Operational Performance at a Glance: October 2020		
Highlights : <ul style="list-style-type: none"> • Recovery: Elective activity recovery continued during October, but cancellations which started on 1st November will compromise plans. Attendance numbers in A&E have been rising steadily to last year's levels, but have been falling over the last two months, which is in line with experience in the CV19 first round; Diagnostics appointments have continued and are still picking up towards full recovery albeit still getting to grips with patients not attending their appointments or not-responding. The recovery of elective activity plans had been set for the remaining part of the calendar year and reflects the 'NHSI Phase 3' guidance in respect of speed of recovery and prioritisation; this includes the guidance criteria in respect of prioritised patients, and diagnostics. As at October, the Trust delivered the Phase 3 and Clinical Groups own targets, but has not achieved its pre-COVID contractual targets (internal Production Plan) at this stage (12.5% behind). From 1st November we have begun to make a large number of elective patient cancellations in order to release staff to support the pandemic, which clearly will impact the recovery trajectory at this stage. Clearly, future recovery depends on CV19 course and its intensity; there is likely to be a Phase 4 guidance coming up. • A&E performance dropped again slightly in October delivering 79.1% of care within the 4hr target. ED performance is heavily impacted by ability to manage patient flow down-stream to wards; currently and additionally to CV19 pressures, in an effort to alleviate them, ED intensively focussing on implementing the NHS111 national initiative (patients calling NHS 111 before attending ED or other, appropriate settings which aims to alleviate ED crowding (999 calls continue as before for seriously ill and injured) - the initiative goes live on 20th November 2020 • RTT & DM01 performance is fully dependant on recovery plans being achieved, patients attending safely diagnostics appointments, and so it is likely that we can expect an overall longer period before we are able to recover to the 92% standard; however some services should be able to achieve this faster than others. RTT plans are being finalised following group changes. GP referrals are increasing steadily, so essential that we are progressing patients through the waiting list now as more referrals are coming through. • Cancer performance is below standards in September (latest reported position) and below previous month's performance; and we see the unusual drop in 2 week waits standard a second month below its target, which previously has been met continually, clearly showing pressures at this time. • Other items to highlight are pressures in increasing stillbirth rates increasing again in October and trolley waits in A&E above 12 hrs including ambulance handover delays. 		
A&E Performance <ul style="list-style-type: none"> • Performance dipped to 79.1% in October and continues to fall in November; attendance numbers, whilst increasing steadily right up to August are starting to fall again and are in October at 13,883 so we are seeing again, as in the previous COVID round, an impact of patients staying away from attending ED. • Despite lower attendances we continue to see high levels of breaches, in October we reported 2,895 patients breaching the 4 hr target including 3x 12hr Trolley Breaches and delayed ambulance handovers; breaches are proportionally higher at Sandwell A&E ; main reasons for the breaches explained as cubicle capacity for the 'cold stream' patients and lack of patient flow into the ward bed-base. • There are 10 patient flow projects currently set up. Some of which have short-term impact and others that will focus on the longer term. A separate patient flow operational group is to be set up in November to monitor, tweak and develop the patient flow projects as to optimise patient flow throughout the organisation. This includes the latest NHSE guidance on discharges aimed at doctors. • Other Same Day Emergency Care (SDEC) initiatives are also being optimised, including the fore-mentioned NHS 111 initiative with an aim to secure ED for the most ill and injured patients. 		
RESPONSIVENESS	Referral to Treatment in 18 weeks (RTT Incomplete)	<ul style="list-style-type: none"> • RTT performance is at 72% in October against the national 92% target; the order of treating patients follows the prescribed clinical prioritisation of patients ; recovery plans put the Trust on trajectory to deliver 92% by end of March 2021, but clearly this was before the impact of the CV19 second round impact was known and hence this delivery is going to be impacted by the elective cancellations and plans set back. The October patient backlog is just below 1/3 of the total waiting list which has been a ratio improving steadily; the number of 52 week wait breaches has as anticipated increased and we report 482 patient breaches on the incomplete pathway for October. All efforts are made to manage the patients that are waiting for this amount of time.
