

## Trust Board Update re Imaging Performance

28/08/2020

Throughout July and August 2020 performance has been as follows:

	In patients (Target 90%)	GP Urgent (Target 90%)	All other Imaging (Target 95%)
06/07/2020	85%	73%	92%
13/07/2020	84%	69%	90%
20/07/2020	85%	66%	87%
27/07/2020	85%	65%	83%
03/08/2020	83%	56%	82%
10/08/2020	85%	55%	86%
17/08/2020	84%	58%	86%

The impact of Covid19 and the intense recovery program continues to impact on KPI performance.

IP delivery continues to hover around 85%.

Having assigned ownership of the targets to individual modality leads there has been an improvement noted with a number of modalities. Ultrasound however remains an area of concern, specifically at the Sandwell site.

To address this a small project group has been established to review all processes within Ultrasound at Sandwell with an aim to afford efficiency gains.

As the backlog is addressed and the longest waiting patients continue to be dated, the GP urgent and all Imaging KPI will remain below target. Whilst this dip in performance was anticipated, the team continue to review and amend processes re allocation, booking templates, rota development etc with an ambition of continuous improvement.
