

REPORT TITLE:	Mobile coverage business case		
SPONSORING EXECUTIVE:	Martin Sadler, Executive Director of IT & Digital		
REPORT AUTHOR:	Mark Taylor, Head of IT - MMUH		
MEETING:	Trust Board	DATE:	7 th September 2022

1. Suggested discussion points <i>two or three issues you consider the Trust Board should focus on in discussion</i>
<p>The current Midland Metropolitan University Hospital (MMUH) construction design and materials will block mobile phone signals unless boosters are installed throughout the building. Mobile phones with a reliable signal are now essential for staff, patients and visitors to manage patient flow, to communicate and to and to maintain business continuity. Therefore, adequate, and reliable mobile phone coverage across the MMUH site is essential to support operational and clinical activities.</p> <p>The MMUH IT team have identified and would like to procure a solution of distributed antennae to allow signals throughout the building. A full compliant tendering process has been successfully undertaken with a preferred supplier.</p> <p>The value of the 5-year contract requires Trust Board approval.</p> <p>Mobile or cellular coverage across MMUH is not a deliverable under the Balfour Beatty contract.</p>