	Diagnostics Waits (% of patients waiting >6 weeks) <ul style="list-style-type: none"> • October DM01 performance improving further to 76%, but below planned trajectory for this month and hence 99% achievement of the full standard by end November seems unlikely. • We have therefore still got a high level of patients (24%) on the diagnostics pathways waiting above the 6 week target and many sitting at 13+ weeks waiting time which has been caused by patients being unwilling to attend appointment in fear of CV19. 	<ul style="list-style-type: none"> • The specific Imaging diagnostic patient volumes (CT, MRI, X rays and Ultrasounds) increased in October again to 27,499 (26,957 in September) and getting closer to pre-COVID levels, which were at an average of c30,000-32,000 per month. Whilst the KPIs below are showing improvements, it needs to be noted that they are achieved by using increased outsourcing capacity, which has high costs associated to it. • Against these October volumes, and the top three Board KPIs performance was: Inpatient total turnaround (TAT) time within 24hrs has dipped again to 80% against the 90% trust target (previous high was 91%); Urgent GP tests within 5 days improved slightly to 58% vs 90% target, but on review most of the patients fitted in the non-responder/non-attenders category. Overall Imaging achieved to turn around 85% of 'all Imaging work' under the 4 weeks (target of 95% and previous highs of 94%) • Seeing now pressure in the booking of patients and patients who are too anxious to attend causing performance to fall below expected and previously achieved levels. Imaging are continuing to keep all patients who do not attend on their waiting list, whilst this is in place it will be challenging to progress recovery of the KPI or the DM01 as the impact of DNAs is significant. We continue to follow National policy by not removing patients from the waiting list who DNA or who do not want to come in at this time. • A much higher level of imaging reporting has been observed in October (c40%) as more plain film reporting goes to the two partner suppliers. This should be reviewed as it will impact costs significantly.
	Cancer Performance	<ul style="list-style-type: none"> • Reporting the September position (latest available reporting period), the Trust, has met some access cancer standards, but continues to fail and attempt to recover the 31-day and 62-day standard; however, additionally in September as in August we have failed to deliver the 2WW at Trust level against the national target which is the very first time within SWBH. Overall 90.1% were seen within the 2 WW target against the 93% target. Four areas were under target colorectal (92.9%), Urology (88%), Dermatology (83.8%) and Upper GI (67%). Recovery towards standards is showing an improving position and we continues to work towards March 2021 for full recovery, but with challenges now. Failed standards: 2WW at 90% vs 93% target, 31-Day at 95% vs 96% target and 62 Day 74% vs 85% target. • Neutropenic sepsis delivery drops to 80% in October with 3/15 breaches; smaller number of patients observed; avg door to treatment time is 44mins so much better than the 1 hr target. Breaching patients breached by only several minutes above the hour (range between 4, 8 and 11 minutes at the highest end)

Operational Performance at a Glance: October 2020		
	Cancellations	<ul style="list-style-type: none"> October cancellations have not been signed off fully by all services, in the IQPR we are reporting as seen in the data; high level of on the day cancellations of 40 have been reported which gives us a rate against elective patients of 1.5% (target 0.8%); additionally we can see 1x urgent cancellation and 4x 28 day breaches. These may be removable if the service validates fully.
SAFE	Infection Control	<ul style="list-style-type: none"> Infection Control metrics continue to report good performance; we reported 1x CDIFF case in October (including community) and 11 cases on a year to date basis against the year to date target of 22. MRSA screening rates non-electively delivering 92% in October and are very close against the target 95%. Elective patients MRSA screening rates are being revised to match the new Trust Policy ratified earlier this month. The changes to reporting are yet to be reflected and are likely to show an improved position as we extend the period in which a MRSA screen test is valid for in the case of elective patients. the New Policy has been signed off appropriately by all appropriate stakeholders.
