a period of time indicating potential, elongated patient treatment / management time as we do not see referrals contribution to the same extent in waiting list growth.
Patient Waiting times • x10.0 patients waited longer than the 62 days at the end of August • 4.5 patients waited more than 104 days at the end of August for treatment • The longest individual patient waiting time for treatment, as at the end of July, was 196 days • In April the Trust has introduced shadow monitoring of the new 28 Day Cancer standard (faster 28 day diagnosis); cancer services confirming that there is much more work to be done to ensure the recording of 'patient told' information is in place. The new standard takes effect in April 2020 and IQPR will be introducing the shadow reporting soon.			28 Day & Urgent Breaches - compliant • There were no breaches of the 28 days guarantee • There were no urgent cancellations	
Neutropenic sepsis - not compliant • The Trust operates a 100% standard against this indicator. Only clinically driven breaches are tolerated. • In September, 37/43 patients (86%) of patients have been treated within the hour, 6 patients (14%) of patients failed to receive treatment within prescribed period (within 1hr). the performance has been impacted directly by Unity implementation in the last week as previous September weeks have been close to 100%. • Performance reporting continuous to monitor daily, weekly and monthly tabled at the OMC; all breaches are routinely reviewed in dedicated, quarterly meetings.	Complaints • The number of complaints received for the month of September is 72 with 2.8 formal complaints per 1000 bed days demonstrating a increased level of complaints in month • 100% of complaints have been acknowledged within agreed timescales • 100% in-month responses have been responded within agreed target time;		21+LOS - not tracking against trajectory • There were 152 patients in the hospital at September month end whose LOS was at 21 days+ • Their combined 21+ LOS equates to 111 beds equivalent; up to August the trust was tracking well against the NHSI trajectory working towards end of March 2020 target of 82 beds occupied by this patient cohort. The Chief Nurse has increased oversight for the coming weeks.	52 Week Breaches - compliant breaches have been reported in September • no
Inter-Provider Transfers - not compliant • 74% of tertiary referrals were met within 38 days requirement in July.			Fractured NOF - compliant • Fractured Neck of Femur Best Practice Tariff (surgery within 36 hours) is reporting at 85% in September compared to the 85% target, showing recovery to standard for the last two months.	
Data Completeness • The Trust's internal assessment of the completion of valid NHS Number Field within inpatient data sets compliant in month with 99.1% meeting the operational threshold of 99% ; . OP and A&E datasets deliver to target. • ED required to improve patient registration performance as this has a direct effect on emergency admissions. Patients who have come through Mailing Health will be validated via the Data Quality Department. • Ethnicity coding is performing for Inpatients at 91% against 90% target, but under-delivering for Outpatients. This is attributed to the capture of data in the Kiosks and revision to capture fields is being considered.	Workforce	Local Quality Requirements 19/20	Indicator Performance : Persistent Red Focus	
	Open Referrals • Open Referrals, referring to patients in the system without a future waiting list activity, stand at c46,000 as at September showing a decrease since last month again being the result of a focussed effort to validate and remove open referrals from the system using a combination of actions driven by clinical groups and auto-closures;	PDR & Medical Appraisals • PDR scores were due at the end of June organisation wide, but early indicators are that the target rate of 95% will not have been met as the scores have not been entered promptly as per the June deadline. A performance rate has been requested from Training & Development • Medical Appraisals are reporting at 96.3% vs 90% standard. Sickness Rate - not compliant • Total Trust level in-month sickness rate in month for September is at 4.62% and a cumulative rate of 4.83% (4.45% last month). • Ward sickness reports at 6.7% in September, with some wards reporting at the top end above a 15% sickness rate- subject to a focussed sickness reduction programme. Nursing Turnover & Vacancy rate (Qualified Nursing only) • The nursing turnover rate is at 11.5% vs the 10% internal target due to deliver in Jun21, tracking trajectory • The nursing vacancy rate is at a high 14.3% in September below the trust target of 11% Mandatory Training (Staff at 100% Compliance) - not compliant • At the end of September increased to last month at 72% measuring staff whose MT is at 100% ; internal target to progress performance to 85% in December and 95% by end of March 2020 • Health & Safety related training dropping below standard of 95% and reporting in September at 86.2%	Local Quality Requirements (LQRs) 2019/20 are monitored by CCG and the Trust is fineable for any breaches in accordance to contract. • LQRs re reported via the SQPR (Service Quality Performance Report; exceptions are summarised in the IQPR on the relevant tab (page 15). • As at September we continue to see some continuing under-performance against a few indicators: • Morning discharges at 17% vs target of 35%; • Community falls assessments reporting at 97% in August, close to, but not meeting the standard of 100%.	<div><ul style="list-style-type: none">The Trust is progressing 18 indicators on the 'persistent red focus'; details can be found on the persistent red tabOversight and assurance is provided through OMC and PMC routinelyProgress is good for most indicators, however,7 indicators have missed their September trajectories2x more indicators are missing improvement trajectories</div>

	1	FFT Response Target (IP, OP, Maternity and A&E)	25%	✓	TBC	23% / 6%	No Traj

Notes:

- September data is 'mixed' with the implementation of Unity from 21st September. Effectively from 21st-21st Sept data was PAS supplied, from 21st onwards it was Capman driven PAS. Therefore this may have impacted some performance in month, as not all data feeds are working fully and robustly.

Tabled Information

- TBC means that we are yet to work up detailed plans & corresponding trajectories
- n/a in table = data not available at this stage, we have more missing data in September than other months due to Unity implementation in the main.

Graphs

- the graphs are updated for latest available information, however where incomplete this is due to :
 - absence of 'improvement lines' means we are lacking stepped trajectory plans
 - mortality is two months behind due to reviews being 42 days behind the current month;
 - stroke is behind as it updates based on data signed off on WD21 each month, which is post clinical validations - we will change graphs to reflect the WDS position in the next IQPR

Sep 2019	100.0	100.0	

The stroke indicators in the IPR are based on 'patient arrivals' not 'patient discharged' as this monitors pathway performance rather than actual outcomes which may / may not change on discharge. National SSNAP is based on 'patient discharge' which is more appropriate for outcomes based reporting. Both are valid but designed for slightly different purposes, however they will align overall, especially over a longer period of time (eg annually)

Each outer segment of indicator is colour coded on kitemark to signify strength of indicator relative to the dimension, with following key:

Red Insufficient

Green Sufficient

White Not Yet Assessed

The centre of the indicator is colour coded as follows:

Red / Green As assessed by Executive Director

White Awaiting assessment by Executive Director

If segment 2 of the Kitemark is Blank this indicates that a formal audit of this indicator has not yet taken place
