

Trust Board Update re Imaging Performance

16/06/20

From the start of April 2020, Imaging performance has been as follows:

	In patients (Target 90%)	GP Urgent (Target 90%)	All other Imaging (Target 95%)
06/04/2020	93%	74%	99%
13/04/2020	90%	84%	98%
20/04/2020	91%	85%	98%
27/04/2020	88%	87%	99%
04/05/2020	88%	88%	100%
11/05/2020	87%	90%	100%
18/05/2020	90%	93%	97%
25/05/2020	86%	91%	96%
01/06/2020	85%	81%	94%
08/06/2020	87%	78%	94%

Relatively consistent performance against the KPIs for all imaging and IP.

Focus on the IP KPI remains a high priority for the team. With the repatriation of nursing staff and the release of the Consultant Radiologists from supporting the on-call service, it is anticipated that an improvements in IR, MRI and US should be realised.

Performance against the GP urgent KPI has seen the most dramatic fluctuations which is a direct result of the additional workload experienced by the booking teams in dealing with anxious patients, pre-screening and reluctance of individuals to attend for their appointment. In addition the booking team are now contacting all patients who require a plain film x-ray. Previously this was a walk-in service however during Covid19 this is now offered by appointment only.
