

Trust Board Update re Imaging Performance

20/10/20

August, September and October performance to date:

	In patients (Target 90%)	GP Urgent (Target 90%)	All other Imaging (Target 95%)
03/08/2020	83%	56%	81%
10/08/2020	85%	55%	85%
17/08/2020	84%	52%	84%
24/08/2020	85%	53%	83%
31/08/2020	83%	51%	84%
07/09/2020	83%	54%	81%
14/09/2020	84%	55%	84%
21/09/2020	81%	57%	85%
28/09/2020	81%	55%	88%
05/10/2020	80%	55%	86%

Whilst all three KPIs remain below target, it is reassuring to see that performance is consistent given all the constraints and challenges faced during the Covid19 pandemic.

Dealing with issues such as Covid19 streaming pathways, staff redeployment, process changes, shielding/isolating staff and intense recovery/restoration regimes, to deliver a level performance throughout is testing.

The Imaging team, whilst mindful of the every changing Covid19 environment, are keen that this consistent performance does not turn into complacency and are reviewing opportunities to re-energise the team and improve performance.