	Harm Free Care	<ul style="list-style-type: none"> The Trust falls rate per 1,000 bed days in October has reduced to 3.76 (last month 4.66) and well below the Trust target of 5; we report a lower number in falls of 74 actual falls in October against which there were no falls causing serious harm. The Trust Falls Lead Nurse looked at a comparison of number of falls during the covid period among some of the regional Trusts; this showed that SWB is below the average for the eight Trusts in the sample. Some Trust reported higher and lower than normal incidences. As a group they looked at the data and drew out common themes experienced during the covid surge in order to learn and prepare for the future. This is a really positive position for the Trust.
		<ul style="list-style-type: none"> Pressure Ulcers (Hospital or DN Caseload Acquired PUs) in October are steady to previous trends and showing low run rates; the overall Trust reports 54PUs (49 last month). There were no Grade 4 PUs reported. The Trust Tissue Viability Nurse (TVN) met with the West Midlands TVS leads, and all saw a reduction in hospital acquired cases. There was an increase in 'device related damage' in all the Critical Care areas, related to patients being prone for 12 hours at a time. Nationally no solution has been found as yet, the breathing tube has to be there and the damage caused is outweighed by the risk of moving the patients. NHSE/I are trying to gather some incidence data around device related damage. VTE assessment performance at 95.3% meeting the 95% target at Trust level; however missing the target in Surgical and Women's & Children's Group level Sepsis screening of eligible patients at 97% in October of which 23% of screened patients being sepsis positive; 88% of the sepsis positive patients were treated, of which 80% were treated within the prescribed 1hr, which still shows room for improvement. Whilst Sepsis performance is still just below expected standards, we are seeing significant improvements based on the continuing improvement plan put in place by the Medical Director's team.; Groups are supporting and monitoring ward and ED sepsis performance routinely via available reporting and non-compliance drill down to patient level functionality.

Operational Performance at a Glance: October 2020		
	Obstetrics	<ul style="list-style-type: none"> The overall Caesarean Section rate for October has reduced to last month when we noticed an increase and reports at 27.9% in month, against trust target of 25%; year to date just below 30%. This is split between : <ul style="list-style-type: none"> Elective C-Section rates slightly higher than average trend and at 14% in September, but reducing to 8% in October Non-elective C-Section rates were on average 17% during the full year, and in October at a high 20% In October, after a spell of lower still-birth rates in recent month, this has again increased to 8.75 rate per 1,000 babies . Neo-natal death rate in October again at zero, following an elevated few previous months A full service review report has been submitted to the Quality & Safety Committee during the last couple of months reporting on the elevated still birth and neonatal rate position. <ul style="list-style-type: none"> Post Partum Haemorrhage (>2000ml) rate is 8 in October, double the target rate of 4
CARING	Patient Experience (FFT), Mixed Sex Accommodation (MSA)	<ul style="list-style-type: none"> MSA has not been reported for a few months running . A data cleanse in September combined with a visit by the Chief Nurse to the Assessment Units suggest that this is where our breaches are. A decision is required as to when we begin to address this issue in the context of Covid-19 pressures and capacity Flu vaccination reporting resumes again for the winter season in October when vaccinations started and the Trust plans to have vaccinated 80% of the front-line staff by end of December. As at October 46% of front line staff have been vaccinated.
EFFECTIVE	Mortality, Readmissions	<ul style="list-style-type: none"> Readmissions rates (30 days after discharge) have gone up again in October to 8.7%; the Groups are reviewing their readmissions reasons to assure themselves that these are as expected. Quality Plan is actively reviewing and leading readmissions focus. HSMR reporting at 136 above the tolerance levels as at the end of June (latest available reporting period and also during COVID), showing an elevated position against the weekend mortality rate which is 150and weekday at 132. This position makes the Trust HSMR position a significant outlier compared against the national picture. As reported last month, an initial review concludes that some of the coding included COVID related deaths, which should have been excluded; the errors are multi-factorial e.g. delayed pathology tests after coding has taken place and other similar issues; learning from deaths facilitator and coding team will be jointly looking at corrections to ensure national guidance is appropriately applied (will take some time). The Learning from Deaths Facilitator will be producing a detailed review paper, which will summarise findings and learning. In the interim, however, looking therefore at deaths levels on a 'real' basis compared to same period last year, we can see April and May excess deaths, as expected from COVID, however more recent months are showing a reduction to prior year same period. This provides some reassurance that the outlier position is a coding related resulting in an increased HSMR rate. Coding team will be working with the Learning Deaths Facilitator to appropriately correct coding following the detailed review outcome. Mortality review performance picking up to 85% which is lower than trust target of 90% however, reasonable against peers which is around 80% pre-COVID levels.
	Stroke & Cardiology	<ul style="list-style-type: none"> Stroke performance good against most indicators, but dropping again in a few places in October with pressures; admission to the stroke ward within 4 hours dipped significantly to 65% in the month below the 80% target; patients have stayed less than 90% on the stroke ward and thrombolysis below the target (RCAs in progress); it is worth noting that this service does achieve good SSNAP (Sentinel Stroke National Audit Portal) ratings. Cardiology performance also reporting good performance across all indicators
	Patient Flow	<ul style="list-style-type: none"> 21+ LOS patients (long stay patients) count at the end of September at 77 patients which represents 15% of inpatients and shows a large increase in this patient cohort (this measures patients within the acute setting; from 1 April 2020 we started reporting just the acute patients in line with current NHSI guidance and to align with our SitRep). This represented c15% or our bed base occupied by this long stay patient cohort and is in line with other providers. Neck of Femur performance recovers from to 80% in October against the 85% target. This indicator displays large fluctuations in performance.
WELL LED	Workforce	<ul style="list-style-type: none"> Sickness rate in month has risen to 5.4% (last month 5.1%) resulting in a cumulative rate of 5.6% against the trust target of 4% (target for wards at 3%). Ward sickness rate specifically is at 7.2% increasing again to recent months. PDR rate for the Trust has been recorded at 91% <ul style="list-style-type: none"> Mandatory Training (where staff are at 100% of their MT) is at 84% against the 95% aim.
USE OF RESOURCES	Use of Resources	<ul style="list-style-type: none"> The Use of Resources assessment is part of the combined CQC inspection alongside the Trust's rating for Quality and the wider Single Oversight Framework. The review is designed to provide an assessment and improve understanding of how effectively and efficiently Trusts are using their resources to provide high quality and sustainable care for patients. The CQC assessment includes an analysis of Trust performance against a selection of CQC initial metrics, using local intelligence, and other evidence. The last Trust rating for Use of Resources was 'Requires Improvement' and the Trust is aiming to achieve a 'Good' rating in the next CQC inspection and performance will continue to be monitored with this aspiration. <ul style="list-style-type: none"> Using a crude method to predict the CQC rating based on an inspection right now, which is taking factors other than what is highlighted in use of resources e.g. RTT, A&E etc, the Trust would mostly likely score 'requires improvement' again. Considering the COVID impact on most of these indicators this is not a worsening from where we were. We have populated 7/16 of the Use of Resources metrics. No work is currently under way to increase this proportion and start deep-diving in presented opportunities, however, this is significantly slowed down due to CV19.
TRUST EMPHASIS	Persistent Reds	To follow

Recovery & Restoration SWB :	Aug-20	Sep-20	Oct-20	Nov-20	Dec-20	Jan-21	Feb-21	Mar-21
Activity Delivery & RTT								
This measures activity % age activity achievement compared to the three different Trust Trajectories set :	Phase 3 : 70% IP / 90% OP	Phase 3 : 80% IP / 80% OP	Phase 3 : 90% IP / 100% OP	Phase 3 : 90% IP / 100% OP	Phase 3 : 90% IP / 100% OP	Phase 3 : 100% IP / 100% OP	Phase 3 : 100% IP / 100% OP	Phase 3 : 100% IP / 100% OP
% Of Phase 3 activity volumes	88.5%	102.2%	101.9%					
% of Production Plan volumes	77.5%	85.1%	85.5%					
% of Clinical Group agreed volumes	94.8%	112.2%	98.8%					
RTT Trajectory Targets :	N/A	76.3%	85.0%	88.1%	89.9%	90.4%	91.5%	92.1%
Variance Performance Trajectory to achieve 92% by 31st Mar21	N/A	-8.6%	-12.5%					
Diagnostics (DM01)								
This measures activity % age activity achievement compared to Phase 3 Target which is based on previous year delivery : additionally the ambition to recover to DM01 standard of 99% by Nov21 :	Phase 3 : 90%	Phase 3 : 95%	Phase 3 : 100%	Phase 3 : 100% & to 99% Standard	100%	100%	100%	100%
% of Phase 3 activity volumes MRI (100% by October)	128.6%	121.8%	110.8%					
% of Phase 3 activity volumes CT (100% by October)	104.2%	98.8%	109.4%					
% of Phase 3 letter activity Endoscopy (100% in October)-All Scopes	74.2%	70.3%	106.3%					
DM01 Trajectory	N/A	94.50%	98.20%	99.00%	99.00%	99.00%	99.00%	99.00%
Variation versus planned trajectory to achieve 99% DM01	N/A	-26.7%	-22.2%					
Cancer 62 Day Standard								
Cancer 62 Day standard aims to achieve 85% performance by Mar21 :			1 Month behind					85%
104 day volumes (patient numbers)	3	8						
62 day refer to treat % (distance from 85% standard)	77.4%(-7.6%)	74.2%(-10.8%)						
31 day diagnosis to treatment % (distance from 96% standard)	93.5%(-2.5%)	94.6%(-1.4%)						
Cancer Trajectory-104 day	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Cancer Trajectory-62 day	60%	55.00%	55.00%	80.00%	85.00%	85.00%	85.00%	85.00%
Cancer Trajectory-31 day	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
52 Week Wait Breaches								
Shows volumes that will breach if no intervention (follows the waiting list patient queue to indicate potential breaches) :								Zero 52 WW Breaches
Volumes that will be breaching at 31 March 2021 - Inpatients	3,843	3,016	2427					
Straight line trajectory to zero in March21-Inpatients	3,843	3,294	2,745	2,196	1,647	1,098	549	0
Variation	-	-	278	318				
Volumes that will be breaching at 31 March 2021 - Outpatients	7,460	5,015	3302					
Straight line trajectory to zero in March21-Outpatients	7,460	6,394	5,329	4,263	3,197	2,131	1,066	-0
Clinical Prioritisation								
Numbers of patients who have been prioritised on the inpatient Waiting List and have not been seen within the specified time frame for their categorisation	Zero	Zero	Zero	Zero	Zero	Zero	Zero	Zero
Patient numbers missing - Category 1(Treatment 72 hours)	1	1	0					
Patient numbers missing - Category 2(Treatment within 4 Weeks)	168	120	106					
Patient numbers missing - Category 3(Treatment within 3 months)	629	591	547					
Patient numbers missing - Category 4(Treatment can be deferred for more than 3 months)	0	0	0					
Clinical Prioritisation-Ophthalmology								
Numbers of patients who have been prioritised on the inpatient Waiting List and have not been seen within the specified time frame for their categorisation	Zero	Zero	Zero	Zero	Zero	Zero	Zero	Zero
Patient numbers missing - Category 1(Treatment withn 24 hours)	0	0	0					
Patient numbers missing - Category 2(Treatment within 72 hours)	1	0	1					
Patient numbers missing - Category 3(Treatment within 4 Weeks)	231	225	211					
Patient numbers missing - Category 4(Treatment needed within 3-4 months)	190	162	166					
Safety Checks								
52 week breaches (incomplete breaches)	252	376	482					
Potential/Actual Harm identified (whole numbers)								
Versus 104 day Cancer breaches last month %								
Potential/Actual Harm identified (whole numbers)								
Versus Clinically Prioritised Date**patients missing prioritisation date**	1220	1099	1031					

Note: Retrospective will show performance against plan - Forward months will show planned performance

If segment 2 of the Kitemark is blank this indicates that a formal audit of this indicator has not yet taken place

The stroke indicators in the IPR are based on 'patient arrivals' not 'patient discharged' as this monitors pathway performance rather than actual outcomes which may / may not change on discharge.
National SSNAP is based on 'patient discharge' which is more appropriate for outcomes based reporting.
